

Newcastle University - Excellent Contractors Award Scheme Winners 2011

The winners of Newcastle University's 'Excellent Contractor Award Scheme' were announced at a celebratory lunch presentation on Friday 15 July 2011.

The awards scheme was developed in 2009 to provide contractors with recognition for excellent performance whilst working on University contracts.

Estate Support Service project managers score contractors against a range of established important key performance indicators:

- Health and Safety
- Quality
- Environmental Sustainability

To ensure that companies of varying sizes can compete on an even playing field, contractors are categorised into three bands according to the number of employees they have.

In Estate Support Service we work in partnership with our contractors to provide the best value for money results for the University community.

Our Philosophy

Contractors willing to work and develop with us as partners, whilst maintaining a clear focus on our key performance indicators is **Value for Money**
