Handbook for Research Students and Research Supervisors

August 2004
Introduction by the Pro-Vice-Chancellor

Welcome to Newcastle University. As one of the UK’s leading universities we regard research students as a particularly important part of our community of learning. The graduate culture, its development and enhancement, is the first priority of our Learning and Teaching Strategy, and we have recently established three Graduate Schools (one in each Faculty) to take forward this agenda and serve as a focal point for our research students. You will also find that each Faculty has a Dean responsible for postgraduate studies, who oversees the quality and relevance of the training programmes offered to research students, and ensures that arrangements are in place to facilitate each student’s progress through his or her research degree. Each Faculty is fully committed to further developing the range of training events and options for research students.

In addition to postgraduate common rooms in Schools and Faculties, the University has recently invested in an exciting new building called ‘the Beehive’. It is centrally located and opened in the Spring of 2004. Postgraduate students, as well as staff, will be able to use the social facilities in the Beehive. It is an excellent area in which to relax and meet one another. We look forward to seeing you there.

May I wish you the very best of success with your studies.

Professor Ella Ritchie
Pro-Vice-Chancellor for Teaching and Learning

Registration

Every student at the University of Newcastle upon Tyne is required to register with the University at the start of his or her programme of study and normally at the beginning of each subsequent academic year that he or she remains a student. Registering confers on each person who undertakes the process an official status as a student of the University.

Information about how and when to register is sent to all new and returning students before the beginning of each academic year. If you require details on registration, you should contact your Graduate School Office. Details are also available at www.ncl.ac.uk/pre-arrival

Research students who are not in Newcastle during the main registration period may register by post and should contact the relevant Graduate School or the Student Progress Section (see Part One) in advance of the main registration period if they wish to do so.

All research students must register for each year of their minimum required period of registration as specified in the regulations for the relevant degree.

Once the minimum required period of registration has been completed, there are various options open to research students who remain eligible to submit a thesis. These are as follows:

1. A research student may, if his or her supervisor requires it or if he or she chooses, continue to register as a full-time or part-time candidate. Such students will be entitled to continue using University facilities and will be entitled to normal supervision. Candidates who still need normal supervision at this stage are likely to need an extension of time in which to submit their thesis, and should consult their supervisor about applying for an extension.

2. A research student may, subject to the approval of the supervisor, register as a 'full-time (writing-up)' or 'part-time (writing-up)' candidate. The full-time (writing-up) mode of registration is only open to students who have completed the minimum required period of registration as full-time candidates. Students registering as 'writing-up' will be entitled to use University library and computing facilities but will not be entitled to receive normal supervision.

3. A research student may, subject to the approval of the supervisor, not register at all for the remainder of the period in which he or she is eligible to submit a thesis. Such students will not be entitled to use University library or computing facilities and will not be entitled to receive normal supervision.

The respective fees payable by candidates registering in accordance with paragraphs 1 or 2 above are set out in the University's Fees Schedule. No fees are payable in the case of candidates who, in accordance with paragraph 3 above, do not register.

After you have registered, you may collect your SMART CARD. All students need a Smart Card in order to use the University Library, Sports Centre, some Computing Service facilities and the students' Union. In addition, you have 24-hour access to the OLUA cluster and the cluster rooms in the Bedson Building. Your Smart Card will contain a digital photograph and brief details including your name, programme of study and card expiry date. Once you have obtained your Smart Card, you will keep it for the duration of your studies, although you will need to go through the process of Registration at the start of each new academic year for the card to remain active. There will be no charge for your Smart Card, but if you should lose it there will a charge of £10 for a replacement.
Note:
This version of the Handbook has been provided to stage 1 research students in 2004/5 academic year. The Handbook is also available on the University’s website at www.ncl.ac.uk/internal/research-handbook.

The website version will be updated annually. The spirit of much of the content is unlikely to change. However, in the future you may wish to download from the website, copies of new or revised information to include in your file.
## CONTENTS

**Part One - Introduction**
- Introduction by the Pro-Vice-Chancellor: iii
- Important Information upon arrival: v
- Dates of Terms and Semesters: v
- Registration: v
- Contents for Section One: vii
- Useful Contacts: ix

**Part Two – Financial Matters, Facilities And Services**
- Tuition Fees: 2
- Childcare Funding and Support: 2
- Financial Support: 3
- Council Tax: 3
- Travel Insurance for Students: 4

Financial Matters, Facilities and Services

It is important that supervisors and students are aware of regulations related to the payment of fees to the University and also of sources of financial help, should they ever be required. The following

There are many services available to staff and students in the University and there follows a full list of all the main services, each with a description of what you can expect and how you access them. Some are essential to your fulfilling your studies here, others pertain more to important leisure activities. You are recommended to spend some time making yourself aware of what is available should the need for the full information ever arise.

See Also: Part Three - Postgraduate Student Support Officer
Tuition Fees

The fees payable by postgraduate students are set in the University Fees Schedule available from the Registrar's Office, 6 Kensington Terrace and on the University's website at www.ncl.ac.uk/calendar/fees/

Students who receive sponsorship should show a suitable letter from their sponsor to the representatives of the Finance Office at Registration to confirm that the sponsor will be paying the fees due. Students who are wholly self-supporting are permitted to pay their fees in two instalments, the first instalment being due at Registration and the second at the end of November. You can now pay online at www.onlinepayments.ncl.ac.uk. Alternatively, payment may be made by cheque, cash, direct debit or credit card. If you have any queries about your tuition fees, you should contact the Finance Office at 1 Park Terrace (telephone 0191 222 5520 or email: Tuition-Fees@ncl.ac.uk).

International Students may particularly like to note the following footnote of the Fees Schedule:

The following part-time overseas students pay the part-time fee at the home rate:

(a) candidates already registered on the programme of study concerned as part-time students before 1 September 1997;
(b) candidates repeating programmes which they have previously taken as full-time students;
(c) research degree candidates who have completed the normal minimum period of full-time study (three years' full-time study for a PhD and one year's full-time study for a Master's degree) and for whom subsequent part-time registration is deemed to be appropriate, on academic grounds, by the Postgraduate Sub-Dean;
(d) research degree candidates whose terms of candidature stipulate that the research be conducted, in whole or in part, overseas;
(e) BPhil in Educational Studies candidates who register for one year's part-time study (normally in their own country) following completion of the full-time Advanced Diploma in Education.

Childcare Funding and Support

The Childcare Support Officer is part of the Student Welfare Service. The service provided for all student parents includes:

- Advice and information about childcare facilities and funding sources available;
- Assistance with the completion of applications for childcare funding;
- Support to student parents in respect of their specific concerns and needs.

The Childcare Support Officer deals with all applications for childcare funding from the University.

A range of financial support measures is available to assist student parents with the cost of fees for childcare, i.e. paying for someone else to care for your child while you study and your partner either works or studies. All childcare must comply with the requirements of the Children Act 1989. Advice and information is available from the Childcare Support Officer who processes all applications for childcare funding from within the University.

To be eligible for financial support for childcare fees, students must be registered at the University of Newcastle upon Tyne to study either full time or part time, so long as the course is equivalent to at least 50 per cent of a full time course. Funding is not available to students on pre-sessional courses.

Applications for financial support should be made in June or July prior to the beginning of the academic year in September. Whilst late applications are welcome throughout the academic year, a waiting list may be in operation.

The financial support available for Postgraduate students is in the form of subsidies paid direct to the childcare provider. All funding is discretionary and for one academic year only, although you may re-apply for the following year. There is no guarantee that funding will be made available to you. The source of childcare funding for which a particular postgraduate student may be eligible depends on the student's status.

A. International and EU students (Newcastle University Childcare Fund)

This is available to international and EU students doing either undergraduate or postgraduate studies. All childcare used must be registered under the Children Act 1989. The Childcare Fund is controlled by the Student Financial Assistance Panel.

The University expects international students to have made adequate financial provision for their stay in the UK, and this includes childcare. The financial assistance available is therefore limited and based on an assessment that includes:

(i) family income;
(ii) the level of childcare deemed appropriate in relation to the student's study needs;
(iii) the availability of the student’s partner to care for the child;
(iv) the student's status within the University (and that of their partner if relevant).
(v) available funding.

B. Home Students - Access to Learning Fund (formerly known as the Hardship Fund)

This is government funding that can be used at the University's discretion to assist UK students, including those doing postgraduate studies. To be eligible for Access to Learning Funds, PGCE students, like undergraduates, must have taken out the full student loan for which they have been assessed by their Local Education Authority (LEA) or the SAAS in Scotland.

The Student Financial Assistance Committee, which controls the allocation of Access to Learning Funds, will consider awards towards childcare fees. The childcare provision used should normally be registered, but consideration will be given to the costs of unregistered care that complies with the requirements of the Children Act 1989.
Funding Sources outside the University

- **The Nursery Education Grant** is available to international, EU and UK students. It is payable for children who have reached their third birthday and who attend a day nursery approved for the scheme. The Local Education Authority makes payments direct to the day nursery, therefore reducing the cost to the parent. The day nursery will deal with this.
- **A Child Tax Credit** is available to UK parents and EU students with migrant worker status but not to international students with limited leave to remain.
- **A Childcare element of the Working Tax Credit** is available to UK students who are employed for 16 hours per week or more and use registered childcare. If the student has a partner, the partner must also be employed for more than sixteen hours per week. Applications should be made to the Inland Revenue.
- **A Childcare Grant** is available to some UK students doing GCSE or undergraduate courses and who are eligible for student funding from the LEA or SAAS.

For further information about childcare funding and childcare provision contact:

Joan Tebbutt,
Childcare Support Officer,
Student Welfare Service.
Telephone: 0191 222 3599
Email: childcare@ncl.ac.uk

**Financial Support**

**A Access to Learning Funds (UK Students only)**

Universities receive Access to Learning Funds from the government each year so that they can provide selective help, at their discretion, to students who have financial difficulties. There are certain conditions which have to be met by students to be eligible to apply.

Broadly speaking, full-time and most part-time registered students will be eligible to apply for Hardship Funds if they meet government residency rules. Details of the residency rules are provided on Access to Learning Fund application forms. Postgraduate applicants must be able to show that their financial hardship is unforeseen and not the result of having embarked on a course of study without sufficient funding to cover course fees and living costs.

Further details about Access to Learning Funds and how to apply are attached to the Access to Learning Fund application form. Information about funding for student parents is in the above section on Childcare Funding.

**B Financial Assistance Fund (for International Students only)**

The University provides limited funds to help international students who are facing severe financial hardship. Awards from the Fund are made on a discretionary basis and any overseas student studying a degree programme at the University is eligible to apply. Applicants must be able to show that their financial difficulties have arisen through unforeseen and exceptional circumstances since it is a condition of registering for a programme of study at the University that students have ensured they have adequate funds to cover tuition fees and living expenses for their whole period of study. Students should not apply to the Fund until they have first explored other ways of supporting themselves.

**C Information and Applications**

Further details about the various student financial support packages can be found on the University's Welfare website at www.ncl.ac.uk/student-support. Application forms for Access to Learning and Financial Assistance Funds will be available from late September from the Registrar's Office Reception, 6 Kensington Terrace, University of Newcastle upon Tyne, and from the Student Advice Centre, First Floor, Union Society Building, King’s Walk and should be returned to the Student Welfare Service, 6 Kensington Terrace.

**Council Tax**

The Council Tax (CT) is a tax based on notional property value. Each property is assessed by the local authority and assigned to a Valuation Band. A Council Tax bill for the amount relevant to that Band is then sent to that dwelling, unless the property is exempt.

Student halls of residence and University flats and, in Newcastle, private properties managed by the University, are exempt from Council Tax and students living in such accommodation will not receive Council Tax bills.

Full-time students living in non-University accommodation are normally exempted, unless they share their accommodation with non-students (including a spouse or partner) or part-time students. Such adult persons attract CT to the property and render the student occupiers liable too. They cannot claim CT exemption but may be able to claim Council Tax Benefit (CTB) covering up to the amount of the whole bill if they have low income or are receiving benefits. In the case of a spouse or partner, joint income is taken into account. Full-time students cannot claim CTB.

Non-British and non-EEA-citizen spouses of non-EEA international students may have the student's exemption extended to include them if the terms of their immigration leave to remain in the UK exclude them from working or claiming benefits.

If full-time students share with only one non-exempt person the bill attracts a discount of 25 per cent; if with two or more non-exempt persons, the CT is charged at 100 per cent.

Students living within the Newcastle City Council area can apply for exemption using an on-line form available at: www.newcastle.gov.uk

For those who need them, Student Council Tax exemption certificates will be issued by the relevant Graduate School or the Academic Registrar’s reception at 6 Kensington Terrace. (If you need a CT exemption certificate, request one at least a week before your deadline, as it may take several days to produce the certificates during busy periods.)

Further details about Council Tax are given in leaflets produced by the Student Advice Centre and are available on their website at www.ncl.ac.uk/ student-support.
Travel Insurance for Students

The University is able to offer insurance to registered students on any organized University activity outside the United Kingdom including field study trips, exchanges and sporting activities.

Countries excluded from this cover are:-
- Afghanistan
- Chechnya
- Iraq
- Israel (including areas governed by Palestinian Authority)
- Yemen
- Saudi Arabia

If you wish to travel to these countries you must contact Glenys.Bailey@ncl.ac.uk (telephone 191 222 6522) in advance of travel.

Cover Provided

1. Personal accident: £20,000 in respect of death, loss of limbs/eyes, or permanent total disablement.
2. Medical and emergency travel expenses: £10,000,000
3. Personal liability: £20,000
4. Personal baggage: Maximum £3,000
   - Any one article limit £1,000
5. Money/credit cards: £1,500
6. Cancellation curtailment: £3,000

All sporting activities included. £50 excess applies to each section.

For further details, contact:
Mrs Glenys Bailey, Finance Office, 1 Park Terrace.
Telephone 0191 222 6522; email: glenys.bailey@ncl.ac.uk
www.ncl.ac.uk/internal/finance/insurance/insurancedept.htm

Disability Support Service - Support for Disabled Students

Robinson Library
Telephone: 0191 222 7623
Email: disability.support@ncl.ac.uk
www.ncl.ac.uk/disability.services/

The University is committed to developing an environment in which disabled students can pursue their intellectual and personal development with appropriate central and departmental support services.

Provision For Disabled Students

The University has a Disability Support Service which offers advice, guidance and support for students with disabilities and specific learning difficulties (Dyslexia). The Disability team comprises of Head of Service, a Sensory Support Adviser, a Disability Coordinator (teaching and learning), one full time and two part time Dyslexia Advisers and a Technical Support Adviser. The Service has a technical resources room with specialist equipment for training and assessment purposes. The Disability Support Service operates a Support Worker Service and will arrange this if required. It is important to contact the Disability Support Service to arrange any alternative examination arrangements or extra exam time.

The Disability Support Service also provides advice and guidance to all university staff to promote effective disability awareness and to ensure courses are accessible to students with disabilities.

The government provides funds for disabled students through the Disabled Students’ Allowance to assist students who, because of their disability, incur extra costs. Advice and help on all aspects of claiming Disabled Students’ Allowance can be obtained from the Disability Support Service. Further details are available in the Department for Education booklet entitled Bridging the Gap obtainable from your Local Education Authority.

Dyslexia

Students with dyslexia must submit a copy of their most recent psychological report to the Disability Support Service by no later than 1 November for semester one and by 18 April for semester two to qualify for additional time in examinations. Disability Support will then arrange additional time with the Examinations Office based on the recommendations made in the psychological report. If you think you have dyslexia but have not been assessed you should contact a member of the Dyslexia Support Team in the Disability Support Service to discuss screening assessment. Further information about the support available for students with dyslexia can be obtained from the Disability Support Service, Robinson Library. Tel: 0191 222 7623, email Disability.Support@ncl.ac.uk

Funding for Disabled Students:

Disabled Students’ Allowance (DSA)

You may have extra costs going into study because of your disability. These may include extra travel costs, a need for specialist equipment such as voice recognition software or personal assistance such as a note-taker or interpreter.

‘If you gain research council funding you can get Disabled students’ Allowance as part of the council’s award package. You should contact the provider of your bursary or award for advice on any extra support you may be entitled to because of your disability.

If you are a student from Scotland or Northern Ireland, you can get DSA if you get a studentship or bursary.

DSAs are now available for open and distance learning courses in postgraduate study. Students from England and Wales should contact their LEA for an application form.

Starting from the academic year 2000-01, postgraduate students from England and Wales can obtain DSAs to support disability related costs on their course. The allowances are non-means tested. There is one allowance to meet all costs (specialist equipment, non-medical helper, general expenditure and travel) of up to £5,500 a year for both full-time and part-time postgraduate students.

If you begin your postgraduate course straight after an undergraduate course, any specialist equipment that has already been given to you may be taken into account. However, if it no longer meets your needs it can be upgraded or replaced. Students doing more than one part-time course at the same time can only apply for one DSA. There is no age limit.
Course criteria:

- A designated course such as research and taught masters, doctorates, diplomas and certificates.
- It would normally require a first degree or equivalent before entry.
- It should be a minimum one year in length.
- The course can be either full time or part time.
- If part time, the course should be at least 50 per cent of the full-time course equivalent. That is, it should take more than twice the time to complete as a full-time course.

If you are a postgraduate student, you should ask your LEA to send you the DSA application form for postgraduate students.

You can also download this from the following website at www.dfes.gov.uk/studentsupport/formsandguides/

Students/courses not eligible for DSA:

- Students receiving DSAs via research councils or similar bodies.

If you are fortunate enough to get statutory funding you may also have any disability-related costs paid for. The contact list of funding bodies explains the disability-related funding available from each body.

For help or advice on applying for Disabled Students' Allowance contact the Disability Support Service, telephone 222 7623 or email disability.support@ncl.ac.uk

Hardship Funds

If you are not eligible for statutory funding, but face extra costs because of your disability you may be eligible to apply to the Access to Learning Fund administered by the University. Further details are available earlier in this section.

Research Council and other Public Funding

You can get government funded research grants, studentships or fellowships for some postgraduate courses, but they are mostly for postgraduate research. The awards mainly come from research councils that cover an area of study. For example, the Economic and Social Research Council (ESRC) has responsibility for the social sciences and the Arts and Humanities Research Board (AHRB) oversees the humanities and certain professional and vocational subjects. Most taught postgraduate courses do not attract research council funding. Universities and colleges will know if any of their courses attract bursaries. The research councils publish a list of the academic departments/schools they have approved for funding each year, which you can find at your university careers service.

Not all postgraduate courses attract studentships and not all students on those that do will be eligible to receive one. All research council funding except some ESRC awards are given through university schools, so apply for these awards through the school where you want to study.

Only one research council (if any) will fund the course you are interested in, so only apply to the relevant one. Contact the funding bodies listed below or for further information about the type of courses they fund, the nature of their studentships, and how to apply for them.

The details below also have information about each research council's Disabled Students' Allowances. These allowances are not the same as the Postgraduate Disabled Students' Allowances available from LEAs (explained above). If you gain research council funding you can obtain Disabled Students' Allowances from the research council only.

For further information contact Disability Support.

International Scholarships and Bursaries

The University offers a large number of scholarships and bursaries – these are:

- International Research Scholarships (IRS)
- International Postgraduate Scholarships (IPS)
- International Alumni Scholarships (IAS)
- International Family Scholarships (IFS)
- Alumni Fund Bursaries (AFB)
- Overseas Research Students Awards Scheme (ORS)
- Dorothy Hodgkin Postgraduate Awards.

Full details are available at: www.ncl.ac.uk/postgraduate/international/intfinance.phtml

With the exception of the ORS Awards, which are open to international students in the first year of their research studies, all of the above awards are only available to prospective students whilst they are applying to the University and are offered during the admissions process. As such, students holding these awards should have received confirmation from the University prior to the start of their studies.

Students who have a query about their award should contact:

Scholarships Officer
International Office
6 Kensington Terrace
Newcastle upon Tyne  NE1 7RU
Telephone: +44 191 222 5537 / 5538 / 5742
Fax: +44 191 222 6139 / 5212
Email: international-scholarships@ncl.ac.uk

Faculties/schools may occasionally offer other studentships and bursaries – please refer to your faculty/school section in this Handbook if appropriate.
The Library

ResIN – Research Information at Newcastle
www.ncl.ac.uk/library/resin

ResIN is a special set of web pages designed for researchers at Newcastle. Use ResIN to discover how to find information in a wide variety of resources, from grey literature to statistical data, primary sources to official documents. You will also find advice on keeping up to date with new publications and on how to manage your references using EndNote. ‘Writing Up’ includes sections on thesis production, publication, academic integrity and citation, while ‘Hot Topics’ highlights major issues such as the scholarly communication debate.

Every time you access ResIN, ‘What’s New’ will alert you to new resources and developments, and ‘Spotlight’ will also point you to key areas of the sight.

Liaison Librarians
Your Liaison Librarian is here to help you make best use of the services and resources provided by the Library. Come and discuss your research with us.

Information Systems and Services (ISS)

ISS provides computer services for all students via cluster rooms which are located throughout the University. Most postgraduate research students additionally have access to personal, or shared, PCs in their own place of work: such PCs will usually be running ISS’s "University Common Desktop", and will therefore have the same software and facilities as Cluster Room PCs.

The Common Desktop ensures integrated, secure access to central filestore, mail and print servers. Running under Windows XP, a wide range of software is supplied to assist in teaching, research, and for personal development. All students have access to full Internet services, including a personal University email address and the ability to publish web pages.

In summer 2004 the PC cluster service comprises over 1300 PCs in 43 clusters. Cluster rooms are open to all members of the University each weekday: some are open for extended hours and at weekends. Laptop docking stations and wireless access points are available in a growing number of locations.

A separate UNIX service provides two powerful central systems, and a small number of Linux workstations. In some clusters staffed Help Desks offer support, and there is also a phone and email Helpline should you experience difficulties elsewhere.

As one of the primary sites for the UK's academic SuperJANET network, this University has always had exceptionally good network connections.

The many services of the ISS are described in documents which are available in the Cluster Rooms, and also on the web page, www.ncl.ac.uk/iss/

Careers Service

2nd Floor, Armstrong Building
Tel: 0191 222 7748  www.careers.ncl.ac.uk

Opening Times (including vacations)
Monday-Thursday  9:00am - 5:00pm
Friday  9:00am - 4:45pm

The nature and demands of research means that it can be difficult to find time to think about your career. However, it is worth exploring the options early rather than leaving it to the final months of your research. Whatever stage of career planning you are at, and whatever you are hoping to do after your postgraduate research, the Careers Service offers independent information and guidance on a wide range of issues including:

- What opportunities exist for research postgraduates?
- How will employers view my research qualification?
- How do I decide what to do next?
- Where can I find information/vacancies in......?
- How can I improve my job prospects?
- How do I find work outside my home country?
- How can I improve my performance at interviews?

We are here to help
Information officers are available to offer immediate advice and help you make the most of the resources in the information room and on the web.
Careers advisers are available for short consultations from Monday to Friday between 11am and 4:30pm except Thursdays. No appointment is required. They can offer advice and guidance on all aspects of your career from recognising what you can offer, researching and assessing your options, applying for jobs and preparing for interviews. In some cases, a longer guidance interview may be recommended. We also offer small group feedback on CVs and individual feedback on application forms. These sessions require a pre-booked appointment.

Careers information
The Careers Service information room contains an extensive range of paper and web based materials on career choice, occupations, employers, working abroad, work experience and finding and applying for jobs. There are several workbooks and reference materials designed to meet the needs of postgraduate researchers, whether you intend to pursue a career within or beyond academia and research. If you need any of our materials in alternative formats, please ask at reception.

Detailed occupation and sector information is available on PROSPECTS, the UK’s official graduate careers website at www.prospects.ac.uk.

The Careers Service website is a comprehensive careers reference site which includes dedicated postgraduate pages, details of Careers Service events, appointment booking facilities and links to career-related sites for postgraduate researchers, www.careers.ncl.ac.uk.

To find out first hand what it is like to work within certain job sectors and organisations log on to ‘Graduate Connections’, a searchable database of profiles of Newcastle Alumni whom you can read about or even contact directly, www.careers.ncl.ac.uk/connections.

Careers sessions and events
Graduate School Careers Programme: careers advisers run dedicated career management sessions for research students in each Graduate School. Contact your Graduate School for further details.

Roadshow sessions: a central programme of 50 minute sessions covering CVs, application forms, interviews, assessment centres and aptitude tests.

Employer events: many employers visit Newcastle to promote their graduate opportunities. These events offer an opportunity for you to talk informally to employers and recent graduates working in a variety of functions and gain a real insight into their work, environment and the application process.

Fairs: graduate recruitment begins early in semester one with two major fairs on campus, JOBFEST and AIESEC. The Newcastle Graduate Recruitment Fair (NGRF) takes place in June. These events are attended by a range of regional, national and international employers offering immediate vacancies.

For more details, see the ‘What’s going on?’ wall planner, our website or contact your Graduate School. Alternatively, register your career interests on our website to receive regular email notification of relevant events on and off campus.

Finding job vacancies
Each year, regional, national and international organisations target graduates from Newcastle University. Opportunities and vacancies are advertised on ‘Vacancies Online’ and include work experience, voluntary positions and paid employment. You can register to receive email alerts of relevant opportunities at www.careers.ncl.ac.uk/vacancies.

Our website also refers to other sources of vacancies including specialist directories, newspapers and journals. Don’t forget that academic and professional contacts can also be useful sources of information and advice.

Starting your own business
The Enterprise Centre encourages the development and application of enterprise skills and facilitates new venture start up. A range of sessions and workshops develop enterprise awareness and link graduates to various business support services. The Hatchery supports businesses in the very early planning stages. Students have access to a workstation including PC, telephone, storage and further resources. Register with the Enterprise Centre at enterprise@ncl.ac.uk to receive details of the latest developments and resources. Telephone: 0191 222 8613

Help after graduation
After an initial free month, for a small fee you can register with the Careers Service for continued access to all services and resources for up to two years following graduation. See our website for further information.

Graduate Schools
The Student Progress Section is the part of the Academic Registrar's Office whose work is directly concerned with students, from first arrival to graduation. Student Progress and other staff who support postgraduate students are located within three Graduate School Offices, one for each Faculty.

Examples of the issues that the Graduate Schools deal with are:
- Admissions,
- Student Registration,
- Student Progress (including MPhil/PhD upgrades, confirmation of candidature, suspension of study, extensions to thesis submission dates, academic concessions, appointment of examiners, dealing with thesis submissions and examiners’ reports, pass lists),
- Research Students' annual progression,
- Training programmes for research students,
- Advice on University and programme regulations,
- Complaints, academic appeals, student discipline, assessment irregularities.

The Congregations Office, which organizes all degree ceremonies and issues degree parchments, is also part of the Student Progress Section.

There are three Graduate Schools within the University.
This is only a brief outline of how the SAC works. Their aim is to help you to make the best of your situation, no matter what your problem may be. The SAC remains independent of the University and anything you say to the staff is treated with the strictest confidence.

The SAC is located on the first floor of the Union. The Centre is open all year around and also some evenings and weekends during term time. Office hours are Monday to Friday, 10.00 am to 4.00 pm (but closed for staff meetings on Wednesday mornings during term time). During vacations it is closed all day Wednesday as well as Monday and Friday afternoons after 2.00 pm.

Please contact our Reception desk for information, or to make an appointment with an Adviser for more complex issues. Appointments cannot be made via email. Our contact details are: telephone 0191 239 3979 (external direct) and 5424 ext 1079 (from within the University) or fax 0191 239 3986.

Academics Office

This office is responsible for:

- processing of all applications for University accommodation
- creating tenancies for the University flats
- arranging room transfers
- billing of accommodation charges
- credit control
- managing a property leasing service
- advertising private sector accredited vacancies
- providing professional advice on a whole range of accommodation issues

In short, they are there to help you!

Specialist staff are organized into two teams in order to ensure continuity of service whenever the office is open.

University Accommodation

If you have a query regarding your University accommodation, you should contact a member of staff in the University Allocations Team: Teresa Lumsdon, Mark Reynolds, Amanda Hill, Kirsten Reilly or Sarah Morales.

If you require information about individual sites, you should contact the Accommodation Office for a copy of the Student Accommodation 2004-2005 brochure, or refer to the University website at: www.ncl.ac.uk/accommodation/

Ending Your Tenancy

If you take up a place in University accommodation, you will be provided with a tenancy agreement until the end of the academic year (the minimum agreement is from 11 September 2004 until 11 June 2005). You may apply to extend your stay until the end of August 2005 if you wish to do so. However, there is no guarantee that you will be offered the same room and/or site. All tenancies are terminated normally only in the event of the tenant ceasing to be a registered student of Newcastle University. If you withdraw from University or fail to register you will still be required to pay the full rent due for the termly billing period in which you leave, that is, until 18/9/2004, 08/1/2005, 16/4/2005 or 11/6/2005. Those who leave University accommodation for non-University accommodation remain responsible for the rent until the end of the tenancy agreement or until the room is re-let to another student.
who is not, at that time, paying rent to the University. If you are a Postgraduate research student i.e. studying towards a PhD or MPhil, you can give 28 days formal notice to end the tenancy early prior to the end of your period of registered study at Newcastle or if you intend to leave the University for research purposes, and the liability to pay rent terminates after the 28 day notice period. You must provide an official letter of support from your school before the notice can be accepted.

Changing Your Accommodation

If you find your accommodation unsatisfactory in some way you may apply for a transfer to more suitable University accommodation. If you are living in self-catered accommodation and wish to change your room at any time, you should contact the Accommodation Office which will assist you as much as possible with your request. A fee of £25 will be charged for second and subsequent moves in all University accommodation. Applications to move from catered to self-catered accommodation should be made at the hall at which you are living and will only be accepted within the first six weeks of a tenancy and will incur a further charge of £200.

University Accommodation After Your First Year

With expanding student numbers we usually need all of our accommodation for the new intake of students each academic year. Therefore we cannot guarantee that it will be possible to offer you a room in University accommodation beyond your first year. Information on availability of accommodation for continuing students will be available in January 2005.

Summer Rent

If you are offered accommodation for a second or subsequent year in self-catered accommodation, your tenancy agreement will start in June 2005 and end in June 2006. You will be required to pay rent for every day of the tenancy agreement, which includes the summer period. This means you may stay in your accommodation over the summer vacation and keep your belongings in your accommodation during this time.

Private Sector

If you have a query regarding private accommodation, including the property management service, you should contact a member of staff in the Private Sector Team: Alison Clemett, Pamela Bonner, Grant Jackson or Paul McKinnell. This team provides services for students who are searching for, or currently living in private rented accommodation. Most second and third year undergraduate students live in privately rented accommodation, sharing houses and flats in various areas of the city. New students who do not wish to live in a University residence are advised to consult the Accommodation Office to obtain details of lodgings, flats and houses. Vacant properties are advertised for whole groups/couples/families via the private sector lists but individual rooms can also be found on our shareboard. The Accommodation Office is happy to offer advice and to look at tenancy agreements prior to students signing. Students who need external accommodation should spend some time in Newcastle during the summer vacation to familiarize themselves with the different residential areas and view several properties before making a decision. Most private sector tenancies are for a 51-52 week period.

University Property Management Service

The University operates a Property Management Service whereby privately owned houses are leased from owners and then rented to groups of students or student families. All properties within the Service meet the Accreditation Scheme standards and are at rent levels that fall within the normal student budget. The Service can offer one to seven -bedroom accommodation in many areas of the city. This Service is very popular with continuing students who decide to share with groups of friends and students with children who prefer to live off campus. A number of properties are reserved each year for new student families.

Flats, Houses and Bedsits

We recommend any student looking for this type of accommodation to use the services of the Accommodation Office. Details of owners and properties are available online or from Accommodation Office staff who can provide advice on rent levels and tenancies. All advertised vacancies meet the standards required by Newcastle’s Accreditation Scheme. This Scheme is a joint venture involving amongst others, the city’s universities and colleges, the student unions, the City Council and the local police. It aims to provide progressive improvements in the standard and safety of private accommodation available to students in Newcastle. It covers gas, electrical and fire safety as well as security and amenity standards. It is strongly recommended that you use the Accommodation Office to find accommodation as other sources may not meet Accreditation Standards.

Lodgings

The Accommodation Office has an established list of householders offering lodgings. They offer catered or self-catered options. Although not usually popular as long-term accommodation, lodgings are very useful for people waiting for their preferred type of accommodation to become available. A separate list of lodging is maintained for those undergraduate students who are unable to obtain University accommodation at the start of term. These students are offered suitable University accommodation as quickly as possible following the start of term.

Find a flatmate Scheme

The Accommodation Office has developed a Find a Flatmate Scheme to assist students who are looking for accommodation on their own. By registering to be part of this Scheme, we can put you in touch with other students to form a group to find suitable privately rented accommodation more easily.

To register, email the Accommodation Office at accommodation-enquiries@ncl.ac.uk.

Opening Hours

The Accommodation Office is open from 9.00 am to 4.30 pm Monday to Friday.

Telephone: 0191 222 6360; fax: 0191 222 6313; email: accommodation-enquiries@ncl.ac.uk
Student Counselling Service

Barras Buildings
Telephone: 0191 222 7699
Email: student-counselling@ncl.ac.uk
Email counselling: e-counselling@ncl.ac.uk
www.ncl.ac.uk/student.counselling

The Service is free and available to undergraduates and postgraduates, including International students, at any time during their University career. Counselling by email or telephone is also available.

The Service offer Support Groups for tutors to assist them in the pastoral aspects of their tutor role. Students come to discuss any personal and emotional difficulties. These concerns may be about self, family or friends or relationships. They may involve current situations or problems from the past that continue to affect them.

The Service can offer individual counselling and group work. The Service is confidential which means that what you say to the counsellor cannot normally be discussed with any other person.

The Counselling Service works to the Ethical Framework for Good Practice of the British Association for Counselling and Psychotherapy.

The office is open 9.00am to 5.00pm weekdays with some later appointments available. Appointments can be made by calling into the office, by telephone or email. There is an answer-phone service when staff are unavailable.

Chaplaincy

The Chaplaincy is both a place and a community of people. We welcome people of all faiths or none, and are here for all students and staff.

We are part of the life of the University, simultaneously at the centre and on the edge. We live and work with the University community, celebrating its life, mourning its pain and contributing to the experience of students and staff. We are a resource for you, for your questions, your hopes, your dreams, and are here for you when you want to talk, to pray, or simply to have some space. We also work with communities across the city and region, forming and sustaining creative partnerships.

And though all of this we seek to enrich the University with the Story of God.

The Chaplaincy building is at the heart of the campus, just by the Playhouse Theatre. You get in through a brown door on the ground floor. We have a common room, a quiet room, a few meeting rooms and a kitchen. It’s a place to come to relax, meet friends, have some space, have a coffee, or meet a Chaplain. It’s a good place to be and all are welcome.

Faith is about getting involved, being part of the community, and continually finding new ways to express our love for God and God’s love for the world. As part of this we are involved in a wide range of activities and groups. Our notice-board and website have details of the weekly activities and events.

We keep in touch with many churches and with all of the major faith groups in the city and also with a number of other voluntary organizations. Even if we can’t help, we can normally point you in the right direction. The Chaplaincy - the place and the people - is here for you.

The Chaplaincy’s web page can be found at: www.ncl.ac.uk/chaplaincy or you can call us on 0191 222 6341.

  Telephone: 0191 273 8011.

For further details of these or other places of worship, please contact the Chaplaincy.

### Medical Matters

#### Medical Care

Students are required by the University Regulations to register with a medical practice. There are many NHS medical practices in Newcastle, the names and addresses of which are available from the Newcastle Health Authority and the Student Advice Centre. A list of medical practices in the areas most commonly lived in by Newcastle students is given in the Appendix off the Student Handbook.

The University has a special relationship with the Saville Medical Group. Students can of course register with any practice of their choice, but if they chose to register with the Saville Medical Group they can do so during registration week when representatives from that practice are available in the University Ballroom.

#### Dental Care

It is advisable for students to register with a dental practice. There are many NHS dental practices in Newcastle, the names and addresses of which are available from the Newcastle Health Authority.

An independent dental practice, the King’s Walk Dental Practice, is situated at the city end of Claremont Road (entrance from the Playhouse car park). It is open from 9am to 7pm on Mondays and Tuesdays, 9am to 5pm on Wednesdays and Fridays, 9am-6pm on Thursdays. It offers a full NHS service to students and NHS and private services to members and staff and the general public. All students under 19 years of age are automatically exempt from charges. Other students can collect application forms for exemption certificates (HC1) from the practice in advance of their appointment in order to avoid charges.

To make an appointment, telephone 0191 222 0725 or 0191 222 6000 ext. 6283, fax 0191 222 0725 or call in person and speak to the dental receptionist.

### Procedure to follow in the case of illness

(Th e following advice applies to most students in the University. Students on some programmes of study (e.g. medical and dental students) may be required to follow slightly different rules about notifying relevant staff of illness, and will be provided with the necessary information by their schools or faculties.)

If illness prevents you from studying at any time whilst you are a student at the University, you should inform your tutor or supervisor immediately. If you are absent from the University through illness for more than three working days, you must obtain a Self-Certification of Illness form from your tutor/supervisor or school office or from the University’s website at www.ncl.ac.uk/spo and return the completed form to your tutor/supervisor as soon as you are able to return to your studies. If illness prevents you from studying for more than seven working days, you must obtain a medical certificate from your GP and forward it to your tutor/supervisor as soon as possible. It is also advisable, if you have to miss examinations as a result of illness, that you see your GP whilst you are ill and obtain a medical certificate as evidence of the illness.

In cases where you believe that illness has affected your academic performance, for example in examinations, you should inform your tutor/supervisor (or degree programme director if the former is unavailable) of the circumstances. In such cases, you should, in addition to providing a Self Certification of Illness form or medical certificate from your GP, provide a statement with the certificate explaining how you believe your illness has affected your studies. If you are unsure at any stage about the possible consequences of illness on your academic progress, you should consult your tutor/supervisor for advice.

### Health and Safety

[www.ncl.ac.uk/internal/safety](http://www.ncl.ac.uk/internal/safety)

Every year University students are injured, and most years there are fatalities in the education sector. Almost all of these incidents are readily avoidable without preventing activities being undertaken. On rare occasions activities are stopped because they generate excessive risks and so cannot be permitted to continue without substantial additional controls being put in place.

### Policy and Law

The University Safety Policy, and considerable amounts of guidance, is on the University Safety Office website at [www.ncl.ac.uk/internal/safety](http://www.ncl.ac.uk/internal/safety). Further guidance and local rules can be obtained from School Safety Officers, or from the University Safety Office. Every school has a School Safety Policy, and some labs also have specific local rules. It is a legal duty on the University, all staff and students to ensure that the University is a safe place. It is therefore important that everybody complies with the local rules and reports all incidents, defects etc. to the School Safety Officer or University Safety Office. If problems are not reported they may result in others being injured.
also an on-line reporting form for Accidents, Incidents and Near Misses at www.ncl.ac.uk/internal/safety/acc-form.html

Risk Assessment and Training

University safety is driven by Risk Assessment. There are courses on undertaking Risk Assessments which all Postgraduate students are entitled to attend. Specific local rules have been developed as a result of Risk Assessment and legal requirements. All Research Students will be required to consider their own safety and the safety of others in their work (including the cleaners and visitors).

Research Students will be accepted for places on many of the University Safety Office training courses. The list of courses available is on line at www.ncl.ac.uk/internal/safety/training-courses.html

Prior to undertaking work with some high risk chemicals, training on the specific risks may be required. In particular work with cyanides, phenol and carcinogens will require a clear understanding of the risks and the local rules for minimizing those risks.

Fire

The University has strict rules on Fire Evacuation - including drills and rules on keeping doors closed and corridors clear. Last year there was a fire costing over £2M, which also had the potential to have killed. The University is a safe place with very few fires but these rules must be complied with at all times, to keep your working environment safe. Penalties for breaches of fire rules ultimately include expulsion from the University, for working in a way that makes the University is a safe place with very few fires but these rules must be complied with at all times, to keep your working environment safe. Penalties for breaches of fire rules ultimately include expulsion from the University, for working in a way that makes the University a dangerous place.

Further information and training is available from the University Safety Office - including training courses on the use of Fire Extinguishers (a legitimate chance to let one off).

Occupational Health Service

The University has an Occupational Health Practitioner to provide basic Occupational Health services. As this is a new service the full details of the service are still being developed so you are recommended to look at the University Safety Office website for up to date information through the year.

For some programmes of study involving biological practical work, health surveillance or immunization may be required. Health surveillance may be necessary by virtue of:

1. The risks arising from the micro-organisms used in the project, or
2. The risks arising from the medical condition of the individual, or
3. Allergy risks arising out of the project (e.g. work with animals).

The details of the arrangements for identifying and reporting a need for health surveillance and/or immunization may be found in the University publication Safe Working with Biological Hazards, which may also be found on the University Safety Office website.

Radiation Protection Office

Work with ionizing radiation is also strictly controlled and every school using radiation for research work will have a Radiation Protection Supervisor. Nobody is permitted to use radiation until they have been approved by the University Radiation Protection Officer which will involve a Newcastle course being undertaken (experience from other Universities will help but the Newcastle Course is required for even the most experienced users). This is to ensure that people are aware of the Newcastle local rules as well as being suitably competent to be permitted to work with sources. There is further information on the radiation issues for Newcastle from the University Safety Office website. The old Radiation website at www.ncl.ac.uk/urpo/rpo.html may be cited in many of the School documents but is now being replaced.

The website

The University Safety Office is generating a new service website over the next few months and much of it will be 'live' by the time you are reading this document. This service will enable you to register on the site and get access to more information than is available externally. If you have specific interests please let us know when you register as we may be able to provide you with additional services (such as access to mailbases etc.). Please be patient over the next year as the further development of this service will take time. If you have any suggestions for further services please let us know.

