

PROGRAMME SPECIFICATION

1	Awarding Institution	Newcastle University
2	Teaching Institution	Newcastle University
3	Final Award	DAppEdPsy
4	Programme Title	Doctorate in Applied Educational Psychology (Initial Professional Training)
5	UCAS/Programme Code	
6	Programme Accreditation	British Psychological Society
7	QAA Subject Benchmark(s)	N/A
8	FHEQ Level	Doctoral/Level 8
9	Date written/revised	August 2008

10 Programme Aims

1. Prepare Educational Psychologists to support positive changes in the education, development and psychological well being of children and young people; EPs who are able to work across 3 interlinked areas within Children Service Authorities:
 - Educational and Organisational effectiveness;
 - Research and Evaluation;
 - Consultation, training and therapeutic interventions;
 at any one of three levels:
 - i. Child/young person and family;
 - ii. School / Educational / Community setting;
 - iii. Local Authority.
2. To produce graduates who are capable of the creation and interpretation of new knowledge, through original research or other advanced scholarship, of a quality to satisfy peer review, extend the discipline and merit publication;
3. To produce graduates who are able to conduct doctoral level research that develops the knowledge base of the profession and employers;
4. To produce graduates who are equipped, particularly through the use of enquiry based learning (EBL) and professional supervision, with the skills of continuing reflection on and development of practice through life-long professional learning, thus keeping up to date throughout their professional careers;
5. To produce graduates who systematically monitor and improve the effectiveness of their work;
6. To provide a programme that is informed by relevant research findings;
7. To provide a programme accredited by the British Psychological Society (or in due course the Health Professionals Council) to train educational psychologists;
8. To conform to University and QAA Codes of Practice, in particular the 'Policies and Procedures for Assuring the Quality and Standards of Placement Learning (approved UTC 9.4.3); and
9. To provide a programme which satisfies the requirements for a level 8 programme

in the HEQF.

11 Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, qualities, skills and other attributes in the following areas. The ultimate intended learning outcomes are at level 8.

Knowledge and Understanding

On completing the programme students should show:

- A1 Detailed understanding and appraisal of appropriate areas of psychology and educational practice including a core knowledge of child development, the effects of inter-personal relationships and knowledge of theoretical debates in educational psychology;
- A2 Detailed understanding and evaluation of the full range of possible educational and community settings and systems, associated legislation, policies and ethical considerations (including those relating to the BPS Code of Conduct, the DECP guidelines for the practice of professional educational psychologists and the AEP Code of Practice);
- A3 Critical understanding of underlying theory and of practical ways to develop appropriate psychological assessment, intervention and evaluation in order to identify needs and promote change for individuals and groups;
- A4 Detailed understanding and appraisal of appropriate research and evaluation methods (both quantitative and qualitative).

Teaching and Learning Methods

The primary means of ensuring students gain knowledge and understanding is through seminar presentation and discussion, enquiry based learning (EBL) and also through learning on placements. As part of the EBL cycles students will be directed to appropriate resources for personal reading and will find additional resources themselves. The discussions undertaken as part of the EBL cycles with other students, both with and without tutors, develop further knowledge and understanding. Fieldwork visits associated with EBL cycles to appropriate provisions further extend knowledge and critical understanding. Students are expected to consolidate their knowledge and understanding in practical placement - situational learning.

Assessment Strategy

All learning outcomes are cumulatively assessed by the use of assignments, portfolios of practical work, a systematic literature review and an empirical research project.

Intellectual Skills

On completing the programme students should be able to:

- B1 Articulate a clear rationale for professional practice which adheres, within law, to the BPS Code of Conduct and reflects ethical practice;
- B2 Show a high level ability to attend to and communicate with and work in partnership with appropriate others (including children, young people, teachers, parents, carers, and other professionals) in ways that are supportive and respectful of their current strengths and needs and likely further development;

- B3 Conceptualise and plan research activities that are appropriate and relevant in the context of developing understanding, knowledge and professional skill for educational psychologists and their employers;
- B4 Demonstrate knowledge, awareness, skills and values that enable effective work with diverse client populations through a clear understanding of the demographic characteristics of communities including the influence of: culture, gender, ethnicity and factors influencing social exclusion.

