

PROGRAMME SPECIFICATION

1	Awarding Institution	Newcastle University
2	Teaching Institution	Newcastle University
3	Final Award	MSc
4	Programme Title	Automation and Control
5	UCAS/Programme Code	5057
6	Programme Accreditation	IET
7	QAA Subject Benchmark(s)	N/A
8	FHEQ Level	7
9	Date written/revised	May 2014

10 Programme Aims

The programme aims:

- To gain an advanced knowledge and understanding of specialist topics in Automation and Control;
- To develop transferable skills in research and knowledge acquisition.
- To satisfy the professional development needs of the individual and his/her employers; providing relevant training to engineering graduates who wish to pursue a career as systems engineers in the fields of intelligent manufacturing, production units and distributed control systems, or in general modern control applications
- To provide a foundation for further postgraduate studies.

11 Learning Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge, understanding, skills and other attributes associated with the theme of Automation and Control.

Knowledge and Understanding

On completing the programme students should have gained and be able to demonstrate:

- A1 A knowledge and understanding of a total of 6 advanced topics in the field of Automation and Control selected from: Industrial Automation, Robotics and Artificial Intelligence, Distributed Control Systems, Advanced Control Systems, State Space Analysis and Controller Design, Signal Processing and Estimation, Advanced Multimedia Systems, Power Electronics, Control of Electric Drives and Power Systems Operation.

A2	The technical expertise that underpins informed project planning, design and decision making in the area of Automation and Control
A3	Computer aided design and analysis techniques appropriate to Automation and Control, for example the use of software packages such as MATLAB, Simulink, PSpice
A4	A particular topic connected with Automation and Control studied in-depth as part of a research project.

Teaching and Learning Methods	
Acquisition of A1 to A4 is through a combination of lectures, tutorials, student centred learning, coursework and project work.	
Assessment Strategy	
Formative assessment in particular areas occurs through tutorial exercises (computer based and written) and coursework. The primary means of assessing factual knowledge is through closed book written examination. This is supported through assessed coursework and case studies.	
In depth individual learning forms part of the research project, which is assessed by a literature survey, a presentation exercise, dissertation and oral examination.	
Intellectual Skills	
On completing the programme students should be able to:	
B1	Select and apply appropriate methods for modelling and analysing problems in Automation and Control
B2	Use scientific principles in the modelling and analysis of engineering systems, processes and products
B3	Select and apply appropriate methods for developing Automation and Control solutions to practical problems
B4	Produce engineering solutions to problems through the application of knowledge and understanding in Automation and Control
B5	Create new designs in Automation and Control through synthesis of ideas from a wide range of sources
B6	Develop ideas and opinions through the critical appraisal of information from a wide range of sources
Teaching and Learning Methods	
Acquisition of B1 to B5 is through a combination of lectures, tutorials, coursework and project work.	

Assessment Strategy
Intellectual abilities are assessed through a mixture of written examinations, coursework assignments. The research project, which is assessed by dissertation and oral examination, provides evidence of the ability to carry out a research project.
Practical Skills
<p>On completing the programme students should be able to:</p> <p>C1 Use relevant test and measurement equipment.</p> <p>C2 Use software packages relevant to Automation and Control</p> <p>C3 Plan, execute and report a research project</p> <p>C4 Design a system or component in selected areas of Automation and Control</p> <p>C5 Search for and retrieve information from a wide range of sources</p>
Teaching and Learning Methods
Acquisition of C1 to C5 is through a combination of lectures, tutorials, coursework and project work.

Assessment Strategy
C1 to C5 are not explicitly assessed but are necessary for successful completion of coursework and project.
Transferable/Key Skills
<p>On completing the programme students should be able to:</p> <p>D1 Communicate effectively</p> <p>D2 Critically appraise information from a wide range of sources</p> <p>D3 Create and innovate in problem solving</p> <p>D4 Use general IT tools such as word processors, spreadsheets</p> <p>D5 Manage time and resources</p>
Teaching and Learning Methods
D1 to D5 are introduced and developed via a combination of tutorial examples, coursework and project work.

