

PROGRAMME SPECIFICATION

1	Awarding Institution	Newcastle University
2	Teaching Institution	Newcastle University
3	Final Award	BSc (Hons)
4	Programme Title	Information Systems Information Systems with Accounting Information Systems with Business Studies Information Systems with Management Information Systems (Industrial Placement) Information Systems with Accounting (Industrial Placement) Information Systems with Business Studies (Industrial Placement) Information Systems with Management (Industrial Placement)
5	UCAS/Programme Code	G500, G5N4, G5N1, G5N2, G504, G5NK, G5NC, G5NF
6	Programme Accreditation	British Computer Society
7	QAA Subject Benchmark(s)	Computing
8	FHEQ Level	6
9	Date written/revised	22 July 2009

10 Programme Aims

1. To produce graduates who will be well suited to developing applications of IT, building on standard software and hardware platforms, and understanding and performing computer system administration. They will have a depth of knowledge of key computing science topics, supplemented by a breadth of knowledge that encompasses other subject areas such as economics, accounting, business management or law, or skills in a modern language (e.g. French, Spanish). We envisage them going on to employment in an administrative/commercial environment doing system management or applying their Information Systems skills in that environment. They would also be well-suited to what we see as a growing market in the development of material for network information services, electronic publishing and similar areas
2. To provide a flexible programme that allows students to specialise in particular areas:
 - a. Students with a degree in Information Systems with Accounting or Information Systems with Accounting (Industrial Placement) will additionally have an understanding of the discipline of accounting and its regulatory frameworks, experience of elementary accounting reporting systems and an understanding of advanced topics such as management accounting and taxation.
 - b. Students with a degree in Information Systems with Management or Information Systems with Management (Industrial Placement) will additionally have understanding of management theory and practice and be able to demonstrate management skills, together with an understanding of advanced topics such as e-business and human resource management.
 - c. Students with a degree in Information Systems with Business Studies or Information Systems with Business Studies (Industrial Placement) will additionally have a breadth of understanding of topics in Accounting,

Economics, Management or Marketing.

3. To provide a programme that equips students with subject-specific and transferable skills that will enable them to pursue a variety of careers within, and outside, the IT industry, including research.
4. To provide a programme which meets the accreditation requirements of appropriate professional bodies, thus providing the basis for further professional development and lifelong learning.
5. To provide a programme which meets the FHEQ at Honours level and which takes appropriate account of the subject benchmark statements in Computing.
6. For those students taking a programme with industrial placement, to provide students with the opportunity to develop their skills within an industrial setting.

11 Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, qualities, skills and other attributes in the following areas. The programme outcomes have references to the benchmark statements in Computing.

Knowledge and Understanding

On completing the programme students should have gained and able to demonstrate knowledge and understanding of:

- A1. A diverse range of programming paradigms and languages supported by programming language principles
- A2. The principles of software engineering
- A3. Professional issues, including legal and ethical aspects of professional practice, professional development, social roles and effects of computing systems
- A4. Communicating information
- A5. Research techniques
- A6. Techniques for distributed and Internet programming
- A7. Advanced knowledge of modern software engineering processes
- A8. Knowledge of basic principles of advanced software CASE tools
- A9. Awareness of software project management techniques
- A10. Understanding of legal issues affecting software projects
- A11. Other subject areas as appropriate to the specialism and/or choice of modules from other Schools

Teaching and Learning Methods

Lectures are the main way of imparting knowledge and understanding (A1-A11), but tutorials are also used. Practical classes feature prominently, especially to support the Stage 1 programming modules (A1, A2). Visiting speakers provide seminars on aspects of being an IT professional (A3). Students are expected to contribute to their own learning experience by independent reading. They are provided with references to books which are categorised as *essential*, *recommended*, and *background* reading, as well as scientific papers and other learning materials including appropriate web URLs. In addition, an industrial placement will involve the development of knowledge within an industrial setting.

Assessment Strategy

Knowledge and understanding are assessed by means of closed and open book written examinations, and coursework, including team and individual project reports and log books (A1-A11).

