

The Aim

- To align our teaching offer to the University's Education Strategy and new Graduate Framework.
- To encourage a collaborative and consistent approach to the planning of embedded information and digital literacy skills across all Faculties.
- To ensure students develop a broad range of relevant information and digital literacy skills at a pace suited to their stage and course of study.

Opening a dialogue

Greatest benefit to the student is achieved when academics and librarians work together to develop appropriate training (Peters, Jones and Matthews, 2007).

Our Working in Partnership dialogue consists of two key documents that are available from the Library website:

- An outline of our offer and how we can collaborate with academics and students.
- A Student Development and Progression document, based on Information Literacy curriculums from SCOUNL (2015) and ANCIL (2011), that provides an outline of the information literacy skills and competencies students can be expected to have at each stage of their undergraduate degree.

These documents were initially shared with School Library Representatives then, more widely, at Faculty Education Committees.

“The Library team were happy to extensively consult at all stages, particularly with regard to how their resources could complement our new emphasis on skills-based training for our students.”

- Senior Lecturer, History, Classics & Archaeology

Partnership in Practice

Following their introduction, our Working in Partnership documents have helped us to initiate positive conversations with academic colleagues across several Faculties such as:

- Biosciences
- Architecture and Urban Planning (AUP)
- In Speech and Language Science
- Natural and Environmental Sciences

We were also able to adapt our documents to respond to the challenge of online learning in 2020, producing a Supporting Flexible Learning webpage as a guide to our approach.

Developing Graduate Skills

Our Student Development and Progression document links to the following Graduate Framework strands:

Critical Thinkers

We engage students in critical thinking around the resources they choose for their work; justifying these decisions and understanding where information comes from helps them to identify and select appropriate academic knowledge and express informed views.

Digitally Capable

In line with JISC's (2019) Digital Capability framework we focus on developing information literacies by improving students' capacity to Find, Evaluate and Manage digital information, making use of active and blended digital learning opportunities where possible.

Curious

Our teaching sessions and online guides embedded in the VLE promote independent exploration of resources and tools available to our students.

Skills Audits

Digital self-assessment tools aimed at undergraduate and postgraduate levels were created and embedded in Canvas modules and on the ASK website to encourage student engagement with their own information and digital skills development.

Next Steps

- To develop a booking system that encourages a collaborative dialogue with academics at the point of request.
- To collaborate with academic staff in reviewing lessons learned from a year of online teaching, with the aim of developing a mix of non-synchronous, synchronous and Present in Person (PIP) options for 21/22.

“I think this will help raise awareness amongst academics of how you can help us – not just to deliver a library session for the first years in induction but throughout the whole student journey.”

- Senior Lecturer, Newcastle University Business School