Teaching and Learning Methods

The tutor facilitated seminars and small group sessions in EBL approach are particularly focused on the development of the professional and intellectual skills of research-based practice. This involves reasoning, critically appraising sources and information and developing arguments. Tutors model and encourage students to engage in activities such as questioning assumptions, generating hypotheses and identifying ways in which they could be tested, critically evaluating and synthesising available information, articulating well reasoned arguments and considering data-based interpretations and implications. EBL sessions, in the subjects under enquiry, focus on professional issues and skills. Individual tutorials also provide further opportunities to extend the learning of subject specific skills.

Assessment Strategy

All learning outcomes are cumulatively assessed by the use of assignments, portfolios of practical work, a systematic literature review and an empirical research project.

Practical Skills

- On completing the programme students should be able to:
- C1 Research, plan, deliver and evaluate appropriate training and development to teachers, parents, other professionals and others;
 - C2 Use appropriate professional skills, using a broad evidence and knowledge base within a range of possible models and modes of intervention with young people, clients, carers, teachers and service systems;
 - C3 Conduct a systematic literature review and empirical research that constitute original contributions to knowledge and understanding and contains material that is worthy of being or has been published in peer-reviewed Journals;
 - C4 Use research skills that enable selection, design and implementation of approaches to evaluate interventions, leading to evidence based practice with key role partners, in terms of: effectiveness, appropriateness and impact of practice with individuals, groups, and at organisational and system levels.

Teaching and Learning Methods

Research project design, management and completion is initially taught through tutor-led seminars that address specific research skills. The EBL sessions provide resources and opportunities for students to develop critical research skills around particular issues, and to generalise them to other issues. Personal tutorials with tutors will provide a key vehicle for the development of the systematic literature review and empirical research project. Students will, usually in the latter part of their first year in discussion with their tutor and DPD outline their research interests. They are required to prepare a formal research proposal early in stage 2. The systematic literature review is conducted during Y2 and submitted for assessment (at D level) in July. The

associated empirical study is then completed and submitted (D level) in May of Y3.

Assessment Strategy

All learning outcomes are cumulatively assessed by the use of assignments, portfolios of practical work, a systematic literature review and an empirical research project. The portfolios of professional work carried out in Y2 and Y3 together with the reports of the systematic literature review and empirical research project are formally examined in a *viva voce* in July of Y3. The *viva voce* will, therefore, be an examination of each student's professional and academic competence.

Transferable/Key Skills

On completing the programme students should be able to:

- D1 Show high level communication skills transferable across settings and including skills of:
 - D1.1 Consultation and problem solving
 - D1.2 Conciliation and negotiation
 - D1.3 Communicating to audiences
 - D1.4 Interpersonal communication
 - D1.5 Appraisal and communication of research and policy documents
- D2 Generalise and synthesise prior knowledge and experience in order to apply them in different settings and novel situations;
- D3 Work effectively at an appropriate level of autonomy, with awareness of the limits of own competence, and accepting accountability to relevant professional, academic and service managers through engagement in and learn from interactive supervision processes;
- D4 Engage in a dynamic, responsive and evolving process to maintain and develop professional practice through the process of appropriate professional reflection and CPD;
- D5 Demonstrate self-awareness and working as a reflective practitioner;
- D6 Demonstrate professional practice which adheres, within law, to the BPS Code of Conduct and reflects ethical practice.

Teaching and Learning Methods

The key transferable skills are developed through EBL cycles, professional practice placements and individual tutorials.

Assessment Strategy

All learning outcomes are cumulatively assessed by the use of assignments, portfolios of practical work, placement and employment review outcomes, a systematic literature review and an empirical research project.

12 Programme Curriculum, Structure and Features

Basic structure of the programme

The D App Ed Psy is a three-year course (full time) 180 credits are taken for the 4 M-level assignments and two portfolios of work undertaken in Year 1 (also assessed at M level). Early in Year 2 candidates submit a research proposal for approval. This outlines the intended Systematic Literature Review submitted for assessment in July (Y2) and the Empirical Study submitted in April of Y3. Both these latter are assessed at D level. In each of Year 2 and 3 students compile a portfolio of professional work.

