

ATHENA SWAN

Gold University Application March 2025

Application information

[Redacted for publication]

Contents

Application information

Section 1: An overview of the university and its approach to gender equality

- 1. Letter of endorsement from the head of the university
- 2. Description of the university and its context
- 3. Governance and recognise of equality, diversity and inclusion work
- 4. Development, evaluation and effectiveness of policies
- 5. Athena Swan self-assessment process

Section 2: An evaluation of the university's progress and success

- 1. Evaluating progress against the previous action plan
- 2. Evaluating success against the university's key priorities

Section 3: An assessment of the university's sector-leading activity

- 1. Maintaining good practice and innovation
- 2. Supporting others to improve

Section 4: An assessment of the university's gender equality context

- 1. Culture, inclusion and belonging
- 2. Key priorities for future action plan

Section 5: Future action plan

1. Action plan

Appendix 1: Culture survey data

Appendix 2: Data tables

Appendix 3: Glossary

Data statement

All data in our submission are based on headcount. The reporting period for this submission is 31st July 2019 (covering academic year (AY) 2018/19) to 31st July 2024 (covering AY 2023/24).

Gender statement

We report on data pertaining to colleagues' sex (female/male) rather than their gender (e.g., man/ woman/non-binary) as this is what the University currently collects from colleagues. Therefore, we use the language of female/male colleagues to describe our sex data in this application. We recognise sex does not equate with gender and that gender is not binary, and we aspire to enhance our data collection and reporting on gender data in the future (AP20, AP21).

Imagery

Images are taken from public sources or used with permission.

Grading systems

Newcastle University uses the following Professional Services (PS) staff grading system. We use the term PS throughout to refer to these grades.

Table 1: Newcastle University's Professional Services Staff Grading System

| Grade | Description |
|-------|---|
| Α | Cleaners and Catering Assistants |
| В | Porters, Gardeners and Maintenance Assistants |
| С | Clerical/Administrators, Library |
| D | Human Resources (HR), Finance, Administrators |
| E | Office Manager, Technician, Finance |
| F | Professional HR, Finance and IT, Professional Student Support |
| | e.g. Therapist |
| G | Professional HR, Finance and IT, Manager |
| Н | Senior Manager |
| IB | Director |

Newcastle University uses the following staff grading system for Academics and Researchers:

Table 2: Newcastle University's Academic and Research Staff Grading System

| Grade | Description |
|-------|--|
| F | Demonstrator/Lecturer/ Research Assistant/Associate |
| G | Lecturer/ Senior Research Associate/Research Fellows/Post- |
| | doctoral Research Associates |
| Н | Senior Lecturer/ Principal Research Associate |
| IA | Reader |
| IB | Professor |

Clinical and non-clinical staff at Newcastle University have one of three contract types:

- Research-only (R-only): For Research staff in Schools and Institutes, including Research Assistants, Post-Doctoral Research Associates, Research Fellows and other Senior Researchers, including Principal Research Associates (PRA) and Senior Research Associates (SRA).
- Teaching and Research (T&R): Staff are research-oriented and promoted on the basis of teaching and research excellence. They contribute research-led teaching to our students, and are included in the REF.
- Teaching and Scholarship (T&S): Staff focus on high quality teaching and improving student performance and experience. They are promoted on their contributions in teaching and pedagogical research and are not REF returnable.

Note: We refer to action points in our previous action plan (2019-25) as PAP with the number e.g. PAP12; we refer to action points in our future action plan (2025-30) as AP with the number e.g. AP8. As per the guidance, these APs have not been included in the word count.

Section 1: An overview of the university and its approach to gender equality

1.1 Letter of endorsement from the head of the university

Please insert (with appropriate letterhead) a signed letter of endorsement from the head of the university.

28th February 2025

Professor C P Day CBE DL MA, MD, PhD, FMedSci, FRCP Vice-Chancellor and President

Newcastle University King's Gate Newcastle upon Tyne NE1 7RU

Dear Athena Swan Review Panel,

I have pleasure in presenting Newcastle University's application for a Gold Athena Swan (AS) award. This application has been reviewed, agreed upon and is fully supported by my Executive Board.

Our application is built on over 15 years of sustained commitment to the AS charter principles and to embedding gender equality across our University. We have recently reaffirmed our commitment to equality, diversity and inclusion (EDI) as one of our three core values in the refresh of our 2018 Vision and Strategy.

Since gaining our second Institutional Silver award in 2020, we have celebrated many gender equality successes and seen our work impact other institutions. We have delivered on our three priority areas of working to close the gender pay gap, increasing the proportion of women in leadership roles and diversifying our recruitment processes.

In 2020, we appointed our first female Chancellor, Imtiaz Darker OBE, in 2023 Professor Stephanie Glendinning became our first female Pro-Vice-Chancellor of the Faculty of Science, Agriculture and Engineering (SAgE) and in 2024 Pat Ritchie CBE became our first female Chair of Council. I was also delighted that the achievements of four of our senior women were recognised in the 2025 New Year Honours List.

Among our many achievements since our last submission we have:

- Increased the proportion of female Heads of School (41% in 2019, 50% in 2024); 51.1% of Senate members are female (from 47.1% in 2019); 34% of our professors are female (from 28.9% in 2019; Russell Group average 31%).
- Two faculties have achieved Silver Faculty awards; two Schools in SAgE have Silver and two have Bronze awards.
- Strengthened our family-friendly polices to include a family time policy with paid time off for foster carers and those undergoing assisted conception; enhanced

provision for adoptive parents through our new adoption policy, and introduced bereavement leave for colleagues who experience a miscarriage.

• Increased our resources for EDI including appointing new posts of Head of EDI, EDI Training Lead, and EDI Advisor (Data and Insights).

Through extensive consultation and evaluation of data collected through University, Faculty and School surveys and focus groups, we have agreed five priority areas for the next five years which respond to our institutional needs:

- Visibility and Oversight
- · Recruitment and Onboarding
- Career Development and Talent and Succession
- Work Life Balance and Wellbeing
- Student Experience and Outcomes

Our longitudinal commitment to increasing the proportion of women in leadership roles is embedded within each priority.

We are committed to other EDI characteristics as evidenced through our: Race Equality Charter Bronze award (2022), a Stonewall Global Equalities Champion (2016), membership of Disability Confident (2022), and accreditation as a University of Sanctuary (2021). We have aligned these action plans through a new digital community space enabling us to work cross-institutionally, align activity and develop an ambitious intersectional AS action plan.

I champion gender equality both within NU and externally e.g. dedicating one of my annual VC Celebrating Success events to EDI, supporting NU Women events, and addressing international conferences on gender topics.

In my previous letter of endorsement, I set out my ambition for our University to aim for a Gold award. Despite the many challenges we are facing in Higher Education, our commitment to EDI, to growing and strengthening our gender equality work and holding true to our aspiration to be a fully inclusive global University, remains unchanged. Indeed, I believe it is more important than ever to our future sustainability and success.

Yours sincerely,

Professor Chris Day CBE Vice-Chancellor and President

chris.day@ncl.ac.uk www.ncl.ac.uk

1.2 Description of the university and its context

Please provide an introduction to the university.

Newcastle University (NU) is a civic university with a longstanding commitment to EDI and social justice, with EDI being one of our three core values.

As a research-intensive, global institution, NU is ranked in the top 130 universities in the world (QS World University Rankings), in the top 100 for sustainable development (Times Higher Education Impact Rankings), 15th for research power in Research Excellence Framework (REF) 2021, and was awarded a Silver rating in the Teaching Excellence Framework (2024).

NU is home to over 29,000 students from over 140 countries and offers undergraduate (UG), postgraduate taught (PGT) and research degrees in over 40 subject areas. 21% of our students are from the local area. We have a PARTNERS Programme to support widening participation.

NU is located in Newcastle city centre in North East England, and has two overseas campuses; degrees are delivered in Malaysia (NUMed; medicine, biomedical sciences; established 2009) and Singapore (NUiS; engineering; established 2009).

NU has 6,574 colleagues (2024); 1,916 academics, 1,017 researchers and 3,641 PS colleagues. A total of 3,643 (55.4%) colleagues are female, 1.4% increase since our previous AS application. Females are well represented among our students (UG, PGT, postgraduate research (PGR)), Research Assistants and Lecturers (Figure 1); although representation at the more senior grades has increased over time, it is less than males (see Appendix 2, Tables 1, 8.1-8.5).

Figure 1: Academic pipeline at Newcastle University, 2024

NU has three faculties (Faculty of Medical Sciences (FMS); Faculty of Humanities, Arts and Social Sciences (HaSS), Faculty of Science, Agriculture and Engineering (SAgE) each with a different structure and size, and a PS Directorate (Figure 2).

NU in Singapore

NU has seven EDI Staff Networks (NU Women, Rainbow@Ncl, NU Race Equality Network (NU REN), NU Parents, Carers Network, Disability Interest Group (DIG), NU TechNET EDI Group) which bring colleagues and PGR students together to share experiences, provide support, host events (e.g. Figure 3) and play a key consultative role in University-wide policies and strategies (Section 4).

Figure 3: NU Women Interactive Workshop – Good Girl Deprogramming, 2024

NU has been involved with the AS charter since 2009 (Bronze award; Bronze renewal, 2012, Silver 2016, Silver 2020). All units have AS awards: FMS has a second Silver Faculty award, HaSS a Silver Faculty award, the SAgE Schools of Natural and Environmental Sciences (SNES) and Maths, Statistics and Physics (MSP) have Silver awards, and the Schools of Engineering and of Computing have Bronze awards.

We have been a Stonewall Global Equalities Champion since 2016, achieved a Race Equality Charter (REC) Bronze award in 2022, member of the Business Disability Forum (2022), awarded University of Sanctuary status (UoS) in 2021 (reaccredited, 2024) and Disability Confident Level 2 in 2024 (member since 2022).

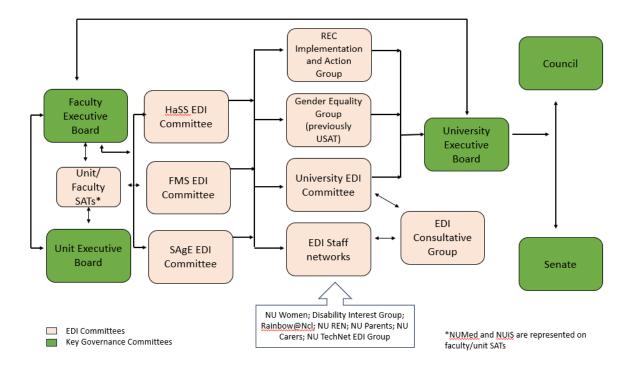

Please see VC's letter for examples of gender-related successes since our last application.

1.3 Governance and recognise of equality, diversity and inclusion work

Please provide a description of your equality, diversity and inclusion (EDI) structures, staff and university-level resources.

Figure 4 summarises NU's EDI structures.

Figure 4: Newcastle University's EDI structures

Following discussion at the University Self-assessment team (USAT) meetings in 2023-24, the USAT became the Gender Equality Group (GEG) to represent broader gender-based initiatives as well as AS. The GEG remains our USAT responsible for driving forward our commitment to the AS charter.

