Dove Marine Laboratory

Meeting Room and Small Conference Facilities
The School of Marine Science and Technology

The School of Marine Science and Technology at Newcastle University is the largest and broadest-based marine school of its kind in Europe, covering the fields of marine engineering, marine biology, naval architecture, offshore engineering, coastal management and small craft technology, and enjoys a substantial international reputation.

Teaching in the School is informed by internationally recognised and industrially relevant research. This is backed by extensive specialist facilities on the main campus, complemented by the Dove Marine Laboratory located nearby on the coast, and further enhanced by the School’s own sea-going Research Vessel.

All our research groups are actively involved in industrial partnerships, which often take advantage of the interdisciplinary expertise available in the School. These can take the form of consultancy projects, sponsored student and research projects, access to the facilities, or combinations of these tailored to individual requirements.

Dove Marine Laboratory

The Dove Marine Laboratory, opened in 1908, plays a pivotal role in contributing to our understanding of marine biology, ecology, and of human impacts on our oceans.

Marine science is a research area of global importance in the 21st century, with issues such as climate change, ocean acidification, declining fisheries and marine species invasions challenging our expertise and capabilities. Marine science is also furthering biotechnological competence through the development of novel techniques and new drugs.

This is an exciting period in the Dove’s history, as new developments will allow the laboratory to maintain its proud tradition of contributing to UK and internationally renowned research and education.

Our facilities are available for workshops, meetings and small conferences in a unique coastal setting. Please contact us to discuss your requirements.

Blue Room

- Maximum capacity 30
- Wireless Network
- Wall Mounted LCD Screens linked to Audio Visual Equipment
- Presentation Aids, including Flipcharts and Whiteboards
- Overhead Projector
- Catering and tailored office support, eg. photocopying and printing, by prior arrangement

Meeting Rooms

Buchanan Room

- Maximum Capacity 40
- Sea View
- Wireless Network
- Wall Mounted LCD Screens linked to Audio Visual Equipment
- Presentation Aids, including Flipcharts and Whiteboards
- Overhead Projector
- Catering and tailored office support, eg. photocopying and printing, by prior arrangement

Disabled Access – please contact us to discuss your needs.

The Dove Marine Laboratory is located in Cullercoats Harbour

- A few minutes’ walk from Cullercoats Metro Station
- Public car parking nearby

Location

Newcastle University

Established in 1834 the University of Newcastle upon Tyne is one of the oldest civic universities in the country and a member of the prestigious Russell Group, an association of the twenty leading research-intensive universities of the United Kingdom. Today the University is one of the UK’s leading academic institutions with a vibrant student population and a thriving research programme.

Newcastle upon Tyne has a reputation as one of the most lively and cosmopolitan cities in the country and a great city for students. Located in the North East of England the city is within easy reach of the beautiful Northumbrian countryside and coast. Newcastle has first class social, cultural and commercial facilities and is an exciting place to work and study.
