

## PROGRAMME SPECIFICATION

1	<b>Awarding Institution</b>	Newcastle University
2	<b>Teaching Institution</b>	Newcastle University
3	<b>Final Award</b>	B. Sc. (Hons)
4	<b>Programme Title</b>	Environmental Science
5	<b>UCAS/Programme Code</b>	F850
6	<b>Programme Accreditation</b>	none
7	<b>QAA Subject Benchmark(s)</b>	Earth Sciences, Environmental Sciences and Environmental Studies, 2007
8	<b>FHEQ Level</b>	Honours
9	<b>Last updated</b>	February 2014

### 10 Programme Aims

- 1 To recruit students from varied educational backgrounds who wish to study a breadth of natural and social science subjects in an integrated way within a holistic frame.
- 2 To produce graduates with:
  - i) an ability to apply understanding of a range of natural and social sciences pertinent to the study, understanding and management of environmental systems;
  - ii) an ability to carry out scientific research investigations and an ability to handle information flexibly from a variety of disciplines in an integrated manner;
  - iii) the necessary key skills and knowledge to gain employment as an environmental scientist or in other fields requiring good investigative and problem-solving skills.
- 3 To provide a programme of study which the basic knowledge and technical skills base to address the needs of employers and to enable graduates to develop the interdisciplinary background needed for effective careers in the environmental sector.
- 4 To provide a flexible programme of study which meets the FHEQ at level 6 by the end of the programme and which takes appropriate account of the Quality Assurance Agency Benchmark Statement for 'Earth Sciences, Environmental Sciences and Environmental Studies'.

### 11 Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, qualities, skills and other attributes in the following areas.

#### Knowledge and Understanding

Students will be introduced to the study of the terrestrial, aquatic and atmospheric environment and human interaction with it. On completing the programme students should have gained and be able to apply their knowledge of:

- A1 Fundamental physical and biological processes within global ecosystems and their complexity and inter-relationships
- A2 The political, social and economic implications of human interaction with the environment
- A3 Human responses to environmental problems at local to global scales including environmental impact assessment and the implications of paradigms of sustainability and sustainable development.

A4	An understanding of legislative and policy frameworks concerned with human interaction with the environment
A5	Measures of biodiversity and strategies for its maintenance at a range of temporal and spatial scales

### **Teaching and Learning Methods**

The primary mechanism for teaching knowledge and understanding is via lectures supported by case studies. The integrated nature of the global environment (A1, A5) and the structures shaping human interactions with the environment (A2-A4) are introduced in a range of modules at Stage 1 and developed in subsequent stages. The application of this knowledge is further developed through fieldwork and site visits. Biodiversity and environmental management (A4-A5) are addressed by specific modules at all Stages. The global focus and issues of sustainable resource use are taken forward in 'Climate and Environmental Change: Present Future and Past' at Stage 2 and 'Ecosystems: Characteristics, Functions and Environmental Change' at Stage 3. The practice of environmental science and environmental impact assessment (A3) is introduced in 'Environmental Science Issues' at Stage 1. The themes are further developed in 'Environmental Practice' at Stage 2 and in 'Sustainability in theory and practice' and 'Environmental Impact Assessment' at Stage 3. These subjects are also developed through fieldwork and case studies and given currency by the use of outside speakers and other practitioners.

Students are encouraged to engage in independent reading to support information delivered in lectures and seminars; they are provided with reading lists to guide them. In many Modules, tutorials follow-up on material covered in lectures and support student-student interaction. Students are encouraged to ask questions during lectures. Case-studies and discussion are used to consolidate less objective elements (A2-A3) and encourage reflection on personal values. Field observation, the writing of reports and reflection on collated data and case studies aid the development of understanding. By Stage 3 students are expected to take responsibility for their own learning and that of the class with an increased proportion of student-led seminars.

### **Assessment Strategy**

Most modules are assessed by a combination of in-course assessment and a written examination taken at the end of the semester in which the module finishes. A variety of assessment methods are used including assessment of précis, essays, case studies and research reports, oral presentations and posters, unseen examinations and open book examinations. Most work is produced individually but some is team-based. Peer assessment is used both to moderate team marks and to encourage critical appraisal of work and a better understanding of assessment criteria. The methods of assessment, their relative weighting, their links to learning outcomes and their timing appear in every module description.