Intellectual Skills

<p>On completing the programme students should be able to understand and undertake:</p> <ul style="list-style-type: none"> B1. Carrying out the process of software development, including: the analysis of system requirements: the production of system specifications using appropriate models and techniques B2. The use of a variety of advanced (especially object-oriented) programming languages and paradigms B3. The use of a variety of advanced computer-based (including operating) systems B4. The use and provision of network information services B5. The use of a variety of programming languages and paradigms B6. The design and implementation of user interfaces B7. The introduction, customization and management of IT systems B8. Giving advice and support to users in the operation of their IT systems B9. The identification and implementation of appropriate algorithms and data structures B10. Project management skills, including estimation and planning B11. The application of IT systems to other subject areas depending on specialism B12. Designing and building realistic distributed systems and Internet applications B13. Integration of a wide variety of protocols and platforms B14. Other skills as appropriate to the specialism and/or choice of modules from other Schools

<p>Teaching and Learning Methods</p>

<p>A team project at Stage 2 gives students experience of working with others to engineer a complex piece of software (B1-B10). When taken, the industrial placement will require students to produce solutions to a customer's requirements (B1-B10). An individual project at Stage 3 requires students to relate their IT knowledge, experience and skills to a different subject area (B14). In all other modules coursework is used to develop many of these skills (B1-B13). Appropriate teaching and learning strategies are employed by external Schools to develop relevant skills (B14).</p>
--

<p>Assessment Strategy</p>

<p>Subject-specific and professional skills are assessed by coursework (B1-B14).</p>
--

<p style="text-align: center;">Practical Skills</p>
--

<p>On completing the programme students will have:</p> <ul style="list-style-type: none"> C1. The ability to conduct investigations using the technical and professional literature C2. The ability to use and evaluate appropriate tools and techniques C3. The ability to undertake empirical evaluation of alternative solutions C4. The ability to solve problems by identifying suitable approaches to using computer-based systems.

<p>Teaching and Learning Methods</p>

<p>All modules involve coursework, much of which involves problem solving skills (C4). This is especially so in the team and individual projects and, when taken, the industrial placement where students need to select, evaluate and apply appropriate tools and techniques (C2). Here and elsewhere students will need to investigate possible alternatives in the technical and professional literature (C1, C3).</p>

<p>Assessment Strategy</p>

<p>Practical skills are assessed by a range of coursework (reports, design documents, etc.) (C1-</p>
--

C4).

Transferable/Key Skills

On completing the programme students should be able to use the following skills:

- D1. Written communication
- D2. Problem solving
- D3. Interpersonal communication
- D4. Initiative
- D5. Oral presentation
- D6. Adaptability
- D7. Teamwork
- D8. Numeracy
- D9. Planning and organisation
- D10. Computer literacy

Teaching and Learning Methods

Key skills feature throughout the programme; teamwork in the Stage 2 team project (D7); oral presentation, interpersonal communication, and planning and organisation in the module on Information Handling, and the final year project module, as well as the Stage 2 team project and when taken, the industrial placement (D3, D5, D9); written communication in all modules, but especially in the final year project (D1); all students will have a basic level of numeracy (at least a C in GCSE Maths) and these skills are used and developed by exercises in the programming modules and in the second year module on Information Handling (D8); computer literacy, problem solving, initiative and adaptability are necessarily covered throughout the programme (D2, D4, D6, D10).

Assessment Strategy

Key (transferable) skills are assessed by both written and oral presentations, in particular in the Stage 2 Information Handling module (D1-D10). Teamwork in the Stage 2 team project is assessed both by the module leader at team oral presentations and by a team monitor (a member of teaching staff) who attends team formal meetings (D5, D7). When taken, the industrial placement is assessed by the Module Leader with input from an industrial supervisor and on a pass/fail basis. No resit opportunity is available. Students who fail the placement are able to proceed to Stage 3 of the corresponding "without Industry" programme.

12 Programme Curriculum, Structure and Features

Basic structure of the programme

This programme has 3 Stages and when an industrial placement is taken, an intercalating year between stages 2 and 3. Students are required to take 120 credits at each Stage (except during an intercalating year).

At each Stage students take 80 compulsory credits worth of Computing Science modules and a further 40 optional credits of non-Computing modules. The diet of modules taken must be agreed by the Degree Programme Director who will need to ensure that a sufficient number of modules are taken at an advanced level.

