WELCOME

Many congratulations! I hope that you are as pleased as we are that you have an offer of a place for the MBBS programme here at Newcastle – we are very much looking forward to your arrival in the autumn. The undergraduate medical course is one of the most consistently highly rated, with an international reputation, and we are continually striving to improve it. We are delighted that you have chosen Newcastle as the place to study, and to begin a fascinating and rewarding life-long career.

Please read this document carefully. There are a number of very important nuggets of information about what you need to do to between now and the start of the course, from confirming your suitability for study, meeting the wider entrance requirements, right through to arranging accommodation and financial advice. If you have any queries at all, please do not hesitate to get in touch with us – all the contact details are in the document.

With very best wishes

[Signature]

Professor Steve Jones MBBS(Hons) MD FRCP MSC (Med Ed)
Consultant Physician
Head of the School of Medical Education and Chair, Board of Medical Studies
1. **Keeping us up to date**

   It is extremely important that you keep us up to date on where we can contact you throughout the admission cycle. For all correspondence Newcastle University will always use the contact information and email address we receive from UCAS.

   Ways in which you can inform us of changes to your contact details:
   - If you change your contact details or address through the UCAS system this should be automatically updated to our electronic admissions system.
   - If you wish to be sure we have received any changes to your contact details you can also contact us direct at Newcastle University, School of Medical Education, Medical Student Office, Framlington Place, Newcastle NE2 4HH. Or you can email us on: medic.ugadmin@ncl.ac.uk
     *Please quote your UCAS number in all correspondence.

   **Common mistakes applicants make:**
   - Many applicants use their school email address as the contact. This causes difficulties when our University sends emails during school holidays or just before registration in August, which is after you have left school.
   - Many applicants forget to check their school emails regularly. We often contact applicants by email as a first contact for an interview or to request additional information to support your application.
   - Some applicants use their school address as their main contact address. If you need to do this, remember to also provide your home address details.

   Remember it is your responsibility to ensure the universities you have applied to have up to date information regarding your contact details.

   ** emojis **

   **Going on holiday?**

   We do understand that you have a long summer break after your exams and many of you take this opportunity to travel widely before your university course begins. This can mean that you are away from your main contact address for a substantial length of time.

   **What can you do?**
   - If possible, make sure that you regularly check the email address you provided on your UCAS application.
   - Ask a relative to check your post and contact you if necessary.
2. **Paperwork before you arrive**

As part of the admission process for Medicine we need to certify and obtain lots of information from our applicants. The following information provides you with a guide on what we might ask for and what we may provide.

**Completed examination certificates**

When you attended your interview for Medicine you may have brought with you your **original certificates** for the completed ‘A’ level; International Baccalaureate; degree examinations you listed on your UCAS form as completed. If you did not, you will need to send the originals to us. You may wish to consider sending your certificates recorded delivery to ensure they are safely delivered. Unfortunately, we do not accept copies and we will return the certificates by recorded delivery. (contact details on page 11) *If you are yet to complete your ‘A’ levels and your results are not due until August, you do not need to do anything. We will receive these results direct from UCAS. (See Waiting for Examination Results on page 10)*

**Immigration and International Students**

If you require a Certificate Acceptance for Study (CAS) we will contact you once you become unconditional/firm (UF) to request any documents we need and complete the CAS.

- We can provide a CAS number up to 6 months before the start date of the course (once UF)
- The CAS number can only be used by you to support your visa application within the 3 months before the start of the course
- Ensure that the passport you have is in date and is the one that will be provided to us for your CAS. If you change your passport after the CAS has been issued your CAS will be invalid

3. **Equipment and Books for the Course**

- We do not recommend that students buy equipment, such as stethoscopes, before arriving at the Medical School
- We do not recommend buying any books before you arrive at the Medical School. You may find that many of our existing students will be selling their copies of text books. We also suggest that you make full use of the medical library (Walton) and its vast resources
- We recommend students own a smartphone, tablet or laptop to enable engagement with interactive teaching seminars
4. Welcome and Registration

University Welcome pack
The University will send you a welcome pack once your offer changes to UF. The packs start going out to applicants during August. As the Accelerated Course (A101 4 years) students start their course earlier, they may receive their packs in early August, but they must be UF before the pack is sent out.

Registration
The Medical Student Office will send you a registration pack in August. This pack will include details on where and when you need to meet on your first day of term.

Newcastle University operates an online registration system for all students. This system gives you the responsibility of ensuring that your student record details are up to date and correct. Whilst a student at Newcastle University, you will have access, through the S3P system to your record and you will be responsible for updating your contact details if you should move.

