

Welcome

INCLUDE

Innovations in Clinical Trial Design and Delivery for the Underserved

Dr William van't Hoff & Professor Lynn Rochester

Tuesday 23rd June 2020

<https://www.ncl.ac.uk/medicalsciences/research/crn/researchinnovation>

INCLUDE Event: Agenda for the day

Time	Session Title
13:00-13:05	Registration and housekeeping <i>Craig Smith, Flint Spark</i>
13:05-13:10	Welcome <i>Professor William van't Hoff, Chief Executive Officer, NIHR Clinical Research Network</i>
13:10-13:20	What is INCLUDE all about? Phase II summary and aims of the day <i>Professor Lynn Rochester, Speciality Cluster Lead, NIHR Clinical Research Network</i>
13:20-13:30	Session 1 – ETI Framework outline and implementation
	Bringing together the NIHR for the underserved <i>Laurie Oliva, Head of Public Engagement, NIHR Clinical Research Network</i>
13:30-13:40	Example of implementation: Ensuring that COVID-19 research is inclusive: Guidance from the NIHR INCLUDE project <i>Professor Miles Witham, Professor of Trials for Older People, Newcastle University</i>
13:40-13:55	Over to you: An opportunity to ask questions
13:55-14:10	BREAK
14:10-14:55	Session 2 – Dissemination and implementation
	How can we disseminate and implement INCLUDE and how can we measure impact? <i>Group discussion</i>
14:55-15:00	Final comments: summing up, next steps and feedback <i>Professor Lynn Rochester</i>

The INCLUDE Vision

“Better healthcare through more inclusive research”

We define the underserved as *‘those inadequately provided with opportunities to participate in research’*