A range of optional Computing Science modules is available at Stage 3 from which students choose one module, however all students must take the 40-credit individual project module CSC3595.

Key features of the programme (including what makes the programme distinctive)

Students may elect to study one or two semesters of their final year abroad at one of our ERASMUS partner institutions.

Students taking one of the industrial placement degrees will take an industrial placement year between Stages 2 and 3.

To gain BCS accreditation students are required to have studied Stages 2 and 3 at the

Newcastle campus. Students must have also passed a problem-solving project at the first attempt.

Programme regulations (link to on-line version)

<http://www.ncl.ac.uk/regulations/programme/2009-2010/documents/G500etcUGInformationSystemsCalendarregs2009-10GW290909.pdf>

13 Criteria for admission

Entry qualifications

Minimum Grade C GCSE Mathematics

A-Level Subjects and Grades

Typical BBC at A2. We do not require any particular A level subjects to have been taken.

We accept applications for APL.

Alternative entry qualifications

We accept a wide range of alternative qualifications, such as IB 28 points, BTEC National Diploma 1 Distinction and 2 Merits, Scottish Highers BBBBC and appropriate Access, Bridging and Foundation programmes.

Admissions policy/selection tools

Applicants are invited to visit the School for interview and to see the University and to meet current undergraduates on the programme. Attendance is strongly encouraged but not compulsory and applicants who are not based in the UK are not expected to attend.

Additional Requirements

None.

Level of English Language capability

For applicants whose first language is not English we ask for IELTS 6.5 or TOEFL 233 (computer-based).

14 Support for Student Learning

Induction

During the first week of the first semester students attend an induction programme. New students will be given a general introduction to University life and the University's principle support services and general information about the School and their programme, as described in the Student Handbook and their Degree Programme Handbook. New and continuing students will be given detailed programme information and the timetable of lectures/practicals/labs/tutorials/etc. The International Office offers an additional induction programme for overseas students.

Study skills support

Students will learn a range of Personal Transferable Skills, including Study Skills, as outlined in this Programme Specification. Some of this material, e.g. time management is covered in the appropriate Induction Programme. Students are explicitly tutored on their approach to both team and individual projects. Specific help is available to improve writing skills:

<http://www.ncl.ac.uk/students/wdc/learning/>

Academic support

The initial point of contact for a student is with a lecturer or module leader, or their tutor (see below) for more generic issues. Thereafter the Degree Programme Director or Head of School may be consulted. Issues relating to the programme may be raised at the Staff Student Committee, and/or at the Board of Studies.

Industrial Placement (when taken)

During the industrial placement, students will have a supervisor from the School as well as an industrial supervisor as detailed in the School's Placement Handbook.

Pastoral support

All students are assigned a personal tutor whose responsibility is to monitor the academic performance and overall well-being of their tutees. In addition the University offers a range of support services, including the Student Advice Centre, the Counselling and Wellbeing team, the Mature Student Support Officer, and a Childcare Support Officer. For details of all student support services see:

<http://www.ncl.ac.uk/about/campus/facilities/list/Student+Support+Services>.

Support for students with disabilities

The University's Disability Support Service provides help and advice for disabled students at the University - and those thinking of coming to Newcastle. It provides individuals with: advice about the University's facilities, services and the accessibility of campus; details about the technical support available; guidance in study skills and advice on financial support arrangements; a resources room with equipment and software to assist students in their studies. For further details see:

<http://www.ncl.ac.uk/about/campus/facilities/list/disability+support+service>.

Learning resources

The University's main learning resources are provided by the Robinson and Walton Libraries (for books, journals, online resources), (<http://www.ncl.ac.uk/library/>) and Information Systems and Services, which supports campus-wide computing facilities:

(<http://www.ncl.ac.uk/about/campus/facilities/list/Computing+Services>)

The School of Computing Science has well equipped computer laboratories consisting of networked PCs with dedicated labs for each stage of the programme. In particular the School hosts a videoconferencing suite, funded through the HEFCE Centre of Excellence in Teaching and Learning programme. Key software used in the support and delivery of the programme is available to students free of charge. The School has its own library which is mainly used for the support of advanced topics in the later stages of the programme. The University's Robinson Library has available multiple copies of all recommended undergraduate texts. Many of the reading list books are available online through Safari Tech.