Language Centre

The Language Centre at Newcastle University provides opportunities and support for language learning for all members of the University.

English

Before Registration, all students whose native language is not English must take a test in English. (Separate information on the test can be found in the Pre-Arrival Information booklet sent to new students.) Advice is then given to you and your tutor on any problems revealed by the test and a recommendation made about what you can do to improve. We may recommend, for example, that you attend some of our classes in academic reading and listening, speaking and seminar skills or grammar and pronunciation, which run throughout term time. These classes are free of charge to registered students. We also run intensive, fee-paying courses in preparation for University study throughout the academic year, as well as an English Language Summer School.

Languages as Part of your Degree

If you are an overseas student whose native language is not English, it may be possible for you to take some modules of English language training as part of your degree. Please check carefully with your tutor that your degree programme regulations allow you to take these courses.

Languages in your Own Time

Even if you cannot study a language as part of your degree, we can still help you.

Open Access Centre: Our Open Access Centre is fully equipped with video, satellite TV and computers for the independent study of almost 50 languages. Advisers are on duty to help with independent language learning. Membership is free to current students of this University. You need to show your Smart Card to register to use the facilities. Access is then through turnstiles activated by your Smart Card.

How to Find Us

Course/General Enquiries: Language Centre Reception, Level 4, Old Library Building; Email: language.centre@ncl.ac.uk; Telephone: 0191 222 7535; fax: 0191 222 5239; Monday to Thursday 9.00 am to 4.45 pm Fridays 9.00 am to 4.30 pm.

Open Access Centre: Level 2, Old Library Building (entrance opposite the Armstrong Building); Email: open.access@ncl.ac.uk; Telephone: 0191 222 7490

Term time: Monday to Thursday 9.00 am to 8.00 pm Friday 9.00 am to 5.00 pm
Vacations: Monday to Friday 9.00 am to 5.00 pm.

For detailed information on all aspects of our work check our website at: www.ncl.ac.uk/langcen

Students’ Union

Students’ Union Officers
The Union Society is run by more than 25 student officers who are elected each year by a cross-campus ballot in which all members (students) can vote. The officers can offer advice and support on a range of issues and represent every sector of the student community.

There are six full-time Sabbatical Officers:

Students’ Union Services

The Union Society of Newcastle University is one of the few student unions in the country to own its building. This has distinct advantages, not least the fact that it gives the management team more discretion to implement services generally wanted by the student membership.

There is a variety of food and bar outlets within the building providing Fairtrade coffee, salads, sandwiches, pizzas, burgers etc. The Union offers one of the largest and best value selections of food and drink in the city and can cater for all dietary requirements. The Union also operates Campus Coffee and a popular café at the Robinson Library.

The Union hosts a full range of entertainment, with something to suit everyone: big name bands, at least two club nights a week, bar quizzes and much more. It also offers the opportunity to organize private parties, functions and conferences in the Union Building at the cheapest prices in town.

The Union Society offers many other facilities including the Union Shop which sells everything you might need from stationery to household products. The Shop also houses a Post Office where you can pay your bills and television licence. In addition there is a Print Shop, Endsleigh Insurance brokers, a Book Shop where students can buy and sell text books and a Hair Salon, all offering a quality services at student-friendly prices.

The Athletic Union offers a spectrum of sporting facilities and supports over 60 different clubs. In addition, the Union funds 150 different societies, giving its members the chance to pursue their own interests, be they political, cultural or social, so there’s always something to get involved in.
The Student Job Shop is part of the Education Unit and can help you to find suitable part-time employment or vacation work. The Education Unit is also a source of academic advice, representation and training for students, and i-want-more area is the place to go to find out about the range of activities available outside of studies.

The Student Advice Centre (SAC) is located on the first floor of the Union. It provides free, impartial, professional advice on a range of issues such as health, housing finance, immigration, legal and consumer issues (see page 13 for more details of the services provided by the SAC).

The Student Bus runs from 7.00 pm till late Monday to Friday during term time. It picks up at the Robinson Library, the Medical School and the Union, and drops you at your doorstep. Yearly passes pay-as-you go are at extremely reasonable prices and priority is given to lone female students.

Nightline
If you need some information, advice or just a chat, Nightline is a confidential, non-judgmental telephone service offered by the Union Society. It runs from 8.00 pm to 8.00 am, telephone 0191 261 2905. The number is printed on the back of each student Smart Card.

Students' Union Website
For more information about the Union Society and the services it offers, visit the website at: www.unionsociety.co.uk or email: union.society@ncl.ac.uk

University of Newcastle Children's Loan Equipment Scheme
The U.N.C.L.E. scheme loans child safety equipment to students who have small children. The equipment loaned includes; stair gates, fireguards, cots, sterilisers, pushchairs, highchairs, baby monitors, strollers and cooker guards.

The charge for this equipment is minimal - £2 per term and £2 summer vacation registration fee; and £1 per item per term/vacation hire. A post dated deposit cheque is also required, which is returned to the student at the end of the loan period, providing the equipment is returned in a satisfactory condition.

The U.N.C.L.E. office is situated in the Education Unit on the 1st floor of the Union Society.

Sport in the University
The Centre for Physical Recreation and Sport
The Centre for Physical Recreation and Sport along with the Athletic Union (AU) are responsible for providing a wide range of sporting opportunities for all students at the university.

The latest development to consolidate this sporting reputation is the building of a new £5.5 million Sports Centre due to open in June 2005.

Details of the full range of Services and facilities available to members and information on the new University Sport Centre are available by visiting our web site at: www.ncl.ac.uk/cprs

There is a registration fee for the academic year (as above) but if you have already registered with us for the baby equipment there is no need to pay it again. We also ask for a post dated cheque returnable when the toys are returned to U.N.C.L.E.

U.N.C.L.E.'s Toy Library
The U.N.C.L.E. scheme now includes a Toy Library for the preschool children of students at Newcastle University. The U.N.C.L.E. scheme offers packages of toys for different ages and also loans separate larger/more expensive toys for a small fee.
PART THREE

Personal Matters

The following sections are related to you as individuals and refer to a range of aspects of your life here, from taking care to protect yourself to advice about studying and making progress.

International students will find a wide range of information tailored to their needs whilst living and studying here.

Sources of Advice and Assistance for Postgraduate Research Students

Your main supervisor should usually be the first person you turn to for help and advice on a personal basis, for example if you are encountering any difficulties in your study or in things which affect your study. Most difficulties can be easily resolved through your supervisor, though he or she may sometimes suggest that you contact one of the services described in Part Two of this Handbook for specialized information or support.

It is recognized that occasionally a research student may not feel able to approach a supervisor about a particular matter. If you are in such a position, you should discuss the matter with your head of school. If for some reason you do not feel able to discuss the difficulties with your supervisor or head of school, there are several sources of advice within the University including school (e.g. School Postgraduate Tutor), faculty (e.g. Dean of Postgraduate Studies or Graduate School Administrator) and University services (e.g. the Student Counselling Service, the Student Progress Section and the Union Society's Student Advice Centre, all described in Part Two of this Handbook). Details about school and faculty support mechanisms are provided in Section Two and Section Three of this Handbook.

Each faculty has a Postgraduate Tutor who has considerable experience of postgraduate matters and who can offer impartial and confidential advice. The Postgraduate Tutor is independent of the structures within the faculty that deal with the academic progress of research students and can be consulted in confidence at any stage of your research.

The Postgraduate Tutors are:

- Faculty of Science, Agriculture and Engineering
  Professor Mike Goodfellow
- Faculty of Humanities and Social Sciences
  Dr Nina Laurie
- Faculty of Medicine
  Dr John Kirby (M)

If you wish to make an appointment to see a Postgraduate Tutor, you should telephone the relevant Graduate School Office (details in Part One). If the advice you require is gender sensitive, please contact the relevant Postgraduate Tutor.

Alternatively, contact the Student Progress Section (details in Part One). See also the Faculty or School Handbook for more sources of help and advice.

Postgraduate Student Support

The Postgraduate Student Support Officer, based at 6 Kensington Terrace can provide dedicated support and advice to current and prospective postgraduates including:

- Information about anything you might need to know or need help with, from a simple question about University services, or funding, to practical or personal problems
- A free and confidential service available in term times and vacations, by telephone, email or appointment.
- Referral to other welfare services where appropriate
- Mentoring schemes for research postgraduates (this is not available in all schools as yet – contact us to find out if its available to you)
- A method by which you can air concerns and problems about postgraduate study at the University. This information can then be disseminated throughout the University hierarchy in order to try to address the core issues.

Contact:- Suzanne Devlin, Postgraduate Student Support Officer, Student Welfare Service,
Tel: 0191 222 3479
E-mail: postgraduate-student-support@ncl.ac.uk

This project is part-funded by the HEESF and HEFCE
**Study Skills**

University study requires each individual student to take significant responsibility for organizing their own work. Information and/or advice about study skills are available from a number of sources around the University. Some of these may prove helpful to you.

- In particular, you should attend what is offered on your Faculty Research Training programme (see the Faculty Section of this Handbook) as this has been compiled to provide generic skills expected of researchers in your field of study.
- The Robinson Library has a Study Skills section on Level 4. The section includes books about improving your skills. More information and links to useful websites on Study Skills can be found on ‘Stan: Study Skills at Newcastle’ web pages at [www.ncl.ac.uk/library/stan](http://www.ncl.ac.uk/library/stan)
- The Education Unit within the Union Society offers advice and occasional training sessions aimed at specific groups of students.
- The Dyslexia Tutor offers support for students with dyslexia. The Dyslexia Tutor is based in the Disability Support Service in the Robinson Library.
- The Language Centre (see Part Two) offers support with writing skills.
- Finally, Part Five of this Handbook offers comprehensive Guidelines for Research Students which include a range of suggestions for study.

In addition, many schools provide specific study skills advice within the curricula and offer students the opportunity of practising those skills in a subject-specific forum.

---

**Crime Prevention and Personal Safety**

The Personal Safety book is available on the University Safety Office website at [www.ncl.ac.uk/internal/safety/security-adv.html](http://www.ncl.ac.uk/internal/safety/security-adv.html)

**Suitable prevention measures should always be taken.**

**WORK INVOLVING HOME VISITS**

Any work involving home visits should be risk assessed and subject to review. The following features need to be addressed.

- Plan to know the whereabouts of staff on home visits, with reporting arrangements.
- Identify and communicate within the school concerns about ‘high risk’ areas or individuals.
- Decide whether or not to drop ‘high risk’ areas or individuals, or to relocate the work elsewhere.
- Staff training.

---

**LATE WORKING**

Lighting the campus. The University is committed to providing adequate lighting on-campus, and has an inspection and maintenance procedure to do so. Defects should be reported to the Customer Services Help Desk:

- extension 7171, between 8.45 am to 4.45 pm
- e-mail: defect-reports@ncl.ac.uk (this will be acknowledged).

**SAFETY WHEN DRIVING**

There are positive aspects relating to cars and their contribution to your safety. They provide a controllable means of transport allowing you to decide your own travel arrangements: the time you leave, the route to take when you return and whom you journey with. If you feel threatened when driving, your car also provides physical protection as well as a means of escape.

The negative aspect of driving is that it may increase risks by creating situations where you become more vulnerable or isolated. By raising your awareness of potential hazards, how to avoid them and what to do if they occur, this section is intended to make driving safer and you more confident about using the car.

The most fundamental way to reduce risk when driving is to ensure that your car will complete the journey you undertake.

**Preparation**

- Have your car regularly serviced.
- Carry out routine maintenance checks.
- Do not let small faults develop into large ones.
- Join a breakdown organization.
- Always ensure you have sufficient petrol.
- Plan your route.
- Keep items you may need in an emergency. These include: torch; blanket; warning triangle; jump leads.

**Reduce The Risks**

- Always let someone know where you are going, when you expect to arrive, and when you have reached your destination safely.
- Do not stop to give lifts to strangers, no matter how genuine they appear.
- If you think that you are being followed by the car behind, drive slowly to give them the opportunity to overtake. If they continue to follow, drive to a busy area, such as a petrol station, where you can stop and use your hazard warning lights.
- If another motorist attempts to make you stop by flashing their lights, and indicates a fault on your vehicle, acknowledge their signal but drive to a busy area where you feel confident.
- Keep doors locked when driving and keep any bags, car phone or valuables out of sight. If you have the window open, only wind it down a little so that it is not possible for anyone to reach in while you are stopped in traffic.
If your car develops problems, find a telephone. On motorways follow the marker arrows to the closest phone. They are never placed more than a mile apart, on opposite sides of the motorway. Never cross the motorway to use a phone.

When telephoning for help tell the operator if you are alone woman.

While on the hard shoulder or telephoning, keep a sharp lookout and do not accept lifts from strangers - wait for the police or breakdown service. Do not wait in the car. Wait on the embankment nearby with the passenger door open. If someone approaches you, or you feel threatened, lock yourself in the car and speak to them through a small gap in the window.

Do not respond to harassment or bad driving, as this may contribute to a confrontation. Try to remain calm, without reacting. It is safer to drive away from potential trouble.

Do not stop for an apparent accident or emergency if you feel insecure, but drive to a telephone and inform the police.

Driving too close to the car in front could make it difficult for you to stop in time; keep your distance.

If you stop in a situation where you feel insecure, do not turn off your engine.

Parking Your Car
Take time to select where you park, remembering that when you return the area may be dark and lonely. For the sake of a little time, be safe.

Try to park underneath a street light, away from walls or bushes that a person might use to conceal themselves.

Remember the location, and if it is confusing make notes to assist you.

Before getting out of your car look around for potential danger.

Do not leave objects inside your car, especially objects that identify the owner as being a woman.

When returning to your car, assess the situation carefully. Study your car to see if it has been tampered with. If it has, avoid it.

Look inside the car before getting into it.

When approaching the car, have your key ready.

As soon as you get into the car, lock the doors before doing anything else.

Remember that a central locking system opens all doors.

Multi-storey car parks create certain risks. If possible park on the lower floor and as close to the lights or staircase as you can.

SAFETY WHEN TRAVELLING

PUBLIC TRANSPORT
As the term 'public' transport implies, you will be travelling openly and with others around. Potential attackers will be deterred by the presence of witnesses and the possibility that they may be recognized. Public transport is also well lit, and does not provide criminals with the means of a quick escape from the scene of any attack. There are, however, potential risks, as in any situation. Be aware that there may be some danger, take positive measures to avoid it, and you will feel more confident and comfortable with travel.

BUSES

- Time your arrival at the bus stop so that you will not have to wait long.
- Try to avoid bus stops that are poorly lit, or isolated.
- Sit as close as you can to the driver or conductor.
- If you feel vulnerable where you are sitting, change your seat as soon as the opportunity arises.
- Think about where you will get off the bus. Avoid isolated and poorly lit stops – they may mean a shorter walk, but it might be safer to use a longer, more secure route.
- On double-decker buses, sit on the lower deck if you can.

TRAINS

- Avoid using compartments that have no access to the rest of the train.
- If feeling threatened and isolated, pull the emergency cord.
- Tell the guard or conductor if you feel threatened in any way.
- Do not remain in your seat if you do not feel secure. Move away from any threat and do not wait for it to develop.
- Be aware of the possibility that your train may be delayed and that you may be late arriving at your destination. If this means you could be too late to catch the last bus, take enough money for a taxi fare.

TAXIS AND MINI-CABS

- Know the telephone number of a reputable cab company and carry this with you.
- Consider sharing a taxi with friend. Not only is it safer but it will be cheaper.
- Always sit in the rear of the cab.
- If you feel uncomfortable about the driver, stop at a busy area and get out.
- Never disclose any personal details about yourself, no matter how genuine the driver might appear.
- Before you get out, have your house keys ready.
- Do not be tempted to accept a cab that stops beside you without a booking, it may not be genuine.
- If female, many taxi companies have female drivers available if you ask.
- If faced with an attacker, for most people the 'kick and run' theory is probably of more practical use than standing up to the attacker.

SAFETY WHEN TRAVELLING ON FOOT
You can be vulnerable when walking alone – whether you are walking for pleasure, or walking from A to B. Many of the tips about making a car journey apply to journeys on foot. For instance, always let someone know where you are going, when you expect to arrive, and when you have reached your destination safely.

- When walking, avoid short cuts through dimly lit areas such as alleys, waste ground, or parks.
- Walk facing the traffic, so a car cannot pull up behind you unnoticed.
Walk on the kerb side of the pavement, so that anyone lurking in an alley has further to come to reach you.

Do not expose expensive-looking jewellery to view.

If you usually walk home after dark, it is worth considering a personal attack screech alarm. These are available from the students’ Union, and give off a piercing noise which will attract attention and may frighten off would-be attackers. Remember they can only be of help if they can be used quickly, so keep in your coat pocket or hand, not in a handbag.

Do keep bags close to your body. If someone makes a grab for your bag it is better to let it go rather than risk injury.

Do keep your keys in your pocket rather than your bag.

If you are accosted by a car driver in the street, run off in the opposite direction to the way the car is facing.

When walking along a street, you may feel that someone is following you on foot. Try crossing the road to confirm your suspicions. If you are still being followed then make your way to the nearest place where people are likely to be, for example, a pub, shop, or house with lights on. As soon as you can, telephone the police from a safe place. Do not use a telephone box in the street as an attacker could trap you inside.

If you are going to be late leaving the University, it is wise to arrange a lift and if possible stay indoors until the vehicle arrives.

If you are leaving the students’ Union, use the ‘Safety Bus’ which operates a door-to-door service on a nightly basis, Monday to Friday. Further information can be obtained from the Union Society Welfare Officer.

SAFETY WHEN CYCLING

When not in use, always secure your bicycle to avoid theft. Make a note of the frame number.

The bicycle should be post-coded with your home post code, for easy identification if stolen.

When cycling avoid unlit areas and quiet roads.

When on campus, use a designated cycle rack (if available) and use a good quality lock and chain.

Always carry a repair kit.

If you feel vulnerable because of an incident when cycling, report the matter to the University security staff or local police.

Always wear a British Standards cycling helmet when cycling.

Fit and use front and rear lights on your bicycle when dark, and wear brightly coloured clothing when cycling at night.

WORKING EARLY/LATE

If you are aware that no-one else is working in the vicinity, advise security or a porter of your location.

Always lock the door when you leave the room.

If you regularly work alone at night consider having panic attack button fitted in the office.

If you hear someone, do not confront them, lock the door and contact security on extension 6666, or from a pay phone call 222 6666. This will link you directly to the security control room staff and ensure that you get assistance as soon as possible.

When leaving the office, keep to main corridors and let security know you are leaving the building.

If you are late leaving the University, it is wise to arrange a lift and if possible stay indoors until the vehicle arrives.

PERSONAL SAFETY AT HOME

Use timers on internal lights when you are out, to give the impression that the accommodation is occupied.

Do not let strangers into your room. If checking credentials by telephone, find out the number yourself, rather than use the one given to you.

If you are expecting a caller you do not know well, invite a friend to be in the room.

Never say you are alone when answering the telephone.

Draw your curtains at night.

Do not answer the telephone by repeating your number. Some malicious callers call at random.

If you move into new accommodation change the locks – you do not know who has copies of the keys.

Do not record your address on your key fob.

When returning to your accommodation do not go in if it appears to have been tampered with. Go to a friend’s room and contact the police.

If you are in bed and you hear someone, do not confront them. Turn on the lights and make a noise, and summon help to scare them away – most burglars will flee empty-handed rather than risk a confrontation.

MONEY AND PLASTIC CARDS

Do not make it easy for pick-pockets. Carry your wallet in an inside pocket, preferably one which can fasten, not your back pocket. If someone bumps into you in a crowd, see if you still have your wallet or purse.

Cash is a favourite target for thieves, so try to avoid carrying large amounts.

Be alert to others around you when using cash dispensing machines, and do not let them identify your personal identification number (PIN).

If you must use cash dispensers after dark, be alert to others around you, have a friend with you who can watch for suspicious strangers, or at least carry a personal attack alarm and be prepared to use it to alert others.

If your credit card is stolen, tell the card company immediately. Keep the number handy. If you delay reporting the loss, it could lead to a crime being committed in your name, as a thief could make fraudulent use of your card.

Never carry the personal identification number (PIN) with your cash-dispensing cards. Always memorize your number and never disclose it, not even to bank staff or close friends.

Sign new plastic cards as soon as they arrive, and cut up old ones when they expire.
**Handbags**

Never let your handbag out of your sight. On public transport keep hold of it, with the clasp or zip shut so thief cannot steal your purse. In the office, keep it in lockable drawer, or in a corner near to you and out of the sight of others. Never leave your handbag unattended, even for a minute, as you may find it missing on your return.

**EMERGENCY SERVICES**

**FIRE • POLICE • AMBULANCE**

**External telephone emergency number: 9 – 999**

Fire, police or ambulance emergency services can be contacted by dialling 9 – 999 on an external University telephone.

NB: for University residences please check local arrangements with the House Warden.

**University internal telephone emergency number: 6666.**

Alternatively fire, police or ambulance emergency services can be contacted 24 hours per day, seven days per week, on 6666 on any University internal telephone.

NB: for University residences please check local arrangements with the House Warden.

**COUNSELLING SERVICES**

During working hours, Monday to Friday, the Student Counselling Service can be contacted on extension 7699 or direct dial 0191 222 7699. Alternatively, the Student Nightline Service can be contacted nightly between the hours of 8.00 pm – 8.00 am on 0191 261 2904.

**UNIVERSITY SECURITY PERSONNEL**

University security can be contacted 24 hours per day, seven days per week, through the University internal telephone emergency number: 6666.

**NEAREST ACCIDENT HOSPITAL**

The nearest accident hospital to the University is the General Hospital, Newcastle upon Tyne.

---

**Information for International Students**

The University annually produces an International Student Handbook. This is a comprehensive guide, and is generally available to all new international students before they arrive at the University. The content of the Handbook is as follows:

**Key Information and Pre-departure Checklist**

- Key dates
- Key contacts
- Other sources of information
- Pre-departure checklist

**Planning the Journey**

- What is the best time to arrive?
- What immigration requirements are there?
- What do I need to bring with me on the journey?
- How do I get to Newcastle?
- Arriving in Newcastle – how do I get to my accommodation?
Payments for Teaching and Demonstrating Duties

General Policy
Payments for teaching and demonstrating duties should be governed by the need for such teaching and the amount of finance that a school is able to allocate for this purpose.

Normally only full-time registered postgraduate students are eligible for these duties. Part-time postgraduate students should only be used for teaching and demonstrating where full time students are not available. Payments to other persons not normally eligible are subject to Faculty or Executive Board approval.

It is University policy that the limited finance available for these duties be distributed as equitably as possible amongst those eligible and with appropriate ability and expertise. Heads of schools are expected to ensure that clear instructions regarding the duties to be performed, and adequate supervision, are provided. There should be a clear understanding of the total number of hours that will be worked, taking full account of realistic time for preparation.

Full-time postgraduate students may undertake paid duties in the University provided supervisors are consulted about the time devoted to such duties and that they do not contravene the terms of their studentships.

2004–05 Payment Rates
All postgraduate students involved in teaching and demonstrating duties must be given a copy of these notes so that they are aware of the ground rules and of the rates of payment. The rates for 2004–05 are:

<table>
<thead>
<tr>
<th></th>
<th>Hourly Rate</th>
<th>Holiday pay per hour worked</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>For Normal Duties</td>
<td>11.02</td>
<td>0.85</td>
<td>11.87</td>
</tr>
<tr>
<td>For duties requiring more preparation</td>
<td>19.95</td>
<td>1.53</td>
<td>21.48</td>
</tr>
</tbody>
</table>

Procedures for Payment
The Inland Revenue has insisted that the University pay all full-time and part-time postgraduate student demonstrators through the payroll system. All postgraduate demonstrators must therefore be issued with appointments by the Human Resources Section. In order to reduce the amount of administration required in schools a number of changes were introduced for 1999/2000 and revised in 2001/2002.

The procedures now being followed are:

i) At the commencement of the academic year each school will be invited to submit to Human Resources a list of those postgraduate students who are to be appointed as Postgraduate Demonstrators.

ii) The form TD1/02 needs to be completed for each student and signed by the head of school or an authorized nominee. Students will need to provide the details of their bank account for payment, as well as tax and National Insurance information and complete a P46 tax form if no P45 is available. This will enable complete records to be set up for payment without having to request further information from most students.

iii) Heads of school will also need to indicate the length of contract required, which should be for the duration of the studentship up to a maximum of three years. The appointment must not exceed the duration of the studentship but will remove the need for annual reappointment.

iv) Human Resources will issue a confirmatory letter of appointment to the student with a copy to the head of school for local records.

v) Payment will be triggered by monthly returns from schools to the Payroll Section of the Finance Office of the form TD4/02.

Forms TD1/02 and TD4/02 are available on the HR Intranet under Human Resources - Payroll – A–Z Index – Teaching and Demonstrating. See www.ncl.ac.uk/internal/hrc

Heads of school should note that if payments to a single individual rise above £395 in any one month during the tax year 2004–05 then liability for National Insurance payments on both the individual’s part (11 per cent) and that of the school (12.8 per cent) will be incurred as an additional charge to demonstrating payments. While students can either reclaim tax or gain tax exemption if their earnings fall below personal allowance levels, National Insurance payments cannot be reclaimed. To avoid this situation it is essential that payment is not left until the end of term as, if a block payment of say £400 was made, this would become liable for National Insurance payment by both the student and the school. However, if payments of £130, £130 and £140 were made during term time on a monthly basis no National Insurance would be paid.

Heads of school should make enquiries concerning this exercise as follows:

- Teaching and demonstrating rates Richard Burrow Assistant Director of HR
- Human Resources procedures and contract matters Faculty Human Resources Officer or Richard Burrow, Assistant Director of HR
- Financial payments, tax and national insurance Bob Wilson Assistant Director of Finance
- Funding of teaching and demonstrating Faculty Head of Administration or Faculty Accountant
PART FOUR

Academic Matters

University Regulations

You will receive guidance and advice from your Supervisor, Head of School and other key academic staff, as appropriate. The full University Regulations for Postgraduate Research Students follow. Any queries which cannot be handled by your Supervisor or School may be referred to the Graduate School or Student Progress Section.

The Regulations cover all matters relating to admission to and examination of those undertaking research degrees at Masters and Doctor of Philosophy levels, whether as student or staff candidates.

This Part begins with the General Regulations, followed by the specific regulations for each degree and category of candidate. Supervisors and students are strongly recommended to be familiar with both. The list of contents will guide you to the relevant pages quickly.

General Regulations

Admission and Registration

1. (a)(i) All students are required to register at the beginning of their studies, in accordance with the rules made from time to time by the University. Ordinarily, this will be the first week of studies (induction week for taught programmes). Only exceptionally, and with the special permission of the degree programme director or director of studies, will students be permitted to register after the time appointed for them. An administration charge of £40 may be charged to all students who register late.

(ii) Registration other than in induction week is only permitted for research postgraduate students or occasional students.

(b) Students registering for modular programmes shall, in addition, by the end of the induction week of semester 1, complete a module registration form recording their choice of modules for the entire academic year. Such choice shall be subject to the written approval of the relevant degree or other programme director in accordance with the relevant progress regulations.

(c) Changes to module selection are subject to the written approval of the degree programme director or director of studies. Transfers between modules shall normally be completed before the end of the third week of the semester. Transfers beyond this date are only permitted in exceptional circumstances. For any late module changes, the written approval of the degree programme directors is required and the amendments shall be reported to the Examinations Office.

(d) Registration of module choice as in paragraph (b) above shall in all cases be determined in accordance with the relevant degree or other programme regulations and may be subject to the availability of places.

2. Occasional students, that is those not pursuing a programme of study, whether undergraduate or postgraduate, leading to a degree or other qualification awarded by the University, are not required to pass any regular entrance examination, but must satisfy the head of school or senior tutor concerned of their educational fitness to enter the programme of study they propose to take. They are subject to the discipline of the University, must register as students and pay the prescribed fees.

Note: candidates for first degree and undergraduate diploma programmes must make application for admission through UCAS, Rosehill, New Barn Lane, Cheltenham, Gloucestershire GL52 3LZ, by 15 January for entry in September of the following year. Candidates for higher degrees and occasional students must apply direct to the Academic Registrar.

3. (a) All new students whose native language is not English are required to take a proficiency test in English at the Language Centre at the time of registration. The student's performance in the test will not prejudice registration, but if the test result indicates that additional tuition in English is desirable the student will be given an opportunity to undertake free in-sessional language modules or courses. This could be via credit-bearing modules or non-credit-bearing courses. Successful completion of one or more in-sessional modules or courses can be made a condition of satisfactory student progress by the degree programme director or, in the case of a PhD student, by the dean of postgraduate studies. If successful completion of the in-sessional modules or courses is a condition of a student's progress, this will be communicated to the student in writing by the degree programme director or the dean of postgraduate studies.

(b) Students will be exempted from the requirement to take a proficiency test at the time of registration if:

(i) they have successfully completed an undergraduate programme of study in a United Kingdom university;

(ii) they hold a first degree which was taught and assessed in English in the United Kingdom, Australia, Canada, the United States of America, New Zealand or Ireland, and the period of study for the degree was two years or greater;

(iii) they have been specifically exempted from the proficiency test by the Director of the Language Centre.

4. In order to be admitted to the University all students are required to sign the following declaration: 'I hereby promise to conform to the discipline of the University and to all statutes, regulations and rules in force for the time being in so far as they concern me'.

5. Students using computing facilities of the University must comply with the Computer Users Agreement adopted by the University, which is available on application to the Director of Information Systems and Services.

Fees

6. Fees and other charges must be paid at the times prescribed by the University. It shall be a condition of registration that the student shall have made adequate arrangements for the payment of tuition fees and for maintenance during the period of study at the University.

7. Students who are supported by grant awarding bodies or other sponsors will be responsible for providing such information as may be necessary for the University to secure payment from the body concerned. Other students will be classified as self-supporting and will be responsible for the payment of their own fees.

8. With the exception of the Home Undergraduate Tuition Fee Contribution (see Fees Schedule), which is payable in three instalments, Composition Fees due from self-supporting students are payable on registration. By arrangement with the Bursar, students may also pay these fees by a schedule of instalments. Students who do not pay by the due dates may be liable to an administration charge (currently set at £40). Details of payment options are available from the Finance Office. Residential charges for students in University accommodation must be paid for in accordance with the invoice issued by the Accommodation Office. Details of payment options are available from the Accommodation Office.

9. It is the responsibility of students to notify the University, in writing, if they are in financial difficulties and unable to pay their charges by the due date. Students should outline the reason for the difficulties and their proposals for payment.

10. Where there are any delays in the payments of tuition fees (or other charges relating to academic study at the University), whether by students themselves or by a grant awarding body or other sponsor, and where those students cannot show reasonable cause and give a satisfactory
assurance as to payment, the Academic Registrar or nominee may determine an appropriate sanction. Sanctions could include:

(a) the suspension of the student’s Information Systems and Services (ISS) account, and thus access to University controlled facilities such as access to ISS clusters and the Library;

(b) being denied the opportunity to sit University examinations or to have assignments assessed;

(c) being denied access to other University facilities or such sanctions as may be approved from time to time by the Academic Registrar;

(d) exclusion from further study in the University. In special circumstances a student so excluded may be readmitted to the University on the authority of the Academic Registrar, on payment of all outstanding fees and debts to the University together with an administration charge (currently set at £25). Students who cannot show reasonable cause and give satisfactory assurance as to payment will be subject to sanctions as outlined in the University Credit Policy and may be expelled from a University residence.

Additionally, no degree, diploma or other qualification shall be conferred upon any person who has not fulfilled their financial obligations to the University.

11. Fees and charges for students in University accommodation must be paid for in accordance with the invoice issued by the Accommodation Office. Any charges which have not been paid by the due date will be subject to the payment of an additional administration charge (currently set at £25). Students who cannot show reasonable cause and give satisfactory assurance as to payment will be subject to sanctions as outlined in the University Credit Policy and may be expelled from a University residence.

Discipline

12. Any student who has registered and signed the Declaration is subject to the discipline of the University.

13. All students subject to the discipline of the University are required at all times during their periods of study to be of good behaviour and to observe all regulations affecting them which may be made from time to time by the University or other institutions which they attend as part of a University programme of study.

14. Any student subject to the discipline of the University shall be liable in cases of misconduct to such punishment as may be embodied in the disciplinary procedures approved by Council. Misconduct may include being found guilty of an offence in the criminal courts.

15. Students are required to make good to the satisfaction of the University any damage or injury they may cause to the property of the University or any institution attended as part of a University programme of study or to the property of individuals thereof.

16. The University is legally required to take such steps as are reasonably practicable to ensure that freedom of speech within the law is secured for members, students and employees of the University and for visiting speakers and that the use of University premises is not denied to any individual or body of persons on any grounds connected with the beliefs or views of that individual or of any member of that body or the policy or objectives of that body. All persons subject to the discipline of the University must comply with the Code of Practice approved from time to time by the University for the purpose of meeting these statutory requirements.

17. The University is legally required to take such steps as are reasonably practicable to ensure adherence of members, students and employees of the University to the Copyright, Designs and Patents Act 1988 and to the Copyright Licensing Agency and Educational Recording Agency Licensing Agreements. Provisions of the Act and the agreements are available in all University schools and all persons subject to the discipline of the University must comply with these requirements. Breaking the relevant legislation may result in legal action against individuals and the University.

Tutors and General Information

18. Every student is assigned to a tutor who is a member of the academic staff. The requirements to inform the tutor of changes in circumstances and to attend for interviews with the tutor are set out in regulation 7 of the Undergraduate Progress Regulations.

19. Students are responsible for making themselves familiar with all regulations and rules affecting them, all notices posted on public notice boards throughout the University, as well as with all dates appearing in the University Regulations which affect them. In particular they are required to note the times and places at which University examinations are to be held.

20. Postgraduate research students are responsible for making themselves familiar with the Guidelines for Research Students approved by Senate from time to time which are available to them at the beginning of each academic year.

21. Students should note that all modules are offered subject to the constraints of the timetable and to any restrictions on the number of students who may be taught on a particular module. Not all modules may be offered in all years and they are listed subject to availability. Degree programme regulations are revised annually.

22. Candidates may be permitted with the approval of the degree programme director, to select modules other than those listed in their degree programme regulations.

Registered Students having Sabbatical Status

23. Persons appointed to any office which Senate and Council from time to time approve formally as having sabbatical status must be full-time registered students of the University.

24. Graduates of the University shall be registered by the Academic Registrar as full-time students for the academic year following the academic year in which they graduate if elected for that year to one of the offices which Senate and Council from time to time approve formally as having sabbatical status and for the following academic year, if re-elected to one of these offices.

25. No-one shall hold sabbatical office or offices for more than two academic years whether consecutively or in aggregate. An academic year for the purpose of this regulation shall be defined as the year or such part of a year served for which student sabbatical officers are normally elected, which commences on 1 August.

26. The special provisions and exemptions which sabbatical officers may claim in respect of University and degree regulations are described in regulation G6 of the Undergraduate Progress Regulations. These provisions for sabbatical officers shall apply unless such an officer informs the Academic Registrar by the end of the induction week of semester 1 that he does not wish to abide by the provisions in which case the Undergraduate Progress Regulations shall apply normally to the officer concerned.

Academic Dress

27. Academic dress in the form prescribed by Senate shall be worn at all Congregations of the University and at such times and on such occasions as may be prescribed by Senate.

Absence from the University

28. A student who is absent from attendance at classes for more than three days must inform the tutor through the completion of a self-certification form which may be obtained from the tutor. In the case of an illness which lasts more than seven days the student must forward a medical certificate.
Living Accommodation

29. All students who take up places in University accommodation shall do so until the end of the current academic year, unless other arrangements are explicitly prescribed for a particular University residence. In exceptional cases or if a substitute is found who is acceptable to the warden in question or where there is no warden, to the Accommodation Office, this rule may be relaxed at the discretion of the warden or of the Accommodation Office as appropriate. Additionally, students in a hall of residence may apply to transfer to non-catered University accommodation within the first six weeks of the start of the academic year on agreement to pay a fixed transfer fee at a rate to be determined annually by the University.

30. Students shall immediately notify the Academic Registrar or the Accommodation Office of changes of home or local address. They must also report any such changes to their tutors or, in the case of students in the Faculty of Medical Sciences, to the Medical or Dental School Office.

Health

31. Students other than those living at home are required to bring their National Health Service medical cards with them when they come into residence and to register under the National Health Service with a local medical practitioner.

32. No student who is suffering from an infectious illness deemed on medical advice to represent a significant risk to other students, or in whose residence there has been such illness, shall attend the University or reside in a University residence until satisfactory medical evidence is presented to the Academic Registrar that there is no longer any risk of infection.

Conferment of Qualifications

33. No person may be described as holding a degree granted by the University until the qualification has been awarded in person at Congregation or in absentia in accordance with a general resolution of Senate. A diploma, certificate or other qualification not being a degree shall be conferred by the University on the publication of the relevant pass list.

34. Congregation shall be held at such times and places and in such manner as Senate may prescribe.

35. Students who wish a degree to be awarded must make application for the award in the form prescribed under the authority of Senate, and must pay such fees as may be prescribed, and must state whether it is desired that the degree should be awarded in person or in absentia.

36. The Academic Registrar may exclude from Congregation any student who has not conformed with the conditions prescribed by Senate under regulation 35 above.

Conduct of Examinations

37. All students offering themselves for any examination shall abide by the Rules governing the Conduct of University Examinations as from time to time published by the Academic Registrar. Alternative arrangements may be made for candidates with permanent or temporary disabilities in accordance with the Policy for Candidates with Disabilities in University Examinations (details available from the Academic Registrar’s Office).

38. (a) Registration of module choice for a degree programme or other programme of study as set out in 1(b) to (d) above shall constitute registration for the assessment associated with the modules concerned. Where a degree programme or other programme of study does not involve registration of module choice, candidates for examination shall submit by the end of the induction week in semester 1 a duly completed approved examination entry form.

(b) Candidates for August/September examinations shall submit approved August/September Examination Entry Forms by such a deadline as the Academic Registrar shall prescribe.

(c) External candidates for examinations shall submit approved External Candidate Examination Entry Forms by such a deadline as the Academic Registrar shall prescribe.

39. Any examination or re-examination fee payable to the University is due when the entry is received by the Academic Registrar.

Entries for examinations or notification of components of an examination which are not submitted within the time limits prescribed under section 38 will only be accepted if, in the opinion of the Academic Registrar, there is good cause for non-compliance with these limits. A candidate who is permitted to submit an entry or notification outside the prescribed time limit shall be liable to pay an administration charge of £40.

40. Candidates are required to present themselves for all components of an examination for which they have entered. Candidates who fail to so present themselves will be subject to the terms of section 18 of the Undergraduate Examination Conventions except where the application of section 45 below is appropriate.

41. Candidates are responsible for retaining all forms of assessed work until after marking by examiners. Assessed work so retained may be recalled from candidates, if required by examiners or for examination review purposes, or for Quality Assessment or Audit purposes. Rules governing the arrangements for the retention and recall of assessed work shall be specified in the relevant degree programme handbook.

42. A candidate who withdraws from an examination is not entitled to recover any annual or examination fee paid, and the fee is not transferred to a later occasion of examination. The Academic Registrar shall have power to authorize the refund of any fee in exceptional circumstances.

43. (a) The University’s policy and procedures governing assessment irregularities are in a document approved by Senate available on request from the Academic Registrar.

(b) Any person entrusted with the superintendence of a University examination shall, if he discovers any irregularity in the conduct of a candidate within the examination room, warn the candidate of the nature of the suspected irregularity, confiscate any illicit material, and tell the candidate that a report of this event will be made in writing to the chairman of the board of examiners and to the Academic Registrar.

(c) The candidate shall be subject to such academic consequences as the board of examiners may determine with regard to the marking of the work and may also be subject to disciplinary action as determined by the Academic Registrar in accordance with the University’s Disciplinary Procedures (see regulation 14).

44. Any student whose examination script or other work submitted for assessment towards a degree, diploma or other qualification to be granted by the University contains the unacknowledged work of another, either verbatim or in substance, or contains fabricated research results shall be subject to the provisions of regulation 43(c) above.

45. The board of examiners may, having regard to a student’s attendance, record, progress and performance,
award an Aegrotat degree to a student who has registered for the final stage of the programme and who presents to the examiners sufficient evidence of ill health, or any other extenuating circumstance, that clearly confirms that the student will not be able to complete the prescribed programme of study in the foreseeable future. The student’s name shall be placed in a separate pass list, distinguished by the word ‘aegrotat’. The names which are placed in it shall be arranged alphabetically. A candidate to whom an aegrotat is awarded shall be deemed to have obtained Honours but without classification.

Extraordinary Examinations
46. In respect of any examination candidates may apply for an extraordinary examination if:
   (a) they are prevented from attending or completing it by illness or other circumstances acceptable to Senate; and
   (b) they would be seriously disadvantaged by having to wait for the next ordinary occasion of examination.
Application for an extraordinary examination, or notification on behalf of a student who is unable to make an application personally, shall be submitted to the Academic Registrar within such period as may be determined by Senate from time to time.
47. For the purposes of determining, according to the degree regulations, the number of occasions upon which a candidate may enter an examination, an extraordinary examination granted under section 46 above shall count as the same occasion of examination as the examination for which it was granted.
48. Candidates:
   (a) who fail to present themselves for a component of an examination for which they have entered; and
   (b) to whom section 46 above does not apply shall be awarded a mark of zero. Such candidates shall be deemed to have failed the assessment in question and shall be entitled to any resit rights ordinarily conferred by the Undergraduate Progress Regulations and Undergraduate Examination Conventions.
49. The number of examiners shall be the same for an extraordinary examination as for an ordinary examination and the examination shall be of the same standard.
50. Except in circumstances approved by the University Concessions Committee, not more than one extraordinary examination shall be set for a particular examination component within one semester.