Assessment Strategy

Skills D1 to D3 are necessary to complete examinations and assignments to a satisfactory standard

Skills D4 and D5 are essential for satisfactory completion of the project

12 Programme Curriculum, Structure and Features

Basic structure of the programme

The course comprises 90 taught credits, plus 15 credits of laboratory based coursework. MSc students also complete an individual project with dissertation (60 credits) and a group project module (15 credits).

The course is offered once per year in a three semester structure with all lectured material and the research methods module being in semesters 1 and 2. The project will take place in Semester 2 and 3.

Key features of the programme

This programme is aimed at students who wish to pursue advanced studies in the area of Automation and Control.

Advanced knowledge and understanding (A1 to A3) of specialist topics in Automation and Control are gained primarily through the selected modules. This is reinforced through tutorial exercises and coursework assignments.

Intellectual abilities (B1 to B6) are introduced through the chosen modules and are reinforced through tutorial exercises, coursework assignments. Tutorial exercises and coursework assignments also develop practical skills (C1, C2, C4, C5) and transferable skills (D1 to D5)

The research project involves individual acquisition of knowledge and abilities (A2 to A4, B1 to B5), project planning and execution (C3). Experience is also gained of practical skills (C1 to C5). Satisfactory completion of the dissertation and examination requires command of the transferable skills (D1 to D5).

Programme regulations

<http://www.ncl.ac.uk/regulations/programme/>

13 Criteria for admission

Entry qualifications

Students should normally have at least a 2.2 honours degree in electrical engineering (or equivalent). A lower qualification may be considered if applicant has a significant period of relevant industrial experience.

Level of English Language capability
6 IELTS or equivalent.

14 Support for Student Learning

The Student Services portal provides links to key services and other information and is available at: <http://www.ncl.ac.uk/students/>

Induction

During the first week of the first semester students attend an induction programme. New students will be given a general introduction to University life and the University's principle support services and general information about the School and their programme, as described in the Degree Programme Handbook. New and continuing students will be given detailed programme information and the timetable of lectures/practicals/labs/tutorials/etc. The International Office offers an additional induction programme for overseas students.

Study skills support

Students will learn a range of Personal Transferable Skills, including Study Skills, as outlined in the Programme Specification. Some of this material, e.g. time management is covered in the appropriate Induction Programme. Students are explicitly tutored on their approach to both group and individual projects.

Numeracy support is available through Maths Aid and help with academic writing is available from the Writing Development Centre (further information is available from the Robinson Library).

Academic and Pastoral support

Each undergraduate and taught postgraduate student will be assigned a personal tutor.*

A personal tutor is one part of a wider network of advice and guidance available to students to support their personal and general academic development. The module leader acts as the first point of contact for subject-specific academic advice. Thereafter the Degree Programme Director or Head of School may be consulted. Issues relating to the programme may be raised at the Student-Staff Committee, and/or at the Board of Studies. Within the academic unit, students may also receive additional academic and pastoral advice from a range of other student-facing staff including degree programme directors, dissertation/project supervisors, and administrative support staff.

*Arrangements may vary for students taking special types of provision.

The University also offers a wide range of institutional services and support upon which students can call, such as the Writing Development Centre, Careers Service and Student Wellbeing Service. This includes one-to-one counselling and guidance or group sessions / workshops on a range of topics, such as emotional issues e.g. stress and anxiety, student finance and budgeting, disability matters etc. There is specialist support available for students with dyslexia and mental health issues. Furthermore, the Student Union operates a Student Advice Centre, which can provide advocacy and support to students on a range of topics including housing, debt, legal issues etc.

Support for students with disabilities

The University's Disability Support team provides help and advice for disabled students at the University - and those thinking of coming to Newcastle. It provides individuals with: advice about the University's facilities, services and the accessibility of campus; details about the technical support available; guidance in study skills and advice on financial support arrangements; a resources room with equipment and software to assist students in their studies.

Learning resources

The University's main learning resources are provided by the Robinson and Walton Libraries (for books, journals, online resources), and Information Systems and Services, which supports campus-wide computing facilities.