### **Intellectual Skills**

On completing the programme students should be able to:

- B1 Handle data from a variety of disciplines and integrate information to provide interdisciplinary insights
- B2 Select and apply a range of methods to solve problems and produce reasoned solutions.
- B3 Develop appropriate search strategies and critically appraise primary and secondary data, information and viewpoints to produce a reasoned evaluation.
- B4 Relate investigations to prior work and the state-of-the-art in the field and reference sources appropriately
- B5 Interpret and effectively communicate using both quantitative and qualitative data.

**Teaching and Learning Methods**

Encouraging students to consider data in a critical manner and justify their interpretation develops cognitive skills. This is done during tutorials, fieldwork and lectures. Students learn through problem-solving, handling data, and discussion. 'The Global Environmental System' and 'Environmental Science Issues' focus on understanding rather than learning facts, from early in Stage 1, with an emphasis on problem-solving (B2, B3). This approach, and an emphasis on integrating materials across disciplines (B1), continues particularly in field classes. Subsequently in case studies and their research project, students practice production of reasoned arguments. For the student-led seminars in "Sustainability in theory and practice" they are required not only to present a reasoned argument to introduce the topic but also to develop materials to support further class discussion. Information literacy is integrated, developed and assessed throughout the course with the support of the library and information centre support staff with a 'golden thread' running from "Developing Skills to Make Sense of Global Challenges: Food Security" through "Environmental Science Issues", and 'Environmental Practice' to the 'Ecology and Environmental Research' (B3, B4). The ability to handle, interpret and communicate quantitative and qualitative data (B5) is developed progressively with specific practice at Stage 1 in 'The Global Environmental System' 'Statistical Methods' and 'Environmental Issues' through to increasingly independent handling of data in 'Environmental Practice' and "Ecology and Environmental Research"..

**Assessment Strategy**

Intellectual skills are assessed by means of examinations, essays, oral presentations and contributions to discussion, case studies, and both laboratory and field reports. The ability of students to support their answers with reasoned argument, application and critical analysis and reference to previous studies is a key marking criteria for assessed work at all Stages.

**Practical Skills**

On completing the programme students should be able to:

- C1 Collect and record environmental data in the field and laboratory. This will require the application of a range of skills including: planning, organisation, observation and recording.
- C2 Select and use appropriate laboratory and field equipment competently and safely within an appropriate risk management framework.
- C3 Design research investigations to address clearly stated objectives and to allow formal testing of hypotheses where appropriate.
- C4 Collate data, apply statistical analysis and interpret data appropriately to address defined objectives

**Teaching and Learning Methods**

Data collection and taxonomic skills (C1, C2) are developed through laboratory based practicals, field visits and field classes. These also reinforce the data handling and experimental design principles (C3, C4) first introduced in lectures. Students acquire skills (C1-C4) through hands-on practical experience, problem exercises and the group projects in 'Ecology and Environment Research' and 'Research Methods in Environmental Pollution'. Fieldwork becomes progressively less structured beginning with field visits in 'Environment and Land Resources Field Class', through student led project planning in 'Environmental Science Field Class 2' and 'Ecology and Environment Research', and requiring student led design and management of the research in Stage 3.