These are also both assessed at D level.

Students will be required to accept the Fitness to Practice Policy.

Students will be required to satisfy members of a panel in line with ECLS policies of their progress at the end of year 2 before progressing to the year 3. Required evidence will be satisfactory completion of all required assignments, placements and portfolios for that year of the course.

An innovative feature of the course is the emphasis on Enquiry Based Learning (EBL) opportunities.

A mark of at least pass must be gained for each module.

This programme involves full-time study. If candidates do not wish to progress from year 1 to year 2, the following can pertain:

If a candidate has completed all year 1 modules, and has 180 credits, they can be awarded a Post-Graduate Diploma in Educational Psychology. This will not enable the candidate to practise as an educational psychologist.

If a candidate has completed all year 1 modules, and has 180 credits, they can choose to complete a further 60 credit dissertation module (EDU8058 Educational Psychology Dissertation) and can be awarded an MA in Educational Psychology. This will not enable the candidate to practice as an educational psychologist. This 60 credit module is not offered as part of the Doctorate in Applied Educational Psychology.

Key features of the programme (including what makes the programme distinctive)

This programme involves intense study of both academic and professional-practical matters. In Year 1 students spend a substantial part of the course attending University-based sessions. In Years 2 and 3 students are currently required to gain employment within a Local Authority Educational Psychology Service as ‘Trainee Educational Psychologists’ (TEPs) whilst also completing their research (Systematic literature review and Empirical Research Project).

Programme regulations (link to on-line version)

<http://www.ncl.ac.uk/regulations/programme>

13 Criteria for admission

Entry qualifications

Graduate Basis for Registration (GBR) of the British Psychological Society (BPS). This entails gaining a good honours degree in psychology (or equivalent) recognised by the British Psychological Society. Candidates must also be able to demonstrate sufficient knowledge and awareness of Local Authority matters to be able to gain employment as TEPs.

Admissions policy/selection tools

Applicants must be able to demonstrate that they have gained at least one year's relevant experience of working with children within educational, childcare or community settings. Examples of the kinds of settings in which relevant experience is likely to be gained: work as a teacher, work as a graduate assistant in an Educational Psychology Service, a Learning Support Assistant, an Educational Social Worker, a Learning Mentor, a Speech and Language Therapist, a Care Worker. Voluntary experience of various kinds may assist applicants in demonstrating a breadth of relevant experience. Whatever kind of work has been done, applicants will need to show that what they have learnt from their experiences is relevant to work as an educational psychologist, and how they have been able to apply the knowledge of psychology gained through first degrees. Applicants must also be aware that travelling (most often by car) and the ability to arrive at all appointments on time is essential.

Selection to the course follows application and interviews.

Additional Information

Applications are welcome from people from ethnic minority backgrounds and people with disabilities, as they are currently under-represented in the profession. People with language skills, in addition to English, are also particularly welcome.

Level of English Language capability
IELTS 6.5 or equivalent.

14 Support for Student Learning

Induction

During the first week of the first semester students attend an induction programme. New students will be given a general introduction to University life and the University's principle support services and general information about the School and their programme, as described in the Degree Programme Handbook. New and continuing students will be given detailed programme information and the timetable of seminars, visits, placements tutorials etc. The International Office offers an additional induction programme for overseas students.

Study skills support

Students will learn a range of Personal Transferable Skills, including Study Skills, as outlined in the Programme Specification. Some of this material, e.g. time management is covered in the appropriate Induction Programme. Students are explicitly tutored on their approach to both group and individual projects.

Numeracy support is available through Maths Aid.

Help with academic writing is available from the Writing Centre.

Academic support

The initial point of contact for a student is with a lecturer or module leader, or their tutor (see below) for more generic issues. Thereafter the Degree Programme Director or Head of School may be consulted. Issues relating to the programme may be raised at the Staff-Student Committee, and/or at the Board of Studies.