Phase I - Scoping

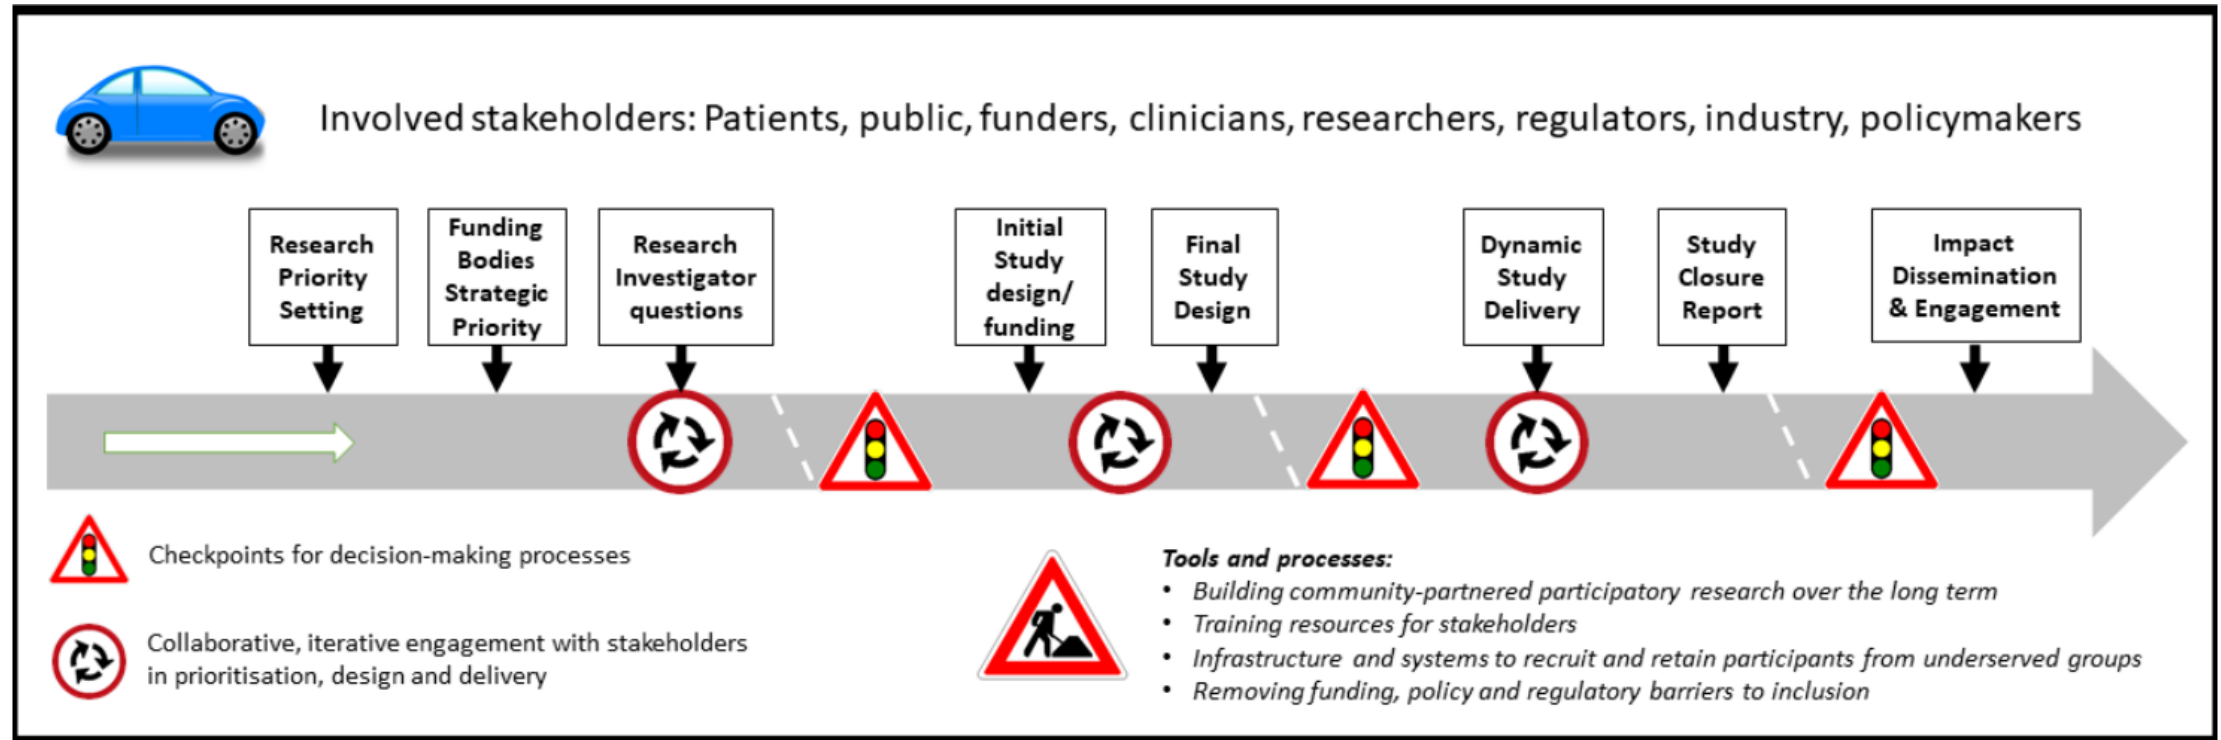

- Researched the **underserved** in clinical trials, professionals working on trials and those taking part in them
- Collated the barriers and challenges that contribute
- Identified innovations in trial design and delivery to enhance inclusion

Phase II – Developing a Framework (including roadmap and objectives with work streams)

- Produced the Framework: a roadmap suggesting intervention points to improve inclusion and core objectives and work streams
- Identified the importance of working with funders, regulators and other stakeholders to implement INCLUDE
- Working with stakeholders to decide routes to implementation and ways to evidence impact

