If you commonly see patients with allergic conditions and want to develop your clinical skills in this area, then this course is for you.

Course developed by: Newcastle University, Newcastle Hospitals NHS Foundation Trust and the NIHR Newcastle Training School as part of the NIHR Newcastle Biomedical Research Centre in Ageing and Chronic Disease

Professional Module (CPD) STARTS APRIL

Programme Overview
- For professionals working in a health or life sciences field including GPs, medical trainees, hospital consultants, nurses, health visitors and allied health professionals
- Suitable for people working with both children and adults
- Learn online – no campus attendance required
- Entry: MBBS, BDS, BSc or an appropriate professional qualification
- Part-time over 14 weeks
- April 2018 entry: £870
- An interactive format with recorded lectures and videos

Built around topic weeks which include:
- Basic immunology for clinical allergy practice
- Clinical evaluation of the patient, including diagnostic options and management approaches
- Anaphylaxis
- Asthma
- Allergic skin disease, including eczema, urticaria and angioedema
- Drug allergy
- Food allergy (both IgE mediated disease and non-IgE mediated disease)

Optional: combine two further modules to achieve a PGCert in Clinical and Health Sciences with Allergy by self-selecting from a diverse range of over 30 modules to create a bespoke course of study. Modules are available in subjects such as Ageing, Clinical Research, Oncology and Palliative Care and Therapeutics (including drug development).

Assessment Methods:
- Case study review
- Multiple choice questions
- Written exercise
- Problem solving exercises

“I absolutely loved this module and would recommend it to any healthcare professional who is involved with allergy”
- Health Visitor

“The high point of the course was the webinars which brought learners ‘virtually’ together and allowed a fantastic faculty facilitated discussion that was a refreshing way to network and learn”
- Consultant Paediatrician