The GEG reports into University EDI Committee (UEDIC), a sub-committee of University Executive Board (UEB), through the co-chairs (Dean of EDI (DEDI) and Director of People Engagement and Culture (DPEC)), and through UEB to Senate and Council.

Each faculty has a Director of EDI (FDEDI), who are members of GEG, their Faculty Executive Boards (FEBs), Faculty EDI Committees (FEDIC) and UEDIC ensuring GEG business is acted on within their faculties. The DPEC co-chair is a member of the People Matters Group (PMG), which provides strategic advice and guidance on people matters, chaired by the Executive Director of People Services, ensuring GEG business feeds into the PMG.

Since our last application, and in support of our aspiration to apply for Institutional Gold, we increased our EDI resources, including appointing three new posts, expanding the existing EDI team of DEDI, three FDEDIs, EDI Charters Advisor (EDICA) and three Faculty EDI Advisors. We launched our EDI Fund (EDIF) in Oct 2017 from strategic funds committed by UEB dedicated to supporting EDI projects/events, funds awarded to colleagues and students, and our EDI Networks; 74 projects funded to date, an investment of >£285k.

1.4 Development, evaluation and effectiveness of policies

Please describe the processes in place for developing, evaluating and revising university policies.

Through consultation, our Policy Team has produced a protocol for those developing a new policy or reviewing an existing policy. This involves a step-by-step guide of actions to ensure colleagues are engaged with and consulted: clear aim of the new/updated policy, benchmarking against other Higher Education Institutions (HEI)/non-HEIs, equality analysis (EA), timeline, and ways to promote the new policy within the University. Key to this protocol is EA, recommended across the university since 2019, mandatory since 2023, and is now integral to developing, consulting on, and evaluating policies. EA takes place for new policies, revised/changed policies or where no previous EA has been undertaken.

We engage with our EDI Networks and students to support policy review and development e.g. when reviewing our family-friendly policies, Rainbow@Ncl highlighted the importance of recognising that not all families look the same and that our policies should reflect that. We changed the title of our paternity policy to 'Paternity/Partner Policy' and our maternity policy to 'Maternity/Pregnancy Policy' and made the language gender neutral; NU Student Union (NUSU) society 'It Happens Here' supported the review of our personal relationships at work policy.

Our Policy Team set up a MS Teams' channel (October 2023), via which the chairs and co-chairs of the EDI Networks are informed about future policy reviews. This enables them to input in a timely way to the EA for new policies, policy changes and amendments. The EDI Consultative Group (EDICG; consisting of members from across the University, students, EDI Networks and Trade Union representatives) plays a key consultative role in university-wide policies and strategies, ensuring that EDI considerations are integrated into decision-making. The EDICG collaborate with the Policy Team and have developed their work and role through a consultative toolkit, ensuring the group is independent, representative, and inclusive.

Information on EAs, guidance, and case studies are easily accessible on our website. Training is provided for colleagues required to undertake EA; Action Learning Sets support good practice and enable evaluation of both the developments under consideration and the workings of EA itself. We will continue to add to these resources and provide training (AP8). Feedback has been positive:

'The Equality Analysis process was communicated very clearly by the Advisor, and it provided a practical framework to efficiently conduct the analysis'.

SAgE Strategic Projects Manager

1.5 Athena Swan self-assessment process

Please provide an overview of who was involved in the preparation of this application, how it was prepared, and what plans are in place to support the university's future gender equality work.

This application was overseen by the GEG which has 16 members (Table 3) comprising: Academics, Researchers, PS colleagues, PG students, Faculty and Central Services representation, colleagues from different ethnic groups, job roles, work-life balance experiences, caring responsibilities and sexual orientation. While there is over-representation of women (11, 69%W), we have more male members than in our previous USAT (24% in 2019, 31% in 2024). GEG membership will be reviewed annually (AP5) to address any underrepresentation. New members will be recruited via an open invitation to colleagues through our University-wide newsletter, NU Connections, or an invite by the co-chairs to individuals holding specific University roles considered necessary to be represented.

Staff time associated with GEG membership is recognised in our Academic Workload Allocation Model (WAM) under citizenship activities which have been a promotion criterion since 2020. We do not have a WAM for PS colleagues; their contribution is agreed with their line manager and can be recognised through our Spotlight awards. We reviewed how PS colleague contributions can be better acknowledged (PAP1.9B) and an agreed approach has been taken forward. We meet in hybrid format four times a year; meetings continued online during the Covid-19 pandemic.

We did not progress with appointing an external member to join the GEG (PAP1.14E); see section on Plans for the Future.

[Redacted for publication]

This application's core writing group comprised the EDICA, EDIAD&I and GEG cochairs, with input from the GEG, colleagues and students across the University. The EDICA assessed University, Faculty/School surveys, culture surveys, existing action plans (Appendix 1), and guided conversations with delivery teams to identify and agree actions.

The self-assessment was based on analysis of qualitative and quantitative datasets (Table 4).

Table 4: Summary of data sources that have informed our self-assessment

| Year | Source | Engagement | Details |
|------|---|--|---|
| 2019 | EDI Annual Report | Analysis of the 2018/19 colleague population = 6276 colleagues 3341 females 2770 males | Data in relation to workforce and pay gaps |
| 2019 | Pulse survey | 2440 respondents | Data regarding culture and experience for colleagues |
| 2020 | Covid-19 Colleague Wellbeing Survey | 2927 respondents 790 male (30.6%), 1778 female (68.9%), 12 prefer to self-describe (0.5%) | Survey about the impact of Covid-19 on colleagues e.g. increased caring responsibilities |
| 2022 | REC action plan | Two culture surveys 2019 survey response rate was approximately the same for majority (18%) and MEG (18.1%) colleagues 2021 survey response rate was 8% for majority groups and 14% for MEG. | Data in relation to colleagues, students, research, campus and estates |
| 2022 | Gender Equality Plan | Self-assessment linked to previous Athena Swan action plan | Focus on gender equality with consideration to work-life balance and organisational culture |
| 2022 | Research Culture Survey | 841 respondents | Encompasses behaviours, values, |

| 2024 | HaSS Culture Survey | Culture survey with 451 respondents and 3 focus groups with 20 participants in total. Culture survey sex split: 304 females 111 males 32 prefer not to say | Data in relation to communications, methods of collaboration, and progression |
| 2024 | Technicians Commitment | Engaged one third of technician's community in discussion groups and online survey | Plan focuses on people, increasing visibility, increasing diversity in technical roles, developing skills, developing pipeline and engaging with local area to develop partnerships |
| 2024 | Parents and Carers Survey (NUPCS) | 422 respondents 250 females 107 males 31 prefer not to say 34 no response | 67.7% of respondents not aware of website detailing support for student parents and carers 57.8% not aware of website for colleague parents and carers |
| 2024 | Access and Participation Plan (APP) | Considers whole student body (29,500 students, 52% female, 48% male) | Narrowing attainment gap is a priority of APP |
| 2024 | Inclusive Newcastle Knowledge Centre report | Review of awarding gap in Engineering between black and white students | Awarding gap is present, opportunities need to be created, including networking |
| 2024 | Pulse Survey: Wellbeing and Workload | 3002 respondents (47% of colleague population) 1549 females 916 males | Data in relation to experience of working environment |

| | | 282 other 167 prefer not to say 88 did not answer | |
|------|--|---|--|
| 2024 | Pulse Survey: Personal and Career Development Survey | 2329 respondents (34.8% of colleague population) 1235 females 739 males 182 prefer not to say 161 did not answer 12 others | Data in relation to perceptions and experiences regarding career progression |
| 2024 | EDI Annual Report | Analysis of 2023/24 colleague population = 6574 3643 females 2931 males | Data in relation to workforce and pay gaps |

The EDIAD&I prepared data for Appendix 2, working with the relevant teams e.g. Recruitment, Promotions, Planning Office.

The GEG was pleased with the positive comments from our previous application. Three areas were highlighted for continued prioritisation:

- 1. Improving representation of women in SAgE. There has been an increase of female colleagues across all academic grades e.g. in 2019 11.4% were Professors, 17.4% in 2024. Female applicants have been more successful in being shortlisted and following interview compared to males (Appendix 2: Table 50, Chart 25). See PAPs1.1C2, 1.17B, 2.1A, 2.4A, 3.8A. See APs19, 23, 45, 53.
- 2. Succession planning for HoS. A new process for succession planning has been developed, is currently being rolled out to cover UEB, FEBs and will be extended to School and Institute leadership teams. PAP5.4B. AP37.
- 3. Information on childcare provision. We planned a feasibility study of providing childcare facilities in 2020 but this was not progressed due to Covid-19. We have received feedback that colleagues prefer to manage childcare in their local area due to increase working from home since Covid-19. We have strengthened our relationships with existing nursery provision across the city. PAPs6.11A, 6.11B. AP's50, 53, 73.

The GEG met more often during the year prior to this submission with email communication between meetings. Regular presentations on progress were given and specific actions were discussed and refined. In the last six months, we held four half-day meetings to refine and confirm the action plan.

The FDEDIs supported the alignment of the University's action plan with the faculty (FMS and HaSS) and SAgE Schools' action plans. We consulted with: colleagues through surveys and focus groups (Table 4), EDI Networks, UEDIC meetings, where AS is a standing item, and discussion and feedback from UEB, Senate and Council.

We engaged externally with the Network of EDI Academic Leads (NEDIAL), Gold AS institutional leads, our Advance HE (AHE) AS lead, and received helpful feedback through a AHE review of our draft application. Our application has been discussed and approved by UEB, Senate and Council.

Plans for the future

The GEG will continue to meet four times/year to oversee the implementation of the action plan. We have developed a Shared Charters Space (SCS) in which we bring together our charter action plans in a digital platform. This has facilitated working synergistically across charters, the ability to work intersectionally, and the efficiency in monitoring where actions are in the implementation cycle.

We will review GEG membership annually. Some membership is based on university role but we will also have an open call for members through NU Connections, to ensure others have an opportunity to participate, and a targeted approach to address underrepresentation (AP5). We will undertake a survey of GEG members to identify what further support they need.

Our gender equality work will continue to be actively discussed at UEDIC, to ensure senior leaders are aware, active in, and supportive. This work will continue to be promoted through our website, regular communication channels, NU Connections, celebrated through diversity days and the Vice-Chancellor's EDI-focused annual Celebrating Success event.

We will establish an External Advisory Group (EAG) consisting of a gender equality expert from three Universities to meet with the GEG annually to review our progress and provide external oversight (AP6).

Section 2: An evaluation of the university's progress and success

2.1 Evaluating progress against the previous action plan

Please provide a critical evaluation of your most recent action plan and any other actions you have initiated since your award.

The GEG is accountable for monitoring AS progress, offers a forum for feedback to action leads and to the EDICA, and ensures delivery of the action plan. Action plan review is a standing item at each meeting. Action leads provided updates at meetings on where in the implementation cycle their action(s) was/were, any barriers to progress or changes to timelines. The EDICA was responsible for working with action leads between GEG meetings and updating the live action plan. During the past year, our SCS has gone live and is accessible to action plan owners. This digital platform has greatly facilitated monitoring and delivering actions and supported the development of our 2025-30 action plan.