Safety
51. The University's rules and arrangements are set out in the booklet Health and Safety: Statements on Policy, Organization and General Safety Arrangements, available on application to the University Safety Officer or from the University website at: www.ncl.ac.uk/internal/safety. The Local Rules Governing the Use of Ionizing Radiation and Radioactive Substances is available on application to the Radiation Protection Officer or from the website at: www.ncl.ac.uk/rpo/radio.html. The University also has local rules on a number of safety matters, including those relating to hazardous waste, work with micro-organisms and to work with chemicals subject to the COSHH Regulations. These local rules are available on the website at www.ncl.ac.uk/internal/safety or on application to the University Safety Officer. All members of staff, students and other persons on University premises are required to comply with safety regulations in force.

Smoking
52. Smoking is prohibited in all parts of all University buildings other than in areas which are designated as smoking areas. The University's detailed No Smoking Policy is available from the Academic Registrar.

University Library
53. Attention is drawn also to the Regulations and Rules of the University Library which is available from the University Library.

Regulations for Student Candidates for the Degree of Master of Philosophy

Postgraduate research students are responsible for making themselves familiar with the Guidelines for Research Students approved by Senate from time to time which are included in the Handbook for Research Students and Supervisors.

Introduction
1. Applicants for the degree of Master of Philosophy are required to show familiarity and understanding of the chosen subject and its principal sources and authorities. A candidate must demonstrate the ability to deal with the chosen subject in a competent and scholarly manner displaying critical discrimination and a sense of proportion in evaluating the evidence and opinions of others. The thesis submitted by the candidate should be clear, well-written and orderly in arrangement and include a bibliography in which the sources used are accurately and systematically presented.

Applicants, including members of staff, who are approved for admission as candidates for the degree of Master of Philosophy under these regulations will be required to pay the student fees for the degree as set out in the annual Fees Schedule.

Admission as a Candidate for the Degree of Master of Philosophy
2. An applicant may be approved for admission as a candidate for the degree of Master of Philosophy by a minimum of two postgraduate admissions selectors in accordance with the University’s Postgraduate Admissions Policy and faculty / programme criteria approved by respective deans of postgraduate studies where an applicant:
   (a) is a graduate of this or another approved university or other approved degree awarding body or holds other qualifications approved by the dean of postgraduate studies;
   (b) has completed an approved application form in which is set out:
      (i) an indication of the intended field of advanced study and research;
      (ii) evidence that the applicant's English Language proficiency meets the published requirements for the programme of research;
      (iii) evidence of the applicant's suitability to become a candidate in terms of academic ability and prior training and experience;
   (c) has supplied such references and evidence of qualifications and experience as the postgraduate admissions selectors and/or the dean of postgraduate studies may require.
   (d) Where an applicant has previously studied for a Master of Philosophy at another institution...
and wishes this to be taken into account at the University of Newcastle, the application must be approved by the dean of postgraduate studies.

3. In considering an application for admission as a candidate for the degree of Master of Philosophy, the postgraduate admissions selectors must be satisfied not only as to the suitability of the applicant, but also as to the availability to the applicant of appropriate supervision and suitable facilities and resources once the applicant is admitted as a candidate. It is the responsibility of the relevant head of school, directly or through the postgraduate admissions selectors, to ensure that appropriate supervision, suitable facilities and resources will be available to an applicant once admitted as a candidate.

General Preconditions to the Award of the Degree of Master of Philosophy

4. Before being awarded the degree of Master of Philosophy, a student must:

(a) satisfy the entrance requirements for the degree;
(b) register for and make satisfactory progress in the relevant programme of study;
(c) satisfy the examiners in the assessments specified.

Supervision of Candidates

5. (a) A candidate for the degree of Master of Philosophy must engage in advanced study and research under the direction of a supervisory team in the University. The main supervisor is appointed by the head of school before a candidate is accepted onto the programme of study.

(b) To be eligible to supervise candidates for the degree of Master of Philosophy, a member of staff must hold a research degree or have equivalent research expertise. The appropriateness of the research degree or equivalent expertise should be determined by the relevant head of school in consultation with the graduate school.

(c) The head of school will designate a member of the supervisory team to be the main supervisor. The main supervisor will be a member of academic staff of the University of Newcastle and will have primary responsibility for supporting the student throughout the period of study. Any reference to the supervisor or supervisory team in these regulations or in the Guidelines for Research Students or in other documents shall be deemed to be a reference to the supervisory team. However, practically, the main supervisor will normally act on behalf of the supervisory team for matters other than progression.

(d) In any case where students are studying outside the University at another institution, arrangements may also be made for local supervision and support to be provided to the student by staff at that institution (see regulation 8). Such arrangements will supplement the role of the main supervisor detailed in (c) above.

(e) Under exceptional circumstances where only one supervisor is available, an additional adviser will be appointed by the head of school, with the approval of the dean of postgraduate studies.

Period of Study and Registration Requirements

6. An applicant may be approved as a candidate for the degree of Master of Philosophy on the basis of either:

(a) a minimum period of 12 months in full-time study; or

(b) a minimum period of 24 months in part-time study.

7. Approved candidates shall be required to register as appropriate as full-time or part-time students of the University for the duration of the minimum period specified, and to abide by the requirements of the University’s General Regulations. A candidate’s period of study shall be reckoned from the date of first registration of the candidate for the degree of Master of Philosophy.

Study Undertaken Outside the University

8. Any candidate may be permitted by a dean of postgraduate studies, on the recommendation of the relevant supervisory team and head of school, to study outside the University, provided that in respect of any period of study not undertaken in the University the dean of postgraduate studies is satisfied before the beginning of that period of study that:

(a) the candidate will have access to adequate facilities and resources;
(b) sufficient time for study and research will be available to the candidate;
(c) appropriate arrangements have been made for the candidate’s supervision during the period of study outside the University, including arrangements for the candidate’s supervisory team to maintain contact with and to meet with the candidate as often as is necessary;
(d) appropriate arrangements have been made in any case where the candidate is attached to or working at an institution outside the University and is offered local supervision and support by staff at that institution.

Attendance and Progress

9. A student registered for the degree of Master of Philosophy shall comply with the University’s requirements for progression, as follows:

(a) Within 3 months of registering for the research programme, the candidate and the University shall have signed an approved learning agreement to cover the period of candidature;

(b) Candidates who are pursuing a course of study without a pre-approved project proposal should, within the guidelines identified by the graduate school up to a maximum of six months, submit project proposals for approval. Progression on the programme will be dependent upon acceptance of the project proposal by the dean of postgraduate studies;

(c) Candidates should attend the University as frequently and at such intervals as the candidate’s supervisory team shall require, bearing in mind whether the candidate is registered as a full-time or part-time student and allowing for any period of study undertaken outside the University. As a minimum, in accordance with the Code of Practice for Research Degree Programmes approved by Senate, students should have regular contact with their main supervisor at least twelve times a year, approximately once per month, and should have formal contact with their supervisory team at least three times a year, normally once per term;
Candidates should maintain a record of their personal development throughout their period of registration;

The school will appoint a progress panel for each candidate. The progress of each candidate will be reviewed annually, although this requirement may be stayed at the discretion of the dean if the student is ready to submit a thesis within the 12 month registration period;

Each supervisory team shall submit an annual report concerning the progress of the candidate's research for review by the appointed progress panel;

Candidates should submit reports and evidence of achievement as specified by the school or graduate school on an annual basis. Candidates may also be required to make a project presentation. This material, along with reports from the supervisory team, will be considered as part of an annual submission to the progress panel for each candidate;

The progress panel will make a report to the dean of postgraduate studies via the graduate school and further progress on the programme of study is subject to approval by the dean. In addition to detailed feedback that the progress panel may wish to provide to the candidate and the supervisory team, the progress panel will make one of the following recommendations to the graduate school:

(i) That the candidate’s performance is satisfactory and that study for the Master of Philosophy may continue;

(ii) That notwithstanding some concerns which the candidate and supervisory team should note, the candidate’s overall performance is satisfactory and that the candidate may continue;

(iii) That the candidate’s performance is unsatisfactory and that a further assessment should be held within two months to determine whether progress on the programme will be recommended;

(iv) That the candidate’s performance is unsatisfactory and that no submission for a Master of Philosophy examination is recommended, and that the student's candidature is terminated.

Evidence of Failure to make Satisfactory Progress and Procedures to be Followed

11. A student whose progress is considered unsatisfactory by the supervisory team shall be notified in writing of the reasons for this opinion and shall be given the opportunity of an interview with the supervisory team. Following this notice and any interview, the supervisory team may decide to monitor progress and/or attendance. Additionally or alternatively, the supervisory team may require the submission of written work in addition to that already prescribed by the project proposal and plan. If the student’s progress has not improved within such a period as shall be specified in the written notice, the supervisory team shall notify the dean and submit a report concerning the candidate's progress for review by the appointed progress panel. The progress panel will make a report to the dean of postgraduate studies via the graduate school (in accordance with regulation 9).

Grounds for Review of Decisions on Unsatisfactory Progress

12. A student may only apply for a review of the decision of a progress panel to the University Concessions Committee on one or more of the following grounds and shall state in writing which grounds are relied upon:

(a) The progress panel were not aware of circumstances affecting the candidate’s performance. (That is: the candidate was adversely affected by illness or other factors of which s/he was previously unaware, or which for a good cause, s/he was unable to disclose to the progress panel);

(b) procedural irregularity on the part of the progress panel;

(c) inadequate assessment by the progress panel;

(d) bias or prejudice on the part of the progress panel.

Interruption of Study

13. A dean of postgraduate studies may permit the interruption of a candidate's programme of study for a period to be specified by the dean of postgraduate studies.

Teaching Duties

14. Candidates for the degree of Master of Philosophy may undertake paid duties in the University during term in any period of full-time study, provided that they consult their main supervisor about the time that may be devoted to such duties and provided that they do not contravene the terms of any studentship that they might hold. Ordinarily, this will mean that teaching duties are additional to the normal commitments of a sponsored full-time student.

Submission

15. The results of a candidate's advanced study and research must be embodied in a thesis in the approved form (see items XIV and XV). The length of a thesis shall be determined bearing in mind the requirements laid down, or guidance issued, if any, by the candidate's graduate school. The thesis must be submitted, together with the necessary submission form and other material, to the relevant graduate school office.

16. The exact title of a candidate's thesis should normally be submitted on the appropriate form for approval by the dean of postgraduate studies not less than one month before the thesis is submitted.

17. The thesis must be submitted for examination within the period specified below from the date appointed as the beginning of the period of study:

(a) within two years in the case of candidates registered full time;

Progress of Candidates intending to Transfer to Registration for the Degree of Doctor of Philosophy

10. Students who are accepted as candidates for the degree of Master of Philosophy intending subsequently to transfer to the degree of Doctor of Philosophy, must normally have received the approval of the relevant dean of postgraduate studies to transfer not later than 12 months after commencing their studies in the case of candidates studying full time and not later than 24 months in the case of candidates studying part time. Transfer from registration for the degree of Master of Philosophy to registration for the degree of Doctor of Philosophy shall not normally be permitted unless the candidate has been registered for the degree of Master of Philosophy for at least nine months. Any candidate shall, for all purposes under the regulations for the degree of Doctor of Philosophy, be deemed to have registered for that degree at the date of initial registration as candidate for the degree of Master of Philosophy.
18. Except with the permission of the appropriate dean of postgraduate studies, a candidate may not submit a thesis earlier than the beginning of the last term of the prescribed period of study. Candidates who submit a thesis at the beginning of the last term of the prescribed period of study or, with the appropriate permission, earlier, shall nevertheless still be required to pay tuition fees (full-time or part-time as appropriate, depending on the type of candidature) for the whole of the prescribed period of study.

Extensions of Time for Submission

19. In exceptional cases, an extension of time for submission may be granted by the appropriate dean of postgraduate studies, subject to the candidate presenting a case justifying such an extension, supported by the candidate’s supervisory team. Candidates granted extensions of time in accordance with this provision, but who do not register, shall be required to pay such extension fees as the University shall prescribe from time to time.

Candidates Writing-up a Thesis

20. Candidates who have completed their research and who require the continued use of University library and computing facilities but who are completing the writing of their thesis and do not need normal supervision may be permitted on the recommendation of their supervisory team in consultation with the appropriate head of school to register as ‘full-time (writing-up)’ or ‘part-time (writing-up)’ candidates. The full-time (writing-up) mode of registration is open only to those who have completed the minimum period of registration specified in regulation 6(a) above.

Notes

(i) Candidates who have completed the minimum period of registration specified in regulation 6(b) will not be permitted to register under the full-time (writing-up) mode of registration.

(ii) Since candidates at the writing-up stage will have completed all experimental work and data collection, those who are registered under either of the writing-up categories will not be permitted to work in laboratories or studios or to take part in field trips (unless they have the authority of the appropriate head of school to do so for teaching or demonstrating purposes).

21. Exceptionally, a candidate who is neither required to register nor chooses to register after the completion of the minimum required period of registration specified in regulation 6 is deemed to be on a leave of absence from the University. The reason for the absence shall be noted as writing-up, but it is understood that such a student will not normally be granted access to University facilities or supervisory support. A candidate writing-up on a leave of absence shall nevertheless be required to be reviewed by a progress panel for each academic year until they submit their thesis for examination.

Examination

Details of the required arrangements for the examination are provided in the Examination Conventions for Student Candidates for the Degree of Master of Philosophy.

Language of Submission

22. A candidate’s thesis must be written in English. In exceptional cases, subject to the presentation by the candidate of a case justifying such a concession, the appropriate dean of postgraduate studies may allow the candidate to submit a thesis written in a modern language other than English. Such a concession shall only be granted where a candidate can demonstrate that the language of submission is integral to the research project, for example where the object of study is an aspect of the literary or linguistic culture of the language of submission and/or a significant proportion of the secondary literature on the object of study is written in the language of submission. Approval for submission in a language other than English must be sought at the time of application to study for the degree. Where approval is granted, the abstract of the thesis must be written in English.

Notes

(i) Forms of application for admission as a candidate and forms for project proposal approval and to accompany a thesis on submission may be obtained from the relevant graduate school office.

(ii) The University cannot undertake to arrange the examination of a thesis immediately after its submission. Candidates are warned that several weeks may elapse between the submission of a thesis and the completion of the examination, and that should consult with their main supervisor well in advance. The normal period between a submission of a thesis and an examination is ten weeks, although circumstances may necessitate a longer time frame.

Examination Conventions for Student Candidates for the Degree of Master of Philosophy

Scope

1. These Examination Conventions apply to all students of the University of Newcastle upon Tyne who, having met the requirements of the University’s General Regulations and of the Regulations for Student Candidates for the Degree of Master of Philosophy, are eligible to submit a thesis for examination for the degree of Master of Philosophy.

Appointment of Examiners

2. A candidate’s thesis shall be examined by examiners appointed by the dean of postgraduate studies. The examination shall consist of a review and assessment of the candidate’s thesis (and where appropriate, other artefacts) by the examiners appointed. A candidate may be required to take an oral examination in addition to submitting a thesis.

3. (a) There shall ordinarily be one external examiner and one internal examiner appointed for each candidate. The examiners will be nominated by the relevant head of school in consultation with the candidate’s main supervisor. Such nominations shall be submitted on the approved form at the same time as the candidate submits an application for approval of thesis title.

(b) The supervisory team will provide candidates with the opportunity to comment on the nominated examiners. If the student believes that there is a concern about the nominated examiners this should be drawn to the attention of the supervisory team and the head of school in writing, as soon as possible. Examiner appointments will however only be reviewed if it is clear that there may be bias or prejudice by an examiner.

4. A member of the supervisory team will not be appointed as an internal examiner. Where the University is unable to appoint an internal examiner a second external examiner will be appointed.
5. A former member of staff of the University shall not normally be appointed as an external examiner until at least five years have elapsed since that person left the employment of the University. A retired member of staff of the University shall not normally be appointed as an external examiner. A retired member of staff of another institution may be appointed as an external examiner only if he or she is still active in the field of research and study concerned.

6. (a) The examiners shall determine whether or not the candidate should be examined orally. A decision not to examine the candidate orally can only be made if the thesis is considered satisfactory (i.e. the examiners may not fail a candidate or recommend that the thesis be resubmitted without holding an oral examination). The normal practice will be that an oral examination is convened unless the external examiner contacts the graduate school to stay the oral examination.

(b) If an oral examination is required, the main supervisor may, at the request of the student, be present during the oral examination but will make no contribution to the examination. However, in all cases, the main supervisor should be available to be consulted by the examiners on the occasion of the oral examination and will have the right to confer with the examiners on request.

(c) The main supervisor will co-ordinate the arrangements for the oral examination. Nature of the Examination

7. The examination shall consist of a review and assessment of the candidate's thesis by the examiners appointed, chaired by the external examiner.

8. Where an oral examination is held, the purpose of such an examination will be to enable the examiners:

(a) to establish that the research has been undertaken by the candidate;
(b) to test the ability of the candidate to defend his or her thesis;
(c) to establish whether the candidate has a satisfactory knowledge of the wider field surrounding the research topic.

9. In examining a candidate’s thesis, the examiners should take into consideration both the extent and merit of the work submitted and the quality of the exposition. With regard to the extent of the work, the examiners should satisfy themselves that the candidate’s work shows evidence of adequate industry and application; with regard to the merit of the work, the candidate is expected to show distinct ability in conducting original investigations and in testing ideas, whether the candidate’s own or others’. The exposition of the work in the thesis must be clear and must show that the candidate understands the relationship of the work embodied in the thesis and the theme of that work to a wider field of knowledge.

10. In the case of any work done jointly, or in wider collaborations, or under direction, it is important that the extent of the candidate’s own contribution is made clear both in any introductory element of the thesis and at relevant points within the thesis.

Recommendations Open to the Examiners

11. Following the first submission and examination of a candidate, the examiners may make the following recommendations:

(a) (i) That the candidate be admitted to the degree of Master of Philosophy;
(ii) That the candidate be admitted to the degree of Master of Philosophy subject to minor corrections of the text made to the satisfaction of the main supervisor, normally within a period of one month of receiving formal notification of the corrections to be made;
(iii) That the candidate be admitted to the degree of Master of Philosophy subject to minor revisions being made to the satisfaction of the internal examiner, normally within a period of six months of receiving formal notification of the revisions to be made.

(b) (i) That the candidate be permitted to revise and re-submit the thesis within twelve months and be re-examined orally;
(ii) That the candidate be permitted to revise and re-submit the thesis within twelve months without a further oral examination;
(c) That the candidate’s thesis be deemed to be of a satisfactory standard, but that the candidate be adjudged to have failed to satisfy the examiners in the oral examination and that the candidate therefore be required to submit within six months either for a second oral examination or for a written examination, as the examiners shall determine;
(d) That no degree be awarded and that the candidate be deemed to have failed.

Minor Revisions or Corrections

12. Recommendation 11(a) may be made subject to a requirement that the candidate correct minor textual errors or make minor revisions to the thesis before the deposit of a copy of the thesis in the University Library in accordance with the Rules for the Submission of Work for Higher Degrees.

13. Where minor textual corrections are required, candidates will be advised by the relevant graduate school office that the corrections must be made within one month of receiving formal notification of the corrections to be made. It shall be the responsibility of the candidate’s main supervisor to certify that the necessary corrections have been made before a pass list can be issued.

14. Where minor revisions to the thesis are required, the candidate shall normally be required to make the revisions within six months of receiving formal notification of the revisions to be made.

15. In exceptional cases, an extension of time for making the corrections may be granted by the appropriate dean of postgraduate studies, subject to the candidate presenting a case justifying such an extension, supported by the candidate’s main supervisor.

16. It shall be the expectation that the thesis will not require referral back to the external examiner and that the candidate will not be expected to undergo a further oral examination. However, if the internal examiner feels that any recommendation other than recommendations 11(a)(i) or (a)(ii), is appropriate following reconsideration of the thesis after the minor revisions have been made, the internal examiner shall refer the thesis to the external examiner. Where a thesis is thus referred to the external examiner, the examiners may determine that a further oral examination is required and may subsequently make any of the recommendations normally open following full revision and resubmission as set out in convention 16.

Recommendations After Resubmission for Re-examination by Internal and External Examiners

17. Where a candidate has been permitted to revise and resubmit a thesis in accordance with convention 11(b) the options open to the examiners when re-examining the
Recommendations Following a Further Oral or Written Examination

18. In the case of a candidate subject to recommendation 11(c) above, the options open to the examiners following the further oral or written examination shall be those set out in conventions 11(a) or (d) only, except that, in the case of convention 11(a), no further revisions to the thesis other than minor textual corrections may be recommended.

Revisions Required

Other than minor textual corrections may be recommended.

In the case of convention 11(a), no further revisions to the thesis shall be required, except that, in the case of convention 11(d) only, the revisions shall be subject to the satisfaction of the additional external examiner. In the event that recommendation (b) (that the candidate be permitted to revise and resubmit the thesis within up to 12 months) is made, the resubmitted thesis shall be examined by the additional external examiner who shall decide whether to conduct a further oral examination.

21. (a) If there is a disagreement between the examiners or doubt about their intentions, they shall be consulted with a view to resolving the matter. Where there is an irreconcilable disagreement between the examiners an additional external examiner shall be appointed.

(b) The additional external examiner shall be asked to read the candidate’s thesis and to conduct an oral examination. The additional examiner shall be told that the previous examiners had failed to reach agreement but will not have sight of their report. On the occasion of this oral examination the candidate’s supervisory team (and where appropriate the internal examiner) shall be available to be consulted by the additional external examiner. The dean of postgraduate studies shall appoint a member of University staff as an independent observer, who will report on the conduct of the oral examination. The main supervisor shall co-ordinate the arrangements for the examination. After the conclusion of the examination, the additional examiner shall make a recommendation which shall be final. He/she shall submit a final report to the relevant graduate school office which will, subject to the approval of the relevant dean of postgraduate studies, be forwarded to the candidate and the candidate’s supervisory team in the normal way.

(c) In the event that recommendation (a) (admission to the degree) is made subject to minor revisions (being made within six months, the revisions shall be subject to the satisfaction of the additional external examiner. In the event that recommendation (b) (that the candidate be permitted to revise and resubmit the thesis within up to 12 months) is made, the resubmitted thesis shall be examined by the additional external examiner who shall decide whether to conduct a further oral examination.

Provision for an Oral Examination to be Conducted Outside the University

23. It is expected that all oral examinations will take place within the University unless specifically requested otherwise. With the approval of the dean of postgraduate studies, an oral examination for a candidate may be held elsewhere than at Newcastle upon Tyne. Both examiners should be present at any oral examination and only in very exceptional circumstances may the dean of postgraduate studies permit other arrangements to be made. A member of the supervisory team or internal adviser is not normally expected to be present unless at the specific request of the student to attend the venue for an examination held outside Newcastle, but is expected to be available to be contacted by the examiners if required, for example by telephone.
Regulations for Staff Candidates for Masters’ Degrees by Research

Introduction
Members of staff whose duties permit may choose to register as students under the student regulations for the degree of Master of Philosophy. Members of staff may however also apply to proceed as staff candidates in accordance with the regulations set out below.
The regulations below are supplementary to the regulations and examination conventions for student candidates for the degree of Master of Philosophy, to which staff candidates should therefore also refer.

Admission as a Staff Candidate for the Degree of Master of Philosophy
1. A member of academic staff of the University may be admitted to the appropriate Master’s degree (by research) in the University if he or she has satisfied the requirements of those regulations. Subject to regulation 6 below, both full-time and part-time members of academic staff may be considered as potentially eligible to undertake a research degree as a staff candidate. The staff fees set out in the annual Fees Schedule will apply in the case of any member of academic staff approved as a staff candidate under these regulations.
2. A member of staff who is a junior research associate shall be treated on the same basis as a student with regard to candidature for a Master’s degree by research.
3. (a) A candidate must, at the time of application, specify the Master’s degree to which he or she wishes to proceed
   (b) A candidate for the degree must be approved by the relevant dean of postgraduate studies.
   (c) A candidate must, unless the relevant dean of postgraduate studies determines otherwise, satisfy the formal admissions requirements specified in the student regulations for the Master’s degree to which he or she wishes to proceed.
   (d) A candidate seeking approval must, after consultation with a supervisory team in the University, submit through the relevant graduate school office to the relevant dean of postgraduate studies:
      (i) an indication of the field of advanced study and research which he or she proposes;
      (ii) evidence of adequate training and ability;
      (iii) the names of the members of the supervisory team in the University with whom he or she has consulted.
4. A candidate for the degree must engage in advanced study and research for a period of not less than six terms in the University under the direction of a supervisory team approved by the relevant dean of postgraduate studies. This period may be reduced only in exceptional cases at the discretion of the dean of postgraduate studies.
5. The period of study shall take effect from the date a candidate is admitted by the dean of postgraduate studies.
6. If the candidate does not at the time of registration hold an appointment which extends to cover the prescribed period of study, the dean of postgraduate studies shall, if the application is acceptable on academic grounds, make the registration of the candidate provisional; in such cases final approval shall normally be subject to the extension of the appointment beyond the initial period.
7. A candidate must inform the relevant dean of postgraduate studies in advance of any period exceeding 12 months to be spent away from the University. The dean of postgraduate studies shall determine, in each case, what amendment, if any, should be made to the prescribed period of study.
8. The relevant dean of postgraduate studies may permit the interruption of the period of study for a period to be specified by the dean of postgraduate studies in each instance.
9. A candidate must submit the thesis for examination within 12 terms of the date from which the period of study takes effect. In exceptional cases an extension of time may be granted by the relevant dean of postgraduate studies.
10. The candidate must embody the results of his or her advanced study and research in a thesis in the appropriate form (see items XIV and XV).
11. (a) A candidate’s thesis shall be examined exclusively by external examiners appointed by the relevant graduate school on the nomination of the relevant dean of postgraduate studies.
   (b) In the case of junior research associates proceeding under staff regulations only one of these examiners need be external.
12. (a) Any candidate may be required by the examiners to present himself for an oral or written examination or both.
   (b) If an oral examination is held, a candidate may, at his or her discretion, ask the dean of postgraduate studies to appoint a member of University staff as an independent observer, who will report on the conduct of the viva.
13. The relevant dean of postgraduate studies shall advise the graduate school on any application from a member of staff approved as a candidate under staff regulations to continue as a candidate for the degree under student regulations after ceasing to be a member of staff.

Type of Candidature, Period of Study and Registration Requirements

7. An applicant may be approved by the postgraduate admissions selectors as a candidate for the degree of Doctor of Philosophy in any of the following categories:

(a) as a candidate whose minimum period of advanced study and research undertaken in the University shall normally be not less than three years of full-time study;

(b) as a candidate whose minimum period of advanced study and research shall be not less than four years, of which not less than one year shall be spent in full-time study in the University, in periods of at least three months duration;

(c) as a candidate whose minimum period of advanced study and research shall be not less than six years of part-time study.

8. Any student who wishes to transfer from one of the categories of candidacy specified in regulation 7 to another such category may do so only with the approval of the appropriate dean of postgraduate studies and subject to the recommendation of the relevant supervisory team and head of school.

9. In the case of a student approved as a candidate under regulation 7(a), the student may in exceptional circumstances apply to the dean of postgraduate studies to register as a part-time candidate for one of the three years of study required, excluding the first year of study. Permission to register part time shall be granted only where the candidate makes a case on academic grounds to register as a part-time student and only where the request is supported by the candidate's supervisory team and head of school.

Note: it should be borne in mind that a full-time candidate who completes a thesis for the degree of Doctor of Philosophy within the normal three-year period allowed under regulation 7(a) will have spent part of that time writing up. The fact that a candidate has reached the stage of writing up a thesis does not therefore constitute grounds for transferring to part-time registration or to full- or part-time (writing-up) registration.

10. In all cases of candidacy approved under regulation 7, approved candidates shall be required to register as appropriate as full-time or part-time students of the University for the duration of the minimum period of candidacy specified (unless permitted to submit early; see regulation 23), and to abide by the requirements of the University's General Regulations. A candidate’s period of study shall be reckoned from the date of first registration as a candidate-elect for the degree of Doctor of Philosophy.

Study Undertaken Outside the University

11. Any candidate may be permitted by a dean of postgraduate studies, on the recommendation of the relevant supervisory team and head of school, to study outside the University, provided that in respect of any period of study not undertaken in the University the dean of postgraduate studies is satisfied before the beginning of that period of study that:

(a) the candidate will have access to adequate facilities and resources;

(b) sufficient time for study and research will be available to the candidate;

(c) appropriate arrangements have been made for the candidate’s supervision during the period of study outside the University, including arrangements for the candidate’s supervisory team to maintain contact and meet with the candidate as often as is necessary;

(d) appropriate arrangements have been made in any case where the candidate is attached to or working at an institution outside the University and is offered local supervision and support by staff at that institution.

Attendance and Progress

12. A student registered as a candidate-elect for the degree of Doctor of Philosophy shall comply with the University’s requirements for progression, as follows:

(a) within 3 months of registering for the research programme, the candidate and the University shall have signed an approved learning agreement to cover the period of candidature;

(b) candidates who are pursuing a course of study without a pre-approved project proposal should, within the guidelines identified by the graduate school up to a maximum of nine months, submit project proposals for approval. Progression on the programme will be dependent upon acceptance of the project proposal by the dean of postgraduate studies;

(c) candidates should attend the University as frequently as and at such intervals as the candidate’s supervisory team shall require, bearing in mind whether the candidate is registered as a full-time or part-time student and allowing for any period of study undertaken outside the University. As a minimum, in accordance with the Code of Practice for Research Degree Programmes approved by Senate, students should have regular contact with their main supervisor at least twelve times a year, approximately once per month, and should have formal contact with their supervisory team at least three times a year, normally once per term;

(d) candidates should maintain a record of their personal development throughout their period of registration;

(e) the school will appoint a progress panel for each candidate. The progress of each candidate will be reviewed annually;

(f) each supervisory team shall submit an annual report concerning the progress of the candidate’s research for review by the appointed progress panel;

(g) candidates should submit reports and evidence of achievement as specified by the school or graduate school on an annual basis. Candidates may also be required to make a project presentation or to attend a viva. This material, along with reports from the supervisory team, will be considered as part of an annual submission to the progress panel for each candidate;

(h) the progress panel will make a report to the dean of postgraduate studies via the graduate school and further progress on the programme of study is subject to approval by the dean. In addition to detailed feedback that the progress panel may wish to provide to the candidate and the supervisory team, the progress panel will make one of the following recommendations to the graduate school:

(i) that the candidate’s performance is satisfactory and that the candidature to study for the Doctor of Philosophy is confirmed;

(ii) that notwithstanding some concerns which the candidate and supervisory team should note, the candidate’s overall performance is satisfactory and
that the candidate should continue or upgrade to study for the Doctor of Philosophy;

(iii) that the candidate’s performance is unsatisfactory and that a further assessment should be held within two months to determine whether progress on the programme will be recommended;

(iv) that the candidate’s performance is unsatisfactory and that a submission for a Master of Philosophy examination is recommended instead of a submission for a Doctor of Philosophy examination;

(v) that the candidate’s performance is unsatisfactory and that no submission for a Master of Philosophy or Doctor of Philosophy examination is recommended, and that the student’s candidature is terminated.

Progress of Candidate-Elect and Confirmation of Registration for the Degree of Doctor of Philosophy

13. In the case of students registered as candidate-elect for the degree of Doctor of Philosophy, their progress shall be reviewed (in accordance with regulation 12) during their first year of study for those candidates studying full-time and in the second year in the case of those candidates studying part-time, with a view to determining whether or not a recommendation should be made to the appropriate dean of postgraduate studies that they should have their status confirmed as studying for the degree of Doctor of Philosophy (see also regulation 4). The review of a candidate’s progress shall be carried out in accordance with the procedures agreed in each graduate school or academic school.

14. A student whose progress is not deemed sufficiently satisfactory to allow confirmation of registration for the degree of Doctor of Philosophy may nonetheless be deemed to have made satisfactory progress as a candidate for the degree of Master of Philosophy. In such a case the candidate shall be permitted to submit a thesis for the degree of Master of Philosophy. Exceptionally, the candidate may be permitted to continue as a candidate-elect for the degree of Doctor of Philosophy for a further period and be reconsidered for confirmation of their candidature for the degree of Doctor of Philosophy at a later date. Such cases should be reconsidered no later than two months after the initial decision in the case of full-time candidates and no later than four months after the initial decision in the case of part-time candidates.

15. A student registered as a candidate-elect for the degree of Doctor of Philosophy whose progress is deemed unsatisfactory at research Master’s degree level shall not be permitted to continue as a registered student or candidate for either degree.

Evidence of Failure to make Satisfactory Progress and Procedures to be Followed

16. A student whose progress is considered unsatisfactory by the supervisory team shall be notified in writing of the reasons for this opinion and shall be given the opportunity of an interview with the supervisory team. Following this notice and any interview, the supervisory team may decide to monitor progress and/or attendance. Additionally or alternatively, the supervisory team may require the submission of written work in addition to that already prescribed by the project proposal and plan. If the student’s progress has not improved within such a period as shall be specified in the written notice, the supervisory team shall notify the dean and submit a report concerning the candidate’s progress for review by the appointed progress panel. The progress panel will make a report to the dean of postgraduate studies via the graduate school (in accordance with regulation 12).

Grounds for Review of Decisions on Unsatisfactory Progress

17. A student may only apply for a review of the decision of a progress panel to the University Concessions Committee on one or more of the following grounds and shall state in writing which grounds are relied upon:

(a) the progress panel were not aware of circumstances affecting the candidate’s performance. (That is: the candidate was adversely affected by illness or other factors of which s/he was previously unaware, or which for a good cause, s/he was unable to disclose to the progress panel);

(b) procedural irregularity on the part of the progress panel;

(c) inadequate assessment by the progress panel;

(d) bias or prejudice on the part of the progress panel.

Interruption of Study

18. A dean of postgraduate studies may permit the interruption of a candidate’s programme of study for a period to be specified by the dean of postgraduate studies.

Teaching Duties

19. Candidates for the degree of Doctor of Philosophy may undertake paid duties in the University during term in any period of full-time study, provided that they consult their main supervisor about the time that may be devoted to such duties and provided that they do not contravene the terms of any studentship that they might hold. Ordinarily, this will mean that teaching duties are additional to the normal commitments of a sponsored full-time student.

Submission

20. The results of a candidate’s advanced study and research must be embodied in a thesis in the approved form in accordance with the Rules for the Submission of Work for Higher Degrees and the Rules for the Form of Theses (see items XIV and XV). The length of a thesis shall be determined, bearing in mind the requirements laid down, or guidance issued, if any, by the candidate’s graduate school. The thesis must be submitted, together with the necessary submission form and other material, to the relevant graduate school office.

21. The exact title of a candidate’s thesis must be submitted on the appropriate form for approval by the dean of postgraduate studies not less than one month before the thesis is submitted.

22. The thesis must be submitted for examination within the period specified below from the date appointed as the beginning of the period of study:

(a) within four years in the case of candidates proceeding under the provisions of regulation 7(a);

(b) within five years in the case of candidates proceeding under the provisions of regulation 7(b);

(c) within seven years in the case of candidates proceeding under the provisions of regulation 7(c).

23. Except with the permission of the appropriate dean of postgraduate studies, a candidate may not submit a thesis earlier than the beginning of the last term of the prescribed period of study. Candidates who submit a thesis at the beginning of the last term of the prescribed period of study or, with appropriate permission, earlier, shall nevertheless still be required to pay tuition fees (full-time or part-time as
appropriate, depending on the type of candidature) for the whole of the prescribed period of study.

**Extensions of Time for Submission**

24. In exceptional cases, an extension of time for submission may be granted by the appropriate dean of postgraduate studies, subject to the candidate presenting a case justifying such an extension, supported by the candidate's supervisory team. Candidates granted extensions of time in accordance with this provision, but who do not register, shall be required to pay such extension fees as the University shall prescribe from time to time.

**Candidates Writing-up a Thesis**

25. Candidates who have completed their research and who require the continued use of University library and computing facilities but who are completing the writing of their thesis and do not need normal supervision may be permitted on the recommendation of their supervisory team in consultation with the appropriate head of school to register as ‘full-time (writing-up)’ or ‘part-time (writing-up)’ candidates. The full-time (writing-up) mode of registration is open only to those who have completed the minimum period of registration specified in regulation 7(a) above.

**Notes**

(i) Candidates who have completed the minimum period of registration specified in regulation 7(b) or 7(c) will not be permitted to register under the full-time (writing-up) mode of registration.

(ii) Since candidates at the writing-up stage will have completed all experimental work and data collection, those who are registered under either of the writing-up categories will not be permitted to work in laboratories or studios or to take part in field trips (unless they have the authority of the appropriate head of school to do so for teaching or demonstrating purposes).

26. Exceptionally, a candidate who is neither required to register nor chooses to register after the completion of the minimum required period of registration specified in regulation 7 is deemed to be on a leave of absence from the University. The reason for the absence shall be noted as writing-up, but it is understood that such a student will not normally be granted access to University facilities or supervisory support. A candidate writing-up on a leave of absence shall nevertheless be required to be reviewed by a progress panel for each academic year until they submit their thesis for examination.

**Examination Conventions applicable to Student Candidates for the Degree of Doctor of Philosophy**

**Scope**

1. These Examination Conventions apply to all students of the University of Newcastle upon Tyne who, having met the requirements of the University's General Regulations and of the Regulations for Student Candidates for the Degree of Doctor of Philosophy, are eligible to submit a thesis for examination for the degree of Doctor of Philosophy. Supplementary examination conventions which apply to staff candidates for the degree of Doctor of Philosophy, can be found at the end of item XII.

**Appointment of Examiners**

2. A candidate's thesis shall be examined by examiners appointed by the dean of postgraduate studies on behalf of Senate. The examination shall consist of a review and assessment of the candidate’s thesis (and where appropriate, other artefacts) by the examiners appointed and of an oral examination on the content of the thesis and subjects related thereto. A candidate may also be encouraged to give a presentation of the work embodied in the thesis in the form of a public lecture or seminar.

3. (a) There shall ordinarily be one external examiner and one internal examiner appointed for each candidate. The examiners will be nominated by the relevant head of school in consultation with the candidate's main supervisor. Such nominations shall be submitted on the approved form at the same time as the candidate submits an application for approval of thesis title.

(b) The supervisory team will provide candidates with the opportunity to comment on the nominated examiners. If the student believes that there is a concern about the nominated examiners this should be drawn to the attention of the supervisory team and the head of school in writing, as soon as possible. Examiner appointments will however only be reviewed if it is clear that there may be bias or prejudice by an examiner.

4. A former member of staff of the University shall not normally be appointed as an external examiner until at least five years have elapsed since that person left the employment of the University. A retired member of staff of the University shall not normally be appointed as an external examiner. A retired member of staff of another institution may be appointed as an external examiner only...
if he or she is still active in the field of research and study concerned.

Examiners’ Preliminary Reports

5. (a) The examiners should independently write a preliminary report indicating their provisional assessment of the thesis and of the issues to be explored in the oral examination. It is expected that, if the criteria for the award of the degree have clearly been met, the preliminary reports will be very brief (a single paragraph). If, on the other hand, the examiners have serious concerns about whether the criteria have been met, fuller reports will be expected. Each examiner’s preliminary report should be sent to the relevant graduate school office. The reports will be forwarded to the relevant dean of postgraduate studies. They must not be shown to the candidate or to the candidate’s supervisory team in advance of the oral examination, but examiners should be aware that preliminary reports will be made available to candidates after the oral examination if they request them under the provisions of the Data Protection Act.

(b) Exceptionally and two weeks or more in advance of a scheduled viva, if the external examiner upon initial independent review of the thesis is unequivocally of the view that the thesis is not worthy of defence without significant re-work by the candidate, s/he shall contact the graduate school. The dean of postgraduate studies shall then determine whether it is appropriate for extraordinary arrangements to be put in place for the examiners to confer before the scheduled meeting. If approved by the dean, the examiners will be permitted to prepare a joint report. The decision reached under these arrangements shall be limited to convention 15(b)(i) only – i.e. permitting resubmission, and the terms of convention 17 must apply. An oral examination will be required after resubmission.

Nature of the Examination

6. The examination shall consist of a review and assessment of the candidate’s thesis by the examiners appointed and of an oral examination on the content of the thesis and subjects related thereto, chaired by the external examiner. The viva shall be conducted in accordance with the guidelines in the University’s Handbook for Examiners of Research Degrees.

7. (a) The purpose of the viva is to enable the examiners:

(i) to establish that the research has been undertaken by the candidate;
(ii) to test the ability of the candidate to defend his or her thesis;
(iii) to establish whether the candidate has a satisfactory knowledge of the wider field surrounding the research topic.

(b) In exceptional circumstances the dean of postgraduate studies may, subject to the agreement of the examiners, exempt a candidate from the oral examination, subject to alternate arrangements being in place to assess the above aspects.

8. In examining a candidate’s thesis, the examiners should take into consideration both the extent and merit of the work submitted and the quality of the exposition. With regard to the extent of the work, the examiners should satisfy themselves that the candidate’s work shows evidence of adequate industry and application; with regard to the merit of the work, the candidate is expected to show distinct ability in conducting original investigations and in testing ideas, whether the candidate’s own or others’. The exposition of the work in the thesis must be clear and must show that the candidate understands the relationship of the work embodied in the thesis and the theme of that work to a wider field of knowledge.

9. The results of the research and study must be satisfactorily presented in the thesis which should include matter worthy of publication. The thesis itself need not however be submitted in a form suitable for publication.

10. In the case of any work done jointly, or in wider collaborations, or under direction, it is important that the extent of the candidate’s own contribution is made clear both in any introductory element of the thesis and at relevant points within the thesis.

Public Presentation

11. In association with the examining process, a candidate may be encouraged to give a presentation of the work embodied in the thesis in the form of a public lecture or seminar. Such a presentation shall not however form part of the formal examination and shall not contribute to the examiners decision on the candidate’s performance.