When can you register?
- In August applicants holding an unconditional/firm offer for Medicine will be sent details on how they can register using the S3P online registration system
- It is important that international students read the information regarding the payment of fees on our web page https://www.ncl.ac.uk/undergraduate/finance/tuition-fees/

If your student record is incorrect
- The online system has an email facility which allows students to submit a request or question to the administrative staff who manage the system. Remember the name on your student record will be the name on your graduation certificate once you graduate. A student's name is normally recorded as their name is shown on their passport

Example change request:
Often the name you entered on your UCAS application is not your full name and often is abbreviated, this will be the name fed from UCAS to our student record system. If you require a change you will need to select the email option within the S3P system and explain your request. We are unable to make a change of name request without documentation evidence, we will need to see proof of name change and documents we can accept include:

- Birth certificate
- Current passport (we may already have a copy of this from your interview)
- Driving licence
- Statutory declaration (available via a solicitor)
- Deed poll (available via a solicitor)
- Marriage certificate

The proof you wish us to consider must be brought to the Medical Student Office.
5. **Health Issues and Health Questionnaire**

Newcastle University has an overriding duty of care to the public with whom students come into close contact. All students are required to comply with the Department of Health’s guidance on health clearance for healthcare workers.

**What will you be asked to do?**

- Enclosed with your invite to interview you would have received a Declaration form which you must complete. This form asks you to sign to confirm that you will adhere to the health, fitness to practise and conviction checks which we may conduct before or during the course.

- Before you start the course our Occupational Health provider will send you a Health Questionnaire to complete and return. This must be completed and returned to the contact details on the document within the timeline indicated in your offer.

- Some applicants may receive a conditional offer which includes an Occupational Health Assessment. This assessment is designed to help us ensure that applicants are not only able to undertake the rigours of the MBBS programme, especially with respect to working with patients in the clinical setting, and meet its outcomes in line with the statutory requirements of the General Medical Council as defined in ‘Outcomes for Graduates’, but to also ensure that we provide any reasonable support necessary.

- Our Occupational Health Assessment provider will contact the applicant to make arrangements for this to take place. This assessment must be successfully completed before an offer can move from Conditional to Unconditional and will need to be completed within any timeline mentioned in your offer.

- Early in the course students will be required to be screened for Hepatitis B; Hepatitis C and HIV. All aspects of a student’s medical record will be bound by the same duty of confidentiality as for any doctor-patient interaction and informed by the same ethical guidance.

- In order to ensure as many students as possible are protected by the beginning of the course, we suggest that for their own protection applicants commence an immunisation programme for Hepatitis B. The process for this immunisation requires three injections over six months. Your GP should be able to start this course of immunisation, but you should be aware they may charge for this service.
6. Disclosure and Barring Service
All MBBS students as part of the process of ensuring students are ‘fit to practise’ undergo a Disclosure and Barring Service (DBS) Enhanced Disclosure check. This type of disclosure is designed to check the background of individuals who will have a high degree of contact with children or vulnerable adults. All medical students in the country are required to undergo a DBS check on entry to Stage 1 and here in Newcastle our NHS Trusts require an additional check prior to the start of the Final Year, and we reserve the right to discontinue your studies on receipt of an unsatisfactory disclosure.

- Once your application becomes Unconditional/Firm you will be sent an email with a link to our online DBS application process. You must follow the instructions and submit your details
- Once you start the course you will be required to attend a DBS surgery where you must bring the original documents you noted as evidence when submitting the online DBS application
- This information will be checked against your application and submitted
- All UK students will need to complete the DBS process as mentioned above and if you have spent a considerable amount of time outside the UK you may need to obtain a ‘Letter of good conduct’ from the country you have been living in. Please contact the Medical Student Office if you are unsure
- International students must bring to this surgery a recent (letter not to be dated more than 3 months before registration) ‘Letter of good conduct’ obtained from the relevant police or government office in their home country
- EU students must bring to this surgery a recent (letter not to be dated more than 3 months before registration) ‘Letter of good conduct’ obtained from the relevant police or government office in their home country. If you have been living in the UK you may also be required to complete an Enhanced DBS application

7. Fitness to Practise
In the interests of patient and public safety, we wish to share some of the information provided in your application form with the Medical Schools Council in order to verify your fitness to practise. If a fitness to practise finding is made against you in the future, this information and a copy of the decision against you will also be stored on the database maintained by the Medical Schools Council. The database is accessible only to other medical schools in the UK and the General Medical Council. It is used only for proper fitness to practise purposes to protect patients and the public. Any offer made by us will be conditional on you having disclosed any previous fitness to practise findings against you, and your consent being given to this use of information. Your consent will be obtained through your signature on the Declaration Form you completed at interview. You have a right of access to any information held about you on the database to correct any errors. If you wish to exercise the right, please contact the Policy Advisor at the Medical Schools Council.
8. **Accommodation** *(subject to change, always check our web site)*

If you firmly accept an offer for our Medicine programme you will be contacted about accommodation at Newcastle University in June. You will be asked to consider the options available *(see [http://www.ncl.ac.uk/accommodation/](http://www.ncl.ac.uk/accommodation/))* . You will also be asked to complete an online accommodation application.