The EDICA worked closely with the EDIAD&I to ensure the action plan included relevant data and to report the degree of completion for actions using the red, amber, green (RAG) method.

Evaluation of actions has been through University pulse surveys, other surveys, focus groups, listening exercises, working groups, feedback at the six-weekly EDI Network chairs meetings, and 1:1 discussions. Some actions were amended or deemed no longer relevant (see below) or the timing of delivery was affected by Covid-19 (e.g. PAP6.10 referred to flexible working but work patterns have changed due to blended working, PAP6.11 referred to a nursery feasibility study but parents now are using local childcare due to working from home) and others by the financial situation affecting many Universities (e.g. PAPs2.3A, 2.3B referring to bridging funds for research grants).

Progress with our previous action plan is summarised below using the RAG rating method as described in the AS guidance.

Green-rated actions:

189 actions (91.7% of 206 total actions). Progress has been made against all priority areas - see section 2 for in depth examples about progress made, including longitudinal progress.

The following have supported the high proportion of actions rated green:

- Additional investment supported by UEB in our EDI team including an EDI advisor dedicated to our charters work (EDICA) and one dedicated to data analysis (EDIAD&I) has been critical
- Creation of a combined tracker for AS and REC plans, increased efficiency regarding meetings with action leads
- Development of the SCS platform to host all AS action plans
- Having GEG members who contribute to AS review panels
- Having the action plan as a standing item at GEG meetings and feedback from action owners enabled identification of barriers early in the cycle

- Assigning actions to job role rather than a person addressing staff turnover
- Establishing working groups to progress particular projects e.g. review of the Returners Support Programme (RSP), improving training materials and resources for EA
- GEG membership including those from faculties and EDI Networks ensuring activity is joined up and best practice is shared across the University

Amber-rated actions:

Ten actions (4.9% of total actions)

- PAPs1.9A, 1.9B, 1.9C aimed to review workload allocation (WA) for SAT chairs/ members and those undertaking AS work, to establish how PS roles in SATs are recognised, and to draft formal guidelines regarding WA for SATs. A WA model is in place in the academic space for chairs and membership under 'citizen activities'. Involvement in citizenship activities e.g. AS work, is a promotion criterion. A group was set up to review WA for PS colleagues which concluded that PS colleagues should agree commitments informally with line managers, and that no formal WA model would be progressed. Links to AP41.
- PAP1.12A, share findings from EDIF projects with EB, was not undertaken as many funded projects were events or training; these were communicated to the University community via NU Connections.
- PAPs2.3A, 2.3B, refer to extending the bridging funds for research grants approach used by FMS to all faculties. There is an aim to extend this across all faculties but the financial situation meant that this could not be implemented. Work is still ongoing.
- PAP2.12B 'Develop clear and tangible criteria for citizenship' will be reviewed as part of a wider review of promotions criteria (links to AP 43); 2.12E refers to modernised academic promotions process; this is linked to ongoing work on core systems (APs44, 45).
- PAPs3.5A, 3.5B, refer to systems that capture EDI data for job offer holders and reasons for not taking up roles; part of this will be delivered as a future action (AP19) but reason for not taking up role is a challenge as not everyone wants to provide a reason.

Red-rated actions:

Seven actions (3.4% of total actions)

- PAP2.6 commits to creating a standard leavers survey which captures equality data. The appropriate system to deliver this survey is now in place and links to AP42.
- PAP1.14E aimed to seek a USAT member from outside HE to support learning and adoption of best practice. This action is superseded by a new EAG (AP6).

- PAP1.16B 'Develop Faculty/unit communication plans with join up to the University communication strategy'. The Faculty/unit communication plans were aligned to the University EDI Strategy. Links to AP3.
- PAP2.11B 'Prepare case studies on those who have undergone a secondment'
 was not progressed. There is guidance available about secondments and
 opportunities are published on the University vacancies site.
- PAP3.9D 'Organise two career conversation events annually for men in PS roles'
 was not achieved as there wasn't sufficient support from male colleagues to
 progress this action.
- PAP5.4B 'Leadership and Succession Group to take responsibility for cascading succession thinking throughout the organisation' has been superseded by planned Talent and Succession conversations (AP37).
- PAP6.2B 'Make funds automatically available to cover locally generated solutions for teaching cover' has been superseded by new guidance for the colleague to inform the line manager of leave with one semester of notice, and guidance for line manager to find cover and build a case for the HoS/Director of Education to review if budget is required.

Newcastle University Previous Action Plan

Institutional Athena SWAN Action Plan (2019-25)

"Newcastle University is committed to developing a fully inclusive global University community in which staff and students from all sectors of society can thrive equally."

Our Equality, Diversity and Inclusion (EDI) vision was developed following consultation with staff and endorsed at a meeting (13/7/2018) of the senior team consisting of the Vice-Chancellor (VC), the three Faculty Pro-Vice-Chancellors (PVCs), Executive Director of People Services (EDPS), the Dean of EDI and the three Faculty Directors of EDI (FDEDI). Our Action Plan seeks to support our vision through the delivery of actions that are aspirational whilst being realistic. To achieve this, we have organised our actions around gender equality into seven themes. Our Action Plan details activities under each of the themes of:

- ✓ Further embedding Athena SWAN and EDI Principles across the whole University
- ✓ Supporting career progression for all staff
- ✓ Supporting a more progressive approach to staff recruitment
- ✓ Intersectionality: consider the intersection of gender and BAME

- ✓ Increasing women in leadership positions
- ✓ Supporting staff who are carers
- ✓ Supporting staff who identify as Trans or Non-binary

Our Action Plan is aligned to our University policy and planning activity. We use a PINK/AMBER/BLUE to denote action priority: PINK denotes that all activity relating to the action will be completed by the end of the first year (end of Dec 2020), AMBER denotes that activities relating to the action will be completed between Jan 2021 and the end of June 2022, and BLUE denotes that all activities relating to the action will be completed between July 2022 and the end of Dec 2023. If a month is given in the Timeframe, we mean the action will be completed by the end of that month. We give the Role or Team responsible for delivery of the actions.

2.2 Evaluating success against the university's key priorities

Our previous AS plan (2019-2025) included three key priority areas; Closing the GPG, Diversifying our recruitment processes and approaches, and Increasing the proportion of women in leadership roles. Progress against each priority is given below.

2.2.1 Closing the GPG

A range of actions aimed to reduce the GPG have been delivered on (below). We publish our gender, disability and ethnicity pay gaps annually.

GPG analysis: The Reward Team examined areas that had not previously been explored in GPG reviews: pay differentials due to concerns pay differences may persist upon appointment and maintain the GPG (PAP2.9), roles to identify if GPGs were present including disability pay gap (PAP2.8A). All findings were incorporated into subsequent GPG reports. Table 5 shows changes in our gender and disability pay gaps since our last application.

Table 5: Changes in Gender and Disability Pay Gaps 2019 to 2024

| Pay Gap | Median 2019 | Median 2024 | Mean 2019 | Mean 2024 |
|------------|-------------|-------------|-----------|-----------|
| Gender | 17.1% | 14.3% | 18.5% | 15.5% |
| Disability | 8.4% | 6.1% | 14.7% | 10.5% |

The **median ethnicity pay gap** in 2024 is 3.0% in favour of minoritised ethnic colleagues (compared to 11.1% in favour of white colleagues in 2019), and the **mean ethnicity pay gap** in 2024 has decreased to 0.4% in favour of white colleagues (14.5% in favour of white colleagues in 2019).

While our GPG has reduced, there is more work to do. For example, while there have been increases in sharing rates, we acknowledge that disclosure rates are low. We have actions in our future plan to broaden diversity categories (AP20) to include a self-describe option for gender and a data sharing campaign in partnership with our EDI Networks to encourage declaration for all protected characteristics (AP21).

Family-friendly policies: Family-friendly policies are a critical aspect of supporting gender equality and addressing the GPG as they specifically address barriers faced by females. Given that females are more likely to be primary carers and more likely to access parental leave (F:M ratio 54%:25%, NUPCS 2024), these policies have a direct impact on female colleagues. There has been a range of positive activity in including raising awareness of shared parental leave (PAP6.8), developing resources for all types of parental leave (PAP6.9B), highlighting the offer and policies to prospective applicants (PAP3.8B), undertaking a new parents and carers survey (PAP6.1A), updating the adoption policy to increase flexibility to attend appointments (PAP6.3A), and broadening the RSP to include colleagues returning from long-term

carers leave, reducing the leave period for eligibility from 18 weeks to 12 weeks, and including PS colleagues in the provision (PAPs6.4A, 6.4B). There has been a positive impact from this work, summarised by an increase in those who agree with the statement 'I found the policies of the University suited my needs', from 37.5% in 2017 NUPCS (541 total respondents) to 51.2% in 2024 NUPCS (422 total respondents). These actions are supporting females so they are not disproportionately affected by career breaks or gaps in professional momentum. This support helps mitigate the longer-term impact on career progression, which can contribute to the GPG, and serve to provide more equitable opportunities, ultimately working towards closing the GPG.

2.2.2 Diversifying our recruitment processes and approaches

Examples of the range of activities towards diversifying our recruitment processes and approaches include:

Inclusive Recruitment training: PAPs 3.3A, 3.6D committed to providing inclusive recruitment training to recruiters who are members of selection panels. This training has been developed and consists of three in-person modules: 1) Launching your campaign, 2) Inclusive panels and shortlisting, and 3) Assessing, Interviewing and Making an offer. The modules include training about Unconscious Bias and provide recruiters with knowledge and capabilities they can apply in key elements of the recruitment process.

'I went through the recruitment process in Newcastle in 2025. I found the whole approach welcoming, supportive and inclusive. In fact, the recruitment process was one of the reasons I decided to accept the role when I was offered it - I felt supported throughout and considerable care was taken both in the recruitment process itself and the subsequent onboarding. Consideration was given to the fact that I have a family, with flexible arrangements raised by the University rather than by me, and an open approach to any needs I may have in managing the new role and home life'.

PVC, HASS

In the first year (academic year 2022-23), 93 employees attended Recruitment module (RM)1, 83 employees attended RM2, and 78 employees attended RM3. The number of attendees declined in 2023-24, 8 employees attended RM1, 9 RM2, and 10 RM3. This was due to an increase in bespoke sessions delivered by the Recruitment Team and the time required to develop an online module which aims to substantially increase engagement for the programme of materials (AP22). This activity has had an impact on the organisation, for example, there has been a shift in the proportion of females and males that are shortlisted for academic and research roles. In 2024, more females were shortlisted (F:M ratio 38%:21%) and appointed (17.5%:11.8%) to academic roles compared to 2020 when more males were shortlisted (84%:100%) and appointed (61.5%:85.7%). We will continue to review our processes to ensure that they are fair to all applying (see Figure 5 for 2020-2024)

data). The Recruitment Team also plan to continue delivering in person and bespoke training once the online programme has been launched.