Pastoral support

All students are assigned a personal tutor whose responsibility is to monitor the academic performance and overall well-being of their tutees. In addition the University offers a range of support services, including one-to-one counselling and guidance or group sessions/workshops on a range of topics, such as emotional issues eg. Stress and anxiety, student finance and budgeting, disability matters etc. There is specialist support available for students with dyslexia and mental health issues. Furthermore, the Union Society operates a Student Advice Centre, which can provide advocacy and support to students on a range of topics including housing, debt, legal issues etc.

Support for students with disabilities

The University's Disability Support Service provides help and advice for disabled students at the University - and those thinking of coming to Newcastle. It provides individuals with: advice about the University's facilities, services and the accessibility of campus; details about the technical support available; guidance in study skills and advice on financial support arrangements; a resources room with equipment and software to assist students in their studies.

<http://www.ncl.ac.uk/students/wellbeing/disability-support>

Learning resources

The University's main learning resources are provided by the Robinson and Walton Libraries (for books, journals, online resources), and Information Systems and Services, which supports campus-wide computing facilities.

<http://www.ncl.ac.uk/undergraduate/facilities>

All new students whose first language is not English are required to take an English Language Proficiency Test. This is administered by INTO Newcastle University Centre on behalf of Newcastle University. Where appropriate, in-session language training can be provided. <http://ncl.ac.uk/undergraduate/international/into>

15 Methods for evaluating and improving the quality and standards of teaching and learning

Module reviews

All modules are subject to review by questionnaires which are considered by the Board of Studies. Changes to, or the introduction of new, modules are considered at the School Teaching and Learning Committee and at the Board of Studies. Student opinion is sought at the Staff-Student Committee and/or the Board of Studies. New modules and major changes to existing modules are subject to approval by the Faculty Teaching and Learning Committee.

External Examiner reports

External Examiner reports for both the taught programme and the research elements of the programme are considered by the Board of Studies. The Board responds to the reports on the taught programme to Faculty Teaching and Learning Committee. External Examiner reports for the taught programme are shared with student representatives on the Board of Studies.

Student evaluations

All modules, and the degree programme, are subject to review by student

questionnaires. Informal student evaluation is also obtained at the Staff-Student Committee, and the Board of Studies.

Mechanisms for gaining student feedback

Feedback is channelled via the Staff-Student Committee and the Board of Studies.

Faculty and University Review Mechanisms

The programme is subject to the University Quality Assurance and Enhancement Framework for Research Degree Programmes. This provides Schools with an opportunity to reflect on practice and a forum for enhancement of the student experience through the sharing of good practice and feedback from external sources. An Annual Review of Research Degree programmes provides Schools with a formal opportunity to monitor the effectiveness of provision. The Annual Review is supplemented by an Audit Visit for two Schools in each Faculty. Schools report to Graduate School and a composite Summary Report for all programmes is provided by Graduate School to UTLC.

Accreditation reports

The BPS follows a 5-yearly cycle of accreditation visits.

16 Regulation of assessment

Pass mark

The pass mark is 50. Only the taught elements in year 1 are marked on the postgraduate scale with numerical marks. Other elements are assessed on a pass/fail basis.

Course requirements

Students are required to pass all assessments at the end of each year before progressing to the following year's course of study.

Role of the External Examiner

An External Examiner, a distinguished member of the subject community, is appointed by Faculty Teaching and Learning Committee, after recommendation from the Board of Studies. The External Examiner is expected, in relation to the taught component to:

- Moderate examination and coursework marking

- Attend the Board of Examiners

- Report to the University on the standards of the programme

The research elements of the programme in years 2 and 3 will be reviewed by external examiners appointed in accordance with the University's Doctor of Philosophy Examination Conventions.

In addition, information relating to the programme is provided in:

The University Prospectus (see <http://www.ncl.ac.uk/requests>)

The School brochure (contact enquiries@ncl.ac.uk)

The University Regulations (see <http://www.ncl.ac.uk/regulations/docs>)

The Degree Programme Handbook

Please note. This specification provides a concise summary of the main features of the programme and of the learning outcomes that a typical student might reasonably be expected to achieve if she/he takes full advantage of the learning opportunities provided. The accuracy of the information contained is reviewed by the University and may be checked by the Quality Assurance Agency for Higher Education.