All new students whose first language is not English are required to take an English Language test in the Language Centre. Where appropriate, in-session language training can be provided. The Language Centre houses a range of resources for learning other languages which may be particularly appropriate for those interested in an Erasmus exchange (<http://www.ncl.ac.uk/about/campus/facilities/list/Language+Facilities>).

15 Methods for evaluating and improving the quality and standards of teaching and learning

Module reviews

All modules are subject to review by questionnaires which are considered by the Staff Student Committee and the Board of Studies. Changes to, or the introduction of new, modules are considered at the School Teaching and Learning Committee and at the Board of Studies. Student opinion is sought at the Staff Student Committee and/or the Board of Studies. New modules and major changes to existing modules are subject to approval by the Faculty Teaching and Learning Committee.

Programme reviews

The Board of Studies conducts an Annual Monitoring and Review of the degree programme and reports to Faculty Teaching and Learning Committee.

External Examiner reports

External Examiner reports are considered by the Board of Studies. The Board responds to these reports through Faculty Teaching and Learning Committee.

Student evaluations

All modules, and the degree programme, are subject to review by student questionnaires. Informal student evaluation is also obtained at the Staff Student Committee, and the Board of Studies. The National Student Survey is sent out every year to final-year undergraduate students, and consists of a set of questions seeking the students' views on the quality of the learning and teaching in their HEIs. Further information is at www.thestudentsurvey.com/ With reference to the outcomes of the NSS and institutional student satisfaction surveys actions are taken at all appropriate levels by the institution.

Mechanisms for gaining student feedback

Feedback is channelled via the Staff Student Committee and the Board of Studies.

Faculty and University Review Mechanisms

The programme is subject to the University's Internal Subject Review process, see http://www.ncl.ac.uk/aqss/qsh/internal_subject_review/index.php

Accreditation reports

All the programmes covered by this Degree Programme Specification were accredited by the British Computer Society in October 2008.

Additional mechanisms

None.

16 Regulation of assessment

Pass mark

The pass mark is 40.

Course requirements

Progression is subject to the University's Undergraduate Progress Regulations and Undergraduate Examination Conventions (<http://www.ncl.ac.uk/regulations>). In summary, students must pass, or be deemed to have passed, 120 credits at each Stage. Limited compensation up to 40 credits and down to a mark of 35 is possible at each Stage and there are resit opportunities, with certain restrictions.

Weighting of stages

The marks from Stages 2 and 3 will contribute to the final classification of the degree
The weighting of marks contributing to the degree for Stages 2 and 3 is 50 : 50

Common Marking Scheme

The University employs a common marking scheme, which is specified in the Undergraduate Examination Conventions, namely

	Modules used for degree classification	Modules not used for degree classification
<40	Fail	Failing
40-49	Third Class	Basic
50-59	Second Class, Second Division	Good
60-69	Second Class, First Division	Very Good
70+	First Class	Excellent

Role of the External Examiner

An External Examiner, a distinguished member of the subject community, is appointed by Faculty Teaching and Learning Committee, after recommendation from the Board of Studies.

The External Examiner is expected to:

- See and approve examination papers
- Moderate examination and coursework marking
- Attend the Board of Examiners
- Report to the University on the standards of the programme

In addition, information relating to the programme is provided in:

The University Prospectus (see <http://www.ncl.ac.uk/undergraduate/>)

The School Brochure (contact enquiries@ncl.ac.uk)

The University Regulations (see <http://www.ncl.ac.uk/regulations/docs/>)

The Degree Programme Handbook
(see <http://www.cs.ncl.ac.uk/teaching/undergraduate/index.php>)

Please note. This specification provides a concise summary of the main features of the programme and of the learning outcomes that a typical student might reasonably be expected to achieve if she/he takes full advantage of the learning opportunities provided. The accuracy of the information contained is reviewed by the University and may be checked by the Quality Assurance Agency for Higher Education.

Mapping of Intended Learning Outcomes onto Curriculum/Modules

Intended Learning Outcome	Module codes (Compulsory in Bold)