All new students whose first language is not English are required to take an English Language Proficiency Test. This is administered by INTO Newcastle University Centre on behalf of Newcastle University. Where appropriate, in-session language training can be provided. The INTO Newcastle University Centre houses a range of resources which may be particularly appropriate for those interested in an Erasmus exchange.

15 Methods for evaluating and improving the quality and standards of teaching and learning

Module reviews

All modules are subject to review by questionnaires which are considered by the Board of Studies. Changes to, or the introduction of new, modules are considered at the Board of Studies and/or the School Teaching and Learning Committee. Student opinion is sought at the Student-Staff Committee and/or the Board of Studies. New modules and major changes to existing modules are subject to approval by the Faculty Learning, Teaching and Student Experience Committee.

Programme reviews

The Board of Studies conducts an Annual Monitoring and Review of the degree programme and reports to Faculty Learning, Teaching and Student Experience Committee. The FLTSEC takes an overview of all programmes within the Faculty and reports any Faculty or institutional issues to the Faculty Learning, Teaching and Student Experience Committee.

External Examiner reports

External Examiner reports are considered by the Board of Studies. The Board responds to these reports through Faculty Learning, Teaching and Student Experience Committee. External Examiner reports are shared with institutional student representatives, through the Student-Staff Committee.

Student evaluations

All modules, and the degree programme, are subject to review by student questionnaires. Informal student evaluation is also obtained at the Student Staff Committee, and the Board of Studies. The results from student surveys are considered as part of the Annual Monitoring and Review of the programme and any arising actions are captured at programme and School / institutional level and reported to the appropriate body.

Mechanisms for gaining student feedback

Feedback is channelled via the Student-Staff Committee and the Board of Studies.

Faculty and University Review Mechanisms

Every six years degree programmes in each subject area undergo periodic review. This involves both the detailed consideration of a range of documentation, and a review visit by a review team (normally one day in duration) which includes an external subject specialist and a student representative. Following the review a report is produced, which forms the basis for a decision by University Learning, Teaching and Student Experience Committee on whether the programmes reviewed should be re-approved for a further six year period.

Accreditation reports

Additional mechanisms

16 Regulation of assessment

Pass mark

The pass mark is 50%

Course requirements

Progression is subject to the University's Masters Degree Progress Regulations, Taught and Research and Examination Conventions for Taught Masters Degrees. There are reassessment opportunities, with certain restrictions. NB: For the purpose of professional accreditation, the University's Teaching, Learning and Student Experience Committee has approved a variation in Postgraduate (Taught) Examination Convention K.35 to the effect that limited compensation of only 20 credits, of the taught element and down to a mark of 40%, is possible.

The University employs a common marking scheme, which is specified in the Taught Postgraduate Examination Conventions, namely:

Summary description applicable to postgraduate Masters programmes Diploma

<50	Fail
50-59	Pass
60-69	Pass with Merit
70 or above	Pass with Distinction

Summary description applicable to postgraduate Certificate and programmes

<50	Fail
50 or above	Pass

Role of the External Examiner

An External Examiner, a distinguished member of the subject community, is appointed by Faculty Teaching and Learning Committee, following recommendation from the Board of Studies. The External Examiner is expected to:

- i. See and approve assessment papers
- ii. Moderate examination and coursework marking
- iii. Attend the Board of Examiners
- iv. Report to the University on the standards of the programme

In addition, information relating to the programme is provided in:

The University Prospectus: <http://www.ncl.ac.uk/postgraduate/>

The School Brochure

<http://www.ncl.ac.uk/marketing/services/print/publications/ordering/>

Degree Programme and University Regulations:

<http://www.ncl.ac.uk/regulations/docs/>

The Degree Programme Handbook:

Please note. This specification provides a concise summary of the main features of the programme and of the learning outcomes that a typical student might reasonably be expected to achieve if she/he takes full advantage of the learning opportunities provided. The accuracy of the information contained is reviewed by the University and may be checked by the Quality Assurance Agency for Higher Education.