Role of the Supervisory Team during the Examination

12. (a) A member of the supervisory team will not be appointed as an internal examiner. Where the University is unable to appoint an internal examiner a second external examiner will be appointed. Where two external examiners are appointed, the dean of postgraduate studies will also appoint an independent member of University staff who will chair the viva.

(b) The main supervisor may, at the request of the student, be present during the oral examination but will make no contribution to the examination. However, in all cases, the main supervisor shall be available to be consulted by the examiners on the occasion of the oral examination and shall have the right to confer with the examiners on request.

(c) The main supervisor will co-ordinate the arrangements for the oral examination and inform the graduate school of the details.

Examiners’ Final Reports

13. Having considered all the evidence presented to them, the examiners shall submit on the approved form a joint report on the examination. The report shall include a written statement concerning the candidate’s performance and the manner in which the work submitted has contributed to the advancement of knowledge and understanding, together with a recommendation as to the outcome of the examination. The report should also address directly any concerns raised in the preliminary reports.

14. The joint report must be sent to the relevant graduate school office. The report will be forwarded to the dean of postgraduate studies who shall consider it and decide whether due process has been followed. Exceptionally the dean of postgraduate studies may require further information from the examiners to justify their decision. After consideration of the report by the dean of postgraduate studies, copies of the final report will be sent to the candidate and to the candidate’s supervisory team by the relevant graduate school office (unless there is disagreement between the examiners, see conventions 23 and 24 below). A copy shall also be sent to the head of school, unless otherwise directed by the dean of postgraduate studies.
Recommendations Open to the Examiners

15. Following the first submission and examination of a candidate, the examiners may make the following recommendations:

(a) (i) That the candidate be admitted to the degree of Doctor of Philosophy;

(ii) That the candidate be permitted to revise and re-submit the thesis within twelve months and be re-examined orally;

(iii) That the candidate be admitted to the degree of Doctor of Philosophy subject to minor revisions being made to the satisfaction of the main supervisor, normally within a period of six months of receiving formal notification of the corrections to be made;

(b) (i) That the candidate be permitted to revise and re-submit the thesis within twelve months and be re-examined orally;

(ii) That the candidate be permitted to revise and re-submit the thesis within twelve months without a further oral examination;

(c) That the candidate’s thesis be deemed to be of a satisfactory standard, but that the candidate be adjudged to have failed to satisfy the examiners in the oral examination and that the candidate therefore be required to submit within six months either for a second oral examination or for a written examination, as the examiners shall determine;

(d) (i) That the candidate has reached the standard required for the appropriate Master’s Degree and should be awarded that degree instead;

(ii) That the candidate has reached the standard required for the appropriate Master’s Degree and should be awarded that degree instead subject to minor corrections of the text made to the satisfaction of the main supervisor, normally within a period of one month of receiving formal notification of the corrections to be made;

(iii) That the candidate has reached the standard required for the appropriate Master’s Degree and should be awarded that degree instead subject to minor revisions being made to the satisfaction of the internal examiner, normally within a period of six months of receiving formal notification of the revisions to be made;

(e) That the candidate be permitted to revise and re-submit the thesis for the appropriate Master’s Degree within twelve months and, if the examiners so require, be re-examined orally;

(f) That no degree be awarded and that the candidate be deemed to have failed.

Minor Revisions or Corrections

16. Recommendations 15(a) or (d) may be made subject to a requirement that the candidate correct minor textual errors or make minor revisions to the thesis before the deposit of a copy of the thesis in the University Library in accordance with the Rules for the Submission of Work for Higher Degrees.

Where minor textual corrections are required, candidates will be advised by the relevant graduate school office that the corrections must be made within one month of receiving formal notification of the corrections to be made. It shall be the responsibility of the candidate’s main supervisor to certify that the necessary corrections have been made before a pass list can be issued.

Where minor revisions to the thesis are required, the candidate shall normally be required to make the revisions within six months of receiving formal notification of the revisions to be made.

It shall be the expectation that the thesis will not require referral back to the external examiner and that the candidate will not be expected to undergo a further oral examination. However, if the internal examiner feels that any recommendation other than recommendations 15(a)(i), (a)(ii), (d)(i) or (d)(ii) respectively is appropriate following reconsideration of the thesis after the minor revisions have been made, the internal examiner shall refer the thesis to the external examiner. Where a thesis is thus referred to the external examiner, the examiners may determine that a further oral examination is required and may subsequently make any of the recommendations normally open following full revision and resubmission as set out in convention 19.

Extent of Revisions in the Case of Resubmission for Re-examination by Internal and External Examiners

17. (a) In the case of a candidate subject to recommendations 15(b) or (e) above, the revisions expected of the candidate shall be more substantial than in the case of a recommendation under conventions 15(a) or (d). However, these recommendations shall nonetheless only be made where the examiners are of the view that the thesis is basically acceptable for the degree concerned and/or that it is reasonable to expect the candidate to be able to attempt to revise and resubmit the thesis successfully in the normal time available and without conducting significant further basic research.

(b) If the extraordinary arrangements under convention 5(b) have been applied, the examiners will be required to conduct an oral examination upon resubmission.

18. In exceptional cases, an extension of time for making the corrections may be granted by the appropriate dean of postgraduate studies, subject to the candidate presenting a case justifying such an extension, supported by the candidate’s main supervisor.

Recommendations After Resubmission for Re-examination by Internal and External Examiners

19. Where a candidate has been permitted to revise and resubmit a thesis in accordance with conventions 15(b) or (e), the options open to the examiners when re-examining the thesis shall be those set out in conventions 15(a), (d) or (f) only, except that, in the case of conventions 15(a) and (d), no further revisions to the thesis other than minor textual corrections may be recommended. Where the candidate’s oral performance on the first occasion of examination was satisfactory and the examiners are agreed, after considering the resubmitted thesis, that a further oral examination is not required, they may submit their recommendations without re-examining the candidate orally.
Recommendations Following a Further Oral or Written Examination

20. In the case of a candidate subject to recommendation 15(c) above, the options open to the examiners following the further oral or written examination shall be those set out in conventions 15(a), (d) or (f) only, except that, in the case of conventions 15(a) and (d), no further revisions to the thesis other than minor textual corrections may be recommended.

Provision to the Candidate of Information about Revisions Required

21. In all cases where a candidate is required to make corrections to a thesis or to revise a thesis, it shall be the responsibility of the examiners to provide full details of the corrections and/or revisions required of the thesis. The examiners should also attach a copy of this statement to their final report which shall be forwarded to the candidate and the candidate’s supervisory team by the relevant graduate school office. When forwarding the final report to the candidate, the graduate school office will make it clear to the candidate that resubmission will not guarantee the award of a qualification.

Communication of the Result to the Candidate

22. The results of the examination or re-examination shall be communicated formally to the candidate by the relevant graduate school office. Neither an examiner nor any other person is empowered to communicate the result formally to a candidate before the official notification of the result to the candidate by a graduate school office on behalf of the Academic Registrar. In any case where an examiner chooses to give the candidate an informal indication as to the recommendation that will be put forward, the examiner concerned must stress that the recommendation is subject to ratification and that only the graduate schools (on behalf of the Academic Registrar) are empowered to issue official results.

Disagreement between the Examiners

23. (a) If there is a disagreement between the examiners or doubt about their intentions, they shall be consulted with a view to resolving the matter. Where there is irreconcilable disagreement between the examiners an additional external examiner shall be appointed.

(b) The additional external examiner shall be asked to read the candidate’s thesis and to conduct an oral examination. The additional examiner shall be told that the previous examiners had failed to reach agreement but will not have sight of their report. On the occasion of the second oral examination the candidate’s supervisory team (and where appropriate the internal examiner) shall be available to be consulted by the additional external examiner. The dean of postgraduate studies shall appoint a member of University staff as an independent observer, who will report on the conduct of the viva. The main supervisor shall co-ordinate the arrangements for the oral examination. After the conclusion of the oral examination, the additional examiner shall make a recommendation which shall be final. He/she shall submit a final report to the relevant graduate school office which will, subject to the approval of the relevant dean of postgraduate studies, be forwarded to the candidate and the candidate’s supervisory team in the normal way. In the event that recommendation (a) (admission to the degree) is made subject to minor revisions being made within six months, the revisions shall be subject to the satisfaction of the additional external examiner. In the event that recommendation (b) (that the candidate be permitted to revise and resubmit the thesis within up to 12 months) is made, the resubmitted thesis shall be examined by the additional external examiner who shall decide whether to conduct a further oral examination.

24. A candidate who is subject to the procedure set out in convention 23 shall be informed that the examiners originally appointed have disagreed and that an additional examiner will be appointed. The candidate shall not be informed as to the nature of the disagreement between the original examiners and shall not be given a copy of their final report. If, however, the candidate subsequently appeals against the final decision in respect of the award of the degree, the report of the original examiners will form part of the formal record of appeal. The candidate shall be informed that a second oral examination will be required. After the second oral examination, and once a final decision as to the award of the degree has been made in accordance with convention 23, the final report of the additional examiner shall be made available to the candidate and the candidate’s supervisory team, provided that the additional examiner’s recommendation has been approved.

Provision for an Oral Examination to be conducted Outside the University

25. It is expected that all oral examinations will take place within the University unless specifically requested otherwise. With the approval of the dean of postgraduate studies, the oral examination for a candidate may be held elsewhere than at Newcastle upon Tyne. Both examiners should be present at any oral examination and only in very exceptional circumstances may the dean of postgraduate studies permit other arrangements to be made. A member of the supervisory team or internal adviser is not normally expected to be present unless at the specific request of the student to attend the venue for an examination held outside Newcastle, but is expected to be available to be contacted by the examiners if required, for example by telephone.
Regulations for Student Candidates for the Degree of Doctor of Philosophy (Integrated)

Postgraduate research students are responsible for making themselves familiar with the Guidelines for Research Students approved by Senate from time to time which are available to them each academic year.

Introduction
1. Applicants for the degree of Doctor of Philosophy (Integrated) are required to demonstrate:
   (a) a systematic acquisition and understanding of a substantial body of knowledge which is at the forefront of an academic discipline or area of professional practice;
   (b) the creation and interpretation of new knowledge, through original research or other advanced scholarship, of a quality to satisfy peer review, extend the forefront of the discipline and merit publication;
   (c) the general ability to conceptualize, design, implement and adjust a project for the generation of new knowledge, applications, or understanding at the forefront of the discipline. Where appropriate, also to demonstrate the ability to formulate and test hypotheses and to generate alternative explanations for the data available;
   (d) a detailed understanding of applicable techniques for research and advanced academic enquiry;
   (e) a range of advanced professional and key skills related to their likely employment context including the ability to communicate their ideas and conclusions clearly and effectively to specialist and non-specialist audiences.

2. A doctoral thesis should exhibit substantial evidence of original scholarship and contain material worthy of publication.

3. Applicants who are approved for admission as candidates for the degree of Doctor of Philosophy (Integrated) under these regulations will be required to pay the student fees for the degree as set out in the annual Fees Schedule.

Admission as a Candidate for the Degree of Doctor of Philosophy (Integrated)

4. An applicant may be approved for admission as a candidate for the degree by a minimum of two postgraduate admissions selectors in accordance with the University’s Postgraduate Admissions Policy and faculty / programme criteria approved by respective deans of postgraduate studies, where an applicant:
   (a) is a graduate of this or another approved university or other approved degree awarding body or holds other qualifications approved by the dean of postgraduate studies;
   (b) has completed an approved application form in which is set out:
      (i) an indication of the intended field of advanced study and research,
      (ii) evidence that the applicant’s English Language proficiency meets the published requirements for the programme of research,
      (iii) evidence of the applicant’s suitability to become a candidate in terms of ability and prior training and experience;
   (c) has supplied such references and evidence of prior qualifications and experience as the postgraduate admissions selectors and/or the dean of postgraduate studies may require.

5. In considering an application for admission as a candidate for the degree, the postgraduate admissions selectors must be satisfied not only as to the suitability of the applicant, but also as to the availability to the applicant of appropriate supervision and suitable facilities and resources once the applicant is admitted as a candidate. It is the responsibility of the relevant head of school, directly or through the postgraduate admissions selectors, to ensure that appropriate supervision, suitable facilities and resources will be available to an applicant once admitted as a candidate.

General Preconditions to the Award of the Degree of Doctor of Philosophy (Integrated)

6. Before being awarded the degree of Doctor of Philosophy (Integrated), a student must:
   (a) satisfy the entrance requirements for the degree;
   (b) register for and satisfactorily complete the programme of study. The programme shall comprise 540 credits of which 200 shall be drawn from taught modules and 340 from research, the latter including generic and specific skills training elements as well as the thesis;
   (c) satisfy the examiners in the assessments specified in the relevant programme regulations for the degree of Doctor of Philosophy (Integrated).

Supervision of Candidates

7. (a) A candidate for the degree of Doctor of Philosophy (Integrated) must engage in advanced study and research under the direction of a supervisory team in the University. The main supervisor is appointed by the head of school before a candidate is accepted onto the programme of study.
   (b) To be eligible to supervise candidates for the degree of Doctor of Philosophy (Integrated), a member of staff must hold the degree of Doctor of Philosophy or an equivalent research degree or have equivalent research expertise. The appropriateness of an equivalent research degree or expertise should be determined by the relevant head of school in consultation with the graduate school.
   (c) The head of school will designate a member of the supervisory team to be the main supervisor. The main supervisor will be a member of academic staff of the University of Newcastle and will have primary responsibility for supporting the student throughout the period of study. Any reference to the supervisor in these regulations or in the Guidelines for Research Students or in other documents shall be deemed to be a reference to the supervisory team. However, practically, the main supervisor will normally act on behalf of the supervisory team for matters other than progression.
   (d) In any case where students are studying outside the University at another institution, arrangements may also be made for local supervision and support to be provided to the student by staff at that institution (see...
regulation 11(d)). Such arrangements will supplement the role of the main supervisor detailed in (c) above.

(e) Under exceptional circumstances where only one supervisor is available an additional adviser will be appointed by the head of school, with the approval of the dean of postgraduate studies.

Period of Study and Registration Requirements

8. An applicant may be approved by the postgraduate admissions selectors as a candidate for the degree of Doctor of Philosophy (Integrated) in any of the following categories:

(a) as a candidate whose minimum period of advanced study and research in the University shall normally be not less than four years of full-time study;

(b) where individual programme regulations allow, as a candidate whose minimum period of advanced study and research shall be not less than six years of part-time study.

9. Any student who wishes to transfer from one of the categories of candidature specified in regulation 8 to another such category may do so only with the approval of the appropriate dean of postgraduate studies and subject to the recommendation of the relevant supervisory team and head of school.

Note: it should be borne in mind that a full-time candidate who completes a thesis for the degree of Doctor of Philosophy (Integrated) within the normal four-year period allowed under regulation 8(a) will have spent part of that time writing up. The fact that a candidate has reached the stage of writing up a thesis does not therefore of itself constitute grounds for transferring to part-time registration or to full or part-time (writing-up) registration.

10. In all cases of candidature approved under regulation 8, approved candidates shall be required to register as appropriate as full-time or part-time students of the University for the duration of the minimum period of candidature specified (unless permitted to submit early; see regulation 27), and to abide by the requirements of the University’s General Regulations. A candidate’s period of study shall be reckoned from the date of first registration of the candidate for the degree of Doctor of Philosophy (Integrated).

Study undertaken Outside the University

11. With respect to the research elements of the degree, any candidate may be permitted by a dean of postgraduate studies, on the recommendation of the relevant supervisory team and head of school, to study outside the University, provided that in respect of any period of study not undertaken in the University the dean of postgraduate studies is satisfied before the beginning of that period of study that:

(a) the candidate will have access to adequate facilities and resources;

(b) sufficient time for study and research will be available to the candidate;

(c) appropriate arrangements have been made for the candidate’s supervision during the period of study outside the University, including arrangements for the candidate’s supervisory team to maintain contact with and to meet with the candidate as often as is necessary;

(d) appropriate arrangements have been made in any case where the candidate is attached to or working at an institution outside the University and is offered local supervision and support by staff at that institution.

Attendance and Progress

12. With respect to the taught elements of the degree, a student registered as a candidate for the degree of Doctor of Philosophy (Integrated) shall attend and complete the requirements of, and satisfy the examiners in the prescribed assessments for the taught elements of the programme as set out in the relevant programme regulations for the degree of Doctor of Philosophy (Integrated), including the generic and specific skills training elements.

13. The progress of all students registered as candidates for the degree of Doctor of Philosophy (Integrated) shall be reviewed at the end of the first 12 months by the relevant board of examiners and head of school in order for a decision to be made as to whether or not they have demonstrated the potential to succeed on the full programme. Such a review shall be carried out in accordance with procedures agreed for each programme.

14. In the case of any student whose progress is deemed to be unsatisfactory at any stage, the board of examiners or progress panel may recommend:

(a) that, where the relevant programme regulations for the degree of Doctor of Philosophy (Integrated) allow re-examination in the taught elements of the programme, the student be re-examined in the failed modules in accordance with the programme regulations for the degree of Doctor of Philosophy (Integrated);

(b) that the student be required to produce additional work and/or to undergo further review after an additional period of study and research;

(c) that the candidate be considered for the award of a Master's degree in accordance with regulation 17;

(d) that the student be not permitted to remain a registered student or a candidate either for the degree of Doctor of Philosophy (Integrated) or for a Master's degree and that the student’s candidature be terminated.

15. With respect to the research elements of the degree, that is, in the second and subsequent years of registration for the PhD (Integrated), the school shall appoint a progress panel for each candidate and the supervisory team shall submit an annual report concerning the progress of the candidate. A candidate shall:

(a) within 3 months of beginning the research element of the programme, have signed an approved learning agreement between the candidate and the University to cover the period of research;

(b) where candidates are pursuing a course of study without a pre-approved project proposal, they should, within the guidelines identified by the graduate school, submit project proposals for approval. Progression on the research element of the programme will be dependent upon acceptance of the project proposal by the dean of postgraduate studies;

(c) attend the University as frequently and at such intervals as the candidate's supervisory team shall require, bearing in mind whether the candidate is registered as a full-time or part-time student and allowing for any period of study undertaken outside the University. As a minimum, in accordance with the Code of Practice for Research Degree Programmes approved by Senate, students should have regular contact with their main supervisor at least twelve times a year, approximately once per month, and should have formal contact...
with their supervisory team at least three times a year, normally once per term;

(d) maintain a record of their personal development throughout their period of registration;

(e) complete and submit an annual report;

(f) submit reports and evidence of achievement as specified by the school or graduate school on an annual basis. Candidates may also be required to make a project presentation or to attend a viva. This material, along with reports from the supervisory team, will be considered as part of an annual submission to the progress panel for each candidate;

16. The progress panel will make a report to the dean of postgraduate studies via the graduate school and further progress on the programme of study is subject to approval by the dean. In addition to detailed feedback that the progress panel may wish to provide to the candidate and the supervisory team, the progress panel will make one of the following recommendations to the graduate school:

(a) That the candidate’s performance is satisfactory and that the candidature to study for the Doctor of Philosophy (Integrated) is confirmed;

(b) That notwithstanding some concerns which the candidate and supervisory team should note, the candidate’s overall performance is satisfactory and that the candidate should continue to study for the Doctor of Philosophy (Integrated);

(c) That the candidate’s performance is unsatisfactory and that a further assessment should be held within two months to determine whether progress on the programme will be recommended;

(d) That the candidate’s performance is unsatisfactory and that a submission for a Master of Philosophy examination is recommended instead of a submission for a Doctor of Philosophy examination;

(e) That the candidate’s performance is unsatisfactory and that no submission for a Master’s degree or Doctor of Philosophy examination is recommended, and that the student's candidature is terminated.

Award of a Master's Degree

17. In the case of students who have not demonstrated the potential to succeed on the full programme, or who choose not to continue on the full programme, at the end of 12 months, or where the progress of students is deemed unsatisfactory at subsequent stages, they may be considered for the award of a Master's degree. In order to qualify for the award of a Master's degree, a student must have demonstrated achievement of all the learning outcomes of the degree to be awarded, which may include the submission of a dissertation. The appropriate Master's degree will be named in the programme regulations for the degree of Doctor of Philosophy (Integrated).

18. A Master's degree may be awarded with Merit or Distinction subject to and in accordance with the regulations for the relevant Master's degree.

Evidence of Failure to make Satisfactory Progress and Procedures to be Followed

19. With respect to the research element of the degree, a student whose progress is considered unsatisfactory by the supervisory team shall be notified in writing of the reasons for this opinion and shall be given the opportunity of an interview with the supervisory team. Following this notice and any interview, the supervisory team may decide to monitor progress and/or attendance. Additionally or alternatively, the supervisory team may require the submission of written work in addition to that already prescribed by the project proposal and plan. If the student’s progress has not improved within such a period as shall be specified in the written notice, the supervisory team shall notify the dean and submit a report concerning the candidate’s progress for review by the appointed progress panel. The progress panel will make a report to the dean of postgraduate studies via the graduate school (in accordance with regulation 16).

Grounds for Review of Decisions on Unsatisfactory Progress

20. A student may only apply for a review of the decision of a progress panel to the University Concessions Committee on one or more of the following grounds and shall state in writing which grounds are relied upon:

(a) the progress panel were not aware of circumstances affecting the candidate’s performance. (That is: the candidate was adversely affected by illness or other factors of which s/he was previously unaware, or which for a good cause, s/he was unable to disclose to the progress panel);

(b) procedural irregularity on the part of the progress panel;

(c) inadequate assessment by the progress panel;

(d) bias or prejudice on the part of the progress panel.

Interruption of Study

21. A dean of postgraduate studies may permit the interruption of a candidate's programme of study for a period to be specified by the dean of postgraduate studies.

Teaching Duties

22. Candidates for the degree of Doctor of Philosophy may undertake paid duties in the University during term in any period of full-time study, provided that they consult their main supervisor about the time that may be devoted to such duties and provided that they do not contravene the terms of any studentship that they might hold. Ordinarily, this will mean that teaching duties are additional to the normal commitments of a sponsored full-time student.

Assessment of the Taught Elements

23. The modes of assessment, pass marks and rules relating to reassessment for the taught elements of a degree shall be as set out in the programme regulations for the degree of Doctor of Philosophy (Integrated).

Submission

24. The results of a candidate's advanced study and research must be embodied in a thesis in the approved form in accordance with the Rules for the Submission of Work for Higher Degrees and the Rules for the Form of Theses (see items XIV and XV). The length of a thesis shall be determined, bearing in mind the requirements laid down, or guidance issued, if any, by the candidate’s graduate school. The thesis must be submitted, together with the necessary submission form and other material, to the relevant graduate school office.

25. The exact title of a candidate's thesis must be submitted on the appropriate form for approval by the dean of postgraduate studies not less than one month before the thesis is submitted.

26. The thesis must be submitted for examination within the period specified below from the date appointed as the beginning of the period of study:

(a) within five years in the case of candidates proceeding under the provisions of regulation 8(a);
(b) where programme regulations for the degree of Doctor of Philosophy (Integrated) allow part-time study, those regulations shall state the number of years in which the thesis must be submitted.

27. Except with the permission of the appropriate dean of postgraduate studies, a candidate may not submit a thesis earlier than the beginning of the last term of the prescribed period of study. Candidates who submit a thesis at the beginning of the last term of the prescribed period of study or, with appropriate permission, earlier, shall nevertheless still be required to pay tuition fees (full-time or part-time as appropriate, depending on the type of candidature) for the whole of the prescribed period of study.

Extensions of Time for Submission

28. In exceptional cases, an extension of time for submission may be granted by the appropriate dean of postgraduate studies, subject to the candidate presenting a case justifying such an extension, supported by the candidate’s supervisory team. Candidates granted extensions of time in accordance with this provision, but who do not register, shall be required to pay such extension fees as the University shall prescribe from time to time.

Candidates Writing-up a Thesis

29. Candidates who have completed their research and who require the continued use of University library and computing facilities but who are completing the writing of their thesis and do not need normal supervision may be permitted on the recommendation of their supervisory team in consultation with the appropriate head of school to register as ‘full-time (writing-up)’ or ‘part-time (writing-up)’ candidates. The full-time (writing-up) mode of registration is open only to those who have completed the minimum period of registration specified in regulation 8(a) above.

Notes

(i) Candidates who have completed the minimum period of registration specified in regulation 8(a) or 8(b) will be permitted to register under the full-time (writing-up) mode of registration.

(ii) Since candidates at the writing-up stage will have completed all experimental work and data collection, those who are registered under either of the writing-up categories will not be permitted to work in laboratories or studios or to take part in field trips (unless they have the authority of the appropriate head of school to do so for teaching or demonstrating purposes).

30. Exceptionally, a candidate who is neither required to register nor chooses to register after the completion of the minimum required period of registration specified in regulation 8 is deemed to be on a leave of absence from the University. The reason for the absence shall be noted as writing-up, but it is understood that such a student will not normally be granted access to University facilities or supervisory support. A candidate writing-up on a leave of absence shall nevertheless be required to be reviewed by a progress panel for each academic year until they submit their thesis for examination.

Examination

31. Details of the required arrangements for the examination are provided in the Examination Conventions for Student Candidates for the Degree of Doctor of Philosophy.

Language of Submission

32. A candidate’s thesis must be written in English. In exceptional cases, subject to the candidate presenting a case justifying such a concession, the appropriate dean of postgraduate studies may allow the candidate to submit a thesis written in a modern language other than English. Such a concession shall only be granted where a candidate can demonstrate that the language of submission is integral to the research project, for example where the object of study is an aspect of the literary or linguistic culture of the language of submission and/or a significant proportion of the secondary literature on the object of study is written in the language of submission.

Approval for submission in a language other than English must be sought at the time of application to study for the degree. Where approval is granted, the abstract of the thesis must be written in English and any viva voce examination must be conducted in English.

Notes

(i) Forms of application for admission as a candidate and forms for project proposal approval and to accompany a thesis on submission may be obtained from the relevant graduate school office.

(ii) The University cannot undertake to arrange the examination of a thesis immediately after its submission. Candidates are warned that several weeks may elapse between the submission of a thesis and the completion of the examination, and should consult with their main supervisor well in advance. The normal period between a submission of a thesis and an examination is ten weeks, although circumstances may necessitate a longer time frame.

Regulations for Staff Candidates for the Degree of Doctor of Philosophy

Introduction

Members of staff whose duties permit may choose to register as students under the student regulations for the degree of Doctor of Philosophy. Members of staff may however also apply to proceed as staff candidates in accordance with the regulations set out below.

The regulations below are supplementary to the regulations and examination conventions for student candidates for the degree of Doctor of Philosophy, to which staff candidates should also refer.

Admission as a Staff Candidate for the Degree of Doctor of Philosophy

1. A member of academic staff may be approved for admission as a staff candidate for the degree of Doctor of Philosophy by a dean of postgraduate studies on the recommendation of the relevant head of school. Subject to regulation 3 below, both full-time and part-time members of academic staff may be considered as potentially eligible to undertake a research degree as a staff candidate. Applicants may be approved as staff candidates for the degree by thesis or, except for members of staff who are junior research associates, as staff candidates for the degree on the basis of the submission of published work. The staff fees set out in the annual Fees Schedule will apply in the case of any member of academic staff approved as a staff candidate under these regulations.

2. A member of staff seeking approval as a staff candidate for the degree of Doctor of Philosophy shall be required to complete and submit the approved staff candidature application form in which is set out:

(a) an indication of the field of advanced study and research;

(b) details of the nature of the appointment held by the member of staff and its duration;
3. In the case of a member of staff who wishes to be considered as a staff candidate for the degree of Doctor of Philosophy by thesis who does not at the time of admission as a staff candidate hold an appointment which extends to cover the prescribed period of study, the dean of postgraduate studies shall, if the application is acceptable upon academic grounds, approve the admission of the member of staff as a provisional candidate. In cases where candidature has been approved provisionally, final approval shall normally be subject to the extension of the member of staff’s appointment to cover the prescribed period of study. Where a staff member’s appointment is not extended to cover the prescribed period of study, the candidate may transfer to student regulations or, if the period of study required by the regulations for the appropriate Master’s degree has been completed, the member of staff may apply to submit a thesis for that degree instead.

4. In considering an application for admission as a staff candidate for the degree of Doctor of Philosophy by thesis, the relevant dean of postgraduate studies must be satisfied not only as to the suitability of the applicant, but also as to the availability to the applicant of appropriate supervisory advice and guidance, suitable facilities and resources.

5. A member of staff who wishes to be considered as a staff candidate for the degree of Doctor of Philosophy on the basis of the submission of published work must have held an appointment in the University for a continuous period of at least four years. A member of staff who has held an appointment for a shorter period may exceptionally be approved as a candidate by the Chair of University Teaching and Learning Committee, on the recommendation of the appropriate dean of postgraduate studies and the relevant head of school, provided that the Chair of University Teaching and Learning Committee is satisfied that a case has been made that the study and research carried out during the candidate’s period of appointment has formed the basis of a significant contribution to the published work.

Basis for the Award of the Degree of Doctor of Philosophy to Staff Candidates

6. The basis for the award of the degree of Doctor of Philosophy to staff candidates shall be the same as the basis for the award of the degree to student candidates, except that in the case of staff candidates for the degree on the basis of the submission of published work, the work submitted must satisfy the requirements laid down in regulations 20 to 25.

Appointment of Supervisory Team, Internal Adviser or Internal Assessor

7. In the case of a staff candidate who holds an appointment as a junior research associate, a supervisory team shall be appointed as in the case of a student. In the case of all other staff candidates for the degree of Doctor of Philosophy by thesis, an internal adviser, who shall be a member of the academic staff, shall be appointed by the appropriate dean of postgraduate studies on the recommendation of the relevant head of school to provide support, advice and guidance to the staff candidate. To be eligible to act as an internal adviser, a member of staff must hold the degree of Doctor of Philosophy or an equivalent research degree or have equivalent research expertise. The appropriateness of an equivalent research degree or expertise should be determined by the dean of postgraduate studies in consultation with the head of school.

8. In the case of staff candidates for the degree on the basis of the submission of published work, the dean of postgraduate studies shall appoint, on the recommendation of the relevant head of school, an internal assessor to consider whether a prima facie case for the award of the degree can be established (see regulations 32 to 34).

Prescribed Period of Study for Staff Candidates for the Degree of Doctor of Philosophy by Thesis

9. The prescribed period of study in the University for a staff candidate for the degree of Doctor of Philosophy by thesis shall normally be four years, but this period may be reduced to three years if the dean of postgraduate studies is satisfied that the greater part of the candidate’s time is devoted to supervised research. Exceptionally a further reduction to the prescribed period of study may be approved by the Chair of University Teaching and Learning Committee, on the recommendation of the dean of postgraduate studies and the head of school.

Registration

10. All staff candidates for the award of the degree of Doctor of Philosophy by thesis shall be deemed to be registered as part-time students during their period of candidature.

Transfer from Master’s Degree

11. A member of staff who has been approved as a staff candidate for a Master’s degree by research under the regulations applicable to such candidates may apply to transfer to candidature for the degree of Doctor of Philosophy by thesis, provided the candidate meets the normal requirements for such candidature under these regulations. The candidature of any candidates so transferring shall normally, for all purposes under these regulations, be deemed to have commenced on the date on which the candidature for the Master’s degree originally commenced.

Progress

12. A member of staff who is a junior research associate shall be treated on the same basis as a student with regard to progress as a candidate for the degree of Doctor of Philosophy by thesis. Such candidates may be required to attend and complete the requirements of, and satisfy the examiners in any assessments for, any taught programme deemed to be part of the programme of study for the degree of Doctor of Philosophy in a particular school and/or faculty.

13. All staff candidates for the degree of Doctor of Philosophy by thesis shall be required to complete and submit an annual report.

14. The progress of all staff candidates for the degree of Doctor of Philosophy by thesis shall be reviewed each year by the relevant supervisory team or internal adviser and head of school. Each supervisory team or internal adviser shall submit an annual report concerning the progress of the candidate’s research for review by the appropriate dean of postgraduate studies.

Submission for the Degree of Doctor of Philosophy by Thesis

15. The results of a candidate’s advanced study and research must be embodied in a thesis in the approved form in accordance with the Rules for the Submission of Work for Higher Degrees and the Rules for the Form of Theses (see items XIV and XV). The length of a thesis shall be determined, bearing in mind the requirements laid down, or guidance issued, if any, by the candidate’s faculty. The thesis must be submitted, together with the necessary submission form and other material, to the relevant graduate school office.

16. The thesis must be submitted for examination within seven years of the date from which the period of study takes effect. In exceptional cases an extension of time may be granted by the appropriate dean of postgraduate studies.
17. Except with the permission of the appropriate dean of postgraduate studies, a candidate may not submit a thesis earlier than the beginning of the last term of the prescribed period of study.

Submission for the Degree of Doctor of Philosophy on the Basis of Published Work

18. A staff candidate for the degree of Doctor of Philosophy on the basis of published work shall be required to submit published work in the form prescribed. The published work submitted should overall be seen to be broadly comparable to a PhD thesis in the same discipline, so that it is evidently the result of a trained level of recent research activity normally in a single field of study to which it makes an original contribution.

19. The submission shall consist of a collection of published material including papers, chapters, monographs or books. The publication of papers shall normally have taken place in refereed journals, or other journals held in high standing by academics working in the relevant field. Books, monographs, and chapters in books shall normally have been published by established publishing houses or other recognized publishing media. The publications submitted shall normally relate to work undertaken during a minimum period of three years and a maximum period of six years.

20. Work shall only be regarded as published if at the time of submission copies of the work are generally obtainable through normal sources, such as publishing houses, bookshops and academic libraries. Proofs of papers not yet published but accepted for publication shall be submissible. Similarly, reports or other documents prepared for organizations such as private companies, government departments or charities or for internal University purposes shall not be submissible unless they have been published widely outside the organization for which they were prepared.

21. In addition to submitting the published works, which shall be bound in the approved form in accordance with the Rules for the Submission of Work for Higher Degrees and the Rules for the Form of Theses (see items XIV and XV), the candidate shall submit:
   (a) a list of the published works submitted;
   (b) an accompanying doctoral statement concerning the work submitted and setting out the proposed basis for the award of the degree and placing the work in its wider context;
   (c) the appropriate fee;
   (d) the relevant submission form or forms

22. The number and scope of the works required for a submission, and the nature and length of the accompanying doctoral statement shall be specified in guidelines concerning the submission of published work for the degree of Doctor of Philosophy to be drawn up in each faculty and subject to approval by the University Teaching and Learning Committee.

23. In the case of joint publications included in a candidate's submission, the candidate shall submit an approved form for each such work submitted indicating the percentage share of the work attributable to the candidate. The candidate will be required to obtain, before submission of the form, signatures from each co-author and collaborator certifying the candidate's share of the work concerned.

Examination for the Degree of Doctor of Philosophy by Thesis

24. A candidate's thesis shall be examined by examiners appointed by Senate on the recommendation of the dean of postgraduate studies acting on behalf of the appropriate faculty. The examination shall consist of a review and assessment of the candidate's thesis by the examiners appointed and of an oral examination on the content of the thesis and subjects related thereto. A candidate may also be encouraged to give a presentation of the work embodied in the thesis in the form of a public lecture or seminar. In exceptional circumstances, on sufficient grounds submitted by the examiners, the dean of postgraduate studies may exempt a candidate from the oral examination.

25. For staff candidates who are junior research associates, there shall ordinarily be one external examiner and one internal examiner appointed. The examiners will be nominated by the relevant head of school in consultation with the candidate's supervisory team. Such nominations shall be submitted on the approved form at the same time as the candidate submits an application for approval of thesis title.

26. For staff candidates other than junior research associates, the examination shall be conducted by two external examiners appointed for each candidate. The examiners will be nominated by the relevant head of school in consultation with the candidate's internal adviser. Such nominations shall be submitted on the approved form at the same time as the candidate submits an application for approval of thesis title.

27. The main supervisor of a junior research associate shall not normally be appointed as an internal examiner unless the dean of postgraduate studies concerned is satisfied that no other member of the University is competent to undertake the examination. In such a case an additional external examiner shall be appointed.

28. The main supervisor, if not an examiner, or the internal adviser, as appropriate, shall not be present during the examination. However, the main supervisor, if not an examiner, or internal adviser shall be available to be consulted by the examiners on the occasion of the oral examination and shall have the right to see the examiners on request. The main supervisor or internal adviser will coordinate the arrangements for the oral examination.

29. (a) The recommendations open to the examiners shall be those set out in regulations 15 to 20 of the Examination Conventions for Student Candidates for the Degree of Doctor of Philosophy.
   (b) In the case of staff candidates (other than junior research associates) the role of the internal examiner shall be fulfilled by one of the external examiners, who shall decide between them which of them shall undertake the further review of the thesis on resubmission.

Establishment of a Prima Facie Case for the Award of the Degree of Doctor of Philosophy on the Basis of Published Work

30. A candidate's submission shall be initially referred to an internal assessor appointed by the dean of postgraduate studies on the recommendation of the relevant head of school (see regulation 8). The internal assessor shall consider whether a prima facie case for the award of the degree has been established, bearing in mind the criteria normally applicable to examinations for the degree of Doctor of Philosophy, whether by thesis or on the basis of published work.

Note: the establishment of a prima facie case for the award of the degree does not constitute a formal examination of the submission and does not imply that after consideration of the submission and an oral examination the examiners will recommend the award of the degree.

31. Where the internal assessor is satisfied that a prima facie case has been established, a recommendation shall be made by the assessor on the appropriate form, supported by the relevant head of school, to the dean of postgraduate studies that examiners be appointed.
32. Where the internal assessor is not satisfied that a prima facie case has been established, a recommendation shall be made by the assessor on the appropriate form, supported by the relevant head of school, to the dean of postgraduate studies that the candidate be informed that the submission has not been found satisfactory. In such a case the examination shall not proceed. The internal assessor shall provide a report indicating the areas in which the submission has been found to be unsatisfactory and the information contained in this report shall be communicated to the candidate by the relevant head of school.

Examination for the Degree of Doctor of Philosophy on the Basis of Published Work

33. Where a prima facie case for the award of the degree has been established, the candidate’s submission shall be examined by examiners appointed by Senate on the recommendation of the dean of postgraduate studies acting on behalf of the appropriate faculty. The examination shall consist of a review and assessment of the candidate’s submission by the examiners appointed and of an oral examination on the content of the submission and subjects related thereto. A candidate may also be encouraged to give a presentation of the work embodied in the submission in the form of a public lecture or seminar. In exceptional circumstances, on sufficient grounds submitted by the examiners, the dean of postgraduate studies may exempt a candidate from the oral examination. The examination shall be conducted by two external examiners appointed for each candidate. The examiners will be nominated by the relevant head of school in consultation with the candidate’s internal assessor. Such nominations shall be submitted on the approved form.

34. The internal assessor shall not be present during the oral examination. However, the internal assessor shall be available to be consulted by the examiners on the occasion of the oral examination and shall have the right to confer with the examiners on request. The internal assessor will co-ordinate the arrangements for the oral examination.

35. Following the first submission and examination of a candidate, the examiners may make the following recommendations:

(a) that the candidate be admitted to the degree of Doctor of Philosophy;

(b) that the candidate be permitted to make a resubmission, including a revised doctoral statement, within a period of up to six months as specified by the examiners, and without further oral examination;

(c) that the candidate be permitted to make a resubmission incorporating additional published material and including a revised doctoral statement, within 24 months and, if the examiners so require, be re-examined orally. (On resubmission, the material presented by the candidate must still conform to the requirements of regulation 19 with regard to the period during which the work concerned must have been undertaken);

(d) that the candidate’s submission be deemed to be of a satisfactory standard, but that the candidate be adjudged to have failed to satisfy the examiners in the oral examination and that the candidate shall therefore be required to submit within six months for a second oral examination;

(e) that no degree be awarded and that the candidate be adjudged to have failed.

36. Recommendation 35(a) may be made subject to a requirement that the candidate correct minor textual errors before the deposit of a copy of the submission in the University Library in accordance with the Rules for the Submission of Work for Higher Degrees. In such cases, it shall be the responsibility of the candidate’s internal assessor to certify to the Academic Registrar that the necessary corrections have been made before a pass list can be issued.

37. In the case of a candidate subject to recommendation 35(b) above, the candidate will not normally be expected to undergo a further oral examination. However, if the examiners feel that any recommendation other than recommendation 35(a) is appropriate following consideration of the resubmitted material, they may determine that a further oral examination is required and may subsequently make either of the recommendations normally open following full revision and resubmission as set out in regulation 40.

38. In the case of a candidate subject to recommendation 35(c) above, the revisions and additions expected of the candidate shall be more substantial than in the case of a recommendation under regulation 35(b). However, this recommendation shall nonetheless only be made where the examiners are of the view that the submission is basically acceptable for the degree and/or that it is reasonable to expect the candidate to be able to attempt to revise and add to the submission successfully in the normal time available.

39. In all cases where a candidate is required to make corrections or revisions to a submission or to submit additional published material, it shall be the responsibility of the examiners to provide details of the corrections, revisions or nature and extent of additional material required. These details shall be communicated to the candidate by the candidate’s internal assessor both orally and in writing.

40. Where a candidate has been permitted to revise and resubmit in accordance with regulation 35(c), the options open to the examiners when re-examining the submission shall be those set out in regulations 35(a) or (e) only. Where the candidate’s oral performance on the first occasion of examination was satisfactory and the examiners are agreed, after considering the resubmission, that a further oral examination is not required, they may submit their recommendations without re-examining the candidate orally.

41. In the case of a candidate subject to recommendation 35(d) above, the options open to the examiners following the further oral examination shall be those set out in regulations 35(a) or (e) only.

Notes

(i) Forms of application for admission as a candidate and forms to accompany a thesis on submission are available from the relevant graduate school office.

