

XI. Doctor of Philosophy Assessment Regulations

A. Scope

1. These Assessment Regulations apply to all candidates at Newcastle University who, having met the requirements of the University's *General Regulations* and the [Doctor of Philosophy Degree Progress Regulations \(Section X\)](#), are eligible to submit for examination for the degree of Doctor of Philosophy.

These Assessment Regulations apply to a submission either by thesis or by published work (for staff candidates). The basis for the award of the degree of Doctor of Philosophy to staff candidates will be the same as the basis for the award of the degree to student candidates.

These regulations use Academic Unit as an overarching term for School and Institute.

Where reference is made in these regulations to any named University role, such references are to be read as including reference to their nominees.

Notes for Published Work Submissions – for Staff Candidates Only

(i) A submission by published work is only available to you if you are registered as a staff candidate. If you are a member of staff who wishes to be a staff candidate for the degree of Doctor of Philosophy on the basis of the submission of published work, you must have held an appointment in the University for a continuous period of at least three years at the time of submission and the study and research carried out during your period of appointment must have formed a significant contribution to the published work.

(ii) The published work submitted should overall be seen to be broadly comparable to a PhD thesis in the same discipline, so that it is evidently the result of a sustained level of recent research activity normally in a single field of study to which it makes an original contribution.

(iii) The submission will consist of a collection of published material including papers, chapters, monographs or books. The publication of papers will normally have taken place in refereed journals, or other journals held in high standing by academics working in the relevant field. Books, monographs, and chapters in books will normally have been published by established publishing houses or other recognised publishing media. The publications submitted will normally relate to work undertaken during a minimum period of three years and a maximum period of six years.

(iv) Work will only be regarded as published if at the time of submission copies of the work are generally obtainable through normal sources, such as publishing houses, bookshops and academic libraries. Proofs of papers not yet published but accepted for publication are acceptable. However, reports or other documents prepared for organizations such as private companies, government departments or charities or for internal University purposes are not acceptable unless they have been published widely outside the organization for which they were prepared.

B. Appointment of Examiners

2. Your thesis will be examined by Examiners appointed by the Dean of Postgraduate Studies on behalf of Senate.
3. There will ordinarily be one External Examiner and one Internal Examiner appointed for you. If you are a staff candidate, the examination will normally be conducted by two External Examiners, although if you are a junior member of staff, one External Examiner and one Internal Examiner may be appointed, at the discretion of the Dean of Postgraduate Studies.
4. All Examiners will be nominated by the Head of Academic Unit in consultation with your Supervisory Team. You will have an opportunity to see who has been nominated as your Examiners. If you believe there is a conflict of interest it should be drawn to the attention of your Supervisory Team, Head of Academic Unit or Graduate School, as soon as possible. Examiner appointments will only be reviewed if it is clear there may be bias or prejudice by an Examiner.
5. Examiner nominations will be submitted by your Supervisory Team, following your submission of your thesis title for approval. This should normally be three months before your thesis is submitted so that Examiners have been appointed by the time of your thesis submission. (*The [Code of Practice for Research Degree Programmes](#) provides further details in the section, 'Criteria for Appointment of Examiners'*)
6. Where the University is unable to appoint, or chooses not to appoint, an Internal Examiner for you, a second External Examiner will be appointed.
7. In all cases where two External Examiners are appointed, the Dean of Postgraduate Studies will also appoint an independent member of University staff who will chair the oral examination. The Independent Chair will normally be from outside your subject area. The Independent Chair is not an examiner of your thesis but provides guidance on University regulations and procedures to ensure that your oral examination is conducted in accordance with normal University practice. The Independent Chair is required to be present for the duration of the oral examination. (*The [Code of Practice for Research Degree Programmes](#) provides further details in the section, 'Criteria for Appointment of Examiners.'*)
8. A former member of staff of the University will not normally be appointed as an External Examiner until at least five years have elapsed since that person left the employment of the University. A retired member of staff of the University will not normally be appointed as an External Examiner. A retired member of staff of another institution may be appointed as an External Examiner only if they are still active in the field of research and study concerned.

Note: The University cannot guarantee the examination of your thesis immediately after its submission. You are advised that several weeks may elapse between the submission of your thesis and the completion of the examination process. The normal period between submission of a thesis and an examination is ten weeks, although circumstances may necessitate a longer time frame. The Graduate School will keep you informed of the progress of your

examination, should the examination process extend beyond the normal ten-week period.

