

# Conference Interpreting Suites

## Multilingual conference suite (OLB 3.14)

This premium conference suite is a state-of-the-art facility. It is designed for both specialist teaching and commercial hire. This suite supports in-person, hybrid and remote conferencing with simultaneous interpretation in up to 10 languages

## Frederick Douglass Centre

For high-capacity events, Newcastle University also offers a 750-seat auditorium at the FDC. This venue includes its own dedicated interpretation booth, making it ideal for:

- Large-scale multilingual conferences (the FDC facility supports interpretation in up to 11 languages)
- Summits
- International forums

**From Newcastle. For the world.**

# FDC Booth

1. Joystick Controlled Camera with video feed to OLB 3.14
2. Dual Interpreter Units

3. IP Cameras  
3 Additional Controllable Cameras
4. Speakers Desktop View  
Broadcast FDC Floor PC

## Advanced Technical Infrastructure

Features include high-quality audio feeds, interpreter desks, and integrated video systems for seamless communication.

## Flexible Conferencing Formats

Supports in-person, hybrid, and remote conferences, ensuring flexibility for organisers and participants.

## TELEVIC Professional Interpreter Unit

### LINGUA INTERPRETER DESK

Televic's Interpreter Desk is a demonstration of user centred design and it embodies a new approach to enhance the working comfort of the interpreter. The unique focus on superior user feedback, improved ergonomics and intuitive interfacing makes it the most user-friendly professional interpreter desk on the market today. The Televic Interpreter Desk has been designed by and for the professional interpreter.

Designed to take a minimum amount of space on the table, the Televic Interpreter Desk optimises the limited space that is available in the typically packed interpreter booths.

Hardware and software blend together and create a seamless experience for the interpreter.

The Lingua Interpreter Desk helps freelance, residential & visually impaired interpreters to do their job better, more focused, yet more relaxed.

Labels for the unit include:

- Colour Display for Control & Information
- Rear Headphone Socket
- Back-firing Speaker
- (Push-to-select) Jog Wheel
- Easy-Access Headphone Socket
- Rotational Controls for Volume, Bass & Treble
- 6 Relay Buttons
- Large Microphone Button
- A/B/C Channel Selection
- Braille Indicators
- Easy-Access Headphone Socket

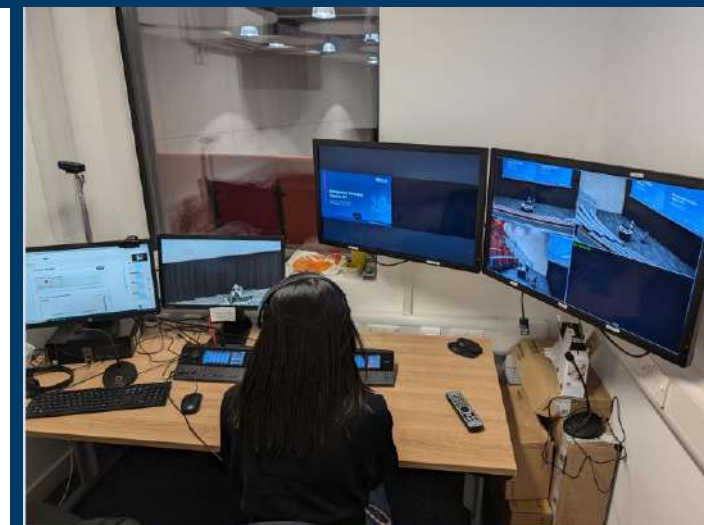

**Plixus Conference Network**

- HD Video
- Documents
- HD Audio
- Tunnelled IP
- Conference Control Data

Lingua includes accessibility features such as braille indicators underneath each button & assistive audio feedback.

*"Plixus offers more bandwidth, better quality and less latency than any other commercial network technology."*

The FDC Booth is equipped with two industry standard Televic interpreter desks, enabling seamless language transitions and allowing interpreters to switch effortlessly during simultaneous interpretation.

## INTERPRETER TRAINING SUITE – Technology Breakdown Audience Participation + Language Distribution for 30 persons

televic  
education

Transmits interpreted language channels + the floor audio to the audience. Audience members can select their chosen language and adjust the volume.

for 64 receivers

### Interpreter Desk Setup

The booth features two interpreter desks for smooth language transitions and easy interpreter switching.

### Wireless Receiver System

Sixty wireless receivers allow delegates to select languages and adjust volume for a personalised experience.

### Remote Integration

Integration with Zoom/Teams enables remote attendees to access interpretation services seamlessly during events.