(ii) The University cannot undertake to arrange the examination of a thesis immediately after its submission. Candidates are warned that several weeks may elapse between the submission of their theses and the completion of the examination, and should consult with their main supervisor or internal adviser well in advance.

(iii) Examination Conventions applicable to Staff Candidates for the Degree of Doctor of Philosophy by Thesis and Examination Conventions applicable to Staff Candidates for the Degree of Doctor of Philosophy on the Basis of Published Work are available from the relevant graduate school office.

Guidelines concerning the Submission of Published Work for the Degree of Doctor of Philosophy

42. Agriculture and Biological Sciences

(a) Submissions should demonstrate the candidate's original contribution to knowledge and should emphasize the quality of their research. The submission should normally comprise at least four original pieces of work
in peer-reviewed journals or other significant publications. For co-authored works, the candidate’s overall contribution should be greater than 80 per cent across all publications. Where the nature of the research is such that the candidate’s contribution to the field has been through a major publication such as a research monograph or book, this can also be considered either singly or in combination with other published material. Without exception, the quality and quantity of the material submitted must be equivalent to that of a PhD thesis awarded under other regulations.

(b) Normally the accompanying doctoral statement would be a minimum of 10,000 words and should include a review of the literature which sets the work in its wider context. The doctoral statement should also demonstrate the linkages between the different pieces of work and include an overall discussion of the results obtained.

43. Faculty of Humanities and Social Sciences

(a) Publications selected for submission by a candidate should demonstrate progressive development or coherence in research activity.

(b) The amount of research activity should be equivalent to that expected from a three year full-time PhD. (c) Candidates would normally be expected to submit at least five articles in refereed journals or the equivalent in books, monographs, works of art, performances and chapters in books or any combination of these types of publication. Papers must have been published either in established, refereed journals, in chapters in edited books or, when appropriate, may be in a professional journal held in high standing by academics and senior practitioners working in the field. The significance of artworks and performances must be demonstrated by the standing of the exhibition venue, the nature of commissioning process or the level of critical appraisal of the work.

(d) Candidates should not include multiple versions of the same paper in their submission.

(e) All items must have been produced within a minimum of three years and a maximum of six years.

(f) Where the publications submitted have been jointly authored, a form will be submitted detailing the contribution of the candidate to each. The number of publications should be increased pro-rata if jointly authored publications are submitted.

(g) The doctoral statement should normally be of about 5000 words in length but can be longer (up to a maximum of 10,000 words) where the publications submitted do not address all key aspects of the research conducted.

(h) The doctoral statement should set out the proposed basis for the award of the degree, placing the work in its wider context, particularly drawing out linkages between the different pieces of work. It should demonstrate the required development or coherence in the work across the period covered by the publications and should incorporate a critical appraisal and discussion of the corpus.

Note: See also Regulations for Staff Candidates for the Degree of Doctor of Philosophy, in particular Regulations

20 to 24. These Guidelines satisfy the requirements of Regulation 23 and were approved by the HASS Graduate School Committee on 23rd June 2004.

44. Engineering

(a) The submission should comprise at least four original articles in peer reviewed journals and should represent a significant contribution to knowledge in the candidate’s field.

(b) The quality of the publications and the impact of the work, rather than the number of publications, will be paramount.

(c) In the case of co-authored publications, evidence of the candidate’s individual contribution will be required.

(d) A critical appraisal of at least 10,000 words will be required incorporating:

(i) a review of the literature, setting the works in a broader context;

(ii) a drawing out of the linkages between the publications;

(iii) a conclusion.

45. Faculty of Medical Sciences

(a) The submission should normally be based on at least four original articles in peer reviewed journals and must be based on work in which the candidate has had a major contribution.

(b) The submission should include an introductory section which reviews the relevant literature in the candidate’s field of research and which puts his/her original observations into a broader scientific context. This should normally be at least 10,000 words in length.

46. Science

(a) It is expected that the number of papers’ equivalents needed for a PhD by published work will be similar to the number of papers that a conventional PhD graduate in the given discipline would usually derive from a thesis. This would normally be the equivalent of around one to three refereed journal publications but, in fields where refereed conference papers or other refereed media enjoy similar status to refereed journals, such publications can be included in the portfolio.

(b) The doctoral statement accompanying the submitted papers should summarize the work, normally include a literature survey and indicate the context of the work to previously published studies (published papers may tend to gloss over this). Similarly, a critical appraisal of what has been achieved, together with ideas for future work, should be supplied. The doctoral statement will typically be equivalent to the introduction, context and conclusion chapters of a canonical thesis (or their equivalent in each discipline), with the rest of the material supplied by the published papers. The doctoral statement will not usually exceed 50 pages.
Regulations for the Degrees of Doctor of Letters; Doctor of Engineering; Doctor of Laws; Doctor of Science in Medicine or in Science or in Engineering or in Agriculture and Biological Sciences

1. Candidates for these degrees must either:
   (a) hold a degree of this University (or a degree of the University of Durham, provided that they matriculated in the Newcastle Division of that University before 1 August 1963); or
   (b) be full-time members of the academic staff who have held teaching and/or research appointments in the University on a continuous full-time basis for at least seven years.

2. The degrees are awarded for work which is of high distinction and constitutes a substantial and original contribution to knowledge or scholarship in the candidate’s subject. The contributions to knowledge or scholarship must either already be published or accepted for publication.

   Note: for the purposes of these regulations, ‘published’ shall mean published in a periodical, book or report which has been available for criticism by relevant experts. Teaching text books and popular books or articles should not be submitted unless they show considerable originality of material or approach. Translations or patents are not acceptable.

3. Those intending to submit work as a candidate for any of these degrees should, in addition to consulting the Rules for the Submission of Work for Higher Degrees, write to the Academic Registrar for particular advice about the form, arrangement and listing of works to be submitted.

4. The University reserves the right to retain the material submitted by candidates for any of these degrees.

5. Work submitted for any of these degrees shall be examined by two examiners who are not members of the staff of the University.

6. Candidates for these degrees are required to pay a fee for submission. There is no further fee at the time of conferment of the degree.

Rules for the Submission of Work for Higher Degrees

1. These rules apply to all material, whether in the form of a thesis, or of published or unpublished work, submitted for the following degrees: DSc, MD, DLitt, DDS, LLD, DEng, PhD, PhD (Integrated), DBA, EdD, MPhil, MRes, LLM.

2. Where a thesis is required by the regulations for the degree it must be submitted in the form described under Rules for the Form of Theses and must include, as a preface, an abstract of the work, not exceeding 300 words, in a form suitable for publication.

3. Two copies of the thesis must be submitted together with five further copies of the abstract referred to above.

4. The submitted copies of the thesis become the absolute property of the University. If a candidate is successful, one copy of the thesis is deposited in the University Library and is thereafter subject to its regulations and rules. The second copy of the thesis is deposited with the school most concerned with it.

5. Candidates submitting a doctoral thesis must, in addition, submit a separate additional copy of the thesis title page and contents page which, along with one copy of the abstract of the thesis, will be deposited in the British Library Document Supply Centre. Each candidate will normally have to sign a British Library access agreement form.

6. Where work other than a thesis is required, two copies shall be submitted.

7. The copyright in all material submitted for a higher degree remains with the candidate.

8. Candidates must submit a higher degree examination entry form which contains:
   (a) a statement showing whether or not any part of the material offered has previously been submitted by the candidate for a degree (or qualification) in this or any other institution, and if joint work is submitted, what part of it is the candidate’s independent contribution;
   (b) a certificate from the supervisor of any candidate required to undertake supervised study that the candidate has satisfactorily completed the required programme;
   (c) a certificate stating that all financial obligations to the University have been fulfilled by the student.

9. Copies of theses or published and unpublished work and accompanying documents for degrees should be sent to the relevant graduate school office.
Rules for the Form of Theses

1. These rules apply to theses submitted for the DDS, MD, DBA, EdD, MRes, MPhil, LLM, PhD or PhD (Integrated) and to unpublished work submitted for the LLD.

2. A candidate is required to submit the thesis in a condition suitable for preservation in the University Library and in conformity with current BSI specifications.

3. When titles of theses quote generic and specific names of living or fossil organisms, these names should obey the appropriate rules of nomenclature, and the higher systematic position of the organisms should be given. When necessary, a shortened version of the title should be printed on the cover of the thesis and the full title should appear on the first appropriate page inside.

4. The texts of theses must be, as far as possible, word processed on A4 paper of good quality. The two volumes to be retained by the University may initially be in either hard-bound or soft-bound form, but the degree will not be awarded until they are bound in a fixed binding of boards with cloth back, or better fixed binding. Each volume must bear the name of the candidate, the title of the thesis, the name of the degree for which the thesis is submitted and the date of submission.

5. Diagrams, maps and similar documents may be submitted in a portfolio of any size and must bear equally the particulars mentioned in (4) above.

Note: a candidate should consult the more detailed information which is available from the Librarian of the University Library and the Academic Registrar's Office as to the proper form of binding for both soft and hard-bound theses.
PART FIVE

Academic Matters

University Guidelines and Policies for Research

Here you will find Guidelines and Best Practice advice for research supervisors and research students. In addition to providing what is hoped to be comprehensive guidance, each section ends with an opportunity for Reviewing Practice for those who feel they may benefit from it.

All the Guidelines featured here are important and you are encouraged to look carefully at them.

Introduction

1. The University of Newcastle upon Tyne is a leading research-intensive university with a distinguished record of advancing knowledge and understanding through the pursuit of research and scholarship. As part of its commitment to research it provides, through its three Graduate Schools, a range of research programmes designed to enable postgraduate students to undertake a research training and to make their own contribution to knowledge and understanding in their subject.

2. The purpose of this Code of Practice is to set out the University’s standards for its research programmes.

The Research Environment

3. The University will only permit doctoral research programmes to be offered where it is confident that students can be trained and supported within an environment which is supportive of research.

4. It defines such an environment at the subject level in terms of:
   - location within a School or research grouping where performance in the 2001 Research Assessment Exercise indicated that the research undertaken was at least of national standing, normally indicated by an overall rating of 4 or above;
   - the availability of supervisors with relevant experience and recent publications in students’ project areas;
   - facilities for research which at least meet those needed for research of a national standard;
   - and acceptable submission rates (70 percent within 4 years for full-time students and 6 years for part-time) and completion rates (80 percent awarded the degree either outright or subject to minor changes or revisions).

5. In the case of Schools or research groupings which for any reason do not meet the normal criterion of a 4 rating, the University may, on the advice of the relevant Graduate School, authorise the offering of doctoral research degrees where there is evidence that research of at least national standing is being undertaken and that the other conditions set out above have been or will be met.

Pre-Entry Information

6. In order to enable students to make an informed choice, the University requires that units offering research degrees provide clear, accurate and comprehensive pre-entry information to potential applicants. This should inform them as fully as possible about research opportunities, training, resources, completion times, expectations and demands upon research students (including financial ones), entry requirements, the admissions process, information about scholarships, and appropriate contacts. Pre-entry information should also give relevant information for potential applicants with disabilities and a contact in the Disability Office.

Entry Standards and Applications

7. The University defines the minimum standard for admission to research programmes as normally an Upper Second Class Honours degree in a relevant subject or a relevant Master’s degree. In the case of the MD, the minimum is an MBBS or equivalent medical degree together with appropriate experience. Exceptions to this are dealt with under the University’s policy for the accreditation of prior learning or experiential learning.

8. In addition, for candidates whose first language is not English, the University requires evidence of acceptable competence in the language to be submitted at the time of application.

9. All applicants are required to submit the names of two referees who can comment knowledgeably upon their suitability for doctoral study in the relevant field.

Selection of Research Students

10. In order to assist the match between student, research project, supervisor(s) and institution the University requires that there should be rigorous selection policies and procedures at the Graduate School or, where appropriate, School or subject levels.

11. The University requires that criteria for selection should be put in writing. They should normally include:
   - evidence of the suitability of the candidate to undertake a doctoral programme, including, where appropriate, proficiency in the English language;
   - evidence of the suitability of the candidate to undertake a research project in the proposed field of study within the allotted time span;
   - evidence of the availability of a supervisory team which is qualified to supervise the candidate in the research project;
   - evidence of the availability of resources to support the candidate’s research project to a successful conclusion;

12. The University requires that selection policies and procedures should be put in writing. These should normally include:
   - a policy of involving at least two experienced and research-active academics in the selection process;
   - who have been trained in admissions;
   - who are fully cognisant with University and statutory policies on equal opportunities;
   - who are aware of the support infrastructure for students with special needs.
   - a policy of, wherever possible, interviewing applicants on a face-to-face basis by academic staff or, where appropriate, local agents for overseas applicants, by video link, or by telephone;
   - a policy of taking up two references and, if one or more of these is not available at the time of offer, making the latter conditional upon the receipt of satisfactory references
   - a statement of selection procedures;
   - target times of 3 weeks for making decisions on domestic applications and 7 weeks for international ones.

Letters of Offer

13. Once it has been decided to accept a candidate, a formal offer has to be made, which can only be done by the Graduate School. The letter of offer should be accompanied by: information on fees and any other charges; the broad research topic and the length of study; the facilities and space to be made available to students; arrangements for their supervision; requirements upon them (including attendance, progress reports, contact, enrolment and registration); expectations in terms of academic and social conduct and performance, and requirements; the availability of research training; and direction to other relevant information, e.g. the institutional...
policy on IPR. Assurance should be sought from the student that he or she has sufficient financial support to complete the degree.

**Induction into the University and the Graduate School**

14 The University requires Graduate Schools to provide students with an appropriate induction programme within three months of registration to enable them to acquire an understanding of the academic and social environment within which they will be working.

15 The induction programme should include:

- an introduction to the University including
  - its history and development
  - its postgraduate portfolio
  - relevant regulations, policies and procedures relating to research degrees.

- induction into matters relating to students’ relationship with the institution including:
  - the University’s expectations of research students;
  - the challenges typically faced by research students;
  - institutional facilities available to students including the learning support infrastructure;
  - institutional provision for student welfare and other support arrangements;
  - complaints and appeals procedures.

- induction into matters relating to students’ relationship with the Graduate School including:
  - nominated contacts for support and advice outside the supervisory team;
  - the specific facilities available to students within the Graduate School including the learning support infrastructure;
  - provision within the Graduate School for student welfare and other support arrangements.

- information about the opportunities to meet other research students and staff and about opportunities to broaden their knowledge through seminars, conferences, forums etc.

16 The University requires that the Graduate Schools monitor attendance at the induction programme.

**Induction into the Programme**

17 The University requires that Graduate Schools make appropriate arrangements for induction into the student’s programme of study. These should actively involve the designated main supervisor and include inducing students into:

- the academic standards of the programme;
- the intended learning outcomes;
- the curriculum including the skills training programme and the research element;
- methods of teaching and learning;
- assessment;
- regulations governing progression;
- subject-related research codes and ethics;
- programme-related health and safety requirements.

**Learning Agreements**

18 The University requires Graduate Schools to ensure that students have received, understood, and accepted the expectations of their research programme. The latter should be set out in a formal Learning Agreement, which should be signed by the student and by the main supervisor on behalf of the University.

**The Development of Relevant Knowledge and Skills**

19 The University requires that Graduate Schools should ensure that research training programmes offer students the opportunity develop a relevant range of knowledge and skills, including skills for employment. It requires that the learning outcomes of such programmes are consistent with the JRC/AHRB skills statement.

20 The University requires that, for individual research students, Graduate Schools should make appropriate arrangements:

- to identify their training needs;
- to identify gaps;
- to provide opportunities for development;
- to record the development of skills in a Research Training Portfolio;
- to ensure that students are introduced to relevant academic networks;
- to advise them on opportunities to attend seminars, and conferences;
- to encourage them to present papers;
- where appropriate, to encourage them to publish;
- to support career development.

21 The University requires that there should be appropriate access to formal research training programmes and to individual advice and support for all students, including those who are part-time, have special needs, or who are remote from the institution.

**Research Students**

22 The University requires that research students should inform their supervisors and the Graduate School administration about any sponsorship they have received for their research projects and obligations in terms of reporting to sponsors on progress.

23 The University requires that research students should attend induction programmes.

24 The University requires that students should signify that they have received, understood, and accepted the expectations of their doctoral programme by signing a formal Learning Agreement with their main supervisor.

25 The University requires that research students should complete the research training programme and any prescribed taught courses, and successfully complete any assessments and/or examinations.

26 The University requires that research students, in conjunction with the supervisory team, agree a personal skills development programme. This should take into account their prior learning and experience, their needs in terms of study skills, the needs of their research project, and employment related skills. It requires that doctoral students actively seeks to acquire relevant skills. This should be reviewed annually with the supervisory team, and the student should maintain an up to date Research Training Portfolio.

27 It requires that research students maintain regular contact with ‘main’ supervisors. The normal minimum requirement is that they should meet with the main supervisor at least once per month, and attend regular
progress meetings with the supervisory team with a minimum frequency of three per year. In cases where the student is not able to meet these requirements because they are studying outside the University, e.g. in another organisation as part of a CASE studentship or undertaking fieldwork, the student is required to agree an equivalent schedule of contacts with the main supervisor, using for example E-mail and video-conferencing. The University requires that research students should record and confirm the outcomes of meetings.

28 Except where a research project has been approved and funded in advance of the allocation of a student, the University requires the student, with support from the supervisory team, to develop a formal research project proposal. This must be submitted to a review panel within the period of time prescribed by the relevant Graduate School.

29 The University requires that research students take responsibility for listening to, understanding, and accepting feedback from the supervisory team and the panel.

30 The University requires that students take responsibility for keeping their research project on track so that it is completed within the normal time-scale.

31 It requires that academic problems with the research project should be promptly brought to the attention of the main supervisor or the supervisory team so that they can provide support. It requires that non-academic problems with a bearing on the progress of the research (e.g. financial, social, domestic, or health problems) should be brought promptly to the attention of the main supervisor or supervisory team.

32 The University requires that, each year, students prepare a written progress report on the research project and submit it to a review panel. In addition, it requires that research students give a presentation on their research to the panel and undergo a viva.

33 It requires that research students contribute to the research environment by attending appropriate internal and external events, and give at least one formal presentation per year on their work. The University requires that these events are recorded in the student’s Research Training Portfolio.

34 The University requires that students be responsible for helping to improve research provision by providing feedback and through representation on relevant committees and decision-making bodies.

35 The University requires that research students abide by this Code of Practice.

Supervisory Arrangements

36 The University requires that supervision should normally be undertaken by a team consisting of a minimum of two members, both whom should be demonstrably research active. Where for any reason this is not possible, one supervisor with relevant skills and knowledge is acceptable provided that an independent adviser is appointed to whom the student can refer general academic and pastoral issues.

37 Within the supervisory team, the University requires that one member should be designated as the ‘main’ supervisor. The main supervisor:

- must be a member of the academic staff of the University;
- must have gained a doctoral degree or have equivalent experience of research;
- be demonstrably research-active;
- should normally have had previous experience of at least one successful supervision, defined as taking the student all the way through to a research degree award.

In cases where the main supervisor does not have such experience, the supervisory team must include another member who is a demonstrably active researcher with experience of at least two successful supervisions.

38 Staff who have not previously supervised research students are required to undertake appropriate initial training and development, while experienced supervisors are strongly encouraged to undertake continuing professional development.

39 The University requires that Graduate Schools maintain an up to date register of staff who are qualified to engage in research supervision.

40 The University requires that there are regular structured interactions between the student and the main supervisor with a minimum of at least 12 per year. In addition, it requires that there should be regular structured interactions with a minimum of at least 3 times per year with the supervisory team to report, discuss, and agree academic and personal progress. In cases where the student is not able to meet these requirements for any reason, the main supervisor is required to agree an equivalent schedule of contacts with the student, using for example E-mail and video-conferencing.

41 The University requires that Graduate Schools should establish a maximum period of absence for any member of the supervisory team, not exceeding three months, following which appropriate alternative arrangements will be made by the Graduate School to ensure continuity of supervision.

42 In order to ensure that individual supervisors are not overloaded, the University requires that Graduate Schools set appropriate limits on the numbers of research students who may be supervised by a main supervisor, subject to a normal maximum of 6. Where Graduate Schools allow main supervisors to take responsibility for more than 6 students, the University requires them to make arrangements to ensure that there will be adequate contact between student and supervisor and that the latter is not overburdened.

43 The University requires that the supervisory performance of individual staff is reviewed annually as part of performance development and review.

44 The University requires that all students have access to confidential advice and support from a nominated contact outside the supervisory team. It requires that Graduate Schools should designate such contacts, which should include the Faculty Postgraduate Tutor and others at School and/or programme level as appropriate, and make this information available to students.

45 It also requires that all supervisors have access to confidential advice and support from a nominated contact, particularly where they have concerns about a student’s ability or application to the programme. It requires that Graduate Schools should designate such a contact, and make this information available to supervisors.

46 The University requires that all research supervisors adhere to this Code of Practice.

The Development and Approval of Research Project Proposals

47 Research project proposals may be developed prior to the recruitment of a student for purposes of obtaining funding or subsequently by the student following enrolment or the successful completion of the taught part of the programme.

48 Where project proposals have already been agreed and funded by the Research Councils or other major research sponsors, the University does not require...
that they are subject to further development or approval.

49 Where the research proposal is developed by the student, the University requires that the supervisory team supports the student in the development of the research project proposal. In particular, the team needs to ensure that the project is achievable within the time-scale of the programme, and to confirm that sufficient resources will be available to support it. The University requires that Graduate Schools should determine appropriate time-scales within which students are required to submit research project proposals, not exceeding 9 months from registration.

50 The University requires that all research project proposals not previously approved by a funding body are approved by a panel appointed by the Graduate School. It requires that the panel should consist of at least 2 independent members of academic staff with relevant skills and knowledge, at least one of whom should be demonstrably research-active and at least one of whom should have experience of successful supervision.

51 The University requires the panel to evaluate research proposals against the criteria:

- that the project has clear aims and objectives;
- that the student has (or can acquire) the knowledge, skills, and aptitudes to successfully complete the project;
- that the proposed supervisory team has, or will be able to acquire, the skills, knowledge and aptitudes necessary to supervise the project to a successful conclusion;
- that the project is suitable for the programme of study and for the award;
- that it can be completed within the time-scale for the programme;
- that sufficient resources will be available to complete the project.
- in cases where the project involves extended absence from the University on fieldwork or work in collaborating organisations, that appropriate arrangements will be made to support and monitor the progress of the student.

In order to evaluate these matters, the panel will need evidence in the forms of:

- a research proposal;
- a research plan;
- a supporting statement by the supervisory team.

52 The panel should consider the evidence and make a written report on the proposals, which should be made available to the student and to the supervisory team. In the event of concerns, the report should indicate the steps necessary to address them. The University requires that Graduate Schools should establish maximum times for the re-submission of proposals, not exceeding 3 months.

53 When the panel is satisfied on the above matters, it then approves the research project and the supervisory arrangements and notifies the Graduate School Office. The University requires the Graduate School Office to maintain a Register of approved research topics and of supervisory arrangements.

Progression and Monitoring

54 The University requires that supervisory teams should formally monitor the progress of students on doctoral programmes through annual reports to the Graduate School Office. Where appropriate, reports on progress should be made to sponsors and copied to the Graduate School Office.

55 But if, at any point during the course of the programme, the supervisory team have concerns about progress, they should inform the student in writing prior to a meeting. At the meeting, the written comments of the team should be discussed with the student, and a plan of action should be agreed along with a review date. If progress continues to be unsatisfactory, the student should be informed in writing of the reasons and of the possible consequences in terms of being unable to progress, suspension, or termination of registration. The letter should be copied to the Graduate School Office.

56 The University requires that the progress of the student should be formally reviewed annually by the same (or equivalent) panel that approved the research project and the supervisory arrangements. Such reviews should involve one or more of a written progress report, a project presentation and viva by the panel, or an open presentation with critical feedback from their peers and staff in the subject area.

57 Panels should consider the evidence, including annual reports by supervisory teams, and determine whether progress indicates that the research project will meet the standards for the award.

58 If this criterion is met, the panel should recommend that, in the case of a student registered initially for a MPhil, he or she should be upgraded to a PhD at the end of the first year, or if a candidate is registered for a PhD in any year, that their registration should be continued.

59 If this criterion is not met, the panel should investigate the circumstances. It should establish the reasons why progress has been insufficient to meet the standards for the award, and indicate what the student and, where appropriate, the supervisory team must do to put the research project back on track. It should set a date for further review within a period prescribed by the Graduate School, and not exceeding two months.

60 Panels should provide a written report to the Graduate School with copies to the research student and the supervisory team. In the event of the panel being unable to make a recommendation to progress, the student and the supervisory team should determine an action plan to ensure that the research project will meet the standards of the award by the date set for further review.

61 The panel should re-convene on the date set and consider whether progress has been such that the research project will meet the standards for the award. Where the evidence has demonstrated this, the panel should recommend upgrading or continuation as appropriate.

62 Where the evidence does not demonstrate that the research project will meet the standards for the award, the panel’s recommendations will depend upon its judgement of the reasons in terms of the potential of the student to achieve the standards and the adequacy and appropriateness of supervisory arrangements.

63 Where it is not satisfied that supervisory arrangements are adequate and appropriate, but considers that the student will be able to achieve the standards of the award, it may recommend the replacement of all or part of the supervisory team. In such cases, the panel should indicate in writing the steps required to ensure that the research project will meet the standards of the award and a date for further review. Its report should be made available to the student and the new supervisory team, who should determine an action plan to put the research project back on track by the date for further review.

64 Where it is satisfied that supervisory arrangements are adequate and appropriate but that the student is unlikely to be able to achieve the standards for the award, it may recommend that the student be registered for a
lower degree where he or she is likely to be able to achieve the standards or, if students cannot meet the standards for those awards, that their registration be terminated.

65 The final decision with respect to any recommendation is taken by the Postgraduate Dean or other relevant body, e.g. the Graduate School Progress Committee.

Examination

66 The regulations of the University require that all research degrees are examined by two examiners, one internal and one external (except in the case of staff candidates where both examiners are external).

67 The University requires that examiners should be demonstrably research-active in relevant fields. Examiners should be independent of the project and otherwise meet the criteria set out in the University’s Handbook for Examiners of Research Degrees. Members of the supervisory team are explicitly excluded from acting as examiners, except as provided for under University Regulation V.31, in which case an additional external examiner is appointed.

68 The University requires that Heads of Schools should be responsible for the nomination of examiners for research degrees. Heads of Schools should consult the supervisory team about possible nominees, and the supervisory team should offer the student the chance to comment.

69 Nominations should be made to the Postgraduate Dean of the Faculty. He or she should check that the examiners meet the requirements set out above and, if so, approve them subject to ratification by Senate.

70 Once nominations have been approved, the Graduate School Office should be notified and send a letter of appointment along with relevant information including institutional assessment criteria for the award and the University’s Handbook for Examiners of Research Degrees. The University offers examiners the opportunity for training.

71 The supervisor should agree in writing the date, time and place with the examiners and candidate and notify the Graduate School Office which then notifies the candidate. Candidates should be asked whether or not they wish to have the main supervisor present in the viva as a non-contributing observer (unless asked to contribute by the chair). If not present, the ‘main’ supervisor should be available for consultation.

72 The University requires the supervisory team to advise the student on preparation for the viva and to offer at least one practice session.

73 The University requires that, prior to the viva, examiners make preliminary written independent reports on the thesis, which should be sent to the Graduate School Office.

74 The University requires that vivas should be chaired by the external examiner and conducted in accordance with the procedures set out in the Handbook for Examiners of Research Degrees.

75 Following the viva, the University requires that examiners write a joint report (except in cases where they disagree when should write separate reports) and make an appropriate recommendation in respect of the award. Where the recommendation is re-submission, the report should include a statement of the work to be done to achieve the award within the period allowed under the University’s regulations.

76 As well as reporting on the thesis and the candidate, examiners should be requested to provide comments on the broader issues of the research training and the environment.

77 The examiners’ report should be sent to the Graduate School Office which sends copies to the student, the supervisory team, the Postgraduate Dean, and the Academic Office.

Feedback Mechanisms

78 The University requires that Graduate Schools establish and operate confidential mechanisms for research students to feed back on the quality of their learning experiences. Such mechanisms should include: a questionnaire administered within 3 months of enrolment and asking about recruitment, admission and induction procedures; questionnaire evaluations of the research skills training programme; an annual surveys (questionnaires and/or focus groups); exit questionnaires and/or interviews about the totality of the learning experience.

79 Graduate Schools should also actively seek feedback from other stakeholders, including supervisory teams, review panels, examiners, funders, collaborative organisations, employers and alumni.

80 Feedback from these should be considered by Graduate Schools and, where appropriate, acted upon.

Complaints

81 The University has established procedures for complaints about a service, member of staff, or another student. A complaint may be made by any student, including a research student. Details of the complaints procedure are set out in the Handbook for Research Supervisors and Students given to all research students and on the University’s Web site (see http://www.ncl.ac.uk/student-support/complaints.htm).

82 The University requires that, before having recourse to the complaints procedure, a student should attempt to resolve a problem with the individual(s) concerned or consult the personal tutor, research supervisor, Head of School, or Postgraduate Tutor for help and advice. Only when these steps have failed or when the student has good cause for not pursuing them should the complaints procedure be invoked.

83 The University requires that the complainant should complete the Student Complaint Form which is available on the above Web site or from the Student Progress Section. The complainant should be named on the form, as the University is unable to act upon anonymous complaints. The completed form should be submitted for the attention of the Head of the Student Progress Section. The University requires that this should normally be done within 12 months of the complaint arising.

84 The University requires that the Head of the Student Progress Section or his or her nominee (hereafter the Complaints Officer) acknowledges receipt within 7 days.

85 The Complaints Officer will invite the complainant to discuss the matter. The complainant has the right, if they so wish, to be accompanied by a friend or advisor. Subject to the express consent of the Complaints Officer, the friend or advisor may contribute to the discussion.

86 The Complaints Officer will determine whether the complaint merits detailed investigation or whether there are other avenues with which he or she could assist the student to explore.

87 The University requires that, if the complaint is to be taken further, the consent of the complainant is required. If the complainant does not consent to further investigation, the University is unable to regard the complaint as valid. In such cases, the Student Progress Section keeps a confidential record of the details on file for 12 months.

88 If it is decided that the complaint merits
investigation, this will be undertaken by the Complaints Officer who will consult the Head of School, Postgraduate Tutor, Senior Tutor, and any other personnel likely to be helpful in resolving the matter.

89 The Complaints Officer will decide whether it is possible to resolve the matter between the parties concerned or whether further action is required.

90 If further action is required, the matter is referred to the Pro-Vice-Chancellor (Teaching and Learning). She or he will make appropriate arrangements for any further investigation or information to be gathered. Where complaints relate either to the Student Progress Office or to the Pro-Vice-Chancellor, the Academic Registrar will make arrangements for senior officers from separate sections to deal with the matter.

91 The University requires that all information which a complainant or other person provides in the investigation of a complaint should be treated as strictly confidential by officers and by the complainant. It recognises that, to investigate a complaint, it may be necessary to divulge information to individuals. It requires that such a course of action should only be undertaken with the consent of the complainant.

92 In the light of the outcome of the investigation, appropriate action will be taken by the Pro-Vice-Chancellor to resolve the matter. This may include the initiation of formal disciplinary action against a member of staff or a student under the University’s disciplinary procedures.

93 The University requires that the investigation be undertaken as quickly as the particular circumstances permit and certainly within 6 weeks from the receipt of the Complaints Form.

94 The University requires that as soon as possible the Complaints Officer notifies the complainant of the outcome and of any consequential action to be taken.

95 Where the complainant is not satisfied about the outcome of a complaint which has been investigated, he or she may appeal in writing to the Academic Registrar. If the latter considers there to be grounds for the appeal, he or she may make arrangements for the reconsideration of the complaint. Any further action is decided by the Academic Registrar, and his or her decision is final and exhausts the University’s internal complaints procedure.

96 If a student still remains dissatisfied, he or she may appeal to the University Visitor, who can review the way in which the case has been handled and the outcome.

97 The University requires that the Head of the Student Progress Section makes an annual report to the University Teaching and Learning Committee of all complaints. The report includes the number of complaints made, the numbers upheld and rejected, the nature of the matters raised and any remedial action recommended and taken, and the gender and ethnic origin of complainants.

Appeals

98 The University has established procedures for appeal against a recommendation by examiners of research degrees. Details of the appeals procedure are set out in the Handbook for Research Supervisors and Students and on the University Web site (see http://www.ncl.ac.uk/student-support/appeals.htm).

99 The University has defined grounds for appeal as being: that the examiners were not aware of circumstances affecting the appellant’s performance; procedural irregularities on the part of the examiners; inadequate assessment by an examiner or examiner; bias or prejudice on the part of an examiner or examiners. It requires that appeals be made on one or more of these grounds.

100 The University requires that appeals should be made on the Academic Appeals Application Form which is available from the Registrar’s Office and is on the University’s Web site. It requires that a completed form and any supporting documentation should be submitted within 14 days of the notification by the Registrar’s Office of the examination results of the appellant and that any further supporting documentation not available at the date of submission should be lodged within 28 days. A late appeal will only be accepted if, on referral to the Chair of the Appeal Panel, he or she is satisfied that there were circumstances which made it reasonable for the appellant not to have applied within the 14 day period.

101 Once an appeal is received, the Head of the Student Progress Section appoints an Appeal Officer. The Registrar or his or her nominee appoints a Chair of the Appeal Panel who is a Provost or Dean (or nominee) from a Faculty other than the one in which the appellant has studied. The Appeal Panel also includes the Appeal Officer, who advises on procedure, case law, and precedents, and the Chair may co-opt further independent members of academic or administrative staff as appropriate.

102 If the Chair of the Appeal Panel determines in consultation with the Appeal Officer that the application is vexatious or frivolous, then the application is rejected and the student informed in writing why the application has been judged an abuse of process.

103 In other cases, the Appeal Officer shall seek comments from appropriate members of staff. Those from whom responses are sought will be provided with the letter of appeal. If the Appeal Officer deems it appropriate that those members of staff should receive any or all of the supporting documentation provided by the appellant, the University requires that the appellant’s permission is sought before documentation is released.

104 Once comments have been sought, the Appeal Panel will investigate the appeal, and seek any further information necessary for it to reach a decision. Where deemed appropriate, the Panel may invite the appellant and any other parties to a hearing, at which any person may be accompanied by a friend or representative. The University requires that the Appeal Officer provides the appellant, as soon as is practicable, with relevant case papers in accordance with the Data Protection Act 1998, together with written advice about the general nature of hearings. The conduct of the hearing is decided by the Chair of the Appeal Panel.

105 The University requires that the Appeal Officer keeps the appellant informed of the progress of the appeal. A progress report (or outcome if decided) will normally be provided within 28 days of receipt of the appeal and subsequent reports provided at intervals of no more than 28 days.

106 The Appeal Panel may decide that there is no justification for referring a case back to the examiners. The University requires that the Appeal Officer should write to the appellant informing him or her that the original decision of the examiners should be allowed to stand and providing an outline of the reasons.

107 Reviews of the decision of an Appeal Panel that there is no justification for referral may only be requested on the ground of procedural irregularities. The University requires that a review application should be made within 28 days of the notification of a decision. The review application should be made directly to the Vice Chancellor, and will be considered by him or her or by a nominated Pro-Vice-Chancellor. The latter may dismiss the application if there is no prima facie case on the specified grounds. If there is a prima facie case he or she may seek any evidence necessary to reach a decision, and decide whether to reject the application or accept it. If the application is dismissed or rejected, this exhausts the University’s appeal procedures, although appellants may make a case to the Visitor. Where the Vice Chancellor or nominated Pro-Vice-Chancellor sees merit in the appeal, he or she can instruct the Appeal Panel to remedy the
Research Training Portfolio (RTP)

Research degrees are highly regarded by employers and academics. The essential purpose of a research programme is a period of training in research and the generation of an original piece of work. During your studies you will develop a range of personal and professional skills. These skills will prove invaluable for the transition onto your next career.

The purpose of the Research Training Portfolio is to provide a record of your personal development at the University of Newcastle. The portfolio is designed to assist you to get the most from your postgraduate experience, helping you to plan and reflect upon your research and how it will relate to future aspirations. It will help you to identify areas of strength and those areas you feel need more attention. By completing your portfolio you will be able to build on the learning and results you achieve, which will provide an ongoing record that can contribute towards your personal growth and career planning. The portfolio is intended to help you understand how your learning can be applied to a wide range of subjects and activities. It will help to improve your research and generic skills and identify opportunities for personal development.

Your portfolio will include relevant information on the following:

- Research Programme
- Personal Development Plan (PDP)

This portfolio is a means of planning/developing and recording both research and generic skills and should be viewed as a serious method for your Continuing Professional Development (CPD). You will be responsible for the generation and maintenance of your portfolio, for which you will be expected to show commitment, planning, action and evaluation/reflection.

1. Why keep a portfolio?

The introduction of personal development portfolios for CPD has shown an overall positive effect and all members of staff and students are now encouraged to maintain one, primarily because it allows individuals to be ‘in charge’ of their own development. The portfolio will also:

- Provide a record of your personal and academic development
- Record the acquisition of skills and self-development, which will be useful for CV preparation
- Help you to understand and learn from ‘life’ experiences and how these can contribute towards your future prospects by providing examples of skill developments
- Allow opportunities for reflection and self-evaluation on your progress and future needs
- Introduce the concept of continuous professional development
- Help you to demonstrate and be aware of that ‘something extra’ which future employers value

2. Research Degree Programme

This aspect of your portfolio will include a research proposal and plan (including a supporting statement from your supervisory team, where necessary). It is also important that you are aware of regulations and formalities regarding your research degree programme. An induction checklist has been included for your guidance (APPENDIX A), please ensure that you discuss these regulations/formalities with your supervisor during your first formal meeting and keep a copy of this record within your portfolio.

2.1 Research Proposal

If your research proposal has already been developed prior to your recruitment and has been agreed and funded by a research sponsor/funding body, then it does not require further development or approval. However, if the proposal is developed by you the researcher (e.g. self-funding individuals, overseas government funding etc) it will need to be approved by a panel appointed by the Graduate School to ensure that the project is achievable within the time-scales and to confirm that sufficient resources are available. If there are any modifications to your proposal, please keep a record of these changes. It is your responsibility to ensure that you have a research proposal agreed either previously by a sponsor/funding body or by the Graduate School.

Keep a copy of your research proposal in your portfolio, with a record of any approved changes.
2.2 Research Plan

A research plan (APPENDIX B) must be completed for your studies and updated on a regular basis as discussed and agreed with your supervisory team. It is your responsibility to ensure that your research project is completed on time. Regular structured contact with your main supervisor (12 or 6 times per year minimum for full-time or part-time individuals, respectively) or supervisory team (3 or 2 times per year minimum for full-time or part-time individuals, respectively) to discuss academic and personal progress will help you to meet your targets. If your research proposal is to be agreed by a panel appointed by the Graduate School an in depth plan will be required that meets the ‘Code of Practice’ for ‘The Development and Approval of Research Project Proposals’ and will need to include a supporting statement from your supervisory team. In addition, progress reports for sponsors should also be copied and sent to the Graduate School Office. Throughout your studies, you will be monitored by your supervisory team, keep a record of formal supervisory meetings by completing the appropriate form (APPENDIX C).

Keep a record of your research plan with progress updates and supervisory meetings in your Portfolio.

2.3 Annual Assessments/Reviews

Each individual will have a formal annual assessment/review by a panel, who will submit a progress report to the Graduate School Office. Timescales for annual assessments will vary depending on your Faculty; but will follow a similar format described later (section 3.3).

Assessments will involve one or more of the following: a written progress report, a project presentation and viva by the panel, or an open presentation with critical feedback. Please consult your Faculty Graduate School Handbook on the requirements for your Annual Assessments. The panel will assess evidence and decide whether suitable progress indicates your research project will meet the standards of the award. If necessary, action may be taken and another review date set.

Keep a record of your research programme assessment presentations, formal meetings and feedback in your Portfolio.

Keeping records about your research programme will help you to continually assess, plan and meet the needs of your research project and research degree requirements. It may also be useful to complete a project specific skill form (APPENDIX D), to help you focus on research project issues, which will assist with project planning and supervisory meetings.

3. Personal Development Plan (PDP)

The Learning and Teaching Support Network defines personal development planning (PDP) as ‘a structured and supported process undertaken by an individual to reflect upon their own learning, performance and/ or achievement and to plan for their personal, educational and career development’.

The PDP will help to highlight areas of strengths and areas for improvement by mapping your current skills against the skills training requirements for research students’ a joint statement by the Research Councils (RCs)/ Arts Higher Research Board (AHRB). This will be achieved by completing the self assessment audit and PDP in APPENDIX E and should be updated at appropriate times during your research. The PDP should be agreed in conjunction with your supervisory team and signed accordingly.

The purpose of the portfolio is to record your skills progress, based upon your PDP, and assessors will want to see evidence of this. Each individual is responsible for their own Research Training Portfolio and should ensure it is up-to-date. The portfolio should include a description of the skills developed and the corresponding skill/ technique within the joint statement of the RCs/ AHRB training requirements. Records can be kept in the form of a diary, learning log, journal or whichever means is most convenient. The professional standard for recording your skills development are set out in APPENDICES F-I and can be used as a guideline if you want to keep a more personalised/ detailed record. The following is a list of ‘essentials’ that must be recorded in the RTP:

- Lab meetings, seminars, conferences attended (including questions asked). N.B. Postgraduate researchers are required to contribute to the research environment by attending appropriate internal and external events (APPENDIX F)
- Training courses attended including faculty training courses (IT, library, safety etc, APPENDIX G)
- Abstracts presented at local, national and international meetings with other relevant information (poster, oral presentation, presenting author etc).
- N.B. You are required to give at least one formal presentation per year on your work (APPENDIX H)
- Publications, including manuscripts in press and abstracts where published (APPENDIX I)
- Work experience and other information relevant to your future career (teaching/ demonstrating, work placements with industry/ business etc, time spent within other academic institutions, APPENDIX J)

In conjunction with the skills above, the University encourages you to: develop relevant academic networks, attend seminars and conferences, present papers, publish papers, support your own career development, and contribute to your research environment by attending appropriate internal and external events.