C. Nature of the Examination

9. The examination will consist of a review and assessment of your thesis by the appointed Examiners and of an oral examination on the content of the thesis and related subjects. The oral examination will normally be chaired by the Internal Examiner, where an Independent Chair has not been appointed, but the examiners should discuss and agree the chairing arrangements during their pre-meeting, in advance of the start of the oral examination.

10. The oral examination will be conducted in accordance with the guidelines in the University's [Handbook for Examiners of Research Degrees](#).

The purpose of the oral examination is to enable the Examiners to:

- a) establish that the research has been completed by you;
- b) test your ability to defend your thesis;
- c) establish whether you have a satisfactory knowledge of the wider field surrounding your research topic.

11. In exceptional circumstances the Dean of Postgraduate Studies may, subject to the agreement of the Examiners, exempt you from the oral examination, subject to alternate arrangements being in place to assess the above aspects.

12. In examining your thesis, the Examiners should take into account the assessment criteria detailed in the 'Criteria for the Doctorate' section of the University's [Handbook for Examiners of Research Degrees](#).

13. The results of the research and study must be satisfactorily presented in the thesis which should include matter worthy of publication. The thesis itself need not however be submitted in a form suitable for publication.

14. In the case of any work done jointly, or in wider collaborations, or under direction, it is important that the extent of your own contribution is made clear both in any introductory element of the thesis and at relevant points within the thesis.

D. Examiners' Preliminary Reports

15. Your Examiners should independently write a preliminary report indicating their provisional assessment of your thesis and of the issues to be explored in the oral examination. It is expected that, if the criteria for the award of the degree have clearly been met, the preliminary reports will be very brief. However, if your Examiners have serious concerns about whether the criteria have been met, fuller reports will be expected.

Each examiner's preliminary report should be sent to the Graduate School in advance of the oral examination taking place. Examiners should not consult with each other before both independent reports have been submitted to the Graduate School. The reports will be forwarded to the Dean of Postgraduate Studies, but they must not be shown to you or your Supervisory Team in

advance of the oral examination. However, Examiners should be aware that preliminary reports will be made available to you after the oral examination if requested by you under the provisions of the Data Protection Act.

16. Exceptionally, and two weeks or more in advance of a scheduled oral examination, if the External Examiner upon initial independent review of the thesis is unequivocally of the view that the thesis is not worthy of defence without significant re-work by you, they will contact the Graduate School. The Dean of Postgraduate Studies will then determine whether it is appropriate for extraordinary arrangements to be put in place to allow your Examiners to confer before the oral examination. If approved by the Dean of Postgraduate Studies, your Examiners will be asked to prepare a joint report. The decision reached under these arrangements will be limited to Regulation 35 b permitting resubmission in 12 months with an oral examination, and the terms of Regulation 39 must apply.

E. Personal Extenuating Circumstances

17. Following submission of your thesis, if you are aware of any circumstances that may prevent you from attending the oral examination, these should be brought to the attention of your Supervisory Team and the Graduate School immediately, to determine if it necessary to delay the oral examination.

18. When preparing for your oral examination, if you believe that you will require reasonable adjustments to your oral examination due to your personal circumstances, you should contact your Supervisory Team and the Graduate School if you require reasonable adjustments to the oral examination due to your personal circumstances. The Graduate School will discuss your requirements with you and where appropriate seek approval for any adjustments from the Dean of Postgraduate Studies and inform your Examiners of these.

19. If you experience unexpected personal circumstances which you believe could impact on your performance at the oral examination, you should contact your Supervisory Team and the Graduate School. The Graduate School will discuss your requirements with you and where appropriate seek approval for any adjustments from the Dean of Postgraduate Studies and inform your Examiners of these.

20. Irrespective of your personal circumstances, your Examiners will be expected to assess you against the doctoral assessment criteria.

21. By attending an oral examination, you are declaring that you are fit to attend the examination and, as such, it is unlikely that you would be able to submit a later claim that your performance was affected by personal circumstances.

F. Public Presentation

22. In association with the examining process, you may be encouraged to give a presentation of the work embodied in your thesis in the form of a public lecture or seminar. Such a presentation will not, however, form part of the formal

examination and will not contribute to the Examiners' decision on your performance.