Phase III – Implementation and Evidence

INCLUDE Framework

INCLUDE Framework

Core Objectives

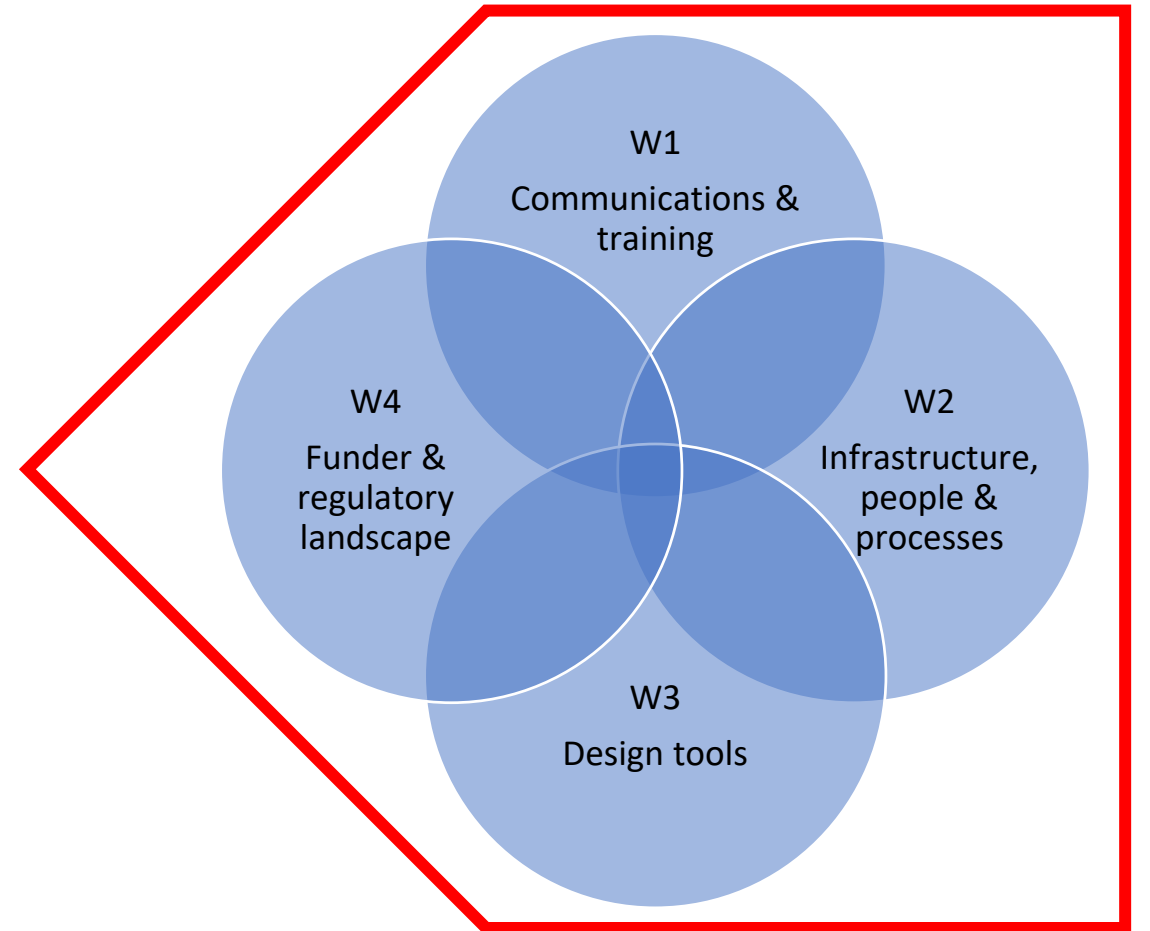

Develop *Community Partnered Participatory Research* building long-term relationships and opportunities for participation for underserved groups.

Develop tailored training resources to design & deliver trials for underserved groups.

Develop infrastructure & systems to reach, engage, recruit & retain underserved groups.