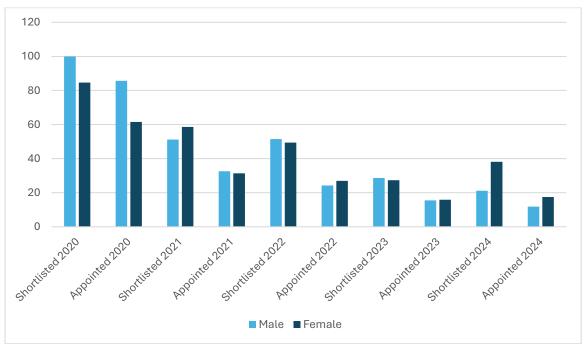

Figure 5: Proportion of males and females shortlisted and appointed for academic and research roles from 2020-2024.

Advertising roles: PAPs 3.2B, 3.7, 3.9A,3.9B, 3.9C referred to broadening methods for advertising roles including the use of gender decoder, including the University's values in the person specification, and using case studies on our website to showcase underrepresented roles. These actions have been completed and have contributed to changes in the organisation. For example, we have seen a growth in applications by females for academic and research roles from 61 in 2019 to 286 in 2024, comparable to the increase in male applicants during the same period (from 40 in 2019 to 228 in 2024). AP23 builds on this work by creating an intersectional career journey webpage which includes videos of people from underrepresented groups in different job roles in the institution. We will also explore free to use platforms that promote roles to a broader range of groups whilst reducing the barrier of paid for alternatives (APs25, 26).

Reporting: PAPs 3.6A,3.6B refer to enhanced reporting and annual reporting regarding recruitment. The challenge in previous years has been the requirement to manually manipulate data which reduces efficiency and access. The 2025-30 plan (AP19) commits to creating an automated dashboard for recruitment data which will automate access to diversity data for all stages of the recruitment process. This will greatly increase efficiency and agility by giving live access to diversity data at all stages of the recruitment process. This will support us in creating more targeted activity to refine our approach and increase accessibility for applicants.

2.2.3 Increasing the proportion of women in leadership roles

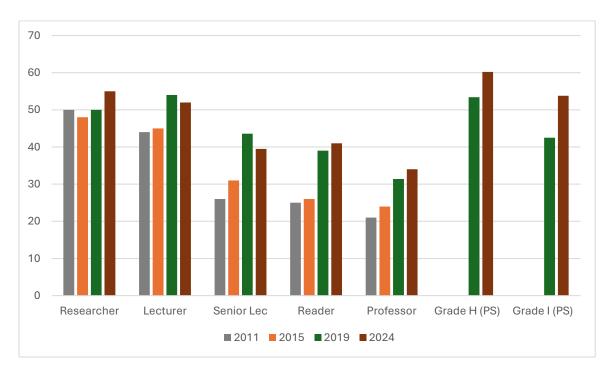

Figure 6: Proportion of females in job roles since 2011*

*Please note, we started to report PS data in our AS applications in 2019.

Figure 6 demonstrates increases in the both the number and proportion of females in the different job roles in our academic pipeline since 2011. For example, an increase in female Senior Lecturers from 26% in 2011 (81 females) to 40% (200 females) in 2024, demonstrating we have a pipeline coming through to Professor, and an increase in female Professors from 21% (89 females) in 2011 to 34% (148 females) in 2024. Figure 6 also shows an increase of females in the two highest PS grades, from 53.4% (31 females) in 2019 to 60.2% (65 females) in 2024 for Grade H and from 42.5% (17 females) in 2019 to 53.8% (28 females) in 2024 for Grade IB. This demonstrates consistent longitudinal progress for the proportion of Women in Leadership roles since 2011.

There has been an increase in the proportion of females in all academic roles, beyond those identified in Figure 6 above, since 2019. Clinical Researcher roles had achieved gender equality in 2019 and this has remained the case in 2024 (Appendix 2, Tables 8.1-8.5, Chart 1). We have also seen an increased proportion of female Head's of School since 2014, from 23% in 2014, 41% in 2019, to 50% in 2024.

Actions related to increasing the proportion of Women in Leadership positions have existed in our 2012-2015, 2016-2019, and 2019-2025 institutional action plans. Examples of actions in this priority area include:

Mentoring: our 2012-2015 action plan included PAP1c 'Further develop mentoring scheme to increase participation rates among research staff, and to extend to

academic staff. This focused on FMS with 84 trained mentors (F:M ratio 40:44) and 24 mentees by 2021. The mentoring scheme was piloted and launched in SAgE in 2013. This led to the creation of an online matching system in November 2013. The number of mentees increased by 53% in 2014 and the scheme successfully met targets and created an additional Senior Women in Academia Coaching and Mentoring Programme which produced a further 13 matches. A 2015 survey of NU Women found that 60% of members knew where to find information about mentoring.

'The programme has helped to make my approach to mentoring much more professional',

Senior Women in Academia Coaching and Mentoring Programme attendee, 2014.

The 2016-2019 plan included PAP3b 'Continue to improve the communication of our mentoring programmes across the University', which led to the creation of the NU Mentoring programme in 2018 which offered an average of 70 mentor/mentee relationships per year to people across the University. The HASS faculty also delivered promotions mentoring which was attended by more females (F:M ratio 54%:46%).

Our most recent action plan (2019-2025) included actions that encourage shadowing opportunities via the mentoring scheme (PAP5.3) and the creation of career development opportunities for PS colleagues which included talent planning conversations (PAP2.15A). There is evidence that colleagues can find mentors, e.g. the SAgE ENG culture survey 2023 asked colleagues: 'I have been able to access a mentor when I have wanted one', 14.3% females disagreed, and 23.4% males disagreed and females are more likely to agree that opportunities for career development are fair and transparent (F:M ratio 5.3/10:5.06/10, Personal and Career Development Survey, 2024). The 2025-30 action plan includes AP40 which aims to develop understanding about the demographics of those requesting mentoring, where there is additional need, understand the number and demographics of the mentors currently available, and if there are requests to align mentors and mentees by protected characteristics. This will form the basis of future plans for the mentoring programme.

Committees: There have been a range of activities in our action plans since 2015 with the aim of increasing representation in senior committees. For example, PAP2c aimed to reach 30% females in leadership teams; this commitment was reinforced by the Chair of Council who signed up to the 30% Club. The proportion of females in Council increased from 23% in 2015 to 40% in 2019. The 2019-2025 action plan committed to provide AS training to UEB members (PAP1.5B), AS became a standing item for all University EDI Committee meetings (PAP1.14F), and the aspiration (see VC letter in 2019-2025 application) was agreed and a plan made to prepare for a gold application in partnership with UEB (PAP1.2C). During this period, our Head of Executive and Governance Office targeted promotion of vacancies within senior committees to spaces with wider representation, for example, our staff

networks. The future action plan commits to creating a committee shadowing scheme for underrepresented groups (AP4) and aims to increase overall representation of females to 50% across committees (currently at 44%).

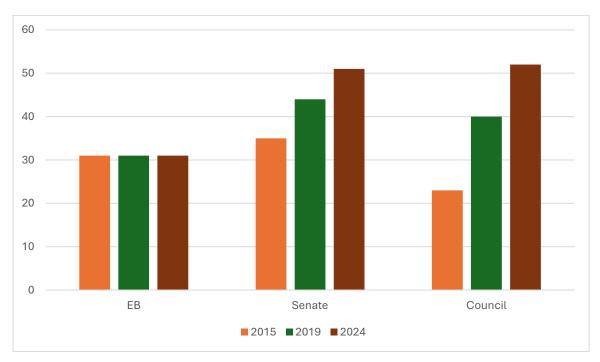

Figure 7: Proportion of females in senior committees since 2015.

Figure 7 demonstrates progress in the representation of females in two out of the three most senior committees in the University since 2015. The figure demonstrates a consistent level of representation of 31% females in our UEB from 2015 to 2024, an increase in representation of females in Council from 23% in 2015 to 52% in 2024, and an increase in representation of females in Senate from 35% in 2015 to 51% in 2024.

Career conversations: The 2016-2019 plan aimed to increase the proportion of colleagues using the annual PDR approach to a minimum of 90% (PAP3F). Our 2016 staff survey, however, raised concerns about the effectiveness and consistency of PDR and the variability of appraiser skills. Based on this feedback, we launched the 'Engage and Aspire' project in Sept 2018, to review the current PDR process and understand the impact on supporting and engaging colleagues. By August 2019, over 845 colleagues had been consulted through focus groups, 1:1 interviews or creativity sessions and including Skype calls with NUMed and a session in NUiS. PDR training was made available for line managers and the approach became established practice. The 2019 Pulse Survey identified that only 21% of respondents agreed they had constructive feedback about their performance in PDR. The 2019-2025 plan set out some goals to review and improve our approach to PDR (PAP2.12F, PAP2.15A) and base the approach on guiding behaviours that align to our organisational values (PAP3.2A). The Conversations & Priorities (C&P) scheme was developed during 2021-2022 and introduced in 2023 with the goal of improving the employee experience of annual review by increasing the quality of conversations. The C&P program was designed to empower line managers with enhanced

resources, skills, and confidence to better support employee progression. While engagement with C&P has been lower compared to the PDR process (35% for C&P compared to 60% for PDR, Personal and Career Development Survey, 2024), valuable feedback has been collected, including higher scores for the clarity of agreed priorities for C&P (7.87/10 for C&P; 7.74/10 for PDR) and a higher rating for how supported colleagues felt in C&P (7.74/10 for C&P; 7.66/10 for PDR).

Looking ahead, the 2025-30 action plan includes specific steps to refresh and improve the C&P approach while ensuring that career conversations remain a central element of the annual appraisal process (AP38). We are committed to gathering ongoing feedback, including evaluating the C&P experience by sex and other protected characteristics, to ensure that the program evolves in a way that better meets the needs of all employees.

Academic Promotions: Our 2016-2019 plan included the AP3D 'Annual review of academic promotions procedures to ensure transparency of criteria and decision making'. This was developed in our 2019-2025 action plan with PAP2.5 which aimed to align progression routes for T&S colleagues to gain consistency with T&R colleagues, increase transparency, and remove the requirement to submit a case for promotion. Our data shows females in FMS are less likely to apply for promotion (F:M ratio 14.6%:15.6%) but more likely to be successful (F:M ratio 86.5%:85.1%) (Appendix 2, Table 54.1) and females in SAgE are more likely to apply (F:M ratio 22.2%:15.4%) and be successful (F:M ratio 86%:72.9%). Females in HASS, however, are more likely to apply (F:M ratio 15.8%:13;8%) but less likely to be successful (F:M ratio 68.3%:70.5%). The HASS and FMS faculties will collaborate to create a faculty promotions toolkit which will be shared with SAgE and contain blogs, guidance and resources to support individuals to develop strong promotions applications (AP45).

Research: Our 2012-2015, 2016-2019, and 2019-2025 plans all included actions referring to the REF. The 2012-2015 plan included a commitment to review the 2014 submission (PAP5b) for gender balance. Findings identified that submissions from females were proportionate to the number of eligible female academics. We also successfully achieved balanced representation in the 2021 REF submission (F:M ratio 50%:50%), ensuring female research contributions are equally represented in the REF. The next phase of progress will consist of specific EDI training for REF panels, including Unconscious Bias training, (AP35) to support ongoing representation in research.