G. Role of your Supervisory Team during the Examination

23. A member of your Supervisory Team will not be appointed as an Internal Examiner.

24. The Supervisory Team will co-ordinate the arrangements for the oral examination and inform the Graduate School of the date, in advance of the oral examination taking place.

25. There should normally be no discussion about the oral examination, between the Supervisory Team and your Examiners in advance of the oral examination.

26. Under no circumstances should your Supervisory Team send the electronic copy of your thesis direct to the Examiners. All formal submissions (first submission and any further submission as determined by the examination outcome) should be sent to the Graduate School, which will send the submission to the Examiners.

27. A member of your Supervisory Team may, at your request, be present at (but will make no contribution to the oral examination. They should in all cases be available to be consulted by the Examiners during the oral examination. The Supervisory Team will have the right to confer with the Examiners following the oral examination, and to be given an oral report on its outcome.

H. Your Role during the Examination

28. Under no circumstances should the arrangements for the oral examination be delegated to you.

29. There should normally be no discussion about the oral examination, or direct contact between you and your Examiners in advance of the oral examination.

30. Following the oral examination there should continue to be no direct contact between you and your Examiners throughout the rest of the examination process. If you require clarification on points raised by the Examiners, this clarification should be sought via your Supervisory Team.

31. Under no circumstances should you send the electronic copy of your thesis direct to your Examiners. All formal submissions (first submission and any further submissions determined by the examination outcome) should be sent to the Graduate School, which will send the submission to the Examiners.

J. Examiners' Final Reports

32. Having considered all the evidence presented to them, your Examiners will submit a Joint Report form on your examination. The report will include a written statement concerning your performance and the manner in which your work submitted has contributed to the advancement of knowledge and understanding, together with a recommendation as to the outcome of your

examination. The report should also address directly any concerns raised in the preliminary reports and make clear the areas required for amendment, if your Examiners are requiring corrections/revisions or a resubmission (See Regulation 46).

33. The Joint Report form must be sent to the Graduate School, which will forward the report to the Dean of Postgraduate Studies for consideration and confirmation that due process has been followed. Exceptionally, the Dean of Postgraduate Studies may require further information from the Examiners to justify their recommendation. After consideration and approval of the Joint Report and recommendation by the Dean of Postgraduate Studies, the Graduate School will send a copy to you, your Supervisory Team and your Head of Academic Unit (unless there is disagreement between the Examiners, see *Section M Disagreement between the Examiners* below).

34. Where two External Examiners have examined the thesis and it is agreed that revisions are required (in the recommendations 35 a ii or 35 c ii) they should agree between them which examiner will receive the revised thesis and ensure that the required revisions have been made.

Note: that Preliminary Reports and a Joint Report should be completed for all examinations requiring the input of both Examiners. This applies to both first submission and resubmission.

K. Recommendations Open to the Examiners

35. Following your first submission and examination, the Examiners may only make the following recommendations:

- a)
 - i. that you be admitted immediately to the degree of Doctor of Philosophy; *or*
 - ii. that you be admitted to the degree of Doctor of Philosophy subject to minor corrections, (e.g., of detail or presentation) or minor revisions (e.g., more substantial than minor corrections, but not involving a major revision of the thesis/doctoral statement) made to the satisfaction of the Internal Examiner, within a period of up to six months of receiving formal notification of the corrections to be made; *or*
- b) that you have not satisfied the Examiners in the oral examination and/or thesis/doctoral statement and that you are permitted to revise and resubmit your thesis/doctoral statement within 12 months for re-examination by both Examiners and be re-examined orally if the examiners require by indication in their joint report.
- c)
 - i. that you have reached the standard required for the appropriate Master's Degree and should immediately be awarded that degree instead; *or*
 - ii. that you have reached the standard required for the appropriate Master's Degree and should be awarded that degree instead subject to minor corrections, (e.g., of detail or presentation) or minor revisions (e.g., more substantial than minor corrections, but not involving a major revision of the thesis/doctoral statement) made to

the satisfaction of the Internal Examiner, within a period of six months of receiving formal notification of the corrections to be made; or

- d) that you be permitted to revise and re-submit your thesis/submission for the appropriate Master's Degree within twelve months for re-examination by both Examiners and be re-examined orally if the Examiners so require by indication in their written report; or
- e) that no degree be awarded and that you be adjudged to have failed.