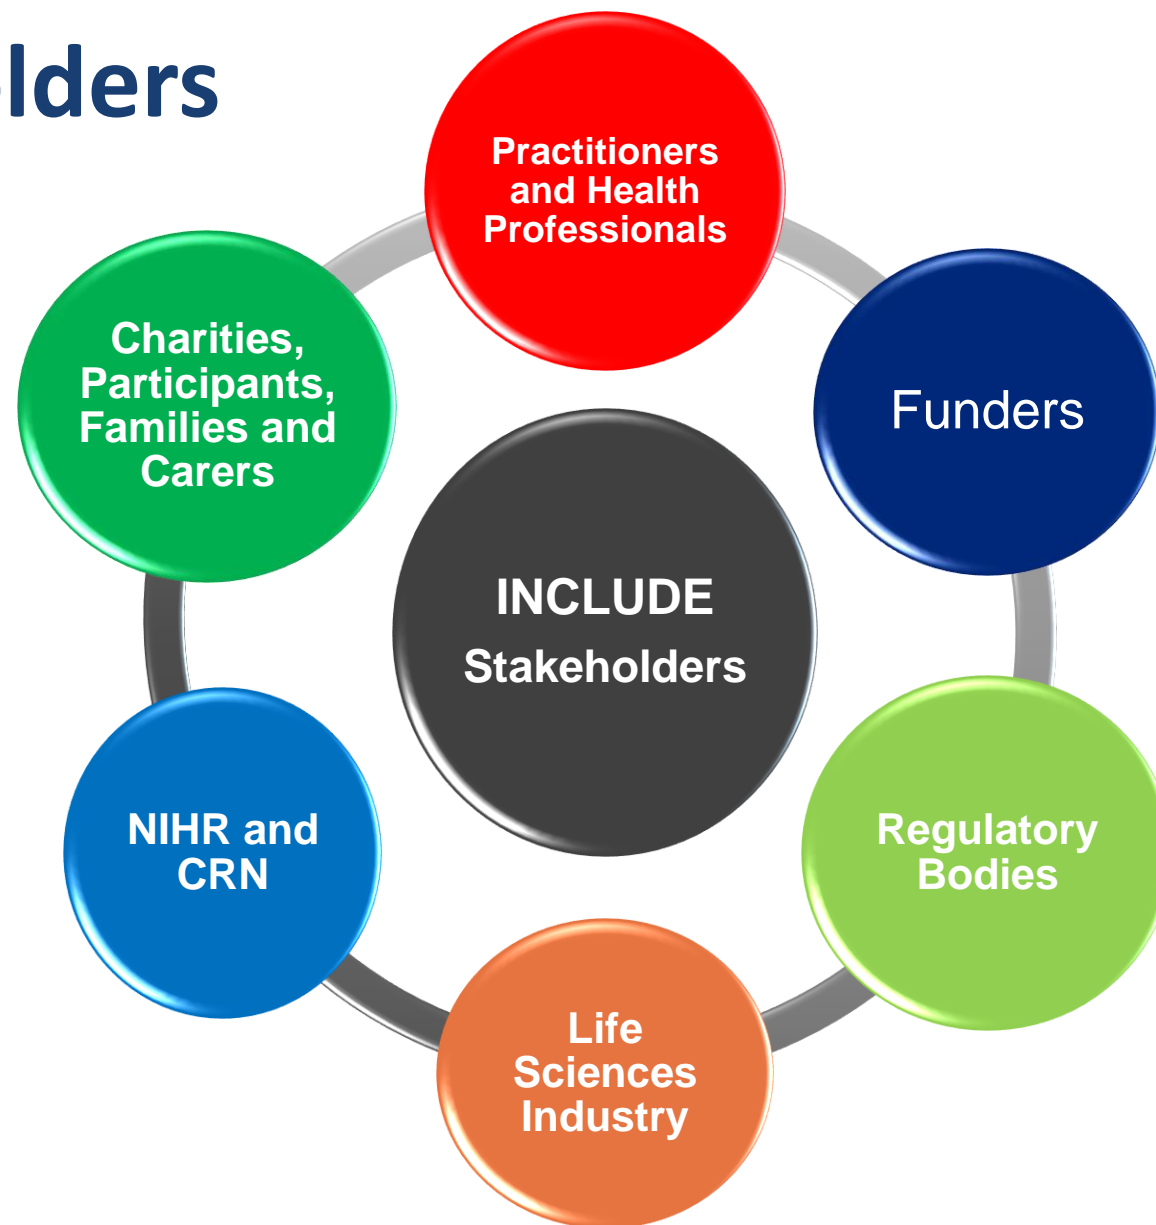

Work with funders, regulators and other stakeholders to remove barriers to including underserved groups in clinical trials.