Section 3: An assessment of the university's sector-leading activity

3.1 Maintaining good practice and innovation

Throughout our involvement with the AS charter, we have strived to develop best practice in gender equality, to monitor and evaluate the impact of our policies and guidance to ensure they are inclusive, and to share with others. Examples of innovation in our gender equality work include:

 Our family-friendly policies, a suite of policies developed through staff surveys and consultation, received particular commendation in our previous AS application's feedback. We have continued to consult with our community with caring responsibilities to ensure we are providing the best support possible. Our RSP, which offers funded support to minimise the impact of extended parental leave on a returner's career, has seen enhancements since our last application, e.g., extended to colleagues returning from long-term unpaid carers leave, reduced minimum length of leave from 18 to 12 weeks, and enhanced communications to ensure awareness of the programme. Feedback has been very positive:

'Coming back from parental leave, the Returners Support Programme was really beneficial in giving me the confidence in progressing my career at a time when I might have otherwise paused it so I would really recommend it'.

RSP female recipient

Since its launch in 2017, the RSP has supported >70 colleagues, an investment of >£400k. We were awarded the 2023 UHR Culture Change and Organisational Development award for this project (Figure 5).

Figure 8: 2023 UHR Culture Change and Organisational Development award

- Following wide consultation (survey, discussions with NU Parents and those with caring responsibilities), we co-developed a university-wide Carers Policy which includes: a Carer's Passport; comprehensive manager's guidance to support implementation; and enhanced flexible leave of up to five days for colleagues with caring responsibilities. We established a NU Carers network. We were invited to share this practice at a Carers UK Business Forum meeting (2021) and presented it at the AHE EDI Conference (2023) after which the Universities of Sussex and Sunderland made contact for advice on developing a similar policy.
- Our Travel Policy underwent review following feedback that it could be more inclusive. In consultation with the EDI Networks, it was updated e.g. to enable carers/nursing parents/parents of young children to book suitable accommodation when attending conferences or making research visits. The

policy now includes clear guidance for colleagues travelling with family and others e.g. since July 2024, four colleagues have claimed for childcare at a conference.

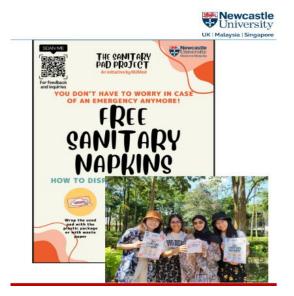

- Commissioned by AHE, NU undertook a consultation exploring the potential for a new holistic approach to EDI work, a key commitment in AHE's strategy. The HEI sector-wide consultation involved an in-depth exploration of stakeholders' (n=279) views on the potential benefits, opportunities, risks and lessons to be learnt. This project has informed the development of AHE's Inclusive Institution Framework. Learning from this project, we have changed our practice by consolidating our institutional AS and REC plans into one document and creating the SCS, a digital space supporting the alignment of our charter action plans.
- We have placed free personal products in bathroom facilities across the University for all our students who menstruate to access; units have similarly provided products for colleagues. 90% (37/41) of respondents in an FMS survey said they thought the free period products were very useful.

'I think it's [providing free personal products] a great thing to do; we had some visitors from other universities who all commented on how great it was.'

Survey respondent

Products are also provided in our international campuses (Figure 9). 80% of respondents in a feedback survey said that this was a great initiative and very helpful in case of menstrual emergency.

Figure 9: Flyer for the NUMed Sanitary Pad Project

.

 Following consulting with NU Parents and our Parents and Carers of Autistic Child Support Group facilitator, our Colleague Health and Wellbeing team now deliver parent-related wellbeing sessions including Managing Parental Burnout and Mindfulness for Parents as well as promoting parent support groups with positive feedback:

'The course was useful and interesting. I came away with useful tips around self-care and how to support myself when faced with parenting challenges.'

Parental Burnout course female attendee

- Where relevant, faculty-specific policies are created to advance gender equality work within units. For example, clinical student feedback identified a need for a policy on head and arm coverings, to maintain patient safety while adhering to faith and religious dress in clinical settings. We developed a policy through extensive consultation with our students, students and colleagues from other medical schools, Board of Medical Studies, NHS clinical partners and faith societies. The draft policy was supported by UEDIC who encouraged it to be extended to other relevant units e.g. School of Education, Language and Communication (HaSS Faculty) with further consultation. The policy has facilitated the provision of 25 arm and 10 head coverings, all benefiting females.
- As part of our commitment as a UoS, we offer Sanctuary scholarships annually. Since 2020, we have awarded 18 scholarships, 11 to females (61%). The life-changing impact of these scholarships is summed up below:

'I am reaching out to express my gratitude for the Sanctuary Scholarship. I completed the program with distinction; this scholarship was pivotal in helping me reach this milestone. I am starting a PhD in 2025. I know I would not be here without the support provided by this scholarship.'

Female NU Sanctuary scholar, 2023-24

Examples of our commitment to the inclusion of and support for people of all gender identities include:

- NUSU established a Trans Fund for students to apply for up to £50 towards new purchases of items such as binders, clothes, makeup, and other items that will make trans, non-binary students, and gender questioning students' lives easier.
- Feedback from Rainbow@Ncl highlighted difficulties faced by trans and nonbinary students who experience barriers and financial burden when clothes shopping. Rainbow@Ncl ran its first Trans Clothes Drive in November 2022

for Trans Awareness Week with three further drives. Over 250 LGBTQ+ NU students have attended the on-campus drives, where they can take donations away. A local trans-owned barbershop has attended each drive offering payas-you-can, accessible, and identity affirming haircuts to over 40 LGBTQ+ students and students with disabilities. The events have been very successful and offer our LGBTQ+ students and colleagues a chance to come together in a welcoming, relaxed environment and celebrate our community. Student feedback has included: "lots of people made new friends at the event"; "it was lovely to be there and see a dedicated space for Newcastle's trans community"; "how empowering it was and how comfortable [they felt]".

3.2. Supporting others to improve

Feedback from our previous application noted that our 'external engagement and leadership is apparent'. We continue to support others to improve their practice or adopt our good practice. Examples include:

GEG members have acted as critical friends for those applying for AS awards including the Universities of Bradford, the West of Scotland, Durham, Northumbria, Teesside and Sunderland; all were successful in gaining their awards. We have acted as reviewers and chairs to AS application panels providing expertise to the review process. We have provided mentorship on gender equality work to other Universities:

'Professor Rankin served as the mentor to Northumbria University's Athena Swan application process. She provided invaluable advice as we worked through our self-assessment process.'

Senior Sponsor for Gender Equality, Northumbria University

- We actively promote the AS charter e.g., presentations on AS to Inside Government (2020), the Westminster Insights EDI in HE conference (2023).
- We regularly present or run workshops at AHE conferences (Figure 10), e.g. Voices of Women in Mathematics: What are the barriers to an academic career? (2022), Inclusive Pronouns (2022), The EDI Toolkit (2023; with follow up from Bangor University), The Family-Friendly Project (2023), The Equality Project (2024), Inclusive Pronouns (2024).

We lead, are members of, and contribute to, EDI networks including: co-chair
of NEDIAL, a community involved in designing, implementing and sustaining
EDI interventions across HEIs; co-founders of the UK EDI Charters Network,
a space for colleagues in the sector to share good practice and learning
regarding EDI charter delivery. The SCS was shared as an example of good
practice at the inaugural UK EDI Charters Network in February 2025; and
received very positive feedback:

'I really liked this idea [Shared Charters Space] and I'm currently reviewing how this could have an impact at my institution'.

Respondent, anonymous feedback survey after event

 We have shared our family-friendly polices widely showcasing what we include, the importance of ongoing consultation and review, and supporting others to adopt our practice e.g. supporting University of Southampton with developing their family-friendly polices:

'We have been particularly inspired by the approachable language used in your policies, as well as the thoughtful provisions for bereavement.'

Operations Manager and Director of EDI, University of Southampton

We have shared two impactful animations both hosted on YouTube (Figure 11). (1) 'Blood, bone, crone: The menopause experience from the inside out', a resource to support learning, focuses on the emotional impact of the menopause (viewed 445 times) (2) 'What is intersectionality?' produced with EDIF funding, viewed >799,700 times.

Figure 11: Animations produced at NU to explain gender equality issues shared on YouTube

(1) Menopause Experience from the inside out

blood, bone, crone: the menopause experience from the inside out $% \left(1\right) =\left(1\right) \left(1\right) \left($

Our gender equality work has also had international impact:

 An NUMed Foundation in Science Lecturer, with funding from NU Women, launched the 'Empower Women's Health' project which aims to educate women about preventive measures, early detection, and available treatments. The first-ever free HPV Vaccination and Cancer Screening program was organised in collaboration with the National Cancer Society Malaysia (Figure 12). Teenage girls who had not received an HPV vaccination, received their first dose.

Figure 12: NUMed's 'Empower Women's Health' project

 NU has partnered with the British Council to fund Scholarships to address gender disparity in HE and provide opportunities for talented women to excel in their chosen fields. NU welcomed our first cohort of students from South Asia in 2021 (see quote) with a further scheme ('Women from Hong Kong') launched in 2024.

'I was honoured to be part of the scholarship scheme and I hope that more girls like me can benefit from the programme into the future.'

Female scholar, Nepal

 Advancing gender equality in sport, we launched a flagship programme 'Future Female Leaders in Sport' in 2022-23 which will empower female leadership, coaching and sport development skills to support the rapid change and growth of sport and physical activity in the Kingdom of Saudi Arabia (AP75) with plans to expand the offer to other communities. Figure 13 summarises the impact to date.

Figure 13: Impact of the Newcastle University run 'Future Female Leaders in Sport' programme

We co-hosted a webinar with colleagues from the Atlanta Global Studies
Center for Race Equality week to highlight the global context of the civil rights
movement and ongoing struggle for racial equality. This intersectional event
strengthened ties between the UK and the US and has led to further
collaborations.

Section 4: An assessment of the university's gender equality context

4.1 Culture, inclusion and belonging

EDI is one of our institutional core values which we aim to embed into every aspect of our practice. Our Equality Objectives (EO) build on this core value by identifying key areas of focus for 2025-2029 that align to our principles, institutional setting, and strategic direction. We have evaluated our gender equality context in relation to the EO's to ensure alignment with these areas. Each EO is detailed below and includes our gender equality context and plans for AS:

 EO1: Increase representation of underrepresented protected characteristic groups among PS and academic colleagues, governing boards, decision-making committees and senior positions

We have made progress in achieving greater gender representation in leadership roles, see section 2.2 for examples. We can also report that females have increased as a proportion of the most senior PS/PTO grades, Grade H (2019: 53.4%, 2024: 60.2%) and Grade IB (2019: 42.5%, 2024: 53.8%) (see Appendix 2, Tables 27.7-27.9, Chart 9)). Activity has included enhancing our approach to career conversations, improving consistency for routes into academic promotions, and establishing leadership training opportunities for colleagues from diverse backgrounds (see section 2.2 for further details).

There is still, however, work to do regarding existing areas of underrepresentation and perceptions regarding gender balance in leadership. For example, 30.8% of our EB members are female and this has remained static since 2019 (see Appendix 1, AP4). Females are also more likely (F:M ratio 19%:15%) to disagree when asked if they get useful feedback on their career development through PDR and females were more likely to say they did not have a mentor when starting a new role (F:M ratio 72%:71%) (FMS Culture Survey, 2022). The SAgE faculty culture survey 2023 summarised perceptions by identifying that females were less likely to believe the University is committed to achieving gender balance in leadership positions (F:M ratio 42%:60%).