<p><b>Assessment Strategy</b></p> <p>Assessment is mostly through reports, practical write-ups (C1-C4). Reports have an element of reporting on process as well as results at Stage 1 and 2. As part of the final report for the Environmental Science Field Class 2, students are required to detail their process of scoping and then designing a short field-based project. Laboratory skills are assessed by means of a laboratory reports (in 'Soils in Terrestrial Ecosystems' and a number of other modules). Reports at Stage 3 are required to be in a technical/ consultancy format or presented as outline research papers.</p>
<p><b>Transferable/Key Skills</b></p> <p>A successful student will be able to:</p> <p>D1 Summarise and communicate in writing and orally in a manner appropriate to the target audience.</p> <p>D2 Work effectively both independently and as a member of a team.</p> <p>D3 Plan work and handle logistical constraints,</p> <p>D4 Reflect on learning experiences, take responsibility for personal learning and professional development.</p> <p>D5 Use computing and information technology effectively.</p>
<p><b>Teaching and Learning Methods</b></p> <p>Students are encouraged and supported to develop and enhance their key (graduate) skills at all stages of the programme. Varied requirements for assessments reinforce this and give the opportunity to practice directed report writing skills for a range of work-relevant contexts. The 'Blackboard' managed learning environment is used to support learning throughout the programme.</p> <p>Communication skills (D1) are developed through tutorials and student-led seminars (which require both written and oral contributions). Team-based exercises are used throughout the course and the development of team-working skills supported by reflective tutorials, within 'Environmental Issues' at Stage 1 and 'Environmental Impact assessment' at Stage 3 (D2). In particular there are employability modules embedded in the course at Stage 2 which promote reflection on graduate skill development and which have been particularly designed to facilitate the development of key skills in work-relevant contexts. In parallel, effective independent working (D2, D3) is encouraged and supported through the development of individual areas of interest in 'Environmental Issues' and through supported independent working in many other Modules throughout the programme. C&amp;IT skills (D5) are developed 'Developing Skills to Make Sense of Global Challenges: Food Security' and then practised through 'Environmental Practice' and the group projects in Stage 3.</p> <p>Emphasis is placed on effective study habits and time management at the very beginning of the programme with 'Environmental Science Issues' serving to encourage and monitor good practice. Students are encouraged to consider the key skills required of environmental science and to put into place their own development strategy to enable them to deliver such skills before seeking formal employment. At Stage 2 all students are required to take 20 credits of NCL+ linked modules which have been particularly designed to facilitate the development of key skills in work-relevant contexts.</p>
<p><b>Assessment Strategy</b></p> <p>Key skills are assessed through the production of coursework, case studies and project reports. Oral and poster presentations, reports and précis test the ability to communicate in a variety of media and in a manner appropriate to the target audience (D1). The effective use of information sources (D4) is assessed throughout the programme using essays and case studies and, at Stage 3, through the literature review required in the 'Ecology and Environmental Research'. Teamwork Skills (D2) are assessed formatively through tutorial debriefs; peer-assessment forms one element of summative assessment and students are required to evaluate team performance with reference to literature models in the summative assessment for 'Environmental Impact Assessment'.</p>

Planning Skills (D3) are summatively assessed in ACE8092 Project Planning and Management with formative assessment earlier in feedback on core studies and fieldwork. C&IT skills (D5) are assessed in coursework exercises in 'Environmental Science Issues', subsequently in the production of case studies (e.g. in 'Environmental Practice'), and especially in the production of project reports for Ecology and Environment Research early in Stage 3).

## **12 Programme Curriculum, Structure and Features**

### **Basic structure of the programme**

This is a three-year full-time modular programme consisting of 120 credits/year for three years. 10 credits are equivalent to 100 hours of study time (including both contact time and private study). Modules vary in valency from 10 to 20 credits.

Stage 1 is common to all students, ensuring a firm foundation across the full spectrum of disciplines necessary to practise environmental science. This includes laboratory and fieldwork, individual and team problem-solving and the study of contemporary issues in environmental management. There is an emphasis on good study practice, with particular modules focusing very much on developing understanding rather than just facts, and the development of C&IT and literature search skills.

From Stage 2 onwards there is a common spine of compulsory modules with a range of optional modules available to all students so that they can develop individual specialisms. Stage 2 includes a choice of Modules specifically to support the development of employability skills. Stage 3 includes three major project-based Modules requiring students to develop their organisational, communication, team working and problem solving skills. Students may opt to take a placement year between Stages 2 and 3; students are responsible for finding appropriate placement opportunities, however, support is given by programme staff and the careers service.

### **Key features of the programme (including what makes the programme distinctive)**

Particular features of the programme are:

- modules unique to the programme at each Stage
- field work modules at each Stage.
- the opportunity to study terrestrial, aquatic and atmospheric environments
- a focus on the rural environment and the interaction of agriculture, ecology and ecosystem services
- the opportunity to study environmental law, policy and management
- the opportunity to engage with local organisations involved in environmental management
- interdisciplinary structure and insights into the study of real-world environmental problems.

### **Programme regulations (link to on-line version)**

<http://www.ncl.ac.uk/regulations/programme/>

## **13 Criteria for admission**

### *Admissions policy/selection tools*

Students apply to the programme from a range of backgrounds with diverse qualifications. We consider each applicant on an individual basis taking into account information provided on the UCAS application including experience, past academic performance and potential. Students are encouraged to contact us to discuss their position if they require any further details or clarification.

