Introductory Text

PART 1 Automated vehicles: liability of insurers etc

1. Listing of automated vehicles by the Secretary of State
2. Liability of insurers etc where accident caused by automated vehicle
3. Contributory negligence etc
4. Accident resulting from unauthorised software alterations or failure to update software
5. Right of insurer etc to claim against person responsible for accident
6. Application of enactments
7. Report by Secretary of State on operation of this Part
8. Interpretation

PART 2 Electric vehicles: charging

Introductory

9. Definitions

Requirements and prohibitions

10. Public charging or refuelling points: access, standards and connection
11. Large fuel retailers etc: provision of public charging or refuelling points
12. Duty to consider making regulations under section 11(1)(a) on request by elected mayor
13. Information for users of public charging or refuelling points
14. Transmission of data relating to charge points
15. Smart charge points

Summary

Proposals for regulations to ensure that electric vehicle chargepoints sold or installed in the UK have smart charging functionality included.

This consultation ran from
15 July 2019 to 11:45pm on 7 October 2019

Consultation description

Consultation on proposals for electric vehicle chargepoint smart technology regulations. The proposed regulations would require that electric vehicle chargepoints sold or installed in the UK have smart charging functionality included.

Annex E: Draft regulations

DRAFT STATUTORY INSTRUMENT

2020 No.

ROAD TRAFFIC

The Electric Vehicles (Smart Charge Points) Regulations 2020

Approved by Parliament

Made - - - - ***

Laid before Parliament ***

Coming into force in accordance with Regulation 1

The Secretary of State, in exercise of the powers conferred by sections 15, 16, 17 and 18 of the Automated and Electric Vehicles Act 2018 (a) ("the 2018 Act"), makes the following Regulations.

In accordance with section 18(4) of the 2018 Act, a draft of this instrument has been laid before Parliament and approved by a resolution of each House of Parliament.

The Secretary of State has consulted such persons as the Secretary of State considered appropriate in accordance with section 18(3) of the 2018 Act before making these Regulations.

PART 1

Introduction and application

1. These Regulations may be cited as the Electric Vehicles (Smart Charge Points) Regulations 2020 and come into force on [date].

Interpretation

2. In these Regulations—

"enforcement authority" means the Secretary of State or any person authorised by the Secretary of State in accordance with regulation 14;

"certification body" means a person authorised by the Secretary of State to carry out the functions referred to in regulations 8 and 12 or, if no such person has been authorised, the Secretary of State;

"cyber attack" means exploitation of a charge point's smart functionality or of systems or networks connected to it to cause harm or disruption;

The screenshot shows the Newcastle University website. At the top, there is a navigation menu with links for 'Who we Are', 'Work with Us', 'Research', 'Study', 'Alumni', and 'Staff & Students', along with a search icon. Below the navigation is the Newcastle University logo and the text 'National Centre for Energy Systems Integration'. A breadcrumb trail reads: 'Newcastle University > National Centre for Energy Systems Integration > Events > Webinars > Webinar Series - EV Smart charging'. The main content area is titled 'Electric Vehicles' Smart Charging Webinar Series'. A description states: 'This series of webinars provides an introduction to vehicle to grid (V2G) and smart charging projects and topics, with invited guest speakers from institutions in the UK and overseas. View the [webinar playlist here](#).' Below the description is a list of webinar events, each with a green plus icon to its right:

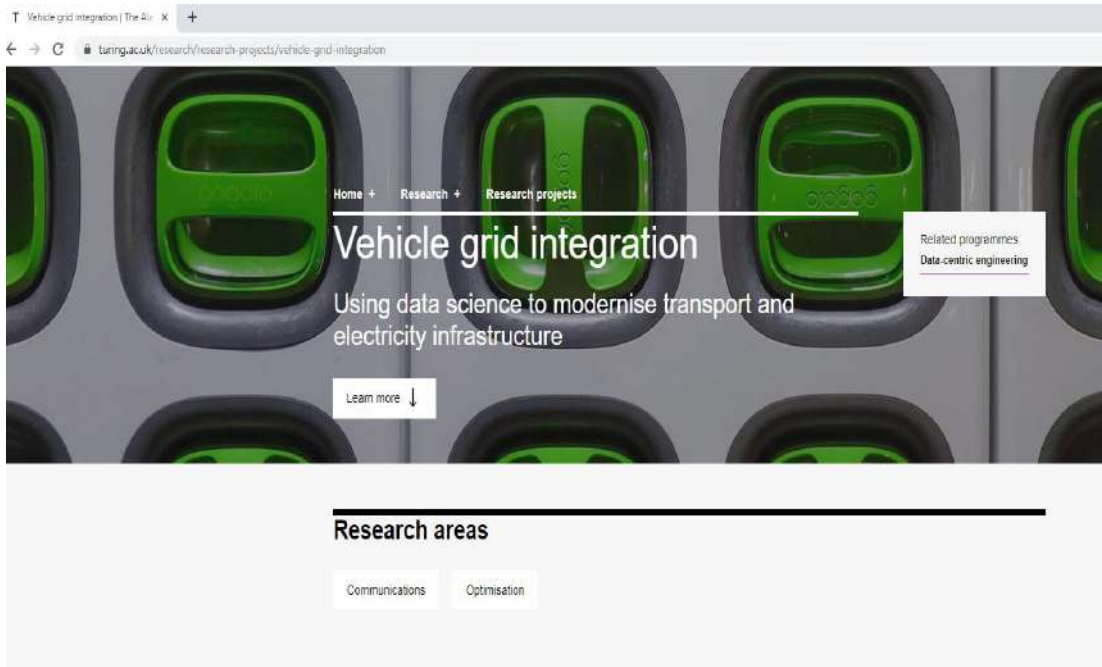

- Smart Charging and V2G Webinar: Caltech and Idaho National Laboratory
- Meet OCPP. Robert de Leeuw. Open Communication Protocols for Electric Vehicles Smart Charging
- Meet OpenADR. Rolf Bienert and guests. Open Communication Protocols for Electric Vehicles Smart Charging
- Open Communication Protocols for Smart Charging: real world demonstrators - GreenFlux and Carbon Co-op
- Open Communication Protocols for Smart Charging: real world demonstrators - Allego
- Meet ISO 15118. Dr Marc Mültin. Open Communication Protocols for Electric Vehicles Smart Charging
- A sufficient & intelligent charging infrastructure - examples from Denmark
- Integrating Plug-In Electric Vehicles with the Grid in California

Upcoming events

- ▶ *15th January 2020.* **Paul Bertrand.** Meet IEC 63110. International IEC standard for Management of EV Charging Stations.

Alan Turing Institute- Vehicle Grid Integration Group

- ▶ Apply and develop data science methods and tools to help in the transformation of electricity and transport infrastructure.
- ▶ Contribute to open communication protocols for vehicle grid integration.
- ▶ Assess security of communication, hardware and software of grid-integrated EV charging infrastructure.

<https://www.turing.ac.uk/research/research-projects/vehicle-grid-integration>

Today's speaker

- ▶ **Noel Crisostomo**, California Energy Commission,
Integrating Plug-In Electric Vehicles with the Grid in California

Topics discussed will include:

- ▶ California is working toward the deployment of 5 million Zero-Emission Vehicles by 2030
- ▶ To support EV uptake, the California Energy Commission-responsible for assessing the demand for electric vehicle charging infrastructure- quantified that 250,000 chargers at multi-unit dwellings, workplaces, and destinations are needed.
- ▶ This webinar will describe the charging infrastructure technology research, modeling, policy, and incentive designs that the Energy Commission is undertaking to transform the market toward seamless vehicle-grid integration.