Workstreams

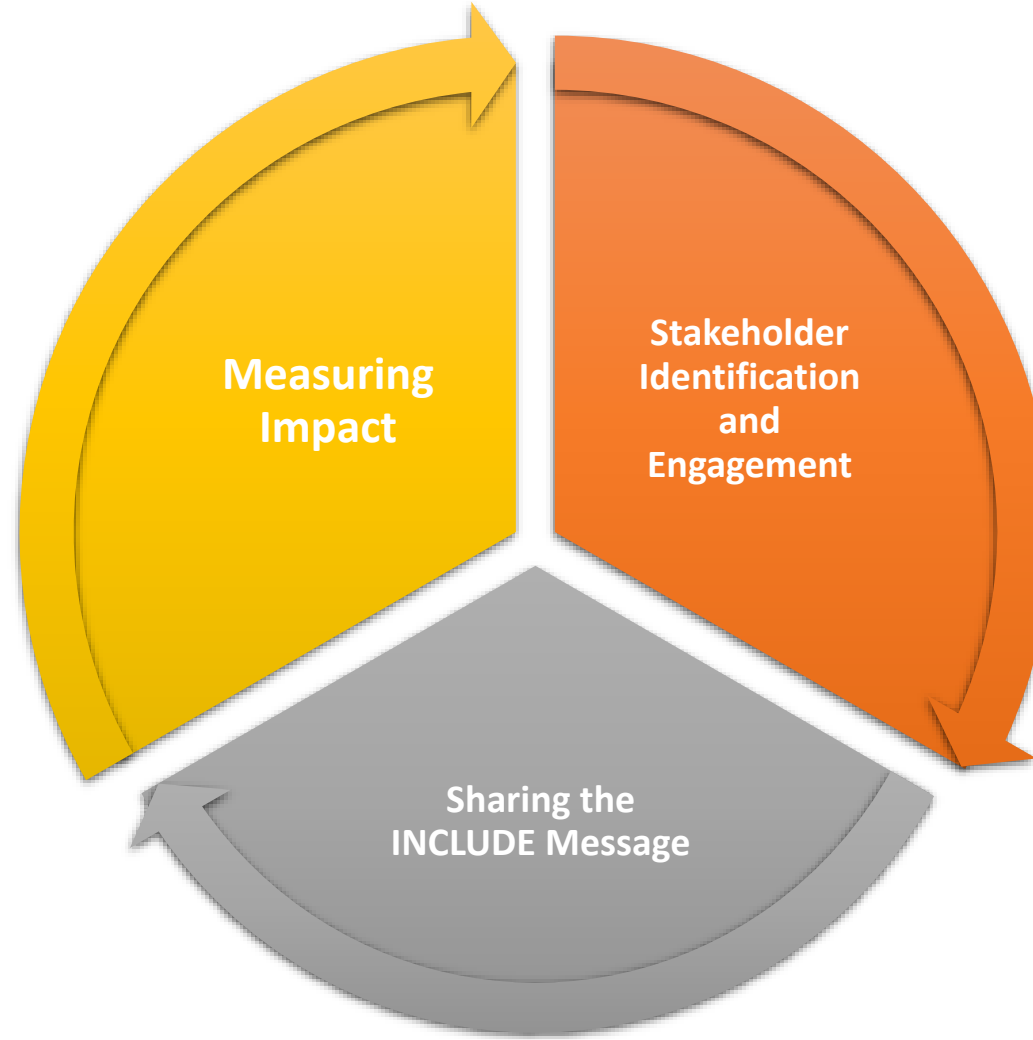

Delivered by integrated approach

INCLUDE Stakeholders

INCLUDE Dissemination Framework

INCLUDE Workshop Aims and Objectives

- Driving awareness of INCLUDE – how can we do this?
- Influencing actions of stakeholders – how can we do this?

Let us know how we can make a difference where it matters

Thank you!