### *Entry qualifications*

ABB preferably including two science subjects from: Mathematics, Chemistry, Biology, Geography, Environmental Science, Psychology and Physics. GCSE Mathematics (minimum grade C) required if not offered at a higher level.

AAABB including at least two science subjects from: Mathematics, Chemistry, Biology, Geography, Environmental Science, Psychology and Physics. Mathematics required at grade 2 Standard Grade (or Intermediate 2 equivalent) if not offered at Higher Grade. Combinations of Highers and Advanced Highers accepted.

International Baccalaureate: A minimum of 35 points with at least one science subject at Higher Level grade 5 or above from: Mathematics, Chemistry, Biology, Geography, Environmental Science, Psychology and Physics. Mathematics or Mathematical Studies at Standard Level grade 4 or above if not offered at Higher Level.

### *Non-standard Entry Requirements*

We welcome students with qualifications other than those listed above, including Irish Leaving Certificate, BTEC and Access to HE Courses with an appropriate level of science/ maths qualification.

Students with combinations of other qualifications may be invited to visit the University before an offer is made. We are pleased to advise anyone interested with regard to choosing an appropriate preparatory course of study.

### *Level of English Language capability*

A score of at least IELTS 6.5 or equivalent is needed if students are not native English speakers.

## **14 Support for Student Learning**

The Student Services portal provides links to key services and other information and is available at: <http://www.ncl.ac.uk/students/>

### *Induction*

During the first week of the first semester students attend an induction programme. New students will be given a general introduction to University life and the University's principle support services and general information about the School and their programme, as described in the Degree Programme Handbook. New and continuing students will be given detailed programme information and the timetable of lectures/practicals/labs/ tutorials/etc. The International Office offers an additional induction programme for overseas students.

### *Study skills support*

Students will learn a range of Personal Transferable Skills, including Study Skills, as outlined in the Programme Specification. Some of this material, e.g. time management is covered in the appropriate Induction Programme. Students are explicitly tutored on their approach to both group and individual projects.

Numeracy support is available through Maths Aid and help with academic writing is available from the Writing Development Centre (further information is available from the Robinson Library).

### *Academic and Pastoral support*

Each undergraduate and taught postgraduate student will be assigned a personal tutor.\* A personal tutor is one part of a wider network of advice and guidance available to students to support their personal and general academic development. The module leader acts as the first point of contact for subject-specific academic advice. Thereafter the Degree Programme Director or Head of School may be consulted. Issues relating to the programme may be raised at the Student-Staff Committee, and/or at the Board of Studies. Within the academic unit, students may also receive additional academic and pastoral advice from a range of other student-facing staff including degree programme directors, dissertation/project supervisors,

and administrative support staff.

\*Arrangements may vary for students taking special types of provision.

The University also offers a wide range of institutional services and support upon which students can call, such as the Writing Development Centre, Careers Service and Student Wellbeing Service. This includes one-to-one counselling and guidance or group sessions / workshops on a range of topics, such as emotional issues e.g. stress and anxiety, student finance and budgeting, disability matters etc. There is specialist support available for students with dyslexia and mental health issues. Furthermore, the Student Union operates a Student Advice Centre, which can provide advocacy and support to students on a range of topics including housing, debt, legal issues etc.

#### *Support for students with disabilities*

The University's Disability Support team provides help and advice for disabled students at the University - and those thinking of coming to Newcastle. It provides individuals with: advice about the University's facilities, services and the accessibility of campus; details about the technical support available; guidance in study skills and advice on financial support arrangements; a resources room with equipment and software to assist students in their studies.

#### *Learning resources*

The University's main learning resources are provided by the Robinson and Walton Libraries (for books, journals, online resources), and Information Systems and Services, which supports campus-wide computing facilities.

All new students whose first language is not English are required to take an English Language Proficiency Test. This is administered by INTO Newcastle University Centre on behalf of Newcastle University. Where appropriate, in-session language training can be provided. The INTO Newcastle University Centre houses a range of resources which may be particularly appropriate for those interested in an Erasmus exchange.