3.2 Creating a PDP

To create a PDP you will need to assess your skills abilities, following this identify your specific needs/ skills gaps and then decide what form of training can be used to meet these needs. Training can be both formal (courses/ workshops) and informal (supervisor/ research colleagues) and can include aspects of your research i.e. attending seminars, conferences etc. At appropriate stages during your studies, you will be expected to audit your skills and update your PDP. Your RTP should be continually updated with information on seminars attended etc. By setting goals and targets in your PDP it can keep you focussed on developing your skills. Continual reviewing and reflection will help you to determine whether you are effectively meeting these goals. The diagram below represents the CPD process. However it can be used in the RTP process.
1. **Identify goals** – Completing your research degree and meeting the training requirements of the RCs/ AHRB joint statement

2. **Determine the skills required** - Assess your skills according to statements in APPENDIX E and note areas where you need to develop or learn a new skill/ technique

3. **Plan to achieve development goals** - Set targets for your development and seek opportunities to develop your skills (create a PDP)

4. **Record Training** - Build a record of your skills achievement and skills profile

5. **Evaluate and Review** – At each stage of your research determine whether you are making progress towards your goals and re-evaluate your skills

### 3.3 Timescales: When to use your RTP

Your role is to reflect on and evaluate your progress, therefore it will be important that you maintain and keep appropriate records. The PDP should be started at the beginning of your research, building on the information, experience and results you gain within each stage. Each researcher will have their RTP assessed annually by a panel during their research studies, which will normally coincide with your research programme assessments (see below). All individuals will be advised to complete a plan at induction, which you will be able to reflect upon during your first assessment. At assessment you will be required to bring along your research training portfolio, which will be rated on a satisfactory/ unsatisfactory basis.

<table>
<thead>
<tr>
<th>Course Type</th>
<th>Induction Assessment (months)</th>
<th>1st Review/ Assessment (months)</th>
<th>2nd Review/ Assessment (months)</th>
<th>3rd Review/ Assessment (months)</th>
<th>Submission (months)</th>
</tr>
</thead>
<tbody>
<tr>
<td>MPhil (1 yr ft)</td>
<td>0-3</td>
<td>6</td>
<td>12</td>
<td>24</td>
<td>24-36</td>
</tr>
<tr>
<td>MPhil (2 yr pt)</td>
<td>0-3</td>
<td>12</td>
<td>18</td>
<td>24-36</td>
<td></td>
</tr>
<tr>
<td>MPhil/ DDS (2 yr ft)</td>
<td>0-3</td>
<td>9</td>
<td>18</td>
<td>24-36</td>
<td></td>
</tr>
<tr>
<td>MPhil/ DDS (1 yr ft &amp; 2 yr pt)</td>
<td>0-3</td>
<td>9</td>
<td>24</td>
<td>30</td>
<td>36-48</td>
</tr>
<tr>
<td>MPhil/ DDS (4 yr pt)</td>
<td>0-3</td>
<td>12</td>
<td>33</td>
<td>42</td>
<td>48-60</td>
</tr>
<tr>
<td>PhD (3 yr ft)</td>
<td>0-3</td>
<td>9</td>
<td>21</td>
<td>30</td>
<td>36-48</td>
</tr>
<tr>
<td>PhD (1 yr ft &amp; 3 yr pt)</td>
<td>0-3</td>
<td>9</td>
<td>33</td>
<td>45</td>
<td>48-60</td>
</tr>
<tr>
<td>PhD (5 yr pt)</td>
<td>0-3</td>
<td>12</td>
<td>21</td>
<td>45/ 57*</td>
<td>60-72</td>
</tr>
</tbody>
</table>

Please remember the generic/ transferable skills aspect of your portfolio is not a test – it is your assessment of your development. It will be assessed but only on a satisfactory/ unsatisfactory basis.

### 4. Feedback

To assist and improve the provision and quality of your training it is important to provide feedback to your Graduate School. A feedback form can be found on the internet/ Blackboard for your completion. At each formal assessment the panel will also discuss barriers/ recommendations for self-development and training; if necessary this will be documented and returned to the Graduate School.

The following forms are samples of those that you will be asked to complete to make up your own research portfolio. These can be found at the following web page: www.ncl.ac.uk/spo/pgradmin/
Induction Checklist

You should discuss the following key issues with your supervisor at your first formal meeting.

It is your responsibility to ensure that with your supervisor you have/ are:

<table>
<thead>
<tr>
<th>TICK</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reviewed the relevant degree regulations</td>
</tr>
<tr>
<td>Reviewed the guidelines for research students and research supervisors</td>
</tr>
<tr>
<td>Discussed and signed the formal Learning Agreement</td>
</tr>
<tr>
<td>Discussed the overall timetable for your programme and its completion</td>
</tr>
<tr>
<td>Noted constraints other than time (e.g. costs, equipment availability)</td>
</tr>
<tr>
<td>Agreed and are aware of the importance of completing on time</td>
</tr>
<tr>
<td>Considered and noted the requirements for Induction and other formal training</td>
</tr>
<tr>
<td>Reviewed relevant safety procedures and responsibility for compliance</td>
</tr>
<tr>
<td>Aware of other relevant members of staff, particularly assessors</td>
</tr>
<tr>
<td>Discussed the standard of work expected (degree regulations, successful theses)</td>
</tr>
<tr>
<td>Discussed good practice in storage/maintenance of results, research protocols etc</td>
</tr>
<tr>
<td>Been given preliminary guidance about relevant literature and other information sources</td>
</tr>
<tr>
<td>Discussed the importance of publication and authorship of publications</td>
</tr>
<tr>
<td>Aware of issues of plagiarism and fabrication of results</td>
</tr>
<tr>
<td>Reviewed participation in meetings of learned societies and details of conferences</td>
</tr>
<tr>
<td>Reviewed faculty assessment procedures</td>
</tr>
<tr>
<td>Agreed a programme of regular supervisory meetings</td>
</tr>
<tr>
<td>Aware of the need to maintain your Research Training Portfolio</td>
</tr>
<tr>
<td>Aware of the monitoring and evaluation processes if progress of your research degree is unsatisfactory or does not meet the required standard for the award</td>
</tr>
</tbody>
</table>

It is important that you are aware of and have discussed the following items:

1. The University’s general guidelines which explain the student/supervisor relationship and the respective responsibilities of both individuals.
2. The periodical assessments of progress (APPENDIX B).
3. The system for recording meetings with your supervisor(s) (APPENDIX C).
4. The Research Training Portfolio for planning and recording activities/achievements whilst a postgraduate researcher at the University of Newcastle.

Research Training Portfolio

Research Plan

The purpose of this section is to help you develop clear research objectives in project planning/implementation and in organising your time effectively. This form should be updated regularly.

<table>
<thead>
<tr>
<th>Date:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Supervisory Team:</td>

<td>Date:</td>
</tr>
</tbody>
</table>

Appendix D: Self-Reflection of Project Specific Skills

All research programmes differ from one another and you may need to develop skills particular to your area of research. Understanding the aims of your research and identifying the specific techniques you need to apply are fundamental to the success of your research degree. Re-visit your responses to this section at various stages throughout your research and assess your ability in each specific technique you use.

Date:

<table>
<thead>
<tr>
<th>What are you setting out to do?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Why are you attempting to do this?</td>
</tr>
<tr>
<td>Are you aware of previous research in this area?</td>
</tr>
<tr>
<td>What contribution will your research make to the academic community?</td>
</tr>
<tr>
<td>What techniques are you applying to your research? And at what level are you? Novice, competent, expert? (include techniques you want to develop)</td>
</tr>
<tr>
<td>How do you know the techniques are the most appropriate?</td>
</tr>
</tbody>
</table>
The Research Councils (RCs) and the Arts and Humanities Research Board (AHRB) play an important role in setting standards and identifying best practice in research training. The following self-assessment sets out a joint statement of the skills that individuals would be expected to develop during their research training. These skills may be present on commencement, explicitly taught, or developed during the course of the research. It is expected that different mechanisms will be used to support learning as appropriate, including self-direction, supervisor support and mentoring, departmental/school support, workshops, conferences, elective training courses, formally assessed courses and informal opportunities.

All skills described are appropriate to postgraduate research and therefore a level of awareness (see below) should be achieved for all the skills described. How each skill is developed and to what level will be up to the individual, however it is important that evidence of continual improvement is presented at assessment.

How to use the self-assessment skills audit and PDP

The self-assessment form is divided into 3 sections; the first section describes the skills/techniques that you are expected to obtain, the second section is for self-assessment of your skills (see skill levels below) and the third section is your personal development plan (PDP).

Mark each statement according to your skill level (it is suggested that you enter the date of assessment). Following self-assessment of your skills/techniques, decide which ones you would like to develop and describe how you intend on achieving this, the third section will be the basis of your PDP. Consult with your supervisor(s), who will be able to advise you of appropriate training, if you are unsure. Following agreement of your PDP with your supervisor(s) please sign the form at the end of the self-assessment skills audit.

At appropriate stages of your research perform the self-assessment, and update the original form accordingly. You will soon start to see evidence of progress when your skill levels increase.

Skill Level:

0  Unaware. At this stage you think that a skill/ technique might be of use to you but you don't know anything about it.
1.  Aware. At this point you are learning about the skill/technique, perhaps by going on a training course, reading a book on it or informally from your supervisor or research colleagues.
2.  Informed. Now you are ready to look for suitable opportunities, where appropriate, to put this into practice, but it will take conscious effort to use the new skill/technique.
3.  Capable. You are now using the new skill/technique routinely, and are consciously aiming to improve by other methods.
4.  Recognised. The people around you recognise the change in skill level and you are now so practised that the skill has moved from your conscious level to the subconscious.

<table>
<thead>
<tr>
<th>Research skills and techniques</th>

</tbody>
</table>

Please describe how you intend to develop/are developing these skills.

1. I have a willingness and ability to learn and acquire knowledge.
2. I am creative, innovative and original in my approach to research.
3. I am flexible and open-minded.
4. I am self-aware and able to identify my own training needs.
5. I am self-disciplined, motivated, and thorough.
6. I recognise boundaries and draw upon/use sources of support as appropriate.
7. I show initiative, work independently and am self-reliant.

Skill Level: 0 – Unaware, 1 - Aware, 2 – Informed, 3 - Capable, 4 - Recognised.

---

### (E) Communication skills:

<table>
<thead>
<tr>
<th>Skill Level</th>
<th>PDP</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 1 2 3 4</td>
<td></td>
</tr>
</tbody>
</table>

Please describe how you intend to develop/are developing these skills.

1. I can write clearly and in a style appropriate to purpose (e.g. progress reports, published documents, thesis).
2. I can construct coherent arguments and articulate ideas clearly to a range of audiences, formally and informally through a variety of techniques.
3. I can constructively defend research outcomes at seminars and viva examination.
4. I contribute to promoting the public understanding of my research field.
5. I effectively support the learning of others when involved in teaching, mentoring or demonstrating activities.

Skill Level: 0 – Unaware, 1 - Aware, 2 – Informed, 3 - Capable, 4 - Recognised.
### Networking and teamwork:

<table>
<thead>
<tr>
<th>Skill Level</th>

Meetings attended

You should record details of any research meetings, workshops, seminars and conferences (national or international) that you have attended (include whether you offered contribution e.g. asking questions). It may also be useful to record what was gained by attending the meeting. For presentations see APPENDIX H.

<table>

Training courses attended

You should keep an accurate record of training courses and workshops that you attend throughout your research programme. This information can be very useful in producing references and will provide you with a formal record of the 'added value' and 'transferable skills' elements of your training. Where appropriate have your attendance confirmed by the course provider.

<table>

</table>
## Presentations

You should record all informal and formal presentations; this can be at a research group, school, faculty, national and/or international level. Include information on how the research was presented (oral/poster etc.). For formal presentations you should identify whether you were invited to present and if your abstract was peer reviewed etc. It may be useful to record feedback and questions asked about your presentation.

## Publications

You are strongly advised to develop your research programme with a view to producing good quality publications. You should include with this record copies of abstracts, published works and manuscripts in press.

## Other relevant information

Include here any other information you feel is not covered elsewhere in this record such as work placements with industry/business, time spent in other academic institutions, demonstrating, teaching duties etc.
Guidelines for Research Students

1. These Guidelines describe the essential elements of student/supervisor, student/University relationships and detail the minimum requirements that a student will be expected to comply with during his/her programme of work.

2. At the commencement of your proposed programme of work you must have a detailed discussion with your supervisor. You need to have received, understood, and accepted the expectations of your research programme. Following this discussion a formal Learning Agreement should be signed by the student and by the main supervisor. This Learning Agreement will be copied, one copy of which should be retained in your Research Training Portfolio (RTP) and one copy sent to your Graduate School to be placed in your student file. You should ensure that the meeting takes place and that following points are covered in the discussion:

(a) the scope of your proposed programme of work and an initial definition of the subject of study with particular emphasis on:

(i) the importance of completing the programme in the time available;
(ii) the standard of work that will be expected from you (you would be well advised to read successful theses available in the Library as a guide to what is expected);
(iii) this should form the basis of your project proposal which will need to be approved before your Candidature is confirmed

(b) the overall timetable for the planning and completion of your programme of work, including any period of preliminary reading and the writing of the thesis. This should be recorded in the Personal Development Plan (PDP) within the Research Training Portfolio (RTP);
(c) any programme of training and guidance in research methods, again listed in the RTP;
(d) guidance about the use of literature, other sources of information, including other members of staff, and about attendance at appropriate courses and meetings of learned societies;
(e) good practice in relation to the storage and retention of research data;
(f) constraints, other than time, which may affect your programme of work, such as costs and the need to design and build equipment;
(g) a programme of regular meetings with your supervisor to monitor your progress and to review the details of the overall timetable for the programme of work;
(h) the submission of written work and/or the presentation of seminar papers while your research is in progress and the possibility of presenting work at meetings of learned societies and/or of submitting it for publication directly.

(i) If your studentship has any formal sponsorship you must discuss with your supervisor the terms and conditions relating to such sponsorship, and ensure that you understand them.

3. You will be expected to maintain regular contact with your supervisor, to seek his/her advice on the planning of your work and other matters including the use of suitable techniques. You will also be required to present written work as appropriate. It will also be your responsibility to raise any problems and difficulties you think should be drawn to the attention of your supervisor. This includes any factors – domestic, social, financial or health factors – which you believe may have an effect upon your progress.

4. If you are following a research programme which will take more than one year to complete (e.g. full-time PhD, any part-time research degree), you will during your first year of study be required by your supervisor to produce at least one substantial piece of work (e.g. literature review, experimental write-up), in order to help assess your ability to proceed successfully through the subsequent years of your programme. You may be required to make a presentation of this work to other staff and/or students.

5. Approximately once a month you will have a formal meeting with your supervisor to review progress at which the details of your discussions need recording within the RTP. From time to time your supervisor may involve other members of the supervisory team in a formal meeting.

6. Students who are pursuing a course of study without a previously approved project should, within the guidelines identified by the Graduate School submit a project proposal for approval. Progression on the programme will be dependent upon acceptance of the project proposal by the dean of postgraduate studies.

7. Candidates for the degree of Doctor of Philosophy will normally be approved conditionally. Conditional approval shall be subject to you being admitted initially as a candidate-elect. Doctoral candidate status will be confirmed provided satisfactory progress is made (usually within 12 months, see University Regulations) and the relevant school progress panel so recommend.

8. Each year your supervisor will be required to submit an annual report on the progress of your work. This report, which will take into account the review procedures detailed by your school;

9. Each year you will also be required to submit an annual report on your progress and evidence of achievement as specified by the school or Graduate School. You will be provided with a standard form for this purpose.

10. The Report Form you submit will be forwarded to a school panel which will consider the evidence, including the annual report from your supervisory team, and determine whether progress indicates that the research project will meet the standards for the award. The Progress Panel will make a report to the dean of postgraduate studies via the Graduate School, and further progress on the programme of study is subject to approval by the Dean. In addition to detailed feedback that the Progress Panel may wish to provide to you and the supervisory team, the Progress Panel will make one of the following recommendations to the Graduate School:

1. That the candidate’s performance is satisfactory and that the candidate to study for the Doctor of Philosophy is confirmed.

2. That notwithstanding some concerns which the candidate and supervisory team should note, the candidate’s overall performance is satisfactory and that the candidate should continue or upgrade to study for the Doctor of Philosophy.

3. That the candidate’s performance is unsatisfactory and that a further assessment should be held within two months to determine whether progress on the programme will be recommended.

4. That the candidate’s performance is unsatisfactory and that a submission for a Master of Philosophy examination is recommended instead of a submission for a Doctor of Philosophy examination.

5. That the candidate’s performance is unsatisfactory and that no submission for a Master of Philosophy or Doctor of Philosophy examination is recommended, and that the student’s candidature be terminated.

11. If at any stage throughout the period of study you feel that the standard of supervision that you are receiving is inadequate or that you are unable to establish an effective working relationship with your supervisor, and it has not proved possible to resolve these difficulties in discussion with your supervisor/head of school, you should inform the relevant Graduate School Administrator or the Head of the Student Progress Section, without delay. The annual report form will also offer an opportunity for you to raise such issues, in which...
case that section need not be countersigned by your supervisor and head of school.

12. You are required to maintain high standards of academic conduct and, in particular, to avoid conduct amounting to the fabrication of research results or plagiarism. (See the Standard of Academic Conduct and the Code of Good Practice in Research, later in this part of the Handbook.)

(a) The fabrication of research results includes: claims, which cannot reasonably be justified, to have obtained specific or general results; false claims in relation to experiments, interviews, procedures or any other research activity; and the omission of statements in relation to data, results, experiments, interviews or procedures, where such omission cannot reasonably be justified.

(b) Plagiarism is the unacknowledged use of another person’s ideas, words or work. At one extreme, plagiarism is simply a form of cheating, such as where the whole or a significant part of work submitted towards an examination or degree is the unacknowledged work of another, copied slavishly from a book, research paper or electronic sources such as the internet. At the other extreme, plagiarism may occur accidentally, through poor standards of scholarship, or may concern insignificant parts of submitted work.

(c) You may be unclear as to what use may be made of the work of others in the field without raising concerns about plagiarism. If you are in doubt on this matter, you should consult your supervisor. In most cases, the adoption of appropriate standards of scholarship will avoid such concerns. The following general guidelines may assist you:

(i) passages copied verbatim from the work of another must be enclosed in quotation marks. A full reference to the original source must be provided. The substitution of a few words in an otherwise verbatim passage will not obviate the need to use quotation marks and to provide a full reference;

(ii) you must always give due acknowledgment to the sources of ideas or data which are not yours and are not truly in the public domain (for example, because they are novel or controversial) or are not widely accepted or widely recognized;

(iii) ideas and data which are your own or are truly in the public domain may be included without attribution, but should be expressed in your own words;

(iv) you must take care to distinguish between your own ideas or work and those of others. Any ambiguity in such a distinction could give rise to a suspicion of plagiarism;

(v) where your work is the result of collaborative research, you must take care to acknowledge the source of data, analysis or procedures which are not your own.

13. The retention of accurate and contemporaneous records of primary experimental data and results is of the utmost importance for the progress of academic enquiry. You should maintain these records in a form that will provide clear and unambiguous answers to questions concerning the validity of the data or the conduct of your work that might arise at a later date. Such questions can arise during the course of subsequent investigations by you, your colleagues, and others; accurate contemporaneous records are invaluable when this happens. In addition, errors detected following publication of experimental or other research results could be mistaken for misconduct if you cannot provide an accurate record of the primary data. It is important that you and your work should be protected from such misunderstanding.

The following guidelines will assist you in this regard.

(a) Records of primary experimental data and results should always be made using indelible materials. Pencils or other easily erasable materials must not be used. Where primary research data and results are recorded on audio or video tape (e.g. interviews) the tape housing should be labelled as set out in (d) below.

(b) Complete and accurate records of experimental data and results should be made on the day they are obtained and the date should be indicated clearly in the record. When possible, records should be made in a hard-backed, bound notebook in which the pages have been numbered consecutively.

(c) Pages should never be removed from notebooks containing records of research data. If any alterations are made to records at a later date they should be noted clearly as such and the date of the alteration should be indicated.

(d) Machine printouts, photographs, tapes and other such records should always be labelled with the date and with an identifying reference number. This reference number should be clearly recorded in the notebook referred to above, along with other relevant details, on the day the record is obtained. If possible, printouts, photographs, tapes and other such record should be affixed to the notebook. When this is not possible (e.g. for reasons of size or bulk), such records should be maintained in a secure location in the University for future reference. When a ‘hard copy’ of computer-generated primary data is not practicable, the data should be maintained in two separate locations within the University, on disk, tape or other format.

(e) When photographs and other such records have been affixed to the notebook, their removal at a later date for the purpose of preparing copies or figures for a thesis or other publication should be avoided. If likely to be needed, two copies of such records should be made on the day the record is generated. If this is not practicable, then the reason for removing the original copy and the date on which this is done should be recorded in the notebook, together with a replacement copy or the original if this can be re-affixed to the notebook.

(f) Custody of all original records of primary research data must be retained by the principal investigator, who will normally be the supervisor of the research group, laboratory or other forum in which the research is conducted. An investigator may make copies of the primary records for his or her own use, but the original records should not be removed from the custody of the principal investigator. The principal investigator is responsible for the preservation of these records for as long as there is any reasonable need to refer to them, and in any event for a minimum period of 10 years.

14. Your supervisor will advise you on the manuscript of your thesis in general and on content, presentation and organization. However, he/she will not act as proof reader. While he/she may read all or part of the first draft of the manuscript and offer advice, thereafter it is your responsibility to revise the manuscript and to decide when to submit the thesis.
Guidelines for Supervisors of Research Students

1. These Guidelines provide the broad framework of acceptable practice within which there are bound to be variations and diversity appropriate to different disciplines. Individual faculty documents may contain more detailed guidance but must be consistent with these Guidelines approved by Senate.

2. It is the responsibility of each head of school or nominee in consultation with the proposed supervisor to decide whether to recommend the admission of an applicant to undertake postgraduate research in his or her school. In reaching this decision the head of school should consider:

(a) whether the candidate is appropriately qualified for the proposed subject of study and whether adequate academic references have been received;

(b) whether the appropriate resources (e.g. library, computing, laboratory facilities, technical assistance) will be available;

(c) whether, on the information available, the subject of study is suitable for the degree for which the candidate is to be registered;

(d) whether it can reasonably be expected that the subject of study will be completed within the timescale prescribed;

(e) whether proper supervision can be provided and maintained throughout the research period;

(f) whether an appropriate programme of training and guidance in research methods can be offered to the candidate.

3. At the commencement of the proposed research programme the supervisor must have a detailed discussion with the student. The students need to have received, understood, and accepted the expectations of the research programme. Following this discussion a formal Learning Agreement should be signed by the student and by the supervisors. This Learning Agreement will be copied, one copy of which should be retained in the student’s Research Training Portfolio (RTP) and one copy should be sent to the Graduate School. The details of this discussion should be recorded by the supervisor and a copy given to the student. It should normally cover:

(a) the scope of the proposed programme of work and an initial definition of the subject of study with particular emphasis on:

(i) the importance of completing the programme in the time available;

(ii) the standard of work expected (students should be referred to successful theses in the Library as a guide as to what is expected of them);

(iii) this should form the basis of the project proposal which will need to be approved before the student’s Candidature is confirmed

(b) the overall timetable for the planning and completion of the programme of work including any programme of training and guidance in research methods, any period of preliminary reading, and the writing of the thesis. This should be recorded in the student’s Personal Development Plan (PDP) within the Research Training Portfolio (RTP);

(c) guidance about the use of literature, other sources of information, including other members of staff, and about attendance at appropriate courses and meetings of learned societies. In particular, the student’s attention should be drawn to the statement in paragraph 12 of the Guidelines for Research Students concerning standards of academic conduct. Appropriate guidance should be given to enable the student to avoid any possible concern about plagiarism or the fabrication of research results;

(d) good practice in relation to the storage and retention of research data;

(e) constraints, other than time, which may affect the programme of work, such as costs and the need to design and build equipment;

(f) a programme of regular meetings between the supervisor and the student to monitor progress on the research and if appropriate to review the details of the overall timetable for the programme of work;

(g) the submission of written work and/or the presentation of seminar papers while the research is in progress and the possibility of presenting work at learned societies and/or submitting it for publication directly.

4. The supervisor should maintain regular contact with the student and should give advice on the planning of work and on other matters, including the use of suitable techniques. He/she should request written work as appropriate and make constructive comments on it. If the student is following a research programme which will take more than one year to complete (e.g. full-time PhD, any part-time research degree), the supervisor shall during the first year of study require the student to produce at least one substantial piece of work (e.g. literature review, experimental write-up), in order to help assess his/her ability to proceed successfully through the subsequent years of his/her research programme. The student may be required to make a presentation of this work to other staff and/or students.

5. A record of the student’s progress should be kept in the Research Training Portfolio (RTP) and approximately once a month formal meetings with the student should be held to review progress. In addition there should normally be three meetings during the year with the full supervisory team. The details of the meeting must be recorded in the RTP.

6. Students who are pursing a course of study without a previously approved project are required to submit a project proposal for approval by a school panel. Progression on the programme will be dependent upon acceptance of the project proposal by the dean of postgraduate studies.

7. Students registered for the degree of Doctor of Philosophy will normally be admitted conditionally. Conditional approval will be subject to the candidate being admitted initially as a candidate-elect. Doctoral candidature status will be confirmed provided satisfactory progress is made (see University Regulations) and the relevant progress panel so recommend, and that decision is confirmed by the dean of postgraduate studies.

8. Each year the supervisor must submit an annual report on the progress of the student’s programme of work to the school progress panel. This report should take into account the review procedures detailed in paragraphs 4 to 5 above.

9. Each year the student shall also submit an annual report on his/her progress and evidence of achievement as specified by the school or Graduate School to a school progress panel.

10. The Report Forms will be forwarded to a school panel which will consider the evidence and determine whether progress indicates that the research project will meet the standards for the award. The Progress Panel will make a report to the dean of postgraduate studies via the Graduate School, and further progress on the programme of study is subject to approval by the Dean. In addition to detailed feedback that the Progress Panel may wish to provide the supervisory team and the student, the Progress Panel will make one of the following recommendations to the Graduate School:

1. That the candidate’s performance is satisfactory and that the candidate to study for the Doctor of Philosophy is confirmed.

2. That notwithstanding some concerns which the candidate and supervisory team should note, the candidate’s overall performance is satisfactory and
that the candidate should continue or upgrade to study for the Doctor of Philosophy.

3. That the candidate’s performance is unsatisfactory and that a further assessment should be held within two months to determine whether progress on the programme will be recommended.

4. That the candidate’s performance is unsatisfactory and that a submission for a Master of Philosophy examination is recommended instead of a submission for a Doctor of Philosophy examination.

5. That the candidate’s performance is unsatisfactory and that no submission for a Master of Philosophy or Doctor of Philosophy examination is recommended, and that the student’s candidature be terminated.

11. If at any stage throughout the period of study the supervisor feels that the progress of the student is unsatisfactory or that the standard of work generally is below that expected, he/she should inform the student by letter as well as orally of this opinion and the student shall be given the opportunity of an interview with the supervisory team. Following this notice and any interview, the supervisory team may decide to monitor progress and/or attendance; additionally or alternatively, the supervisory team may require the submission of written work in addition to that already prescribed by their project proposal and plan. If the student’s progress has not improved within such a period as shall be specified in the written notice, the supervisory team shall notify the dean and submit a report concerning the candidate’s progress for review by the appointed Progress Panel. The Progress Panel will make a report to the dean of postgraduate studies via the Graduate School.

12. Where it becomes impossible for a school to continue to provide direct supervision – for example because of the departure of the only member of staff able to supervise a particular topic – the head of school should consider alternative arrangements in good time and inform the relevant graduate school office so that formal approval may be sought from the appropriate Postgraduate Sub-Dean and/or faculty committee.

13. The supervisor should advise on the manuscript of the thesis in general and on content, presentation and organization. He/she should not act as a proof reader and should make this clear to the student. He/she should read all of the first draft and thereafter continue to offer advice. It must be made clear to the student that it is his/her responsibility to revise the thesis manuscript and to decide when it is ready for submission.

NOTE ON HEALTH AND SAFETY

Supervisors are responsible for ensuring that students under their supervision follow the agreed University and, where appropriate, School, safety policy and procedures. Full details of the University’s safety policy are contained in a booklet on Health and Safety available in all schools.

Guidelines on Good Practice for Research Students

Introduction

While the knowledge and skills that you gained as an undergraduate and/or in studying for a taught Master's degree have given you a background in your subject and perhaps some experience of and insight into the process of research, they may not necessarily have equipped you to successfully study for a research degree. As Salmon (1992: 51) has put it: ‘Unlike a certificate, a diploma, a Bachelor's or a [taught] Master's degree, a [research degree] does not merely entail the consideration of already existing work within a pre-arranged structure but demands the creation of a personal project. To undertake [a research degree] is therefore to define oneself as having a contribution to make to the understanding of the area concerned.’

In seeking to make that contribution, you will have the advice, encouragement and support of your supervisor(s), of academic colleagues in the field, and of your fellow postgraduates, but ultimately the responsibility is yours. You may have to create the project; you will certainly have to undertake the research; you have to write it up as a dissertation or thesis; you have to complete on time and submit; possibly in the case of a Master's degree and certainly in the case of a Doctorate, you will have to defend your work in an oral examination; and if you do all of these things to the satisfaction of your examiners, you will be awarded the degree.

The purpose of these Guidelines is to assist you to reflect on good practice in studying for a research degree. The Guidelines are not intended to be prescriptive or exhaustive, just to indicate what has been identified in the literature and elsewhere as good practice. But a number of the matters covered do relate to the University’s requirements of its research students, which are formally set out in its Guidelines for Research Students, and it is essential that students read the latter as well.

The Guidelines attempt to set out good practice in:

1. establishing and maintaining a good relationship with your supervisor(s)
2. approaching a research degree
3. preparing for research
4. where appropriate, choosing a topic
5. producing an initial research proposal and plan
6. writing regularly
7. dealing with academic problems
8. dealing with non-academic problems
9. reviewing the progress of the research
10. framing your thesis
11. writing your thesis
12. preparing for examination
13. publishing, networking, and developing your career

1. Establishing and Maintaining a Good Relationship with Your Supervisor(s)

Your relationship with your supervisor(s) is crucial to the success of the research project, and you need to start it off well and maintain it over time. As Cryer (2001 p58) has put it: ‘The relationship between a research student and a supervisor can be a precious thing. Supervisors and research students work closely together over a number of years. Mutual trust and respect should develop, along
with a working relationship that can continue, as between equals, long after the completion of the research degree. It is in your own interests as a research student to develop and nurture this relationship. At the very least, only a highly unusual student successfully completes a research degree if the relationship with the supervisor is poor.’

Starting off well involves, firstly, making an early appointment to see your supervisor(s) in the first few days after your arrival; secondly, being clear about your respective roles and responsibilities; and thirdly establishing ground rules to govern your future relationship.

Until you have met with your supervisor(s), it is not possible to even begin the preliminary work on the project. While it can sometimes seem that, with one, two, or three years stretching ahead, the matter is not urgent, in reality the time soon passes and it is vital to meet with your supervisor(s) as soon as possible.

At the meeting, your supervisor(s) will welcome you and, in many cases, devote at least some time to discussing your respective roles in the relationship so that you both know what to expect of each other. This is vital because, as Delamont et al. (1997, p 14) have put it:

‘Relationships [between supervisors and students] have to be worked at and discussed, because most of the later problems stem from a failure to set out the expectations that both parties have for the relationship.’

So what your supervisor(s) might do is to say that he or she or they will:

♦ where appropriate, help with the choice of a topic
♦ advise on sources for the literature search
♦ advise on methodology and/or methods
♦ facilitate data collection in terms of access or equipment
♦ discuss results
♦ read drafts on grounds of substance
♦ advise on progression and submission
♦ assist you to develop your career

But they will expect you to:

♦ undertake the actual research
♦ write or re-draft chapters
♦ proofread the thesis

In pointing out that it is up to you to do these things, supervisors are not being difficult, but realistic; a research degree is an award for successfully completing a personal research project, and for that to be the case you have to do the research, write it up, and make sure that the spelling, grammar, and punctuation are correct.

Particularly where research projects are multi-disciplinary and/or involve extended study outside the University, e.g. in industry, there may be two supervisors, one who is a member of the academic staff of the University, the other from the ‘outside’ institution in which the student will be studying. In such cases, the University requires that one supervisor should be the ‘primary’ supervisor, with overall responsibility for supervision, while the other is the ‘secondary’ supervisor. Normally in such cases there is a division of labour between the two supervisors, and it is important for the student to be aware of who will ‘lead’ on which aspects of the research project.

As well as having clear expectations about your respective roles, it is also important that you and your supervisor(s) discuss ground rules for working together. These might be as below:

You agree to:

♦ turn up on time for supervisions and give as much notice as possible of cancellations
♦ be properly prepared for your supervisions
♦ write regularly and share the draft materials
♦ maintain the highest standards of academic conduct, as set out in paragraph 10 of the University’s Guidelines for Research Students
♦ maintain contact with your supervisor(s), particularly when studying outside the University
♦ undertake the tasks agreed to the best of your ability within the allotted time

Your research supervisor(s) agree to:

♦ hold regular supervisions and give as much notice as possible of cancellations
♦ read work submitted promptly
♦ give written feedback.

All of you agree to:

♦ treat supervision in a business-like way with an agenda
♦ keep records of supervisions detailing what was discussed, what targets were agreed, and when they were to be achieved by.

This should help to put your relationship on a firm professional footing, and create a basis upon which you can continue to relate over time.

Of course, as with any relationship, that with your supervisor has to be worked at and maintained over time. In the early days you are likely to be heavily dependent upon your supervisor as you begin to find your feet in research. Once you have found your feet, your supervisor will expect you to become more independent, and your relationship should develop into a dialogue in which you engage in academic debate on a basis of increasing equality. By the time you are nearing completion, you will come to know more about the work than your supervisor, but will still be dependent upon his or her expertise to advise whether the research project has reached the stage at which it should be submitted for the degree or whether further research and/or re-writing is required.

It happens that, occasionally, what should be the natural transition from dependence to relative independence doesn’t transpire, either because the student remains over-dependent upon the supervisor or the latter is unwilling to ‘let go’. Because of these possibilities, it is useful, over the course of a research degree, for you and your supervisor to discuss your evolving relationship at regular intervals. This gives the supervisor a chance to flag to you that they think that you are more than ready to spread your wings and fly alone, or you the chance to ask for more space to take the research in your preferred direction.

Very rarely, research students find that they are unable to work effectively with their supervisors, and the relationship is in danger of breaking down. Procedures for dealing with this eventuality are set out in Paragraph 9 of the University’s Guidelines for Research Students.
2. Approaching a Research Degree

In order to be awarded a research degree, you have to satisfy the examination that you have fulfilled the requirements for that degree as laid down in the University’s regulations and as applied in your own subject. It is vital that, at the very start of your studentship, you are aware of what those requirements are to avoid latter errors. As one of the research students interviewed by Delamont et al. (1997 p 16) in their study of PhD students put the matter:

‘A lot of mistakes I’ve made are the result of not asking questions and people not putting me right. They presume I must know… I didn’t know the PhD was meant to be an argument…[that] it’s meant to say something. I thought it was one of those old-fashioned monographs, a collection of information. When I was an undergraduate I used to think a PhD was one of those articles you read in the journals, a 10,000 word article, I used to think they were PhDs.’

Clearly, if the student had clearly understood from the start what a PhD was, then these mistakes could have been avoided.

It is therefore worth spending some time looking at what will be the end product of your studies. Your starting point should be to unpack the University’s and, where appropriate, the faculty’s formal requirements for whatever research degree you are registered, and which are to be found in the Faculty Section of this Handbook. You should read these carefully and, preferably, discuss them with your supervisor so that you have a clear idea of what they mean.

While all research degrees have to meet the University and, where appropriate, the faculty’s requirements, they do this in very different ways, depending upon the discipline in which they are undertaken. It is therefore vital that you also have a clear understanding of what the relevant research dissertation or thesis in your discipline is like at the start of your studies. Your supervisor should recommend you to go and look at a couple of theses in the same or in cognate areas to your own, and you would be well-advised to do this and discuss key issues – for example in the case of PhD theses what made them original or how much of the thesis was publishable – in a supervision.

3. Preparing for Research

Most new research students naturally perceive research to be as it is written up in articles and books, which portray it as a seamless unrolling of (for example), theory, hypothesis, method, data collection, data analysis, results, and conclusions. But the published account is only the visible part of the iceberg; beneath it lies the nine-tenths of blood, sweat, toil, and tears, including the ideas that were discarded, the investigations that ended up in blind alleys, the correlations that were in the wrong direction, the experiments that gave negative results, and sometimes the sheer fluke that led to the substantive advance. Research can, for much of the time, be a messy, difficult, and frustrating process as any researcher, including your supervisor, will tell you.

But you can minimize, if not eliminate, the frustrations of research by thorough preparation at the start of your studentship. In particular, you can ensure that you are familiar with the resources available to support your project, that you are familiar with the processes of research in your discipline, and that you are personally organized to undertake the project.

You need to be familiar with the resources available to support your research, both material and human. The former includes the library, centrally and locally-provided computing facilities, and any specialized equipment needed for your project; the latter includes academic staff and fellow researchers and research students in your school. You will be provided with opportunities to attend induction sessions relating to all of these resources, and it is vital that you take advantage and make sure that you know what is available, how to access them, and how to use them in ways that are conducive to the health, safety, and welfare both of yourself and others. In the latter context, you should about read the University’s Health and Safety Policy in Part Two of this Handbook and the relevant school health and safety policy and, if appropriate, discuss this with your supervisor.

You also need to be familiar with what is involved in the research process and with good practice in doing research in your field. In the graduate schools, this is laid on for you through a programme of research training. In some cases, for example ESRC awards, the successful completion of such a training is a condition of support, whereas in others it may be a graduate school requirement. You must find out about the research training programme and attend; this is your opportunity to be informed about what is involved in research in your discipline by academic staff who are not only knowledgeable about the processes of research but also about the practice. As well as attending graduate school and, where appropriate, school training programmes, you will also find it helpful to read through one or more of the general texts about research (see for example Cryer 2000; Leonard 2001; Phillips and Pugh 2000; Wisker 2001) or ones relating to specific disciplines where your supervisor may be able to help with references.

As well as being familiar with the resources and the research process, you also need to be well-organized personally in terms of time, working conditions, and research materials.

With regard to time, as a full-time postgraduate research student you probably have more control over how you spend your time than at any other period in your working life. While this can be exhilarating, it can also, as Welsh (1979 p 33) has put it, ‘be all too easy for the postgraduate to spend his [her] time pottering in out and far behind, putting what is right and tight deadlines to complete the project. If, for this reason, time management is vital to full-time students, this is even more the case with part-time ones who may well be combining a job and/or a family with their research. For this reason it is well-worth adopting explicit time management techniques (see for example Cryer 2000 pp 91-106; Graham and Grant 1997 pp 42-45).

With regard to working conditions, the demands of research are, or can be, very intense, and you need an appropriate working environment in which you can read, reflect, think, evaluate, and write. You need to establish what facilities are available in your school or, if you undertake work at home, create a suitable space.

With regard to research materials, this covers both data and results generated in the course of the research and sources such as books, articles, papers, and other theses. In terms of data and results, particularly in experimental research, it is of the utmost importance that these are recorded and maintained in such a way that they can vouch for the accuracy and authenticity of your research. You must read, and follow to the letter, the University’s requirements for the retention and storage of data as set out in Section 11 of its Guidelines for Research Students.

In terms of other sources, it is important that you index and store them so that they are immediately accessible when needed.
needed – there is nothing more frustrating than being in full flow writing up a piece of work and then being unable to find the source for that seminal point which, you have just realized, will tie the chapter together. You should assume that anything that you read may well find its way into the dissertation or thesis, take full details of the reference (preferably in a database organized in terms of whichever referencing system you will use for the final work), and put any materials into a filing system with an index which makes it easy to retrieve.

Last, but not least, there is the obvious point that, where data and or sources are stored electronically, they must be backed up with a second copy kept in another place. Research can be frustrating enough without losing weeks or sometimes months of work through failure to back up a file.

### Reflecting on Practice

Are you fully aware of the range of resources available to support your research project? Have you developed the skills to use them effectively? Are you aware of health, safety and welfare policies? Do you understand from your faculty and or school training programme what is entailed in the research process in your subject? Are you managing your time effectively? Do you have adequate facilities for your research? Do your arrangements for retaining and storing data meet the University’s requirements? Have you organized your references and sources so that you can access them quickly? Do you regularly back up your work? Do you keep the copies in another place?

5. Producing an Initial Research Proposal and Plan

It is a requirement of the University (*Guidelines for Research Students*, Section 2) that research students should, in conjunction with their supervisors, produce and agree an initial research proposal and plan. In science and engineering subjects, this has usually been done previously as part of the bid for research funding, but this may not be the case in others. At their simplest, research proposals and plans set out what research students are proposing to do in their research projects, and when they are proposing to do it by.

With regard to an initial research proposal, a simple guide to drafting one might be to try and address the eight key questions of:

- What is the topic of my research?
- What have others written on this topic?
- Where appropriate, what conceptual/theoretical frameworks might be useful in approaching my research?
- What method or methods might be useful in undertaking that research?
- How could I go about designing the research?
- How could I collect my data?
- How could I analyse my data?
- How might my findings contribute to knowledge in this field?