During your first year of study you are guaranteed a place in University-owned or Managed Partnership accommodation, provided you:

- have accepted our offer of a place at Newcastle as your firm-choice University before 30 June, *and*;
- are coming alone to the University for the full academic year, *and*;
- live in an area from which it would be unreasonable to commute to the University by public transport, *and*;
- have completed the online Accommodation Application by 30 June of your year of entry

**Please note: We would advise you to check the criteria on our web site**

You must meet ALL of the conditions above and the guarantee may involve some temporary sharing at the start of the contract. Mature undergraduate students (25+) may be offered accommodation with postgraduate students.

If you are **not covered by the guarantee** you are still welcome to apply for a place in University accommodation. If you live within reasonable commuting distance of the University, you should apply in the usual way. Your details will be put on a waiting list, and students living furthest away from the University will be housed before those living closer to the city centre. If we are unable to offer you a room at the start of term, you will be asked to remain at home until a room becomes available, usually during the first term.

9. **Finance**

Starting a course of study at a university can be a large financial commitment and will require some forward planning. Visit our web site for this updated information *[http://www.ncl.ac.uk/undergraduate/finance/](http://www.ncl.ac.uk/undergraduate/finance/)* .

**Examples of living costs**

We provide examples of the living costs you will need to consider when starting a university course, visit *[http://www.ncl.ac.uk/undergraduate/finance/money/](http://www.ncl.ac.uk/undergraduate/finance/money/)* for further information.

**NHS Bursaries (subject to change)**

As you may be aware many Medical students are currently entitled to a Bursary from the NHS. The NHS Bursary Award Scheme is available for English domiciled Medical students *only* who are undertaking the:

**UNDERGRADUATE MBBS A100 five year Degree Programme**

*[http://www.ncl.ac.uk/undergraduate/degrees/a100/#fees&funding](http://www.ncl.ac.uk/undergraduate/degrees/a100/#fees&funding)*

**MBBS A101 Accelerated four year Degree Programme**

*[http://www.ncl.ac.uk/undergraduate/degrees/a101/#fees&funding](http://www.ncl.ac.uk/undergraduate/degrees/a101/#fees&funding)*

For more detailed information about the NHS Bursary visit: NHS Business Service Authority, England *[www.nhsbsa.nhs.uk/students](http://www.nhsbsa.nhs.uk/students)*
This Bursary pays the fees only of all eligible students. Through this Bursary scheme students may also be able to claim some living and travel expenses, although this is ‘means’ tested, and not all students will be eligible.

English domiciled students are students who are ordinarily resident in England on their first day of the first year of their course, if you are unsure as to whether you are eligible check by using the following link:

NHS Business Service Authority, England
www.nhsbsa.nhs.uk/students

For those students who have moved from Scotland, Northern Ireland or Wales primarily for the purpose of undertaking a full-time course of Education, you will not normally be classed as being ordinarily resident for NHS Bursary purposes. Therefore, you are required to contact your own awarding body for details of student support arrangements:

Students Awards Agency for Scotland
www.saas.gov.uk/
Department for Employment and Learning, Northern Ireland
www.delni.gov.uk
NHS Wales Student Award Unit
www.wales.nhs.uk/sitesplus/955/page/72050

10. Waiting for examination results

Conditional/Firm
If you are waiting for your academic results to be announced in August your offer will not change from Conditional to Unconditional until we have considered all of the results published at this time. This is an extremely busy time in the Medical Student Office so please bear this in mind and allow us some time to process the decisions on the ‘A’ level results we receive through UCAS.

If you are requesting that your ‘A’ level is remarked you will need to contact the Medical Student Office to receive guidance on the position of your offer. We do require your school to indicate their support in this process by sending us a fax or email. Fax: 0191 2226521 Email: mbbs.admission@ncl.ac.uk

If you are still awaiting confirmation of your Degree classification you must ensure that you provide official confirmation of your result by the week ‘A’ level results are announced. We understand that you will not have your certificate, but you will need to supply us with a letter from the Registry or Student Records department at your current University.

Failure to provide official notification of your results in time for ‘A’ level week may result in the offer decision being withdrawn as you would not have met the necessary conditions.
11. **Under the age of 18 years**

If you are under 18 years of age on the day of registration you should have received an under 18 years contract for your parent or guardian to sign. This is to ensure that any contracts you enter into with the University are guaranteed and legal.

12. **General Information**

**Data Protection**

Newcastle University holds and uses personal student data which comes under the Data Protection Act. As part of your S3P online registration process you will be asked to read and accept a statement regarding the holding and use of this information.

**Student Support**

We are committed to the principle of equal treatment of disabled persons and the proper application of the Disability Discrimination Act. We recommend those students who require the support of our Student Wellbeing Service should visit [http://www.ncl.ac.uk/students/wellbeing/about/](http://www.ncl.ac.uk/students/wellbeing/about/) to obtain information on the support we provide.

**Smoking**

Newcastle University has a ‘No Smoking on campus’ policy; this means that we do not allow any smoking on our campus, including outside our buildings.

13. **Contacts**

Address for all correspondence:

Newcastle University  
Faculty of Medical Sciences  
Medical Student Office  
Framlington Place  
Newcastle  
NE2 4HH  
Telephone: 0191 2087005