### **15 Methods for evaluating and improving the quality and standards of teaching and learning**

#### *Module reviews*

All modules are subject to review by questionnaires which are considered by the Board of Studies. Changes to, or the introduction of new, modules are considered at the Board of Studies and/or the School Teaching and Learning Committee. Student opinion is sought at the Student-Staff Committee and/or the Board of Studies. New modules and major changes to existing modules are subject to approval by the Faculty Learning, Teaching and Student Experience Committee.

#### *Programme reviews*

The Board of Studies conducts an Annual Monitoring and Review of the degree programme and reports to Faculty Learning, Teaching and Student Experience Committee. The FLTSEC takes an overview of all programmes within the Faculty and reports any Faculty or institutional issues to the Faculty Learning, Teaching and Student Experience Committee.

#### *External Examiner reports*

External Examiner reports are considered by the Board of Studies. The Board responds to these reports through Faculty Learning, Teaching and Student Experience Committee. External Examiner reports are shared with institutional student representatives, through the Student-Staff Committee.

### *Student evaluations*

All modules, and the degree programme, are subject to review by student questionnaires. Informal student evaluation is also obtained at the Student-Staff Committee, and the Board of Studies. The results from student surveys are considered as part of the Annual Monitoring and Review of the programme and any arising actions are captured at programme and School / institutional level and reported to the appropriate body.

### *Mechanisms for gaining student feedback*

Feedback is channelled via the Student-Staff Committee and the Board of Studies.

### *Faculty and University Review Mechanisms*

Every six years degree programmes in each subject area undergo periodic review. This involves both the detailed consideration of a range of documentation, and a review visit by a review team (normally one day in duration) which includes an external subject specialist and a student representative. Following the review a report is produced, which forms the basis for a decision by University Learning, Teaching and Student Experience Committee on whether the programmes reviewed should be re-approved for a further six year period.

### *Accreditation reports*

### *Additional mechanisms*

## **16 Regulation of assessment**

### *Pass mark*

The pass mark is 40 for all Undergraduate programmes.

### *Course requirements*

Progression is subject to the University's Masters Degree Progress Regulations, Taught and Research and Examination Conventions for Taught Masters Degrees. There are reassessment opportunities, with certain restrictions. Limited compensation up to 40 credits of the taught element and down to a mark of 40% is possible for candidates who commenced their programme in 2013/14 or earlier. For students starting their programme in 2014/15 or later, no compensation is possible.

### *Weighting of stages*

The marks from Stages 2 and 3 will contribute to the final classification of the degree  
The weighting of marks contributing to the degree is 1:3 for Stage 2 and 3 respectively

### *Common Marking Scheme*

The University employs a common marking scheme, which is specified in the Undergraduate Examination Conventions, namely

	<b>Modules used for degree classification (DC)</b>	<b>Modules not used for degree classification</b>
<40	Fail	Failing
40-49	Third Class	Basic
50-59	Second Class, Second Division	Good
60-69	Second Class, First Division	Very Good
70+	First Class	Excellent

*Role of the External Examiner*

An External Examiner, a distinguished member of the subject community, is appointed by Faculty Learning Teaching and Student Experience Committee, after recommendation from the Board of Studies. The External Examiner is expected to:

- See and approve examination papers
- Moderate examination and coursework marking
- Attend the Board of Examiners
- Report to the University on the standards of the programme

In addition, information relating to the programme is provided in:

The University Prospectus (see <http://www.ncl.ac.uk/undergraduate/>)

The School Brochure (contact [enquiries@ncl.ac.uk](mailto:enquiries@ncl.ac.uk))

The University Regulations (see <http://www.ncl.ac.uk/regulations/docs>)

The Degree Programme Handbook

Please note. This specification provides a concise summary of the main features of the programme and of the learning outcomes that a typical student might reasonably be expected to achieve if she/he takes full advantage of the learning opportunities provided. The accuracy of the information contained is reviewed by the University and may be checked by the Quality Assurance Agency for Higher Education.