Minor Revisions or Corrections

36. Recommendations 35 a or 35 c may be made subject to a requirement that you make minor corrections or revisions to your thesis before the deposit of an electronic copy of the thesis in the University Library in accordance with the [*Rules for the Form of Theses and Submission of Work for Higher Degrees \(Section XIV\)*](#).

37. Where minor corrections or revisions are required, you will be advised by the Graduate School that these must be made within six months of receiving formal notification of the corrections. It will be the responsibility of the Internal Examiner (or nominated External Examiner) to certify that the necessary corrections have been made before a pass list can be issued.

38. The expectation is your thesis will not require referral back to the External Examiner and that you will not be expected to undergo a further oral examination. However, if the Internal Examiner (or nominated External Examiner) feels that any recommendation other than recommendations 35 a i, (following an initial 35 a recommendation), 35 c i or 35 c ii (following an initial 35 c recommendation) is appropriate following reconsideration of the thesis after the minor revisions have been made, the thesis will also be referred to the External Examiner.

Resubmission for Re-Examination by Internal and External Examiners

39. If you are subject to recommendations 35 b or 35 d above, the revisions expected will be more substantial than in the case of recommendations 35 a or 35 c. However, these recommendations will be made only where your Examiners are of the view that the thesis is basically acceptable for the degree concerned and/or that it is reasonable to expect you to be able to attempt to revise and resubmit the thesis successfully in the normal time available and without conducting significant further basic research.

40. At resubmission, you must provide a written report indicating the changes you have made to your thesis in response to the requirements of the Examiners.

41. If the extraordinary arrangements under Regulation 16 have been applied, the Examiners will be required to conduct an oral examination upon resubmission.

Extension to Deadlines

42. In exceptional cases, an extension of time for making the required corrections/revisions or resubmission may be granted by the Dean of Postgraduate Studies, subject to you providing a strong justification and evidence, supported by your Supervisory Team. Requests to extend your

deadline must be submitted, in advance of your current corrections or resubmission deadline.

Recommendations after Resubmission for Re-examination by Internal and External Examiners with or without an Oral Examination

43. Your Examiners will indicate in their original joint report if they require an oral examination upon resubmission of your thesis. Where your oral performance on your initial examination was satisfactory and the Examiners are agreed, after considering the resubmitted thesis, that a further oral examination is not required, they may submit their recommendations without re-examining you orally.

44. However, Examiners may require a further oral examination on consideration of your revised thesis, even if this had not originally been required as part of your resubmission.

45. Where you are permitted to revise and resubmit your thesis in accordance with Regulations 35 b or 35 d, the only options open to the Examiners when re-examining the thesis will be one of the following, as appropriate;

- a) i. that you be admitted immediately to the degree of Doctor of Philosophy; *or*
 - ii. that you be admitted to the degree of Doctor of Philosophy subject to subject to minor corrections ((e.g., of detail or presentation) or minor revisions of the text (e.g., more substantial than minor corrections, but not involving a major revision of the thesis/doctoral statement)) made to the satisfaction of the Internal Examiner, within a period of six months of receiving formal notification of the corrections to be made; *or*
- b) i. that you have reached the standard required for the appropriate Master's Degree and should immediately be awarded that degree instead; *or*
 - ii. that you have reached the standard required for the appropriate Master's Degree and should be awarded that degree instead subject to minor corrections of the text/doctoral statement made *to the satisfaction of the Internal Examiner*, normally within a period of one month of receiving formal notification of the corrections to be made; *or*
- c) that no degree be awarded and that the candidate be adjudged to have failed.

Provision of Information about Corrections/Revisions

46. In all cases where you are required to make corrections/revisions to your thesis or resubmit your thesis, it will be the responsibility of your Examiners to provide full details of the corrections, revisions or additional publishable material (for published work submission) required of the thesis, but not extending to proof-reading or editing of the thesis. The Examiners should provide a detailed written statement of the nature of the changes they wish to be made to the thesis, along with their completed Joint Report form. These should be sent to the Graduate School which will formally forward these

documents on to you and your Supervisory Team. When forwarding the final report to you, the Graduate School will make it clear that resubmission in itself will not guarantee the award of a qualification.