The future plan aims to respond to areas identified by providing senior leadership shadowing opportunities, enhancing transparency for academic promotions, and continuing to develop our approach to career conversations - see related priorities and actions below:

| Priority | Actions |
|---|--|
| Visibility and Oversight | AP4 Board/Committee shadowing scheme |
| Recruitment and Onboarding | AP24 Ensure search consultants include equality monitoring data reports as part of their service |
| | AP27 Revamp and promote the NU Buddy System |
| Career Development, Talent and Succession | AP37 Introducing talent and succession career conversations |
| | AP38 Review of Conversations and Priorities appraisal method |
| | AP40 Mentoring review |
| | AP45 Promotions toolkit |

• EO2: Further develop an inclusive culture and one which does not tolerate hate crime, discrimination, victimisation or harassment.

We have made positive progress in this area including introducing a bullying and harassment policy, established a behaviour framework to support colleagues to live our values, and implemented new reporting and support systems for students.

Our analysis, however, indicates opportunities for further developments in the future action plan. For example, females in SAgE were more likely to identify an experience of bullying and/or harassment (F:M ratio 18%:13%) (SAgE Culture Survey, 2023). Our 2022 FMS culture survey identified females were also more likely (F:M ratio 18%:17%) to indicate that they had experienced bullying and/or harassment, increasing for disabled colleagues, particularly disabled females (F:M ratio 35%:29%) and for the small number of colleague respondents who identified as nonbinary (33%). Females in our student cohort were more likely to report sexual violence (SV) (F:M ratio 131:21) and sexual harassment (SH) (F:M ratio 42:11) (Appendix 1, AP69). The FMS Culture Survey 2024 found 48% of colleagues agreed that inappropriate behaviour is dealt with effectively although females were less likely to agree (F:M ratio 43%:53%) and qualitative feedback indicated a need to create psychologically safe spaces (FMS Culture Survey, 2022). We have found varying levels of awareness about methods to report inappropriate behaviour in each faculty; only 35% of colleague respondents in FMS were aware of how to report instances (FMS Culture Survey, 2022) compared to 65% in SAgE (SAgE Culture Survey, 2023) and 69.4% in HASS (HASS Culture Survey, 2024) respectively.

The future plan aims to increase awareness about reporting for all colleagues, provide training about appropriate behaviour for colleagues and students, and create psychologically safe workspaces.

• EO3: Increase representation of underrepresented protected characteristic groups among students and ensure equity in the student experience and graduate outcomes.

We have introduced positive activity to support students for gender related themes in recent years. For example, an Independent Point of Contact (IPC) which supports students to discuss gender identity, created a policy to support students wearing head and arm coverings during clinical placements which mainly impacts female students, and our Rainbow@Ncl inaugurated the annual Trans Clothes Drive event for students during Trans Awareness Week.

There are, however, challenges that remain regarding gender representation and equity in our student body. For example, females are less likely to agree to the statement 'I feel part of a community of PGT students' (F:M ratio 66%:68%) and female PGR students are more likely to be negative when asked about their perception of the word 'community' (F:M ratio 27.2%:21.5%). There are intersectional challenges regarding a sense of belonging for Black female students in engineering (Razak and Laing, 2023) and female students from a Black or Black British African Background were more likely to not be optimistic about their options for a career post-University (28%) compared to the average (8%) (FMS Culture Survey, 2022). We also recognise challenges regarding attainment, for example, our data show that male students are 8.6% less likely to get a 2:1 or 1st degree award, higher than the sector average awarding gap of 3.4% (Appendix 1, AP77).

Our aim is to respond to challenges outlined above by enhancing support for colleagues regarding gender identity, increasing sense of community for PGT, PGR and students from minority ethnic groups, and monitoring our attainment gap closely.

| Priority | Actions |
|---------------------------------|--|
| Work Life Balance and Wellbeing | AP48 Listening sessions with T/NB colleagues and students |
| | AP49 Learn from IPC and implement support |
| Student Experience and Outcomes | AP68 Showcase intersectional career journeys |
| | APs 71, 72 Increase sense of community for students within PGT and PGR |
| | AP77 Attainment gap system |
| | AP79 Create and promote opportunities for Black female UG students to network with female PGRs |

• EO4: Further enhance our position as a family-friendly organisation

We have strengthened our family-friendly policies (see section 1.4 for details) and the work undertaken has had a positive impact, for example, we acknowledged in section 2.2. that there has been an increase in the proportion of respondents who believe family-friendly policies suit their needs from 2017 to 2024. There is, however, still low levels of awareness about various policies, support, and entitlements. For example, NUPCS 2024 identified 65% of respondents were not aware of the NU Parents network, 88.5% were not aware of the adoption policy, 47.7% were not aware of bereavement leave for those who experience miscarriage, and 62% were not aware of the Carers Passport.

We acknowledge sex differences regarding the need for support as parents and unpaid-carers. For example, females are more likely to be carers (F:M ratio 59%:41%) (Census, 2021), are three times more likely to be student parents (Institute of Women's Policy Research, 2024) and are more likely to access parenting leave in the University (F:M ratio 54%:25%, NUPCS 2024). We aim to respond to the challenges by enhancing our family-friendly policies, increasing awareness of our policies, and enhancing our support for student parents.

| Student Experience and Outcomes | AP73 NU Student Parent project |

 EO5: Progress developments in systems and processes relating to EDI data and embed EDI in our processes, policies, decision-making and governance.

We have fewer colleagues identifying a gender that is different to their sex registered at birth (0.2%) compared to the population in England and Wales (0.5%) (Office for National Statistics, 2023) and fewer colleagues identifying a disability (4.7%) compared to the population in England and Wales (17.6%) (Office for National Statistics, 2023). We are also aware of having barriers to EDI data which can impact access and activity in response. For example, applicants cannot identify carer status which may impact the accuracy of our colleague data, the Recruitment Team must create manual reports to understand EDI characteristics in the recruitment process, and the EDI Team also require manual manipulation to understand EDI data and conduct intersectional analysis.

The future plan includes a range of actions to respond to data challenges by increasing diversity data categories and creating automated dashboards for our recruitment and EDI Teams.

EA has been integrated into NU since 2019 as outlined in section 1.4. There is still work to do to increase the number of colleagues accessing EA training (see Appendix 1, AP8 for data), keeping our EA SharePoint page which includes completed EA examples updated, and connecting with institutions nationally to understand how others are approaching EA.

4.2 Key priorities for future action plan

The future action plan includes five priority areas that have been developed based on the evaluation of our gender equality context. The priorities and respective evaluation are outlined below. Our longitudinal priority, Increasing the proportion of Women into Leadership, remains an active part of our action plan threading through

each of our five priority areas to ensure continued progress rather than as a separate priority. We will continue to work hard to further reduce our GPG, but this will be considered an outcome measure rather than an area of activity and related activities will now reside under one of the priorities identified below. We will also continue to report our gender, ethnicity and disability pay gaps annually. Diversifying our recruitment processes priority is now 'Recruitment and Onboarding' future priority as the GEG wanted to include more of the recruitment journey in the future action plan.

Priority 1: Visibility and Oversight

This priority provides transparency on our approach to delivery of our gender equality activity, aligns gender equality practices across the University, aims to increase data categories and disclosure rates, and commits to developing sector leading policies and practices to share across the sector.

Our evaluation identified relatively low scores for perceptions regarding EDI work in the University. For example, 53% agree (14.4% disagree) that 'HaSS Faculty leadership is committed to addressing inequalities around gender, race, disability, LGBTQIA identities' (HASS Faculty Culture Survey, 2024). We have created actions that increase transparency of our approach to delivering AS (APs1, 2), increase visibility and celebrate success with EDI charters via a joint communications plan with our faculty and departmental colleagues (AP3), increase oversight of all EDI charter action plans in the University via the SCS which offers live access to stakeholders and action plan leaders (AP14) and increase access to senior board/committees for underrepresented groups via a shadowing scheme (AP4).

As outlined in 4.1, there are potentially low levels of declaration for gender identity and disability at NU. AP20 aims to respond by broadening diversity categories in our system and include a self-describe option for gender and AP21 which will involve a data sharing campaign to encourage declaration for all protected characteristics.

Finally, we aim to continue to develop sector-leading initiatives that help to increase the visibility of gender equality and intersectional practices. For example, we have established and co-chair the UK EDI Charters Network (AP15), a community for colleagues delivering EDI charters across the sector. We are establishing a national network for equality analysis (AP9), a national network for staff networks (AP10), and an EDI Think Tank which utilises subject experts to inform practices (AP7).

Priority 2: Recruitment and Onboarding

This priority builds on our prior commitment to diversifying recruitment processes which has helped us to embed inclusive recruitment training modules, create more inclusive job adverts, and advertise roles on a broader range of platforms. The future priority aims to develop innovative new ways to embed inclusion into recruitment procedures, increase our data capabilities, and revamp approaches to onboarding for new colleagues.

Females are more likely to be shortlisted (38.1%, out of 286 applicants) than males (21.1%, out of 228 applicants) and more likely to be offered roles (17.5%) than males (11.8%) for academic and research roles in 2024 (Appendix 2, Table 43.2, Chart 15).

Similarly, females are more likely to be shortlisted (17.3%, out of 10,910 applicants) than males (12.9%, out of 8,929 applicants) and more likely to be offered roles (5.4%) than males (4.0%) for PS/PTO roles in 2024 (see Appendix 2 table 52.8, Charts 29-30). The REC culture survey (2022) identified the highest application to interview rates for academic roles were for white women (25%), followed by white men (15%), then women from MEG (10%) and men from MEG (5%). Similarly, white women and men were more successful from interview to hire (45%) followed by women from MEG (35%) and men from MEG (25%). The REC culture survey identified that 30% of respondents from a MEG believe that our policies (and/or processes) don't enable the best person to be recruited.

We have developed actions that support inclusive recruitment practices. For example, we will create a web page clarifying the candidate journey including intersectional video case studies (AP23), significantly increase the engagement with inclusive recruitment training materials via an online module for all hiring managers (AP22), curate a suite of free to use recruitment platforms that attract a diverse range of applicants (APs 25, 26) and develop an automated data feed for access to EDI data in the recruitment process (AP19).

Priority 3: Career Development, Talent and Succession

This priority aims to build on progress in our previous plan which integrated promotion conversations into annual appraisals, clarified academic promotions criteria, and utilised communications to promote a more diverse range of leaders. The future priority aims to continue our success by establishing a values-based leadership offer, enhancing our career conversations offer, and understanding colleague aspirations for mentoring and workload allocation.

There has historically been underrepresentation of females at senior levels in the academic and PS roles. This has, however, been changing over the last five years. For example, since 2019 to 2024 females have increased as a proportion of senior lecturers (2019: 38.8%, 2024: 39.5%), senior researchers (2019: 45.1%, 2024: 54%), readers (2019: 29.6%, 2024: 41%), and professors (2019: 28.9%, 2024: 34%). Females have also increased as a proportion of the most senior PS grades as outlined in section 4.2. There is still, however, areas of underrepresentation in some senior roles (e.g. senior lecturers, readers, professors, and clinical consultants) compared to the population of academic females (47.5%), females have decreased as a proportion of clinical researchers (2019: 59.3%, 2024: 55.1%), there are fewer female Principle Investigators (PI) leading research projects (F:M ratio 40%:58%), and there is an underrepresentation of females in maintenance roles (F:M ratio: 4.7%:95.3%) and specialist roles (F:M ratio: 36.5%:63.5%) (see Appendix 1, AP23).