## ANNEX

### Mapping of Intended Learning Outcomes onto Curriculum/Modules

The following modules develop the indicated specific Intended Learning Outcomes

Module	Type	A	B	C	D
<b>Stage 1</b>					
ACE1008	Compulsory	1	3, 4	1	
ACE1010	Compulsory	2	1, 2, 3, 4, 5	1, 2	1, 2, 3
ACE1014	Compulsory	2, 3	1	1	1
ACE1035	Compulsory	2,3	1, 3		1, 3
ACE1049	Compulsory	2, 3, 4			1
ACE1101	Compulsory	1, 2	1, 2, 5		3
ACE1102	Compulsory	1	3, 4	1	1,5
BIO1003	Compulsory	1		1	
BIO1006	Compulsory	1, 3, 5	5	1	2, 5
CEG1702	Compulsory	3	2, 5		5
MAS1401	Compulsory		2, 5	4	
<b>Stage 2</b>					
ACE2014	Compulsory	3, 4	1, 2, 4	4	1, 3, 5
ACE2015	Compulsory	1	2, 3, 4, 5	1, 2, 3, 4	1, 2, 3, 4, 5
ACE2016	Compulsory	1	4, 5	1	1, 2, 3
ACE2052	Compulsory	1	2, 4	2,	
BIO2018	Compulsory	2, 3	2, 4, 5		1
GEO2107	Compulsory	1, 2, 5	1, 3, 4		3
ACE2051	Optional	2	3, 4		1, 2, 3, 4
NCL2100	Optional		4		1, 2, 3, 4
ACE1003	Optional	2	4, 5		3
ACE2003	Optional	2, 3	1, 4		2, 3
ACE2029	Optional	1, 2, 4	1, 4	1	3
BIO2002	Optional	1, 2, 3, 5	4		
BIO2009	Optional	1, 5	2, 4	1	3
LAW2053	Optional	4	4		3
<b>Stage 3</b>					
ACE3015	Compulsory	1, 2, 3	2, 4, 5	1, 3, 4	1, 2, 3, 5
ACE3042	Compulsory	2, 3	1, 2, 4, 5		1, 2
ACE3070	Compulsory	1, 5	1, 4	1	1
ACE3080	Compulsory	2, 3, 4	1, 3, 4	1, 4	1, 2, 3, 4
ACE3081	Compulsory	1, 5	2, 3, 4	1, 2, 3, 4	1, 2, 3
ACE3082	Compulsory	4	2, 3, 4	3,	1, 3
ACE3013	Optional	3, 4	4		
ACE3016	Optional	2, 4,	4		
ACE3017	Optional	2, 4	1, 4		
ACE3035	Optional	1, 2, 3	1, 3, 4		
ACE3067	Optional	1, 2, 3	1, 4, 5		
BIO3002	Optional	1	4, 5		
BIO3003	Optional	1	2, 4, 5	4	1, 5
BIO3012	Optional	1, 3	4		1
BIO3031	Optional	1	4		1
LAW3015	Optional	4	4		1

Development of specific Intended Learning Outcomes occurs through the following modules  
(compulsory modules in bold text, optional modules in italic text)