L. Communication of the Result

47. The Dean of Postgraduate Studies acts as the Chair of the Board of Examiners. Examiner recommendations are considered by the Dean of Postgraduate Studies who will then confirm or otherwise these recommendations, following receipt of examiner reports by the Graduate School. The results of the examination or re-examination will then be communicated formally to you by the Graduate School.

In any case where an Examiner chooses to provide you with an informal indication of their recommendation, the examiner concerned must stress that their recommendation is subject to ratification by the Dean of Postgraduate Studies. Only the Graduate School, on behalf of the Academic Registrar, is empowered to issue an official result and provide you with this.

M. Disagreement between the Examiners

48. If there is a disagreement between the Examiners or doubt about their intentions, they will be consulted by the Dean of Postgraduate Studies or Graduate School, with a view to resolving the matter. Where there is irreconcilable disagreement between the Examiners an additional External Examiner will be appointed.

49. The additional External Examiner will be asked to read your thesis and to conduct an oral examination. The additional External Examiner will be told that the previous Examiners had failed to reach agreement but will not have sight of their reports. On the occasion of the second oral examination the Supervisory Team (and where appropriate the Internal Examiner) will be available to be consulted by the additional External Examiner. The Dean of Postgraduate Studies will appoint an Independent Chair, who will report on the conduct of the oral examination.

50. The Supervisory Team will co-ordinate the arrangements for the oral examination. After the conclusion of the oral examination, the additional External Examiner will make a recommendation which will be final. They will submit a final report which will, subject to the approval of the Dean of Postgraduate Studies, be forwarded to you and the Supervisory Team in the normal way. In the event that changes to the thesis are required it will be the additional external examiner who will examine the thesis.

51. Where a disagreement between Examiners is identified at the examination of a resubmission, the additional External Examiner will be asked to read your thesis and to consider the work submitted against the Examiners joint report from the first submission. If an oral examination is required for the resubmission the Dean of Postgraduate Studies will appoint an Independent Chair, who will report on the conduct of the viva. After the conclusion of the oral examination, the additional External Examiner will make a recommendation which will be final. They will submit a final report which will, subject to the approval of the Dean of Postgraduate Studies, be forwarded to you and your Supervisory Team

in the normal way. In the event that minor corrections or minor revisions are required, they will need to be made to the satisfaction of the additional External Examiner.

52. If you are subject to the procedure set out in Regulations 49 - 52 you will be informed that the Examiners originally appointed have disagreed and that an additional External Examiner will be appointed. You will not be informed as to the nature of the disagreement between the original Examiners and will not be given a copy of their reports. If, however, you subsequently appeal against the final decision in respect of the award of the degree, the report of the original Examiners will form part of the formal record of appeal. You will be informed that a second oral examination will be required. After the second oral examination, and once a final decision as to the award of the degree has been made in accordance with Regulations 35 and 45, the final report of the additional Examiner will be made available to you and your Supervisory Team.

N. Provision for an Oral Examination to be Conducted Outside the University

53. It is expected that all oral examinations will normally take place with both you and your Examiners present at an approved University campus.

54. A video link oral examination may be arranged where either you and/or your Examiners is not able to be present at the University. In order for an oral examination to be conducted in this way the guidelines outlined in the University's [Handbook for Examiners of Research Degrees](#) must be followed to guarantee the integrity of the examination.

55. Your Supervisory Team will normally discuss the oral examination arrangements with you at the point at which your Examiners are nominated. In all cases where the oral examination is conducted via video link or at a location other than an approved University campus, your consent must be obtained. If you choose not to participate in a video link oral examination you should advise your Graduate School and the examination process will be placed on hold, until a present in person oral examination is possible.

56. An oral examination may be arranged at a location other than an approved University campus, subject to the approval of the Dean of Postgraduate Studies.

57. A member of your Supervisory Team is not normally expected to attend the oral examination (via video link or at a location other than an approved University campus) unless at your specific request, but is expected to be contactable by the Examiners if required.

P. Posthumous Awards

58. A posthumous degree can be awarded where a deceased student's body of work is sufficient to meet the criteria for the award. To initiate a request for a posthumous award, the Supervisory Team should provide a statement to the Dean of Postgraduate Studies outlining why the student should be considered for the posthumous degree. Requests should be endorsed by the Head of Academic Unit in which the student was registered and should normally have

the support of the student's family. The [Policy on Posthumous Awards for Postgraduate Research Students](#) provides additional detail.