The actions within this priority will respond to these areas of underrepresentation by creating an academic promotions toolkit (AP45), establishing a values-led leadership training offer (AP29), establishing a research leadership programme to increase confidence for colleagues to become PI (AP33), and utilise apprenticeships as a method to upskill colleagues and respond to areas of underrepresentation (AP34).

There is an aspiration for developing the quality and availability of career conversations. For example, the 2022 FMS culture survey, identified 19% female colleague respondents disagreed that they get useful feedback on their career development through their PDR, compared to 15% male colleague respondents. The PDR system was changed to C&P in 2023 and there has been a low engagement rate compared to the previous PDR system (35% completed C&P and 60% completed PDR, 1400 respondents, Personal and Career Development Survey. 2024). Action AP38 aims to review the C&P system and create a plan for wider rollout. We recognise career conversations go beyond annual appraisal and include, for example, our NU Mentoring programme and talent and succession conversations. Two of our departmental AS plans (SAgE Eng 6.3, HASS 5.4) refer to access to the central NU Mentoring programme, AP40 will respond by developing a plan for the scheme that meets organisational needs. The Organisational Development team will also introduce a standardised approach to talent and succession conversations that asks leadership to consider diversity of talent pipelines as part of their planning (AP37).

Priority 4: Work Life Balance and Wellbeing

This priority builds on our previous work developing family-friendly policies and procedures. The future priority aims to enhance our approach to support for parents and carers with additional activity for people of all gender identities and support for mental health.

The NUPCS 2024 revealed that parents, kinship and/or foster carers, or unpaid carers rated the University 6/10 on average when asked to what extent they feel supported by the University regarding support for being a parent or unpaid carer (1 = feel not at all supported, 10 = feel fully supported, 274 respondents). 78.7% (out of 263 respondents) were not aware of the RSP, 81.8% were not aware of the standalone carers policy (out of 264 respondents), and 80.3% (out of 314 respondents) were not aware of the location of information regarding family policies. We are therefore planning a review of our family-friendly policies and provisions (AP50), piloting a model for childcare cover for academics (AP53), enhancing our support for unpaid carers (AP54), and developing a communications plan to raise awareness of available support to parents and unpaid carers (APs 51, 52).

Alongside our commitment to broaden our diversity data categories (AP20) and create a data sharing campaign (AP21), we will conduct listening sessions with T/NB colleagues and students to improve our understanding of experiences and types of support that could be offered (AP48). We are aware that students can access an Independent Point of Contact (IPC) via Student Health and Wellbeing to discuss gender identity and explore areas including changing their name, pronouns, and gender in our systems. We are committed to learning more about this approach and developing the offer for colleagues seeking support related to gender (AP49).

Males are less likely to be aware of where to seek wellbeing support at work (F:M ratio 7.16:6.55) (1 = not at all aware, 10 = fully aware) (1,549 respondents, NUPCS 2024), males were also less satisfied with the support in place for health and wellbeing (F:M ratio 6.59:6.30) (NUPCS, 2024), and were less likely to access the

EAP in 23/24 (842 calls, F:M ratio 62.1%:30.3%). The CHWT have committed to developing a variety of mental health activities for males (AP55) and producing a communications plan to raise awareness of EAP (AP56).

Priority 5: Student Experience and Outcomes

This priority aligns to actions in our previous AS action plan to explore sex-based and intersectional issues in our student population. This priority will aim to build on findings and increase our understanding of the experiences and outcomes of our student body, enhance our offer in response to findings, and create opportunities to build community for intersectional student groups.

We recognise there is variation regarding outcomes and experiences on campus. For example, we identified in section 4.1 that females are more likely to be student parents, males are less likely to get a 2:1 or 1st, females from a Black or Black British African Background were less likely to be optimistic about their options for a career post-University, Black females have a lack of belonging in the engineering space, and females at PGT and PGR are less likely to feel part of a community. We have a range of actions planned in response to these challenges. For example, the Student Parents Project (AP73) aims to understand the experiences of student parents on campus and use findings to influence our policy and practices. The attainment gap system (AP77) will develop an automated method to identify attainment gaps by module and sex. AP68 will entail creating videos that showcase alumni from intersectional backgrounds sharing their approaches to career success. AP79 intends to establish the Belonging in Engineering Network (BEN) and focus on bringing Black female UG and PGR students together. Finally, AP71 and AP72 aim to increase the sense of community for students in the PGT and PGR spaces by undertaking listening campaigns, peer mentoring, and student socials.

Section 5: Future Action Plan

[Find action plan separately on our EDI website]

Appendix 1. Culture Survey

Source of data for Self-Assessment

The self-assessment was informed by analysis of multiple quantitative and qualitative data sets.

| | inequalities | |
| | throughout HaSS' | |

| | EDI Annual Report | Data sharing rates (i.e., proportion of colleagues who have provided their |
|---------------------------------------|-------------------------------------|--|
| categories in the Employee Central | 2024 | personal details) have seen an increase since 2019 (source: EDI annual report 2024). Gender affirmation has seen an increase of 25.9%-point increase in |
| system and increase | | data sharing rate (Data sharing rate in 2019: 28.2% in comparison to 2024: |
| data sharing rates' | | 54.0%). Sexual orientation has seen a similar increase in data sharing rate of |
| | | 25.9%-point (Data sharing rate in 2019: 28.7% in comparison to 2024: 54.6%). |
| | | Despite an increase in data sharing rates across these two data categories, declaration rates for gender affirmation and sexual orientation are still low. |
| | | Another category showing low data sharing rates is Religion and belief. |
| | | Despite an increase of 25.8%-point in data sharing rate since 2019 (data sharing rate in 2019: 28.8%, in 2024: 54.7%), the data sharing rate is still low. |
| | | Despite high data sharing rates for Disability status (>99% in the past years), |
| | | there is a low proportion of colleagues declaring that they have a disability on their staff records. Disability declaration rate 4.7% in 2024 (source: EDI annual |
| | | report 2024). The prevalence of disability in 2022/23, UK-wide wars 23% for |
| | | working adults (source: House of Commons Library, UK parliament). We |
| | | believe disclosure is low, based on national statistics and also based on outcomes from anonymous institutional surveys revealing higher proportions |
| | | of colleagues declaring a disability. The current data therefore does not |
| | | represent all our colleagues with a disability. |
| | REC C1.3 'The 2021 | REC C1.3 A1. Recruitment training modules to be developed and made |
| | Colleague REC survey tells us that | mandatory for colleagues on interview panels, including ED&I in recruitment and recruiting a diverse organisation, responsibilities of being a diverse |

| 25. 'Mapping exercise around diversity platforms and candidate attraction to identify their success' | Disability Confident 1.5, 1.6 | 1.5 Developing links with Jobcentre Plus and accessing government resources (for example, Work and Health Programme providers (If you're in Scotland contact Fair Start Scotland) to advertise jobs and attract disabled people to apply for opportunities 1.6 working with and placing job adverts in the disability press or on disability websites, such as: developing links with Jobcentre Plus and accessing government resources (for example, Work and Health Programme providers (If you're in Scotland contact Fair Start Scotland) to advertise your jobs and attract disabled people to apply for opportunities working with and placing job adverts in the disability press or on disability websites, such as: Evenbreak, Disability Jobsite, RNIB, Vercida, your local disability rights organisation |
| 26. 'Post mapping exercise about diversity platforms' | Disability Confident 1.5, 1.6 | 1.5 Developing links with Jobcentre Plus and accessing government resources (for example, Work and Health Programme providers (If you're in Scotland contact Fair Start Scotland) to advertise your jobs and attract disabled people to apply for opportunities 1.6 working with and placing job adverts in the disability press or on disability websites, such as: developing links with Jobcentre Plus and accessing government resources (for example, Work and Health Programme providers (If you're in Scotland contact Fair Start Scotland) to advertise your jobs and attract disabled people to apply for opportunities working with and placing job adverts in the disability press or on disability websites, such as: Evenbreak, Disability Jobsite, RNIB, Vercida, your local disability rights organisation |

| 27. 'Revamp and promote the NU Buddy System' | Disability Confident 24. | Disability Confident 24. Providing mentoring, coaching, buddying and or other support networks for staff. |
|---|--------------------------|--|
| | FMS PE4.1 | FMS PE4.1 Culture survey data - |
| | | The 2022 FMS culture survey, 71% (72%F) colleague respondents reported having no internal mentor. Furthermore, our external focus group on culture and environment recommended that we 'consider introducing a buddy scheme for new starters'. Discussion in the People Experience workstream suggested that new colleagues of all genders would benefit most from a buddy whilst they settle in and signposting to mentoring programmes for further development once they are settled in. |
| | | The FMS culture survey data also indicated diversity in our faculty, such as minoritised genders and sexualities (12%), as well as religion and beliefs (37%, reducing to 6% without Christianity), highlighting the need to support minority groups. Further discussion in the People Experience workstream about member's personal lived experience of joining the faculty from minoritised backgrounds suggested that new colleagues would benefit from being offered the option of having a buddy with similar demographics for support whilst they settle in. |
| 29. 'Improve the capability and behaviour of leaders and managers through the socialisation and implementation of both the Leadership | FMS Culture survey | FMS Culture survey data: 2022 FMS culture survey, 26% (26%F) colleague and 16% (22%F) PGR student respondents had experienced microaggressions, increasing to 33% in the small number of colleague respondents who identified as non-binary. |

| Framework and relevant measurable leadership offer'. | Pulse survey (2019) Research Culture Survey | Pulse survey (2019) 38% of colleagues agreed that inappropriate behaviour was dealt with effectively 46% in the research community agreed and 32% disagreed that 'discriminatory and inappropriate behaviour in my research environment will be dealt with effectively (2022 Research Culture Survey) |
|---|---|--|
| 31. 'Continue to socialise and embed the expectation that all new leaders and managers attend the new Induction programme. Evaluate its impact and continue to improve and enhance the initial content and format. Establish the Leadership induction and Welcome | Disability Confident 20. FMS Culture Survey 2022 | Disability Confident 20. Ensuring there are no barriers to the development and progression of disabled staff e.g. via access to leadership training opportunities. The 2022 FMS culture survey, 26% (26%F) colleague and 16% (22%F) PGR student respondents had experienced microaggressions, increasing to 33% in the small number of colleague respondents who identified as non-binary. These experiences impact psychological safety which can affect career development and progression, including whether colleagues feel able to nominate themselves to management and leadership development programmes |
| training.' 32. 'Design and deliver a longitudinal evaluation for Inclusive Futures which tracks impact and outcomes. | REC C2.2 'We need to address the dearth of ethnic minority representation in senior roles by paying attention to the pipeline as well'. | REC C2.2 A1: Review and evaluate success of Inclusive Futures programme with the External provider (Common Purpose). Review how this pilot can be developed further. |