In addition, there may be specific guidelines from your school and/or your supervisor(s) which should be followed in writing a research proposal. The draft proposal should then be shown to, and discussed with, your supervisor and amended in accordance with his or her comments.

With regard to an initial research plan, this involves unpacking what the tasks will be and assigning target time values to them which will enable you to complete on time. So, for example, for a three-year PhD in the social sciences, the initial research plan could be as below:

<table>
<thead>
<tr>
<th>Month</th>
<th>Research tasks</th>
<th>Writing tasks</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Reading around for suitable topics</td>
<td>Mini-reports on identified topics</td>
</tr>
<tr>
<td>2</td>
<td>Narrowing down topics</td>
<td>Short-list of topics</td>
</tr>
<tr>
<td>3</td>
<td>Selecting a starting topic</td>
<td>Justification of topic</td>
</tr>
<tr>
<td>4</td>
<td>Reviewing literature</td>
<td>Outline research proposal and plan</td>
</tr>
<tr>
<td>5</td>
<td>Reviewing literature</td>
<td>Literature evaluation</td>
</tr>
<tr>
<td>6</td>
<td>Reading on concepts and methods</td>
<td></td>
</tr>
</tbody>
</table>
Once you have an initial research plan, then it is important to discuss it with your supervisor, check that it is realistic in terms of the allocation of time to task, and if necessary, amend it. It should be stressed that, as with the topic, both the initial research proposal and the plan may well be subject to change over the course of the research as the focus perhaps changes as do activities and in consequence the timings. This is normal and not, in itself, a cause for concern – the proposal and the plan are intended as a flexible framework and not as a cage. But it is important that, at regular intervals during the research project, you and your supervisor review the proposal and the plan and update them to reflect the evolution of the research project. This should help you to keep track of where the project has been and where it is going and, most crucially, whether you may need to step up a gear to keep the project to time.

Reflecting on Practice
Have you, in conjunction with your supervisor, agreed an initial research proposal and a research plan? Do you review them regularly with a view to updating them and keeping the research project on track?

6. Writing Regularly
As you begin to make progress with your research, you should put pen to paper as soon as possible, for four reasons. Firstly, it enables you to keep a record of what you have done from the start to serve as a basis for later work. Secondly, it encourages you to reflect on what you have done so far and think about where you will go from here. Thirdly, it gives your supervisor the chance to see what has been done, and to advise you about how to proceed. This is crucial, and it is in fact a University requirement (Guidelines for Research Students, Para 4) that research students following programmes that will take more than one year of study should produce at least one substantial piece of written work in their first year. Fourthly, it gets you into the discipline of academic writing at an early stage rather than leaving it until later when it is more difficult to acquire. But, in some cases, students are reluctant to produce written work. Research (see for example Graham and Grant 1997, Delamont et al. 1997; Murray 2002) suggests that research students following programmes that will take more than one year of study should produce at least one substantial piece of written work in their first year. Fourthly, it gets you into the discipline of academic writing at an early stage rather than leaving it until later when it is more difficult to acquire.

One way of ensuring that you write regularly is, as Blaxter et al. (1996 pp 5-59) have suggested, to keep a research diary on a daily basis recording what you have done, time spent on it, analysis, and speculation. This gets you into the habit of writing regularly, recording, and reflecting, and can provide a useful basis upon which to construct longer pieces of work. In constructing longer pieces, you can make what may seem a Herculean task more manageable by breaking it up into smaller ones. So, initially, you might write a one-page abstract of the chapter setting out its aim (purpose), content (what it would cover), and possible conclusions (what it would add). With that thought through and discussed, the next stage would be to write a synopsis fleshing out the abstract and setting out headings and sub-headings to be used. Then, with a framework established, you can to fill it in piece by piece until you have a draft chapter.

In order to improve your academic writing, you can read books on the subject (for example: Dunleavy 2003; Murray 2002), ask your supervisor for examples of such writing from the literature in the field, or even pair up with another research student who will undertake to read drafts and suggest improvements in return for similar support from you for their efforts. In terms of overcoming psychological reluctance to write, you can, as Murray (2002) has suggested, ‘free-write’, i.e. write it down as it comes without any attempt to structure or present it for an academic audience. This takes the pressure off you and although, at the time, you may feel that it is worthless, you can be surprised to return to it later and find that it does take you forward. Additionally, and provided that you warn him or her beforehand that it is a free-written draft, it can be useful to show it to your supervisor and gain some feedback. Supervisors are aware from their own experiences that virtually all research starts-off very rough-hewn and will allow for this, and of course most would prefer a ‘messy’ draft of a chapter from one of their research students rather than nothing at all.

It may be noted that, while writing is a necessary task for all research students, it is inherently a more difficult one for students whose first language is not English and who have perhaps been educated within different styles of academic discourse. Your supervisor may be able to assist by discussing with you the work of other people, as research students outlined and discussed the work of other people, as research students their writing becomes, or should become, a presentation of their own views, ideas, thoughts, etc. This can leave students feeling very exposed and, particularly if their standard is published work, very dissatisfied with what they have achieved. For these reasons, they may be psychologically reluctant to write.

7. Dealing with Academic Problems
While you can be well prepared for research, it is frequently the case that, at some point during the project, you experience academic problems of one kind or another. Common ones include:

Drifting from the topic
As the research progresses, highways and byways of new exploration open up which just have to be investigated because they could be vital. So you become lost in the maze of possibilities and unable to establish where you should be at...
that stage of the project.

- **Difficulties with the methodology/methods**

  Particularly in the arts and humanities and social science, the section of your thesis on methodology/methods can require you to grapple with a whole range of unfamiliar philosophical, theoretical, empirical and experimental problems, and it can be frustrating to try and identify, tackle, and resolve these, particularly when you are really itching to undertake the substantive research.

- **Problems with the substantive research**

  You can expect a range of problems to occur as you undertake the substantive research – evidence that you can't obtain as easily as you hoped, experiments that don't work, apparently promising lines of enquiry which turn out to be dead ends, simulations which don't run properly – the list is endless.

- **Drowning in data**

  You collect masses and masses of data, start playing around with them, and find all sorts of interesting things that can be investigated in and around the topic and then even outside it. As a result, you are unable to discriminate between what to concentrate upon in your research project and what to leave out.

- **Unexpected results**

  With the substantive research accomplished, you find results which you did not expect – the evidence which is contradictory, the experiments which yield negative results, the cast-iron assumptions which are apparently falsified, the simulation results which defy predictions, variables which behave badly etc. etc.

  If you hit problems of this kind or others, it is important that you are not afraid to admit, not least to yourself, that you are in difficulties. Research students tend to have previously sailed easily through undergraduate and taught postgraduate programmes and it can, to say the least, be a shock to be brought shuddering to a halt while engaging in research. Students may find it hard to admit this for reasons which Atkin (1996* p 2) has termed ‘Top Gun’ syndrome whereby:

  ‘...students are seen...as the best and the brightest. Significant academic achievement has led them to their current place. They are thus unable to admit faults or shortcomings for fear of “showing themselves up” in the...academic community. It becomes better to struggle on with barely a clue about what is going on than to admit...that one does not know what is happening.’

  If you have problems, you should acknowledge them secure in the recognition that this happens at one time or another to all researchers as well, i.e. it is all part and parcel of doing research.

  In terms of resolving problems, you might start by trying to think through how you can overcome them yourself. If you feel that you are drifting aimlessly in terms of the topic, you might re-visit your research proposal and plan and re-assert the initial focus of the research; if methodology is a problem, look at other books or theses in the area for models of how to proceed; if one avenue of the substantive research has been blocked off, look for another; if you are drowning in data again go back to the research proposal and plan to re-focus the analysis; for unexpected results, see if there is a substantive explanation – many important contributions to knowledge have come from the explanation of apparent inconsistencies.

  You may also wish to consider sharing the problem with a fellow-research student, particularly perhaps one who is further on in his or her studies and who may be able to offer advice on the basis of their own experience. Some graduate schools encourage such a collective approach to problem solving by pairing research students so that they can support each other. Alternatively, if you are part of a research group, it may be that one of your colleagues can assist.

  You should, of course, ask for assistance from your supervisor. As an experienced researcher, he or she will be familiar with the problems of research both generally and in the specific subject area and should at least be able to help you to think through the problem and to suggest ways in which you might go about resolving it.

  **Reflecting on Practice**

  What academic problems might you expect to meet in the course of your research project?

  How would you go about resolving them?

  What sources of support are available to help you resolve academic difficulties?

---

8. **Dealing with Non-Academic Problems**

As well as experiencing academic problems of one kind or another, research students may also experience a range of non-academic problems arising from their situation. Three common ones are self-doubt, isolation, and boredom.

You may, particularly in the early stages of a research degree, experience bouts of self-doubt. These can arise from the situation of a research student; as one of the respondents to Delamont et al’s (1997: p 27) survey put the matter:

‘...you are suspended between a student who just absorbs things and an academic who produces [them], and that [leads to] all kinds of paranoia or neuroses.’

Self-doubt often takes the form of anxiety about whether you will be able to successfully make the transition from being primarily an absorber of to contributor to knowledge, and it can be associated with a reluctance to write or at least to submit written work to your supervisor(s) in case it is ‘not good enough’.

It is worth noting that such self-doubt is not uncommon, and that dealing with it is part and parcel of the experience of being a research student. In terms of how to deal with it, the key thing is to write – no matter how mundane you think that the piece or chapter is – and show the work to your supervisor(s).

While you are, of course, bound up in the research, and are often unable to judge the contribution that you are making – in time even the most original insights come to seem commonplace to their creators – your supervisor has a greater degree of objectivity. He or she is far better placed to ascertain how you are progressing, and to offer guidance and support for your work.

As well as self-doubt, one of the most consistent findings of the literature on research students over the past three decades (see for example: Becher 1994 143; Cryer 2000; Delamont et al. 1997; Leonard 2001; Phillips and Pugh 2000; Rudd 1975; Rudd 1985) is that research students can feel isolated.

At school and as undergraduates or postgraduates on taught programmes, you study a common syllabus in the company of your peers. But, as a postgraduate research student, unless you are working on a group project or in a large and active research school, you find yourself working on your own project and often without the company of others. This can lead to intellectual isolation – you are the only one in the world working on this topic – and social isolation at the workplace as you plod away on your own in the library or the laboratory.

Here, Cryer’s (2000 p 41) advice is pertinent:

‘...you should put effort into warding off isolation. You need to be on the constant lookout for people who both know enough about your field to be able to discuss it meaningfully and have the time to do so.

You may find such people in your family, your social group, or in your department... However, if you have to go outside into a national or an international arena, so be it. Overcoming isolation or potential isolation must be a major objective for all research students.’

A third common feature of the life of the postgraduate student which has been identified in the literature (see Phillips and Pugh, 2000, pp 77-78) is the tendency towards boredom. This
tends to happen when you are well into your research, and have reached a stage where, as Cryer (2000 p171) puts it, ‘your work genuinely is excessively routine and monotonous’. So, you’re churning it out day after day, and you become bored with the whole thing and ripe for distractions which will take your mind.

There is no simple neat solution to this problem – if you want to complete you have to continue the research – but it can be beneficial to either do something else (write or re-write an earlier chapter) or even take a short break and then come back to it with a fresher mind. But, if you contemplate a break, do ask your supervisor and agree with him or her to stick to a defined time – there are many ex-research students who took a breather from their studies and then procrastinated about returning until it was far too late.

While these, of course, are non-academic problems arising out of being a research student, you may encounter other difficulties of a personal, social, and financial character that have a bearing upon your research. You should certainly alert your supervisor, who is your personal tutor, to any such difficulties that you may be experiencing, or if you feel this is inappropriate, then you also have access to the full range of graduate school and University support services outlined in Part Two of this Handbook.

9. Reviewing the Progress of the Research

One of the key tasks of research students is to review the progress of their research. This involves variously self-review, formal reviews with supervisors, and participating in school, graduate school and University review procedures.

Research students are under considerable pressure variously from sponsors, bank managers, the University, and schools to complete their degrees within the allotted time. Your chances of completing on time or as near as possible will be significantly enhanced if you treat the research as a project and actively manage it to meet the deadline. The skills that you need to do this may well be imparted in your research training and actively managed to meet the deadline. The skills that you need to do this may well be imparted in your research training and actively managed to meet the deadline. The skills that you need to do this may well be imparted in your research training and actively managed to meet the deadline. The skills that you need to do this may well be imparted in your research training and actively managed to meet the deadline. The skills that you need to do this may well be imparted in your research training and actively managed to meet the deadline. The skills that you need to do this may well be imparted in your research training and actively managed to meet the deadline. The skills that you need to do this may well be imparted in your research training and actively managed to meet the deadline. The skills that you need to do this may well be imparted in your research training and actively managed to meet the deadline.

Either way, you should find that one of the critical recommendations is that you should treat your research plan not as an exercise to be completed at the start of the studentship and then filed away, but as a ‘live’ document to be reviewed and updated frequently and regularly over the duration of the project. You should, then, consult it regularly; update it in the light of your progress to date; consider the implications for the completion of the research; and, as far as possible, act to keep the project on track. It may be noted that such self-review will not only help you to finish your research degree as soon as possible, but also enhance your project management skills and your attractiveness to employers (see Part Two).

As well as self-reviewing, the University requires (Guidelines for Research Students, Para 5) that you also formally review your progress with your supervisor(s) at least once per term, i.e. three times per year. It is important that you treat these supervisions in a businesslike way as an opportunity to discuss the progress of your research with your supervisor(s) and that you keep a record of what was discussed and what action points were identified.

One way of doing this is to use the pro-forma such as Appendix C in the Research Training Portfolio, which will provide a record of the supervision.

As well as student and supervisor review, School Progress panels will also have formal procedures, usually involving the submission and/or presentation of pieces of work at specified intervals. It is worth noting that, while these review procedures are intended to assure the graduate school that your progress is satisfactory, they are also intended to be helpful to you. They give you the opportunity to gain feedback on your work from senior researchers in your school.

Reflecting on Practice

Do you have a strategy for personally reviewing the progress of your research project at regular intervals?

Do you approach supervisions to review your progress in a business-like way? What review procedures are there in your school and/or faculty?

10. Framing Your Thesis

After spending the best part of one, two or three years of your life training to do research and then undertaking the actual research for your project, you are then faced with what is the last major task of producing your thesis. This task is absolutely crucial because, as Cryer (2000 p177) has put it:

‘The thesis is the culmination of [the] research student’s entire research programme, and it is on the thesis that he or she will be examined and judged.’

This, of course, raises the question of ‘what is a thesis?’ While there is no objective definition of a thesis and there are variations between what is expected in different disciplines, one common factor is, as Barnes cited Blaxter et al. (1996 p 27) has put it, that:

‘A [thesis] is far more than a passive record of your research and generally involves presenting an argument or point of view. In other words, it must say something and be substantiated with reasoned argument and evidence.’

So, producing your thesis involves more than throwing everything you have done into the pot and hoping for the best; it has to involve a case or point of view and be substantiated with reasoned argument and evidence.

This can be difficult to do because, to put it at its simplest, often we cannot see the wood (the thesis) for the trees (the mass of writings and materials we have accumulated over the course of the research). So, in order to produce a thesis, we need to know the shape of the wood, i.e. a framework for our thesis.

There are many ways of developing a framework for your thesis, and it is worth consulting your supervisor about suitable approaches. One possibility suggested in the literature (see for example Cryer 2000; Taylor 2002) is for you to think of yourself as an explorer who has undertaken a journey and who is writing a guidebook. As the author of the guidebook, you need to explain:

- where you started from
- what other guidebooks you read
- why you decided to undertake the journey
- how you decided to approach the journey
- the route you decided to follow
- for the PhD/MD, the original discoveries you made on the way
- where you arrived at the end of the journey
- how it differed from the starting point
- where you would go from here in future.

You can literally map this on a couple of sides of paper, and then re-trace the journey. At each stage you need to ask the questions; What is it vital to say to take the reader on to the next stage?; What is it important but not vital?; What is neither important nor vital? By this process, if necessary repeated
several times, you should be able to distil the essence of the thesis (the vital) and separate it from the important and the relatively unimportant.

With, hopefully, a stripped-down and clear route, you can then begin to fill in each stage of the journey in terms of key topics which you have to address, which you use to flesh out your map. You can then apply the same tests as above - are they vital, important, or neither - and go through a similar iterative process. Then, within the topics, this can be repeated with sub-topics until, eventually, you have a complete map of the thesis.

Such an approach has a number of advantages. Firstly, it gives you an overall framework for your thesis; secondly, it divides the writing into manageable tasks; thirdly, and vitally, it can be discussed with your supervisor(s) before writing up; fourthly it highlights the key things you need to bring out in terms of discoveries (originality), added knowledge and understanding (the differences between the start and end point), and future research in the area (where we go from here); and finally may translate into the structure for a thesis. So, for example, in the case of many PhDs, the translation is:

<table>
<thead>

<td>Analysis and results</td>
</tr>
<tr>
<td>Differences</td>
<td>Added knowledge</td>
</tr>
<tr>
<td>Future</td>
<td>Directions of research</td>
</tr>
</tbody>
</table>

While the percentages may vary in different cases, it is crucial to plan them with the needs of the audience in mind. With the needs of your audience in mind, it is then possible to proceed to drafting. One of the (few) common factors in the research degree experience is that it almost always takes far longer to write up the thesis than had been planned. The reason for this is that, when we finally write up, we have finished the substance of the project and now have, or should have, the benefit of hindsight, which leads us to change, amend, and modify the draft. While this is an entirely legitimate and valuable part of a research degree – it is in fact learning from what we have done – it can result in considerable delays in producing a first rough draft.

You should then review this yourself. Here it can be very useful to look at the Handbook for the Examiners of Research Degrees – the part of this Handbook which sets out the criteria which they will apply to your thesis. You should apply these then, if necessary, re-draft the thesis and ask your supervisor(s) for comments. Following that, you should re-draft in the light of their comments, review it again yourself, and so the cycle continues until a final draft emerges.

As well as meeting requirements for the substance of the research degree, it is also vital that the draft is well-presented, for two reasons. Firstly, while good presentation cannot rescue a poor thesis, it may help a marginal one, i.e. the examiners may be inclined to take a more charitable view if the thesis is easily readable and, as far as possible, error-free. Secondly, inadequacies in expression and errors in spelling and grammar are one of the most common reasons for the referral of theses, i.e. for these being accepted subject to minor corrections. It can be extremely galling to have to spend a month or two correcting elementary mistakes and errors, not just to you but to your supervisor who will be landed with the task of checking that your errors have been corrected before the degree can be awarded. So it is important that you get this right before you go further.

You should:
- ensure that you have expressed yourself as clearly and concisely as possible (reading out loud can often help to identify over-long sentences and unnecessary padding)
- check the grammar and the spelling (it is your

11. Writing Your Thesis

Once you have established a basic framework, you still, of course, have to write the thesis. Here the three key issues to consider are; who am I writing for? (audience); how do I actually go about writing it? (drafting); how do I make sure that I read it well? (presentation).

A research thesis, like any other piece of writing, is a form of communication, and it is necessary to consider in advance the audience that you are addressing and how you might meet their needs. Here, Cryer (2000 p 178) has some good advice:

'The crucially important audience for theses are external examiners. Think of them as individuals who are exceptionally busy and grossly underpaid and who therefore have to read theses quickly. They will expect them to be well-structured and to be argued coherently to make the case for certain solutions to specific research problems. Irrelevancies will irritate, as will having to tease out meaning that research students should have extracted themselves. Think of them also as individuals who are very able and experienced in the general area, which means that the background material should be as concise as is consistent with showing that it is known.

'However, no external examiner can be an expert in your work. By the time you finalise your thesis, you and you alone are the world’s expert. So the aspects that make your work significant and original and worthy of a PhD...need to be argued coherently; each step needs to be spelled out, the outcomes must be stated unambiguously, and all their implications identified and discussed in depth.'
responsibility to do this and not that of your supervisor)

- check that you have the right words (spell checkers can tell you whether the word is spelled correctly but not if it is the right word in the first place)
- check the footnotes/endnotes, quotations, citations etc. both in the text and in the bibliography (remember, your examiners will check a sample)

Given that many of us can be blind to our own deficiencies and errors, it can be very helpful to ask a friend with some expertise in the area to comment on the comprehensibility of the draft and to also ask him or her to check it for errors.

With this done, it is back to your supervisor for a final re-read and, hopefully, the green light to go ahead and submit the thesis for examination. If your supervisor still has reservations, you can still submit – ultimately it is your decision – but you would be well advised to consider this very carefully for fear of failing at the final fence.

Assuming that you do decide to submit, before actually doing so you should check the University’s regulations about submission. Usually, you are required to give notice of submission, and you may have to conform to a range of stylistic regulations, e.g. concerning page margins and layout, as well as providing an abstract, a contents page, and meet any other requirements, including a count of the number of words. Only when you are satisfied on this score can you print off copies to be bound and submitted to your examiners.

Reviewing Practice
Are you clear about the audience for which you are writing? Have you decided upon an appropriate balance between the lengths of the various parts of the thesis? Have you reviewed your thesis using the Handbook for Examiners? Has your supervisor seen the draft? Have you taken their comments on board? Have you asked their advice about submission? Have you checked the University’s regulations about giving notice of submission? Have you checked the University’s requirements in terms of the submission of theses?

12. Preparing for Examination

Following submission of the final title of the thesis, examiners are appointed, normally one internal and one external examiner. In the case of Master’s research degrees, the process of examination normally involves the assessment of the dissertation or thesis by the examiners but, in the case of the MPhil may involve an oral examination. In the case of the PhD/MD, University regulations require an oral examination, i.e. a viva.

Vivas are comparatively rare in undergraduate and taught postgraduate programmes; in most Universities they are only held if there is some doubt about the class of degree to be awarded, although in some they are mandatory for the award of a First.

But, of course, vivas are compulsory for the award of the PhD/MD. The implication of this is, of course, that candidates starting PhDs/MDs often have little or no experience of oral examinations. While they gain some by defending their work at progress reviews, this is still a far cry from the full rigour of a formal oral examination.

This might be of little consequence if, as in many other European countries, the viva was a public affair and they could go along and experience what happened. However, the British viva rarely gives access to people other than the examiners. Again, this might not matter if there were published guidelines for the viva, but this is not always the case. So, as Burnham (1997 p 30) has put it ‘...what occurs in the lengthy “judgel huddle” from which postgraduates emerge either victorious or distraught is a mystery’.

In consequence, as Delamont et al. (1997 p 148) have written: ‘The [PhD] student may well fear and dread the [viva] examination. Even when the student is outstandingly competent, and however excellent the thesis may be, the process of examination is a stressful one...most [candidates] feel worried by the indeterminacy of [the viva].'

However you can prepare for your viva in six main ways.

Firstly, it is important to understand what vivas are about, i.e. their purposes, procedures, and outcomes. These are explained in detail in the University’s Handbook for Examiners of Research Degrees which is set out in this part of this Handbook. You will find it helpful to discuss these with your supervisor.

Secondly, you need, of course, to be thoroughly familiar with your thesis. While this may seem strange since you wrote it, it is amazing how quickly you can forget what you have written, and you do need to re-read it. Often, you will find typos and other errors you have missed earlier – if so, list them and take them with you to the viva to show your examiners that you are aware of them.

Thirdly, you need to keep up to date with the literature in your area in the hiatus between submission and the viva. If a key paper comes out during that period, your examiners may ask you about it and about any implications for your work, and it obviously creates a good impression if you are aware of it.

Fourthly, as well as being prepared for questions concerning new literature, it can also be useful to anticipate the sorts of questions you might be asked and at least think about how you will answer them. There are some fairly obvious general ones (e.g. ‘Why did you do this topic?’ ‘Why did you study here?’ ‘What would have done differently if you were doing the research now?’ ‘What do you think the implications of your work are for the field?’) for which you can prepare.

Fifthly, you can ask your supervisor to arrange a mock viva in which colleagues who are experienced in examining question you on key parts of the thesis and afterwards give you feedback upon your performance. Such an opportunity, which allows you to experience as part of their progress monitoring procedures, is invaluable in enabling students to prepare themselves both intellectually and psychologically for what is to come.

Finally, on the day itself, you need to be prepared for the experience. You should go to the viva as well-rested and fed as possible, and appropriately attired – it is a formal occasion so you need to be well-dressed but as you will be sitting down for a couple of hours and possibly more you need to feel comfortable as well.

You should take with you:

- a copy of your thesis (preferably loose-bound so you can find pages quickly)
- pen and paper if you need to jot questions down or possibly draw diagrams
- where appropriate, a list of corrections
- copies of any original results, print-outs, or raw data which may be helpful in substantiating key points made in the thesis

Following Cryer (2000 p 197), you should:

- be composed when you enter the room
- sit squarely on the chair, not on the edge
- ask for anything not to your liking in the room to be changed, e.g. your seat moved out of sunlight
- wait for questions to be asked of you by the examiners
- show that you are listening attentively
- ask for clarification if questions are unclear
- take whatever time you need to answer them
- defend your thesis without becoming wholly defensive, i.e. be prepared if necessary to concede points
- be scholarly in your approach, i.e. give answers weighing the pros and cons before reaching balanced conclusions
When the examiners have finished their questions, they may well ask if there is anything you wish to say; this is an opportunity for you to clarify or expand upon any answer which you felt did not do you justice, or raise any other matters concerning the examination.

At the end of the viva, the Chair should ask you to leave while the examiners deliberate, and afterwards you will normally be called back in to be informed of the examiners' recommendation.

In many cases, the recommendation will be to award the degree subject to making minor corrections (usually spelling and grammar) to the satisfaction of your supervisor. In others, it will be subject to making minor revisions within a few months, and in a few making major ones within twelve months. While these recommendations may be disappointing, it is important to remember that the examiners' expectation is still that you will eventually pass, and they are required to specify what you need to do to make the grade. Other outcomes, i.e. the award of a lower research degree or a fail, are mercifully rare. But, if this does happen and you have reason to believe that this relates to unfairness in the examination procedure, you have a right to appeal, and details of the University’s appeals procedure are set out in Part Six of this Handbook.

But, in the vast majority of cases, you should only need to do one thing after the viva – celebrate.

### 13. Publishing, Networking, and Developing Your Career

There are three other areas of good practice for research students, namely publishing, networking, and developing your career.

If at all possible, you should try and publish work during your studentship; this can help to mark out your academic territory, bring you into contact with others in the field, boost your self-esteem — it is a coup to be published when still a graduate student — and provide a better platform for employment, particularly in the research field inside or outside the universities. Your supervisor should be able to advise you about whether your work should be published and, if so, how to go about it.

Also, you should consciously network within the academic and/or professional community relating to your field. Academia is heavily dependent upon networking informally and formally, in the latter case through professional associations and conferences. You should try and establish your own informal networks, and participate in the professional ones, e.g. the postgraduate sections of professional associations. Such networking will bring you into contact with others in the same field, help to prevent isolation, offer you opportunities to attend conferences and give papers, and finally enable you to acquire skills which will stand you in good stead in your career, inside or outside academia (see for example Blaxter et al. 1998* pp 55-77). Again, your supervisor can help with contacts and advise on professional association memberships, etc.

Last, but by no means least, you should, from the beginning of your research studentship, be conscious of the need to develop skills and plan for your future career. Your primary objective as a research student is, of course, to gain a research degree, and this will be valuable in seeking employment. But, in today's labour market, you also need to have the key – transferable – skills which are demanded by employers.

You can learn about the skills demanded by employers by, as early as possible in your studentship, attending training and development events organized by the University’s Careers Service. The latter has also produced a list of such skills (see www.careers.ncl.ac.uk/students/frames/employFrame.html) which can be used as a benchmark against which you can develop them over the course of your programme.

So, at the start of your programme, you should look at the list and see which skills you have acquired already and which you will need to acquire over the remainder of your studentship. You should then check out which of these skills you will acquire in the course of your research training programme — they should be listed in the programme handbook — and discuss with your supervisor the other skills that you will acquire by undertaking your research. You should then audit your skills and identify any gaps – a common one for research students particularly in the humanities and social sciences is team-working – and make plans to fill them.

Your supervisor will be of assistance in this regard, as will the postgraduate adviser in the Careers Service.

While all of the key skills are important, it is worth highlighting the acquisition of one in particular, namely effective oral presentation skills. Such skills are vital in the academic context (a number of graduate schools ask research students to make oral presentations as part of their procedures for progression and of course you need them to make presentations to seminars and conferences) and for employment in virtually any field. You should take every opportunity to develop these skills through your graduate school training programme, by reading the relevant literature (e.g. Cryer 2000) and by asking your supervisor or other colleagues to listen to a mini-presentation and give you feedback.

As well as actually acquiring skills for employment, you also need to be able to document their acquisition. In some graduate schools, this process has been formalised by the introduction of Personal Development Records whereby students are required to record the acquisition of skills and present the records as evidence of satisfactory progress. In others it is up to the student to keep a record, which can be done by creating a portfolio based upon how you meet the Careers Service list. Either way, if you can demonstrate to employers that you have acquired the appropriate skills, this will greatly enhance your chances of gaining the good job which you deserve for all of the work and effort you have put in over the course of your research degree.

### Reviewing Practice

Have you found out about the process of examination from the Handbook for Examiners of Research Degrees? Have you prepared adequately in advance for your viva? Have you prepared for the day itself?

Guidelines on Good Practice in Research Supervision

Introduction

Research supervision has been characterized by Brown and Atkins (1988, p 115) as “…probably the most complex and subtle form of teaching in which we engage. It is not enough for us to be competent researchers ourselves – although this is vital. We need to be able to reflect upon research practices and analyse the knowledge techniques and methods which make them effective. But there is a step even beyond this. We have to be skilled in enabling our research students to acquire those techniques and methods themselves without stultifying or warping their own intellectual development. In short, to be an effective research supervisor, you need to be an effective researcher and an effective supervisor.”

As a member of the academic staff at Newcastle, you will be an effective researcher; the aim of these Guidelines is to assist you to reflect on good practice in supervising research students. The Guidelines are not intended to be prescriptive nor exhaustive, just to indicate what, within the literature, has been identified as good practice. But some of the matters covered do relate to University requirements, and this document should be read in conjunction with the University’s Guidelines for the Supervisors of Research Students, which sets out the formal framework for research supervision.

The Guidelines attempt to set out good practice in relation to fifteen key components of research supervision, namely:

1. establishing and maintaining a professional relationship with the student
2. helping to induct them into research
3. where appropriate, assisting with the choice of a topic
4. where appropriate, helping them devise a research proposal and plan
5. supporting the initial stages of the research project
6. encouraging students to write
7. assisting with academic problems with the research
8. assisting with personal and social problems affecting the research
9. giving feedback and reviewing the progress of the research project
10. monitoring the progress of the research
11. advising on drafts of the thesis
12. advising on submission
13. assisting on preparation for examination
14. assisting with career development, networking, and publication
15. working with co-supervisors

1. Establishing and Maintaining a Professional Relationship with the Research Student

The relationship between a supervisor and a research student is a professional one, and it is vital that it is started off on an appropriate footing. As Delamont et al. (1997, p 14) have put it: “You need to sort out a good working relationship with your supervisee. Relationships have to be worked at and discussed, because most of the later problems stem from a failure to set out the expectations both parties have for the relationship. A few supervisions devoted to discussing

---

Newcastle University (1992) Guidelines for Supervisors of Research Students
the best ways to work together will not be wasted.’

One way to do this is to establish, implicitly or explicitly, an agreement between the supervisor and the student setting out expectations of each other, as in the example below.

The research student agrees to:
- turn up on time for supervisions and give as much notice as possible of cancellations
- be properly prepared
- write regularly and share the draft materials
- maintain the highest standards of academic conduct, as set out in paragraph 10 of the University’s Guidelines for Research Students
- maintain contact
- undertake the tasks agreed to the best of their ability within the allotted time

The research supervisor agrees to:
- hold regular supervisions and give as much notice as possible of cancellations
- read work submitted promptly
- give written feedback.

Both agree to:
- treat supervision in a business-like way with an agenda
- keep records of supervisions detailing what was discussed, what targets were agreed, and when they were to be achieved by.

Supervisors may wish to go further than this and indicate more precisely what they can or cannot do to assist the student. So, the supervisor may say that he or she will:
- help with the choice of a topic
- advise on sources for the literature search
- advise on methodology
- facilitate data collection in terms of access or equipment
- discuss results
- read drafts on grounds of substance
- advise on submission

But he or she will not:
- undertake the actual research
- write or re-draft chapters
- ‘proof’ the thesis

At this stage also, you may wish to make it clear in what circumstances you would or would not expect credit to be given in any publications arising from the research. While this process of establishing a professional relationship is important for all students, it may be particularly helpful to international students, who may have culturally defined notions of what they can expect from their supervisor. As Ryan (2000, p: 69) has put it:

‘...international students...are likely to expect a hierarchical relationship with their supervisor where the supervisor exercises tight control over the research. Many international students will expect their supervisor to take the initiative and adapt a role close to being a guide and/or parent. They may expect the supervisor to make major contributions towards the research and the thesis. They will be expecting clear direction and guidance from their supervisors, whom they will hold in great esteem, and they often have very high expectations of the relationship.’

In such cases, it can be useful to spend some time discussing student’s expectations of the role of the supervisor and of what you can offer in order to clarify the relationship. Such discussions should emphasise the additional support available to international students in the early stages of their research (see below), as well as the need for them to take the initiative in undertaking and completing the research project.

By these means, clear expectations should be established for what is to come at the start of the research. But, as with any relationship, the supervisor-supervisee see changes, and change, over time. Ideally, it should start as a master/mistress-apprentice relationship and end up as almost equal colleagues.

Clearly, this implies a process of development over the course of the supervision from the supervisor playing a directive role and setting tasks for the student to do at the start towards encouraging the student to become an autonomous researcher and increasingly recognizing their capacity to make an independent contribution to knowledge and understanding in the subject. However, as Cryer (2000, pp 5-7) has pointed out, this does not happen automatically. Students may need to be weaned away from dependence upon their supervisors, while the latter may need to adjust to the idea of the student abandoning the nest and beginning to fly on their own. So, it is important for supervisors to periodically check where the balance lies, whether it is appropriate for this stage of the research, and if not what can be done to correct it.

Reflecting on Practice
What methods do you use to establish a professional relationship with the student at the start of the programme? What is the appropriate balance between dependence and independence over the course of the programme? How often do you review that balance? What can you do if it is wrong?

2. Inducting Students into Research

Many students coming through to research will have undertaken short research projects either as undergraduates or as postgraduates, and will be required to undertake a training in research during their first year of study. There is also now a substantial literature on undertaking a research degree to which students can be directed, of which recent examples are Cryer (2000), Leonard (2001), Phillips and Pugh (2000), and Wisker (2001). However, while previous experience and the literature yield insights into research, they may not prepare students for it fully, in five respects.

Firstly, students are often still not fully aware of what they are letting themselves in for, i.e. a research degree. Again, the point is well made by one of the PhD students interviewed by Delamont et al. (1997, p 16):

‘A lot of mistakes I’ve made are the result of not asking questions and people not putting me right. They presume I must know… I didn’t know the PhD was meant to be an argument…[that] it’s meant to say something, I thought it was one of those old-fashioned monographs, a collection of information. When I was an undergraduate I used to think a PhD was one of those articles you read in the journals, a 10,000 word article, I used to think they were PhDs.’

Clearly, if the student’s supervisor had explained what a PhD was, pointed the student in the direction of a few successful theses (see University Guidelines for Supervisors of Research Students 3(a) (ii)), and discussed why they were successful, the mistakes which marred the student’s experience could have been avoided.
The second way in which students may be unprepared for research stems from the way in which it is written up in books and papers in journals, namely as a seamless progression from initial idea to an addition to knowledge and understanding. But what is published is only the visible part of the iceberg; the other nine-tenths – the ideas that were discarded, the investigations that ended up in blind alleys, the correlations that were in the wrong direction, the experiments that gave negative results, the sheer fluke that led to the substantive advance – rarely see the light of day. So it is scarcely surprising that many students expect their research to progress without incident and, when it does not, blame themselves.

Here, the supervisor has a key role in forewarning and forearming. This may take the form of directing students towards accounts of research as it really happened, pairing them with students further down the line to discuss the problems they had experienced, or even self-disclosure by the supervisor. What can be useful is for a supervisor to keep all of the materials relating to a particular research project from first scribbles to final paper, and take the student through the process, disasters as well as triumphs. Such exercises can prepare them for what is to come, and can have the added bonus of demonstrating how to go about problem-solving in your subject.

Thirdly, students may not be aware or fully aware of what is entailed in maintaining the highest standards of academic conduct in undertaking their research in particular with regard to the storage and retention of research data. A few minutes spent discussing Section 10 of the University’s Guidelines for Research Students with the student can be helpful, and it is recommended that this be done in the comparable Guidelines for Supervisors (3(c)).

Fourthly, the Guidelines for Supervisors (3(d)) also recommend that supervisors spend some time at the start of the project discussing the storage and retention of research data with their students. Failure to store and retain data can, at worst, mean that experiments etc have to be replicated, at best that progress is haled until missing data is eventually found. In this context, it can also be useful to encourage students right from the start to take full references for everything that they read in such a form that they can later be easily transferred to the text or the bibliography of their thesis. Again, this can save many hours hunting for page numbers etc. at the writing-up stage.

Fifthly, the University (Guidelines for Supervisors, p 3) makes supervisors responsible for ensuring that research students follow agreed University and, where appropriate, school health and safety policies and procedures, and these should also form part of the student’s induction into research.

Again, on international students, it is worth quoting Ryan, (2000, p 73) :

'A common problem is that supervisors assume too much of student’s research knowledge. But some international students will have very little knowledge of how to conduct research....'

Supervisors might consider going through one of the texts described above (e.g. Cryer 2000) with international students, and devising mini-research projects designed to enhance their experience of research.

Reflecting on Practice

Do you provide students with a framework for choosing a topic? Would disclosure of your own experiences be helpful? Can you identify review papers in your subject which could be used to generate topics for exercises?

4. Producing an Initial Research Proposal and Plan

Again, and particularly in science and engineering, many research students are recruited to implement research proposals which have already been planned and scheduled. But, where the project is not pre-determined and planned for them, students need to actively manage their research projects. Otherwise, they can drift for months during the first year of research, and this is a major cause of drop out and also of non-completion within three or four years. Given the financial pressures on students — particularly international ones funded only for the stated duration of the programme — and of course Research Council sanctions on subjects with low completion rates within three or four years (see e.g. Joint et al. 2002), it is vital that they are clear about what they are doing and when they should be aiming to do it by. For these reasons, the University’s Guidelines for Supervisors (3(a)) strongly recommend that supervisors should work with students to produce a research proposal and a plan.

With regard to the research proposal, graduate schools may have guidelines for writing a research proposal, or supervisors may be left to come up with their own. The latter can consist of a fairly simple series of questions to be answered by the student. For example: What is the topic? Why is it important?; What have others written on it?; What would the research seek to add?; What method or methods would be useful in undertaking the research?; How could the research be designed?; How will data be collected?; How will it be...
analysed? How, in principle, might results add to knowledge and understanding in this field? It may be noted that, whether the guidelines are institutional or supplied by the supervisor, it is still useful to show students a good research proposal and take them through it step by step so that they have a clear exemplar to follow.

With regard to planning the research, in principle it seems simple enough to plot the tasks identified in the research proposal against time. In practice, of course, it is extremely difficult to predict in advance even approximately how long things are going to take, particularly if students have limited research experience, and the results can be over-optimistic to say the least.

Here, the supervisor can help students to appreciate the pitfalls of planning a research project. One method for doing this has been developed by Delamont et al. (1997). Students are given Gantt charts for research projects in their subject which deliberately over-represent the time to be allotted for some aspects of the research process and under-represent the time needed for others. They are then asked to consider the realism or otherwise of these projections, to discuss them, and to re-plan the research. This technique can be extremely effective in stimulating students to think about the relationship between time and task and in enabling them to plan their own research.

If, by these means, students can be assisted by supervisors to produce research proposals and research plans, the supervisor has at least one other key responsibility, namely to encourage students to frequently revisit and update both. Research topics can change markedly over the course of a project, and research plans need to be modified in response to this and other factors. Indeed, it can be beneficial to periodically devote a supervision to discussing and updating the research proposal and the research plan, so that both supervisor and student are clear about where the research has got to, and what needs to be done to complete it.

5. Supporting the Initial Stages of the Research Project

Again in science and engineering, students may be able to step into ready-made research projects. But, in disciplines where students have created their own research project, they are then faced with the detailed preparatory work on the literature, the methodology, and the design of the research. All of these can pose serious problems for students at the start of their projects. On the literature, students may need help in finding how to read it critically, with note-taking, and with referencing. On methodology, there are established and relatively less contested approaches in many engineering and science subjects, but in the arts and social sciences in particular students are faced with a range of different potential approaches and may have to grapple with a range of difficult philosophical, theoretical, and empirical matters. In virtually all subjects, designing a major research project is a difficult exercise for the uninitiated, with each potential design associated with opportunities and limitations which can have profound implications for outcomes.

Such matters are dealt with in general through graduate school research training programmes, and it is clearly important for supervisors to be aware of the content of these in ascertaining the support needs of their students. If graduate school programmes do not cover these matters, then supervisors may have to point students in the direction of other courses or modules available within the institution or provide a programme of study.

6. Encouraging Students to Write

As students begin to make progress with their projects, they need to be encouraged to put pen to paper as soon as possible, for four reasons. Firstly, it enables them to keep records of what they have done from the start as a basis for later work. Secondly, it encourages them to reflect on what they have done so far and think about where they will go from here. Thirdly, it gives the supervisor the chance to see what has been done, and to advise them about how to proceed. Fourthly, it gets students into the discipline of academic writing at an early stage rather than leaving it until later when it is more difficult to acquire.