### Ergonomic and Technical Design

The booth combines ergonomic stations and advanced audio distribution for comfort and technical precision.

# Multilingual Conference

## FDC Booth + OLB 3.14

### Interpreting Booth Capacity

Up to 10 interpreting booths in Old Library Building plus the FDC Booth enable support for 11 languages simultaneously.

### Ideal Event Use

This multilingual setup suits large conferences and academic gatherings requiring diverse language interpretation.

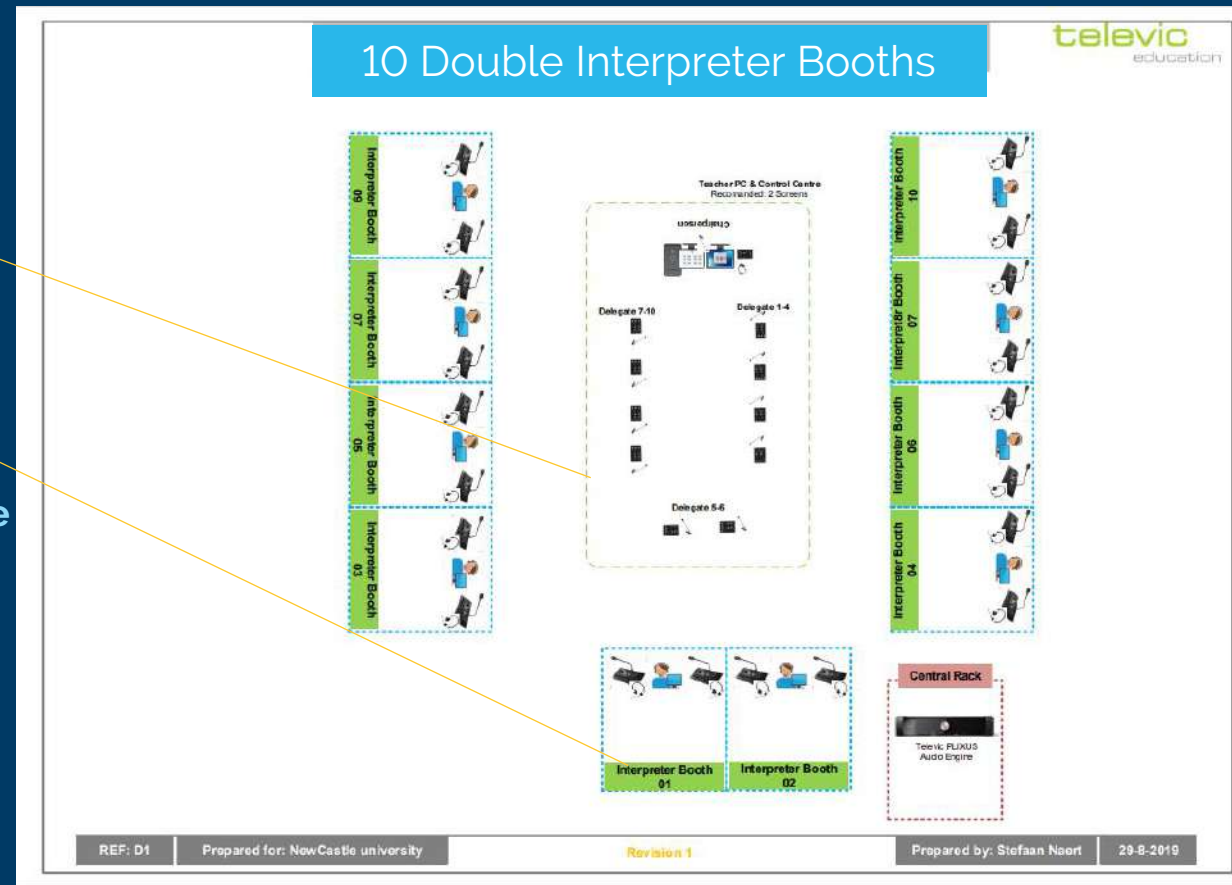

### Flexible Booking Options

Additional booths can be booked separately, allowing scalable interpretation services tailored to event size.

# T&I 3.14 – Flexible Solutions For Global Reach

1. Fully Integrated Conference Desk,
2. Dual Booths
3. Hybrid Mode  
Use Zoom/Teams for remote speakers & Interpretation
4. Hybrid Mode  
Broadcast FDC Floor or FDC Booth to OLB 3.14

## Hybrid and Remote Conferencing
