

WELCOME TO TransSLO

SUSTAINABLE TRANSPORT RESEARCH

The TransSLO project is a Targeted Specific Support Action in the New Member State of The Republic of Slovenia in the thematic area of sustainable development, global change and ecosystems - Sustainable Transport.

TransSLO will assess the transport research capability in Slovenia and facilitate the involvement of Slovenian organisations in European projects by identifying key representative individuals and organisations and promote collaboration in the 25 EU member states and associated countries. The analysis will be carried out using a systems approach considering the skills and innovations of Slovenia.

Objectives

General

The general objective of this project is the integration and strengthening of the research community, policy makers and industry at national level. This will lead to the development of links and common information channels and strengthening of contacts between professional, educational, development, research and industrial institutions in the area of sustainable transport.

Specific Objectives

- To support knowledge transfer and experience exchanges within the EU and specifically target Slovenia and nearby countries in order to promote transport research and encourage post graduate research at Universities.
- To generate information for decision makers and politicians on Slovenian and EU transport research priorities.
- To ensure dissemination of Slovenia transport research capability
- To ensure dissemination of the results of the project

PHD RESEARCH DAY

May 9 - 11, 2007, Ljubljana, Slovenia

This PhD Research Day is sponsored by the TransSLO European Project whose main aim is to assess the transport research capability in Slovenia

The aim of the PhD Research Day is to encourage participation by PhD students who are currently involved in **any aspect of transport research** and the practical issues concerning transport in Slovenia and the region

This day will be given exclusively to PhD presentations to an invited audience of transport experts from Slovenia and Europe.

Applications are particularly welcomed **for free participation** from Slovenia and nearby countries.

We expect a high attendance at this event, so if you are interested in submitting an abstract, please send an electronic version of your presentation *in English* to:

SLOVENIAN & EUROPEAN TRANSPORT RESEARCH PRIORITIES

12 October 2007, Ljubljana, Slovenia

Workshop Purpose

This workshop will bring together the results from the ISEP 2007 Symposium and PhD Research Day, which will have taken place in May 2007. The aim of the workshop is to further expand the identification of key players and experts in the field of transport research in Slovenia and the surrounding countries.

Workshop presentations

Presentation will be from all sectors of the transport arena - air, waterborne, road and rail. Presentations will include examples of the difference types of funding sources and types of research mechanisms.

To supplement the presentations there will be a session, which will use a collective digital voting system to collate, rank and validate the workshop findings so far. This technique allows for breakout workshops to determine what is really needed, what the major issues are and how experts feel they could be solved.

Workshop Audience

Delegates for the workshop will be invited from industry, policy makers and other stakeholders, including VIP's from Slovenia, surrounding countries, Europe and world-wide.