		<b>Stage 1</b>	<b>Stage 2</b>	<b>Stage 3</b>
A1	Fundamental physical and biological processes within global ecosystems and their complexity and inter-relationships	<b>ACE1008, ACE1101, ACE1102, BIO1003, BIO1006</b>	<b>ACE2015, ACE2016, ACE2032, ACE2052, GEO2107, ACE2029, BIO2002, BIO2009</b>	<b>ACE3015, ACE3067, ACE3070, ACE3081, ACE3035, BIO3002, BIO3003, BIO3012, BIO3031</b>
A2	The political, social and economic implications of human interaction with the environment	<b>ACE 1014, ACE1035, ACE1010, ACE1049, ACE1101</b>	<b>ACE2051, BIO2018, GEO2107, ACE1003, ACE2003, ACE2029 BIO2002</b>	<b>ACE3015, ACE3042, ACE3067, ACE3080, ACE3016, ACE3017, ACE3035</b>
A3	Human responses to environmental problems at local to global scales including environmental impact assessment and the implications of paradigms of sustainability and sustainable development.	<b>ACE1035, ACE1049, BIO1006, CEG1702</b>	<b>ACE2014, BIO2018, ACE2003, BIO2002</b>	<b>ACE3015, ACE3042, ACE3067, ACE3080, ACE3013, ACE3035, BIO3012, MST3021</b>
A4	An understanding of legislative and policy frameworks concerned with human interaction with the environment	<b>ACE1009, ACE1049</b>	<b>ACE2014, LAW2053, ACE2029</b>	<b>ACE3080, ACE3082, ACE3013, ACE3016, ACE3017, LAW3015</b>
A5	Measures of biodiversity and strategies for its maintenance at a range of temporal and spatial scales	<b>BIO1006</b>	<b>GEO2107, BIO2002, BIO2009</b>	<b>ACE3070, ACE3081, ACE3019, BIO3012</b>
B1.	Handle data from a variety of disciplines and integrate information to provide interdisciplinary insights.	<b>ACE1010, ACE 1014, ACE1035, ACE1101</b>	<b>ACE2014, GEO2107, ACE2003, ACE2029</b>	<b>ACE3042, ACE3067, ACE3080, ACE3017, ACE3035, ACE3070</b>
B2.	Select and apply a range of methods to solve problems and produce reasoned solutions.	<b>ACE1010, ACE1101, MAS1401, CEG1702</b>	<b>ACE2014, ACE2015, ACE2052, BIO2018, BIO2009,</b>	<b>ACE3015, ACE3042, ACE3081, ACE3082, BIO3003</b>
B3.	Develop appropriate search strategies and critically appraise primary and secondary data, information and viewpoints to produce a reasoned evaluation.	<b>ACE1008, ACE1010, ACE1035, ACE1102</b>	<b>ACE2015, ACE2051, GEO2107</b>	<b>ACE3080, ACE3081, ACE3082, ACE3035</b>
B4.	Relate investigations to prior work and the state-of-the-art in the field and reference sources appropriately	<b>ACE1008, ACE1010, ACE1102</b>	<b>All, in particular ACE2014, GEO2107, ACE2029</b>	<b>All, in particular ACE3082, ACE3042, ACE3081</b>
B5.	Interpret and effectively communicate using both quantitative and qualitative data.	<b>ACE1010, ACE1101, BIO1006, MAS1401, CEG1702</b>	<b>ACE2015, ACE2016, BIO2018, ACE1003,</b>	<b>ACE3015, ACE3042, ACE3067, ACE3091, BIO3002, BIO3003</b>

C1	Collect and record environmental data in the field and laboratory. This will require the application of a range of skills including: planning, organisation, observation and recording.	<b>ACE1008, ACE1010, ACE 1014, ACE1102 BIO1003, BIO1006</b>	<b>ACE2015, ACE2016, ACE2029, BIO2009,</b>	<b>ACE3015, ACE3070, ACE3080, ACE3081</b>
C2	Select and use appropriate laboratory and field equipment competently and safely within an appropriate risk management framework.	<b>ACE1010</b>	<b>ACE2015, ACE2052</b>	<b>ACE3015, ACE3081</b>
C3	Design research investigations to address clearly stated objectives and to allow formal testing of hypotheses where appropriate.		<b>ACE2014, ACE2015</b>	<b>ACE3015, ACE3081, ACE3082</b>
C4	Collate data, apply statistical analysis and interpret data appropriately to address defined objectives	<b>MAS1401</b>	<b>ACE2014, ACE2015</b>	<b>ACE3015, ACE3080, ACE3081, BIO3003</b>
D1	Summarise and communicate in writing and orally in a manner appropriate to the target audience.	<b>ACE1010, ACE 1014, ACE1035, ACE1049, ACE1102</b>	<b>ACE2014, ACE2015, ACE2016, ACE2051, BIO2018, NCL2100, ACE2029</b>	<b>All, in particular ACE3067, ACE3080, ACE3081, ACE3082</b>
D2.	Work effectively both independently and as a member of a team.	<b>ACE1010, BIO1006</b>	<b>ACE2015, ACE2016, ACE2051, NCL2100, ACE2003</b>	<b>ACE3015, ACE3042, ACE3080, ACE3081,</b>
D3.	Plan work and handle logistical constraints.	<b>ACE1010, ACE1035, ACE1101</b>	<b>All, in particular ACE2015, ACE2051, GEO2107, LAW2053, NCL2100</b>	<b>ACE3015, ACE3080, ACE3081, ACE3082</b>
D4.	Reflect on learning experiences, take responsibility for personal learning and professional development.	<b>ACE1009</b>	<b>ACE2014, ACE2015, ACE2051, NCL2100</b>	<b>ACE3080</b>
D5.	Use computing and information technology effectively.	<b>ACE1009, CEG1702</b>	<b>ACE2014, ACE2015, ACE2029</b>	<b>ACE3015, BIO3003</b>