| | Disability Confident 20. | Disability Confident 20. Ensuring there are no barriers to the development and progression of disabled staff e.g. via access to leadership training opportunities such as Inclusive Futures. |
|--|--|---|
| 33. 'Track the sex split of applicants and attendees on the Research Leadership programme. Compare to sex + split of PI's in NU and sector to understand if the training is changing the | REC R1. 'There is significant underrepresentation of minoritised ethnic colleagues on decision-making boards such as research committees, particularly those | REC R1 A1, A2, A3. A1: Review membership of research committees at institutional, faculty and unit research committees as baseline data. A2: Develop committee shadowing scheme focussed on research decision-making committees that allows minoritised colleagues to experience committee working and give their feedback on how their practices and processes could be made more inclusive. |
| proportion of males and females' | where membership is determined by role' | A3: Pilot committee shadowing scheme in central committees (e.g. URIC, RSIG, RCCG), and evaluate and report on outcomes and benefits. A4: If successful, promote at Faculty and Unit level, to encourage more inclusive practices and encourage more diverse input and committee membership (to feed up University committees). |
| 34. 'Utilise apprenticeships as a method to upskill and respond to areas of underrepresentation' | EDI Annual Report 2024 | Annual EDI report 2024 show an underrepresentation of female colleagues in e.g. maintenance roles (F:M-ratio: 4.7%:95.3%), specialist roles (F:M-ratio: 36.5%: 63.5%), and in our School of Engineering Academic roles (F:M-ratio: 22%: 78%). Apprenticeships provide an opportunity to increase proportion where there is underrepresentation. Increasing representation across various work areas will create a more balanced pipeline which, in time, may impact the gender pay gap (15.5% mean pay gap, in 2024 EDI Annual Report). |
| 35. 'Increase awareness of potential | Research Culture Action Plan 5.2 | Research Culture Action Plan 5.2 'Consult and work with our research community to widen definitions of research excellence and feed this |

2023 Culture Survey results:

I receive useful feedback from line management in PDR/Career conversations Total population:

- 20.6% females disagree
- 23.8% males disagree
- 36.7% academics disagree
- 15.8% PTO disagree

Decisions about promotion/progression are made fairly:

Total population:

- 14.3% females disagree
- 38.7% males disagree
- 40% academics disagree
- 19.3% PTO disagree

I have been able to access a mentor when I have wanted one: Total population:

- 14.3% females disagree
- 23.4% males disagree
- 38.3% academics disagree

SAGE SNES 3.1 'Our goal is to offer support to all staff in their pursuit of career goals, exploring actionable steps to facilitate individual career development'.

Culture survey data (SAgE SNES 3.1) -

3.1 'Our goal is to offer support to all staff in their pursuit of career goals, exploring actionable steps to facilitate individual career development'. Emphasis to undertake Conversations and Priorities (notwithstanding nonfunctional system).

Full engagement with "Conversation and Priorities" initiative when relaunched. Rationale / data:

| Technicians Commitment | The 2023 Culture Survey reported: "I have received useful feedback on their career development through career conversations." 53%F and 68%M academics disagree/strongly disagree 19% PTO disagree/strongly disagree Technicians Commitment, 'Enhance Career pathways and development opportunities for Technicians through "Conversation and Priorities" ensure that technicians are offered appropriate training opportunities' |
|--|---|
| FMS CD5.1 'Promote existing training opportunities for line managers and supervisors via communication channels, to ensure their professional development feedback are meaningful exercises and that links to promotion and progression or next job' | FMS CD5.1 Culture survey data - In our 2022 FMS culture survey, 19% female colleague respondents disagreed that they get useful feedback on their career development through their PDR, compared to 15% male colleague respondents. Additionally, 24% (23%F) PTO colleague respondents disagreed that their PDR was a useful tool to support career progression. This rose to 50% (50%F) in disabled PTO colleague respondents. |
| HASS 6.4 'Highlight promotion pathways | HASS Culture survey, 'I receive useful feedback on my career development through PDRs': |

| | and support planning in C&P from year 1; enable promotions planning in C&P over 3-5 year timelines; ensure intersectionally disadvantaged colleagues are given proactive support for promotions planning' | Agree – 52.5% Neither agree nor disagree – 20.6% Disagree – 20.6% Not applicable – 6.3% |
|--|---|--|
| 39. 'Launch new Learning and Development policy' | FMS CD6.1 'Commitment that colleagues of all genders have the opportunity for continued professional development up to 0.5 days per month' | PMS CD6.1 Culture survey data - Our qualitative and quantitative culture data indicate the need to prioritise time for colleague career development. In our 2022 FMS culture survey, 19% female colleague respondents disagreed that they get useful feedback on their career development through their PDR, compared to 15% male colleague respondents. 24% (23%F) PTO colleague respondents disagreed that their PDR was a useful tool to support career progression, increasing to 50% (50%F) in disabled PTO colleague respondents. This highlights the need to provide all colleagues, particularly line managers, with time to read key policies and attend training to support colleagues of all genders. |
| 40. 'Develop a plan for NU Mentoring scheme that meets organisational needs' | SAGE ENG 6.3 'Clarify routes to access mentoring expertise, either general or more specific (specific area of engineering, or specific area of | Culture survey data (SAgE ENG 6.3) - Culture survey 2023 I receive useful feedback from line management in PDR/Career conversations Total population: • 20.6% females disagree • 23.8% males disagree • 36.7% academics disagree |

| challenge/opportunity) and ensure this information is readily available at all times' | 15.8% PTO disagree Decisions about promotion/progression are made fairly: Total population: 14.3% females disagree 38.7% males disagree 40% academics disagree 19.3% PTO disagree |

| | I have been able to access a mentor when I have wanted one: Total population: • 14.3% females disagree • 23.4% males disagree • 38.3% academics disagree |
| SAGE SNES 2.1 'Creation of Peer Mentoring scheme for SNES PGR students. Research culture funding obtained for project to pilot the scheme'. | Culture survey data (action 48) (SAgE SNES 2.1): SAgE SNES 2.1 'Creation of Peer Mentoring scheme for SNES PGR students. Research culture funding obtained for project to pilot the scheme'. Feelings of isolation raised by international PGRs when transitioning to PGR study (identified in PGR Student Staff Committee) PRES: 52.5% of PGR students agreed to "I feel part of a community of PGR students." Inaccessible information (PRES comments) |
| FMS PE4.3 | 2022 FMS culture survey, 71% (72%F) colleague respondents reported having no internal mentor. |

| | Technicians Commitment | Technicians Commitment 'Enhance Career pathways and development opportunities for Technicians, increase the number of technicians participating as mentors and mentees in the NU Mentoring Scheme' |
|--|---|--|
| | HSS 5.4. Gather baseline data on access and participation to mentoring for HaSS PTO staff including the range of schemes available, number of places offered, and take-up of them. To include feedback from colleagues on the value of these schemes. | HASS 5.4 rationale: Qualitative feedback in focus groups that mentoring is an important tool in professional development; this action is designed to expand take-up and enable us to track engagement and impact. |
| 41. 'Creation of a Workload Model Forum' | Pulse survey: Wellbeing and Workload | Pulse Survey: Wellbeing and Workload: Females (1,549 respondents) rated the statement 'Typically my workload is manageable' 6.01/10 on average, males (916 respondents) rated this statement 5.88/10. |
| | SAgE SNES 4.1'Creation of a Workload Model Forum, consisting of a balanced academic | SAgE SNES 4.1 Colleagues, particularly academics report unmanageable workloads, a lack of fairness in workload allocation and poor mental health: Culture Survey 2023: "Workloads are allocated fairly" |

community supported by PTO to enable continuous improvement in the model, tariff and transparency'

- 53%F & 54%M academics strongly disagree/disagree
- 23% PTO strongly disagree/disagree

"My workload is manageable"

- 59%F & 57%M academics strongly disagree/disagree
- 25% PTO strongly disagree/disagree

"My mental health and wellbeing are supported in my school"

- 53%F & 50%M academics strongly disagree/disagree
- 36% PTO strongly disagree/disagree/don't know

FMS WW 6.1 'Provide T&S and T&R colleagues and their HoAUs with individual workload reporting system (WRS) reports to monitor and address excessive workload that could trigger stress and inappropriate behaviours' and 6.3 'Explore the potential to roll out FMS WRS to R&I colleagues and investigate if the WRS would work in other job families'

FMS WW 6.1 and 6.3 Culture survey data -

In our 2022 FMS culture survey, 40% (43%F and 31%M) academic colleague respondents did not feel that their workload was manageable, increasing to 68% (73%F and 44%M) for Lecturers at grade G (T&S and T&R contracts), suggesting a gender disparity. Furthermore, for Senior Research Associates and Research Fellows at grade G (R&I contracts), 59% (56%F and 67%M) academic colleague respondents did not feel that their workload was manageable, suggesting further (but opposing) gender disparity.

Students feel encouraged and able to engage with their peers, staff and activities at all stages of their student journey' |
| | PTES (2023) | PTES 'I feel part of a community of PGT students', 38% definitely agree, 27% mostly agree, 17% neither agree nor disagree, 12% mostly disagree, 6% definitely disagree. |
| 77. 'Create an online system which can do the analysis for colleagues and make attainment gap reports easier to produce' | APP | Male students at Newcastle are 8.6% less likely than females to get 2:1 or 1st degree award, this is higher than the sector average awarding gap 3.4% (APP). There is a desire to develop a more nuanced understanding of awarding gaps by course and module. |
| 79. 'Create and promote opportunities | REC ST2.1 | REC ST 2.1 'Increase students' sense of belonging to a community' |
| for Black female UG students to network with female PGRs.' | APP and Inclusive Newcastle Knowledge Centre report on awarding gap and actions. Razak, A. and Laing, K. (2023) Narrowing the Awarding Gap in | APP and Inclusive Newcastle Knowledge Centre report on awarding gap and actions: The Belonging in Engineering Network (BEN) at Newcastle University School of Engineering is a student-led group that aims to improve Black and other Global Majority undergraduate and postgraduate students' experiences and help to reduce the awarding gap between Black home students and their peers in the School of Engineering. Narrowing this gap is a priority of Newcastle University's (NU) Access and Participation Plan (APP). Inclusive Newcastle Knowledge Centre working in partnership with a Student Advisory Board from the School of Engineering embarked on participatory action |

| proj Nev Cen Univ | gineering: Pilot ject. Inclusive wcastle Knowledge ntre, Newcastle versity: Newcastle on Tyne. | research project to understand the causes of the awarding gap and identify potential actions. The research (Razak and Laing 2023) found Black and other Global Majority students experience a lack of belonging and isolation and noted peer networks as critical in finding support. Key recommendations from the research was to establish a Black Engineers Network and to support Black female UG students to network with female PGRs |
|----------------------------|---|--|
| PRE | ES | PRES 'Focussing on 'Community' and comparison to our competitors, at Newcastle students aged 30 or younger scored the sense of community significantly lower (55%) compared to the sector (61%) and Russell Group (62%). For the question 'There are sufficient opportunities to interact with other postgraduate research students', men, BAME students, full-time students, and home students all scored significantly lower compared to the sector and Russell group scores'. |