But, as most experienced supervisors will testify, students are frequently extremely reluctant to produce written work. Research (see e.g. Murray 2002) suggests that there are two major factors which constrain research students from writing. One relates primarily to lack of experience of writing regularly at all, of producing long pieces of work, of producing academic writing with its demands of precision, clarity, organization and explicit structure. The other factor is confidence. Whereas, as undergraduates or postgraduates on taught programmes, students outlined and discussed the work of other people, as research students their writing becomes, or should become, a presentation of their own views, ideas, thoughts, etc. This can leave students feeling very exposed and, particularly if their standard is published work, very dissatisfied with what they have achieved. For these reasons, they may be psychologically reluctant to write.

Supervisors can help students overcome these problems in a number of ways. With regard to writing regularly, Blaxter et al. (1996, pp 59-57) suggest that students should be encouraged to keep a research diary on a daily basis recording what they have done, time spent on it, analysis, and speculation. This gets students into the habit of writing regularly, recording, and reflecting, and gives them a basis upon which to construct larger pieces of work.

With regard to writing longer pieces, supervisors can help students to make the task more manageable. So, initially, they might request a one-page abstract of the chapter setting out its aim (purpose), content (what it would cover), and possible conclusions (what it would say). With that thought through and discussed, the next stage would be to ask for a first fleshing out the abstract and setting out headings and sub-headings to be used. Then students can be encouraged to fill in the framework piece by piece until they have a draft chapter.

With regard to academic writing, students can be variously

Reflecting on Practice

Is there a training programme for research students in your graduate school or faculty? Does it fully support the student to acquire the necessary knowledge and skills in terms of evaluation of the literature, methodology and research design? How can you assist the student to acquire these in the context of their project?
referred to books on the subject (e.g. Dunleavy (2003), (Murray 2002)), given examples of such writing from the literature in their field, or even paired with a mentor in the form of a study buddy. In this way, students can begin to understand the academic writing style. It is important to include them in school social activities and point them in the direction of relevant institutional societies and common development and training programmes, or participation in conferences or professional associations.

Again, in this context, it is worth stressing that particular consideration needs to be given to supporting international research students. They are more likely to feel socially and culturally isolated than home students, and they may find it more difficult for support from supervisors or to make friends with fellow students. It is, as Ryan (2000) has argued, important to ensure that staff take an interest in the well-being of international students and assist them to join social networks. Also, where international students are accompanied by their families, consideration also needs to be given to involving spouses and children in social activities. They can feel marooned in an alien environment, and it is important to include them in school social activities and point them in the direction of relevant institutional societies and clubs.

This is a matter of fine judgement, and the answer varies from case to case and from supervisor to supervisor. But it can be suggested that, if at all possible, supervisors should try the middle way, namely suggesting a way in which the student can, by their own efforts, resolve the crisis.

Again, there is a good example of such thinking in Delamont et al. (1997, p 77), in this case covering the familiar scenario where a research student has collected a vast amount of data and is unable to organize in a coherent way, i.e. the student is 'drowning in data'. Rather than leaving them to flounder or giving out with the research, Delamont et al suggest that the supervisor should arrange for the student to prepare a seminar paper or write a working paper re-stating the central questions of the research, establishing what needs to be evidenced to answer them, and re-evaluating the contribution that the thesis will make to knowledge and understanding. This, they argue, absolves the supervisor from direct intervention while providing an opportunity for students to re-focus the research, discard extraneous material, and hopefully avoid writing the 'everything but the kitchen sink' thesis which might be referred because of inadequate discrimination of evidence.

8. Assisting with Non-Academic Problems

Research students can experience non-academic problems which can affect their research. At Newcastle, primary supervisors are also personal tutors to their graduate students, and hence the role can extend to assisting with personal and social problems as well. Supervisors thus need to be equipped to deal with problems in the same way as for undergraduate tutees although it is worth noting that a number of schools have established additional arrangements for support. In addition, there is a postgraduate tutor in each faculty. Of course, there is also a range of University services for postgraduate research students with which supervisors need to be familiar, and which are set out elsewhere in this Handbook.

In addition to particular problems, it may be noted that one of the most consistent findings of the research literature on research students (see the summary in Delamont et al. 1997, p 96) is that they suffer, to a greater or lesser degree, from intellectual and social isolation. But, as the authors point out, while a degree of intellectual isolation is inherent in undertaking an original research project, '...there is no reason for this...to be accompanied by social or emotional loneliness' and indeed this can be detrimental to the success of the research. So it is important for supervisors to ensure that there are opportunities for students to mix with others. These might include a regular postgraduate seminar, a postgraduate society, common development and training programmes, or participation in conferences or professional associations.

Research is, as argued earlier, an inherently difficult activity and it can almost be guaranteed that, at some point, students will be faced with problems. Such problems may include, for example, exploring the highways and byways of the topic and drifting too far away from the original focus of the research, setbacks in collecting data, inconsistencies in findings, problems with the status of results -- the list is endless.

The appearance of such problems can pose a dilemma for supervisors. Should research students be left to dig their own way out of the hole? Or should the supervisor pull them out, dust them down, and send them on their way again? The first way accords with the view that a research degree should be entirely the student's own work, and that the view that part of the exercise should be building self-reliance; the second recognizes that the researcher is inexperienced and that he or she needs help to recover the position and complete the thesis.
Phillips and Pugh (2000, pp 23-24) have put it: appreciate the standards which they are expected to attain. As key functions of the supervisor is to enable students to for at an intermediate stage of the research project. One of the et al of the standards that they are expected to attain (see Becher at the start or in the early stages in particular to be fully aware of the standards that they are expected to attain (see Becher et al. 1994, p 134) and even reading successful theses in cognate areas may given them a little indication of what to aim for at an intermediate stage of the research project. One of the key functions of the supervisor is to enable students to appreciate the standards which they are expected to attain. As Phillips and Pugh (2000, pp 23-24) have put it:

‘[Students] cannot get a PhD unless [they] know what the standards are...it is a vital responsibility of [the] supervisor to ensure that [they] are given every opportunity to become familiar with appropriate professional standards. It is only through this that [they] will be able to recognise and achieve them.’

Hopefully, as students learn from feedback, they should begin to internalize the standards and become able to critically assess their own work. This, of course, is part of becoming a successful researcher.

- to enable them to appreciate standards

Feedback gives the student a feeling for the standards against which their work will be judged. Students are unlikely at the start or in the early stages in particular to be fully aware of the standards that they are expected to attain (see Becher et al. 1994, p 134) and even reading successful theses in cognate areas may given them a little indication of what to aim for at an intermediate stage of the research project. One of the key functions of the supervisor is to enable students to appreciate the standards which they are expected to attain. As Phillips and Pugh (2000, pp 23-24) have put it:

‘[Students] cannot get a PhD unless [they] know what the standards are...it is a vital responsibility of [the] supervisor to ensure that [they] are given every opportunity to become familiar with appropriate professional standards. It is only through this that [they] will be able to recognise and achieve them.’

Hopefully, as students learn from feedback, they should begin to internalize the standards and become able to critically assess their own work. This, of course, is part of becoming a successful researcher.

- to improve their skills

Feedback can also assist in developing students’ skills, including methodological skills (e.g. research design, data collection, data analysis, data interpretation) and writing skills. Students may or may not have the expertise to design and implement their research projects, and one of the functions of feedback is to advise on these matters and, in the case of shortfalls, assist the students to acquire relevant skills. Similarly, students’ skills in academic writing are likely to require development, and this is part of the function of feedback.

- to give them a sense of achievement

A further, and often neglected, reason for feedback is to give the student a sense of achievement. As Brown and Atkins (1988, p 136) have put it:

‘Students need to know that their work is valued and that their supervisors are genuinely interested in it.’

Being encouraged or praised is crucial to motivating students, particularly in the early stages of the project before (hopefully) success becomes apparent and becomes an internalized driver in itself.

- to deepen their understanding

The final reason is to assist students to deepen and develop their understanding of the problem or topic that they are researching through discussion at all of the stages from inception through to completed drafts. But, if these objectives are to be achieved, feedback must be given in appropriate ways that will elicit a positive rather than a negative response from the student. Suggestions include:

- thinking about an appropriate setting for the feedback

The setting for the feedback can have some bearing on how it is received. If you sit behind your desk with the student on the other side – particularly if they are on a lower level – then the signal is one of formal interaction between a superior and an inferior. If you are side by side in armchairs, the signal is more one of a discussion between colleagues.

- opening by setting out expectations for the session

It can be useful at the start to set out your expectations for the session. In particular, you should make it clear that the primary objective is to enable further progress in the research project (see Phillips and Pugh (2000, p 174)). It also can be helpful here to make it clear that, where appropriate, you will expect students to challenge your views and opinions, and that this is a normal and essential part of the process.

- summarizing your understanding of the material submitted

One of the most useful things that a supervisor can do is to summarize your understanding of the material that the student has submitted. ‘So it seems to me that the central thrust of what you are saying is...’

- checking your understanding with the student

Once you have summarized, it can be very useful just to check that your understanding is the same as that of the student – ‘Have I got that right?’ This not only reassures students that you are taking their work seriously, but offers an opportunity to correct any misapprehensions at the start of the session.

- identifying the strengths of the work

You can then identify what you saw as the strengths of the work submitted, which is an opportunity for praise. ‘What I thought was really interesting was... what I most enjoyed reading was...’

- identifying the areas for attention

You can identify the areas for attention in ways that are constructive and positive rather than destructive and negative, e.g. ‘Why did you try to solve the problem using method X rather than method Y?’ or ‘Did you realise that you could have avoided these difficulties with method Y?’

- inviting the student to respond

Once you have identified the areas, then you can ask the student to respond. Here, it is very important that you allow the student to engage with the matters that you have raised, and in particular it must be recognized that they will need time to respond to queries about their work. You must also be prepared to listen carefully and check that the student has understood the point being made.

- summarizing the discussion

When the points have been exhausted, then it is important to summarise the discussion. You may try to draw the threads together and then check it with the student or, alternatively, you may ask the student to summarize.

- maintaining a record

Finally, for the benefit of both the student and yourself, there should be an agreed written record. Normally, this would be written by the student, copied to you, if necessary amended, and then agreed jointly. By extending the work of Partington et al. (1993, p 78) to the case of supervisor feedback, it can be said that you should avoid acting:

- as an inquisitor

This supervisor behaves like a TV interviewer quizzes a politician during an election campaign, rapidly shooting out hostile questions, interrupting the answers, and generally trying to score points. Such an approach may intimidate the students so that he or she is unable to respond or anger them to the extent that the session becomes an adversarial confrontation.

- as a committee person

The committee person takes the student through the material page by page questioning each matter as it arises rather than synthesising points into key issues relating to the research.

---

• as a hobby horse rider
  
  This supervisor has strong feelings or prejudices about one area of the submitted work and keeps returning to questions on this while neglecting other aspects of the research.

• as a kite flyer
  
  The kite-flyer has identified a – usually fairly tenuous – link between the work submitted and another subject and persists in exploring this to the detriment of the substance of the research.

• a reminiscer
  
  This supervisor continually regales the student with stories of their own research career to the detriment of feedback on the material submitted.

Reflecting on Practice
What arrangements do you make for ensuring that feedback to research students is prompt? How do you ensure that feedback is constructive? Do you maintain written records of feedback given to research students?

10. Monitoring Progress
Clearly, one of the key tasks of the supervisor is to formally monitor the progress of the research project. This normally has three aspects, namely monitoring progress with the student, monitoring it in line with graduate school requirements, and monitoring in accordance with University requirements.

With regard to monitoring progress with the student, the University requires that supervisors hold a formal meeting at least once per term with the student to review their progress and that the details should be recorded (Guidelines for Supervisors, 5). Such formal supervisions should be undertaken in a business-like way, with a date, time and agenda agreed with the student. Supervisors should ensure that, as far as possible, they should not be disturbed while they are meeting with the student.

Both to structure the meeting and to provide a record, it can be helpful to use Appendix C from the Research Training Portfolio. The pro-forma or similar can be completed by the supervisor and/or the student, but should be signed by both as a permanent record of the meeting.

In addition to formally monitoring progress with the student, supervisors normally also have to meet graduate school requirements for progress reports. So, for example, the Faculty of Medical Sciences Graduate School reviews progress at 9, 18 and 31 months into the research project, and supervisors are required to send reports to independent panels at those junctures.

Finally on monitoring, it is currently a University requirement (Guidelines, Para 6) that supervisors submit an annual report on the student’s programme of work using the University’s standard form. This should be submitted to the relevant Postgraduate Sub-Dean.

Reflecting on Practice
Do you meet your research students approximately once per month to monitor their progress? Do you do this systematically? What school requirements are there for monitoring student progress? Do you meet the University’s requirements for annual monitoring?

11. Assisting Students to Complete
After students have persevered through academic and possibly personal problems and completed the basic research, they then enter a new tunnel called ‘writing up’. While students may have conscientiously written up draft sections and chapters as they have gone along, they now face the task of putting it together as a whole and creating a thesis. This would be easy if it were just a matter of throwing together what has already been written and adding linking sections, but demand rather more. As Barnes (cited Blaxter et al. (1996, p27)) has pointed out, ‘...a thesis is far more than a passive record of [the] research and generally involves presenting an argument or point of view. In other words it must say something and be substantiated with reasoned argument and evidence’.

Students can find it difficult to translate their work into a thesis, and here the supervisor may be able to assist by giving them a framework within which to work. One suggestion (see e.g. Cryer 2000, Taylor 2002) is to ask students to think of themselves as explorers who have undertaken a journey and who are writing a guidebook for others to follow.

As guides, they need to explain where they started from, what other guides they read, why they decided to undertake the journey at all, why they went off in a particular direction, what their route was subsequently, what they discovered on the way, where they arrived at the end of the journey, how it differed from the start, and where they would go in the future. They can be asked to map this on a few sides of paper, thinking carefully about what information must be imparted to enable someone to follow, what should be imparted, and what may be interesting but not strictly necessary.

Supervisors can then give feedback on the map, both on the overall clarity of the guidebook and upon the priorities assigned to particular stages in the journey. By this means, students can begin to construct a coherent outline of the thesis.

Once the general lines are clear, students can then be asked to fill in more details of sections of the journey, and then subsections until they have a detailed guidebook. This can then be translated into the structure for a thesis, e.g. starting point (introduction), existing guidebooks (literature review), reasons (triggers for the research), direction (methodology), route and discoveries on the way (substantive research chapters), arrival (analysis and results), difference from the starting point (contribution to knowledge) and future (where research should go).

If, by these or other means, students can be assisted to establish a framework for their thesis, they then still have to write it. Here, supervisors can give guidance at least upon four key matters, namely communication, style, drafting, and managing the writing process.

A thesis is, of course, a form of communication, and it is necessary to consider in advance the audience to which it is addressed and how students might meet their needs. Here Cryer (2000, p 178) has some excellent advice which students can be given or pointed towards:

‘The crucially important audience for theses are external examiners. Think of them as individuals who are exceptionally busy and grossly under-paid and who therefore have to read theses quickly. They will expect them to be well-structured and to be argued coherently to make the case for certain solutions to specific research problems. Irrelevancies will irritate, as will having to tease out meaning that research students should have extracted themselves. Think of them also as individuals who are very able and experienced in the general area, which means that the background material should be as concise as is consistent with showing that it is known.

However, no external examiner can be an expert in your work. By the time you finalise your thesis, you and your alone are the world’s expert. So the aspects that make your work significant and original and worthy of a PhD...need to be argued coherently; each step needs to be spelled out, the outcomes must be stated unambiguously, and all their implications identified and discussed in depth.’

With regard to style, it will of course be expected that the thesis is written up in ‘academic writing’, and it has already been suggested that students should be pointed towards the literature and to exemplars of the style appropriate to their work.

In terms of drafting, even with a framework students can find this a daunting task. One way of assisting them is to encourage them to write their first draft ‘as it comes’, and then work with you to polish and re-polish it into its final form.

Again, this can pose a dilemma for a supervisor in so far as there can be a fine line between helping the student clarify what they want to say and writing it for them. There is no simple solution to this dilemma, although it can sometimes be avoided by directing students to look at other work in which similar problems have been overcome.

In the context of advising on drafts, it is worth noting that the University’s Guidelines for research supervisors (paragraph 12) state that the supervisor should not act as a proof reader and should make this clear to the student.

Last, but by no means least, students have to exercise a high degree of self-discipline to complete the thesis, particularly within a short period of time. It can be useful for supervisors to bring their students’ attention to what Delamont et al. (1997, p 121) have described as the four ‘golden rules’ of writing, namely:

- the more they write, the easier it gets
- if they write every day, it becomes a habit
- tiny bits of writing add up to a lot of writing
- the longer they don’t write, the more difficult it is to get back in the habit.

Reflecting on Practice

How do you help your students to translate their research materials into a thesis? How do you help them to write? Does your institution have a policy on the supervisor role in writing? What constitutes helping as opposed to writing it for students? Are there exemplars you can point students towards to assist their writing up?

12. Advising on Submission

The completion of the first serious draft is usually an immense relief for students. But it can be a major headache for supervisors, who need to advise students whether what they have done has the potential to meet the standards for the award, and if not what needs to be done to bring it up to scratch. Giving such advice to students can be particularly difficult at the start of a supervisor’s career, when their own experience may only be as an examinee and they are unsure about what is looked for by an examiner.

In such cases, the starting point for supervisors is to try to determine the criteria for success or failure. Here, published sources may include professional associations which have set out criteria for research degrees (see for example. British Psychological Society/UCoSDA, 1996; Royal Economic Society 1992; Royal Society of Chemistry 1995) or failing that for supervisors to bring their students’ attention to what Delamont et al. (1997, p 121) have described as the four ‘golden rules’ of writing, namely:

- the more they write, the easier it gets
- if they write every day, it becomes a habit
- tiny bits of writing add up to a lot of writing
- the longer they don’t write, the more difficult it is to get back in the habit.

Reflecting on Practice

How do you help your students to translate their research materials into a thesis? How do you help them to write? Does your institution have a policy on the supervisor role in writing? What constitutes helping as opposed to writing it for students? Are there exemplars you can point students towards to assist their writing up?

13. Advising on Examination

Once the final title has been submitted, the process of arranging the examination begins. Supervisors will normally be consulted about the nomination of examiners, usually one internal and one external. The latter in particular can, as various studies (see for example: McWilliam et al. (2002); Mullins and Kiley (2002)) have shown, involve some heart-searching by supervisors; should they suggest Professor X who is a leading authority in the field but is known to be fiercely critical of the offerings of lesser mortals, or Dr Y who is less distinguished but more likely to take a balanced approach to examining the student’s work? The ideal is, of course, an external examiner who is distinguished and who will take a balanced approach, and if at all possible, supervisors should suggest the names of examiners of this ilk.

With examiners appointed and the thesis forwarded to them for scrutiny, the supervisor then normally has to arrange the date, time and place of the final examination, the viva. In the past, this has signalled the end of the supervisor’s involvement in supervision itself as opposed to examination, but in recent years the view has grown that the supervisor should play a part in preparing the student for the experience of the viva.

Unless students have previously attended Universities in which their awards were conditional upon an oral examination, the chances are that the examination for their research degree will be their first experience of a viva. This might be of little consequence if, as in many other European countries, the viva was a public affair and they could go along and experience what happened. However, this is rare in the UK, and for most students (and for that matter first time examiners), what goes on in the viva has, historically, been a mystery, one which has only recently become the subject of systematic research (see e.g. Tinkler and Jackson (2002)).

In the absence of hard information, tales of vivas being used to inflict unnaturally cruel punishment on research students abounds with the result that, as Delamont et al. (1997, p 148) have put it:

‘The student may well fear and dread the [viva] examination. Even when the student is outstandingly competent, and however excellent the thesis may be, the process of examination is a stressful one...most [candidates] feel worried by the indeterminacy of the viva’

Here, the supervisor can play a role, in three main ways:

♦ Firstly, by de-mystifying the viva through explaining its purposes, procedures, and outcomes. In the case of Newcastle, these are set out in the University’s Handbook for the Examiners of Research Degrees (2003), and it can be helpful for supervisors to take students through the relevant parts.

♦ Secondly, by indicating what the student should do to prepare in terms of re-reading their thesis, keeping up to date with the literature, and preparing for questions.

♦ Thirdly, and perhaps most helpfully, supervisors can arrange for students to have a short mock viva in which...
colleagues who are experienced as examiners question them on a key part of their thesis and afterwards give feedback on their performance. Such an opportunity to 'taste' what is in store is invaluable in enabling students to prepare themselves both intellectually and psychologically for what is to come.

14. Assisting with Career Development, Networking, and Publication

It is good practice for supervisors to assist students with career development, networking, and the publication of their work. At one time, students undertaking a research degree, particularly a PhD, were destined predominantly for the groves of academe, and career development took the form of socializing them into the values and rituals of the relevant academic 'tribe' (see e.g. Delamont et al. (2000)). But it is no longer the case that successful research students necessary become academics – a majority do not – and even those who do follow an academic career require a wider portfolio of skills. Part of the job of the supervisor is, from the very start of the studentship, to encourage the student to actively acquire the key skills necessary to give them an edge in the labour market.

A full list of key skills is available from the Centre for Academic Development, also offers support to supervisors on how to develop them (see www.careers.ncl.ac.uk/academics). While all skills are important, it is perhaps worth highlighting one, namely the need to encourage research students to acquire the skills to give effective oral presentations. Such skills are vital in the academic context (a number of faculties include oral presentations as part of their procedures for progression and of course students need them to make presentations to seminars and conferences) and in employment. It is worth making inquiries about whether training in presentation skills forms part of the faculty research training programme, directing students' attention towards the relevant literature (e.g. Cryer (2000)), and offering opportunities for students to give mini-presentations and receive feedback.

Under the heading of skills, supervisors also need to encourage students to record the skills that they acquire over the course of their research programme for later use as evidence to prospective employers. In some graduate schools, e.g. Medical Sciences, the acquisition of skills has been formalized by requiring students to maintain Personal Development Records, but in others it may be up to the supervisor to prompt the student to acquire record skills the development of their skills. Assistance for supervisors in encouraging students to do this is available from the Careers Service.

A second function of supervisors can be to encourage students to network within the subject community and to provide opportunities for them to do so. Academia is heavily dependent upon networking informally and formally, in the latter case through professional associations and conferences (see Blaxter et al. (1998, pp 55-77)). Students need to be encouraged to establish their own informal networks of academic colleagues in their subject areas, and to join in professional networks, e.g. the postgraduate sections of professional associations. This can be important for their research, as a counterweight to isolation, and in acquiring networking skills which will stand them in good stead in any career.

A third function of supervisors is, as soon as it is practical to do so, to encourage students to publish their work in scholarly journals. Publications, particularly those during the course of a research degree, can help variously to mark out their academic territory, bring them into contact with others working in the same field, boost their self-esteem, give them a better platform for applying for jobs and, last but not least, enhance school publication rates. But students do need guidance from their supervisors about how to write for publication, which journals or publishers to aim for, and how to go about submitting a paper or a book.

Research students' writing for publications, of course, raises the issue of whose names should go on the paper. Should it be just the research student's or also the supervisor's name? This can be important for their professional networks, e.g. the postgraduate sections of professional associations. This can be important for their career, and in ensuring their own development. Networking skill which will stand them in good stead in any professional context. Given this, requirements for research supervisors have broadened significantly to include expertise from a range of relevant disciplines and sub-disciplines and/or industrial and commercial experience. Such expertise may not normally reside within a single member of staff, with the consequence that, increasingly, students have more than one supervisor, i.e. there is a supervisory team.

15. Working with Supervisory Teams

So far, these Guidelines have predominantly been concerned with good practice of the main supervisor. This is very much in line with the historical model of the British PhD which has normally involved undertaking a research project on a narrowly-focused topic within a single discipline or sub-discipline. For this reason, the main requirement for research supervision has been the possession of the highly-specific subject expertise necessary to be able to guide and support students' work within their chosen field of enquiry. Within any particular university, such expertise has normally resided in a single member of staff, and consequently the dominant mode of research supervision has been one supervisor to one student.

In recent years, however, there have been strong pressures, not least from the research councils, for research degrees to become multidisciplinary and/or involve a mix of academic research and practical application in an industrial or commercial context. Given this, requirements for research supervisors have broadened significantly to include expertise from a range of relevant disciplines and sub-disciplines and/or industrial and commercial experience. Such expertise may not normally reside within a single member of staff, with the consequence that, increasingly, students have more than one supervisor, i.e. there is a supervisory team.

But this shift has also been apparent in older forms of doctoral studies, including traditional PhDs, where team supervision has become much more common (see e.g. Joint Funding Councils (2002)).

The reason why co-supervision is becoming all but ubiquitous is the perceived benefits that it offers to both supervisors and students. The former can offer each other mutual support and learn from each other's disciplines and experience, while students have two sources of support and advice for their research. So, for example, a recent student survey by the Wellcome Trust (cited Frame and Allen (2002, p 101)) found that co-supervision was valued:

'...primarily to ensure accessibility at any time to at least one senior researcher with knowledge and involvement in the research and as a back-up, providing a second person or team, on whom ideas could be discussed.'

But, as any reader of the student-based literature on supervision by committee in the US (see e.g. Peters (1997),
Fitzpatrick et al (1998)) will be aware, it can also lead to problems with potentially serious consequences for doctoral students. Co-supervisors may disagree as to the aims and objectives of the research project which, as Cryer (2000, p 79) suggests:

‘...puts tremendous burdens on the research student who has to integrate the understanding of both and satisfy both. The research student too often ends up satisfying neither, and each co-supervisor can tacitly abdicate responsibility to the other.’

So, if there is co-supervision, it is good practice for supervisors to spend some time discussing how to establish a professional relationship with each other, as well as with the student. Such a discussion should encompass agreeing notions of what they are supervising, deciding they are to work with each other to integrate their own understandings of the topic and give consistent advice to students, and determining what their respective roles should be.

It should be noted that, where there are co-supervisors, it is a requirement at Newcastle that one supervisor who is a member of the academic staff should be designated as the primary supervisor, and the other as a secondary supervisor. While the University prescribes that the former should ultimately be responsible for supervising the student's work, at present it does not offer further guidance as to precisely what the division of labour should be between the primary and secondary supervisors. Particularly in cases where the student spends part of their time outside Newcastle studying under a second supervisor, it is necessary to specify who is responsible for what. Here, a useful template which could be adapted for use at Newcastle, has been developed at City University, and is set out overleaf.

### Reflecting on Practice

<table>
<thead>
<tr>
<th>Question</th>
<th>Consideration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do you discuss the requirements for a research degree with your co-supervisor at the start of the studentship?</td>
<td>You and your co-supervisor clear ideas of who is responsible for what in supervising the student?</td>
</tr>
<tr>
<td>Do you discuss ways of resolving inter-disciplinary differences and giving consistent advice to students?</td>
<td></td>
</tr>
</tbody>
</table>

### Conclusions

Being an effective researcher is a necessary condition to be a research supervisor, but it is not a sufficient one; the latter requires being an effective supervisor as well. That, in turn, involves unpacking what is involved in effectively supervising a research student, reflecting on practice, and improving it. Hopefully these Guidelines will at least give food for thought in encouraging supervisors to review their effectiveness.

### References

London: Falmer.

The internal supervisor:

Accountability
- represents the institution making the award and is accountable for the satisfactory completion of the project.
- clarifies to the student and external supervisor, prior to commencement of the research, the University’s requirements regarding scope, content, structure, timing and intellectual level of a research thesis appropriate to the target qualification.
- confirms any financial arrangements, and modus operandi for information exchange, progress review, production of interim reports and papers and relevant inter-vivos meetings.
- discusses with the student the general role of an external supervisor, and any characteristics peculiar to a supervisor for the proposed research, and requests nominations from the student.
- discusses with potential external supervisor their role, and the student’s proposed programme, and confirms any changes agreed by both supervisors and the student.
- progresses the student’s application and liaises with the School/School Senior Tutor/Director of Research and Board of Studies on the required formalities for progress and annual report.

Knowledge
- agrees with the student a potential research question or proposition that meets the University’s requirements and fits the student’s interests and opportunities.
- gives guidance about: the nature of research and the standards expected; the planning of the research programme; literature and sources; requisite techniques; and the avoidance of plagiarism.
- gives advice on the structure and layout of the thesis.
- ensures that the student is aware of appropriate health and safety regulations.

Training
- arranges training on subject-specific material and skills and generic skills as appropriate.
- arranges, as and where appropriate, for the student to talk about his/her work to staff or graduate seminars and to have practice in oral examinations.

Time and Contact
- reviews student submissions, and discusses content and timing with student and external supervisor, with recommendations of any general changes needed to meets the University’s standards.
- ensures that the student is made aware of any inadequacy of progress or standards of work below that generally expected, confirming this in writing to the student and arranging any supportive action necessary.

Introduction to the Field
- arranges, as and where appropriate, for the student to talk about his/her work to staff or graduate seminars.

The external supervisor:

Accountability
- acts as coach and counsellor to help the researcher to meet the goals agreed between them and the internal supervisor.

Knowledge
- possesses sufficient knowledge of the research area to provide accurate advice and guidance on the project.

Time and Contact
- prompts a regular review of the plan and setting agreed targets.
- possesses sufficient available time, after all other responsibilities have been taken into account, to dedicate to the needs of each individual research student he/she is supervising.
- maintains contact through regular tutorial and seminar meetings in accordance with School policy and in the light of discussion of arrangements with the student.
- is accessible to the student at other appropriate and reasonable times when he/she may need advice.
- requests written work, as appropriate, and returning such work with constructive criticism and within reasonable specified time.

Introduction to the Field
- takes an active role in introducing the student to other workers in the field, and the appropriate academic bodies and societies.

Reporting
- provides an annual report through the Senior Tutor/Director of Research to the Board of Studies on the student’s progress, with a copy to the student.
- provides comment on the research student’s learning experience and support infrastructure at the University as part of the Research Study Annual Report Exercise.

Arrangements for Examination
- makes the initial recommendations for examiners and makes arrangements for the student’s oral examination.

Guidance for the Future
- provides, in conjunction with the external supervisor, guidance, encouragement and counsel regarding the future career plans of the research student.
University Handbook for Examiners of Research Degrees by Theses

Introduction
The University is, of course, responsible for the quality and standards of postgraduate research awards made in its name. The function of examiners is to assist the University to discharge that responsibility by ensuring that the standards of postgraduate research awards at Newcastle are at least comparable to those in similar subjects in other Universities in the UK. The purpose of this Handbook is to set out (1) procedures for the nomination of examiners (2) criteria for selection (3) procedures for appointment (4) the duties of the external examiner of research degrees and (5) guidelines on good practice in the performance of those duties followed by (6) conclusions. The Handbook covers research degrees by thesis only, i.e. the degrees of MPhil, DDS, DBA, MD and PhD.

1. Nomination
Candidates for postgraduate research degrees must complete the minimum period of registration required for the award and formally submit the exact title of their thesis for approval to the postgraduate dean of their faculty not less than one month before they intend to submit it.

At the same time as the title is submitted, the head of the school in which the candidate is studying should nominate examiners for the thesis on the approved form for this purpose. Heads of school should consult supervisors about nominations. In the case of student candidates, heads of schools should normally nominate one external and one internal examiner who is not the candidate’s supervisor. In exceptional cases where the University is unable to appoint an internal examiner a second external examiner will be appointed. Where two external examiners are appointed, the dean of postgraduate studies will also appoint an independent member of University staff who will chair the viva.

2. Criteria
In making nominations, heads of school should, in consultation with supervisors, seek to identify prospective examiners who:

♦ are fully cognisant with standards for the award of research degrees in the subject in comparable institutions
♦ have significant experience and knowledge of research in the subject area within which the candidate is working
♦ command authority in the field and the respect of their subject community
♦ have played no personal part in the research undertaken by the candidate
♦ and, in the case of the external examiner(s), have not been a member of staff at Newcastle for at least five years
♦ are able and willing to examine candidates and to complete the process of examination within a specified period

Heads of school should present evidence, e.g. a short CV and a list of recent publications, that nominees fulfil these criteria. Subject to the presentation of satisfactory evidence, postgraduate deans make recommendations to Senate.

3. Appointment
Examiners are appointed by the dean of postgraduate studies on behalf of Senate. Following appointment examiners are

sent:
♦ a letter setting out the terms and conditions of appointment
♦ a copy of the University's Regulations governing the relevant research degree
♦ the relevant Examination Conventions
♦ relevant information about the programme followed by the candidate
♦ the University's Handbook for Examiners of Research Degrees by Theses
♦ a copy of the work submitted by the candidate in fulfilment of the requirements for the award
♦ forms for reporting on the examination

4. Duties
The core duties of examiners for research degrees are:

♦ carefully to consider the written work submitted by candidates
♦ to arrive at an independent evaluation of whether the work submitted meets the standards of the award and, if not, in which aspects it is deficient
♦ to write a preliminary report and send it to the graduate school administration for forwarding to the relevant postgraduate dean
♦ to consult with other examiners and compare preliminary reports
♦ in the case of research degrees where vivas are optional, to decide if it is appropriate to use this means of determining a candidate's suitability for the award
♦ to agree with the supervisor a date and time for the viva
♦ to prepare for the viva before the viva, to compare independent reports with the other examiner and agree an agenda for the examination
♦ to conduct the viva examination
♦ following examination of all written and, where appropriate, oral evidence, to decide whether the candidate has met the standards for the award
♦ to decide upon an appropriate recommendation to the dean of postgraduate studies (the full list of recommendations allowed under University regulations is set out later in this document)
♦ to write a final report with other examiner(s) on the candidate's performance and submit it on the approved form to the graduate school administration.
♦ in all cases where the recommendation is that the thesis be revised before award or re-submission for the original or a lesser degree, to agree with the other examiner(s) a full list of the changes to be made and/or work to be undertaken. This should be given to the candidate and supervisor as soon as possible after the viva and a copy attached to the final report.
♦ in the case of external examiners, to comment upon any aspects of a candidate's experience which they have judged to be particularly good or which have raised problems. This should be forwarded to the graduate school administration for forwarding to the relevant dean of postgraduate studies.

5. Good Practice
The purpose of this section is to try to outline good practice in the examination of research degrees by thesis. There is no intention to be prescriptive, just to give a view of the processes involved. These processes are divided into pre-examination,
5.1 Pre-examination
Before reading the work submitted, examiners should consider the criteria against which to evaluate theses. Such criteria may relate to the chapters of the thesis, the thesis as a whole and the award.

5.1.1 Criteria relating to chapters of the work
Criteria relating to specific chapters of the work will vary considerably between subjects and, within subjects, between topics. But they may include, for example:

- **The context**
  - that the research question(s) have been placed in their academic and, where appropriate, industrial or commercial contexts
  - that, in the case of a thesis undertaken as part of a team project, the relationship of the research to the overall project is set out along with the contribution of the candidate relative to that of other team members

- **The literature**
  - that the relevant literature or an appropriately justified section of it has been covered
  - that the literature is reviewed in ways which are critical and analytical and not just descriptive
  - that the thesis demonstrates clear mastery of the literature
  - that explicit links are made between the literature and the topic of the thesis
  - that there are explicit links between the literature and the design of the study
  - that there is a summary of the literature in so far as it relates to the thesis topic

- **Methodology/methods**
  - that there is an awareness of the range of methodologies/methods which have been or might be used to tackle the topic
  - that there is adequate justification of the methodology(ies)/methods adopted for the research
  - that the methodology/methods are related to the design of the research
  - that practical problems and issues are identified and discussed
  - where applicable, that ethical considerations are outlined and discussed
  - where applicable, that matters of reliability and validity are identified and discussed

- **Design of the study**
  - that the design of the study is appropriate to the topic
  - that there is awareness of the limitations of the design adopted

- **Substantive research**
  - that the research design has been properly implemented
  - that the relevant sources of evidence have been explored

- **Analysis**
  - that appropriate theoretical and, where applicable, empirical techniques are used to analyse evidence
  - that the level and form of analysis is appropriate to the evidence

- **Outcomes/Results**
  - that the outcomes/results identified relate to the topic
  - that the outcomes/results are justified on the basis of the analysis of the evidence
  - that the outcomes/results are presented clearly
  - where applicable, that patterns and trends in the outcomes/results are accurately identified and summarized

- **Discussion**
  - that the main points emerging from the outcomes/results have been picked up for discussion
  - that there is an awareness of the limitations of the outcomes/results

- **Conclusions**
  - that the conclusions relate to the initial focus of the study
  - that the conclusions drawn are justified by the study
  - that the implications of the conclusions for the field of knowledge have been identified

5.1.2 Criteria relating to the thesis as a whole
For all research degrees, the University requires that work presented for examination should be:

- **Authentic**
  The thesis should be the candidate's own work and not plagiarized from the work of others, published or unpublished. All sources used should be appropriately acknowledged using a recognized form of referencing

- **Scholarly**
  The thesis should conform to the normal canons of scholarship, displaying critical discrimination and a sense of proportion in evaluating evidence and the opinion of others. Sources should be cited accurately, consistently, and correctly in the text and in the bibliography.

- **Professional**
  The thesis should demonstrate that the candidate has acquired or extended a repertoire of research skills appropriate to a professional researcher in his/her field and has a clear understanding of the role of such a researcher.

- **Well-structured, written, and presented**
  The thesis should be clearly structured and orderly in arrangement, and well-written and presented. Similarly, any composition, exhibition, artefact(s) or other products of practice arising from the research should be arranged and presented in an orderly and coherent way.

5.1.3 Specific criteria relating to the award:

- **MPhil**
  In addition to the above, for the MPhil the University requires that the thesis should demonstrate an advanced knowledge of the subject including a satisfactory knowledge of the literature. It does not require that it should be original or worthy of publication

- **DDS/MD/PhD**
  The criteria here are that the thesis
  - should show evidence that the subject has been studied with adequate industry and application
  - demonstrates an ability to conduct original investigations and to test the ideas of the candidate and those of others
  - shows that the candidate understands the relationship of the theme of his or her thesis to the wider field of knowledge
  - exhibits substantial evidence of original scholarship
  - contains material worthy of publication
5.2 Examination of Written Work
While it is good practice to have clear criteria in mind prior to reading the thesis, it is recognized that different external examiners will have their own methods. What follows below are simply suggestions which may be of interest to those new to examining (experienced examiners may wish to skip to this section).

In their Handbook for Examiners, Brown, Partington and Gordon (1993) suggest that examiners should:
♦ Start by gaining an overall impression of the substance of the thesis or dissertation
Examiners can start by reading the full title, the abstract, and the introduction and then turn to the final chapter(s) to see what conclusions were reached. This should enable them to gain an overall impression of what the thesis is about and what has come out of it.
♦ Reflect and re-formulate criteria relating to sections of the thesis
Examiners may then reflect and consider how the criteria relating to the sections of the thesis (5.1.1 above) might be applied to the topic in question, e.g. the literature the candidate might be expected to have read, which methods would be appropriate, etc. etc. By the end of this examiners should have effectively translated the criteria into a set of clearly-defined questions to be asked of the specific piece of work before them. In addition, their reflection may have led to new questions about the research.
♦ Read and note
Examiners can then carefully read each chapter of the thesis or dissertation with the relevant questions in mind. They can note where questions have been answered satisfactorily, where clarification is needed, and where answers are not satisfactory. As, in the course of reading, additional questions occur, these may be noted and views recorded on how well the candidate has answered them in the present chapter or in subsequent ones.
♦ Reflect and summarize
Examiners should now have a clear idea of how far each section of the thesis meets the relevant criteria. These may be summarized to identify the strengths and weaknesses of the thesis and to highlight issues where clarification is required
♦ Consider whether the thesis meets the general criteria
In the process of reading the thesis section by section, examiners will have begun to formulate an impression of how it meets the more general criteria concerning authenticity, scholarship, and structure, presentation and citation (5.1.2 above). They may now consider how far the work meets these criteria and note where the work does fulfill them, where there is doubt, and where they are not met. This may involve re-reading all or part of the thesis and would normally include checking a sample of citations.
♦ Consider whether the criteria for the award have been met
The last area for consideration is whether the thesis meets the award specific criteria. It can be helpful here for examiners to refresh their memory of the University’s regulations, in particular in the case of the PhD to consider the definition of originality. Again examiners should note in what respects the thesis meets the criteria, where this is unclear, and where it does not meet them.

If examiners follow the above, they should have notes on the extent to which the criteria are met for sections of the thesis, the latter as a whole, and in relation to the award. These notes should form a basis for writing a preliminary report.

5.3 The Preliminary Report
Examiners should then independently write a preliminary report which will indicate their provisional assessment of the thesis and of the issues to be explored in the viva. The University recognizes that these reports will vary considerably depending upon the discipline and the subject matter of the thesis. But it would normally expect that, if the criteria have clearly been fully met, the report will normally be very brief. But, on the other hand, if examiners have serious doubts or concerns about whether criteria have been met, a fuller account would be expected.

A copy of the preliminary report should be sent to the graduate school administration in advance of the oral examination for forwarding to the relevant dean of postgraduate studies. The preliminary report should not be shown to the candidate.

5.4 Oral Examination
The purpose of the viva is to gather further evidence from the candidate about their suitability for the award, in particular:
♦ to ask the candidate to clarify issues relating to meeting criteria relating to specific parts of the thesis, to the thesis as a whole, and to the award
♦ to ascertain that the thesis is the candidate’s own work, that he or she has developed research skills at this level, and that he or she understands the relationship of the thesis to the wider field of knowledge
♦ in cases where the thesis or the candidate for the award clearly does not meet the criteria, to find out the reasons. These may include the abilities of the candidate or other factors affecting the research, e.g. deficiencies in research training, the quality of supervision, the availability of resources, disruptions to the research process, or personal circumstances

It is normally the supervisor who arranges the date, time and place of the viva. The supervisor should normally be available for consultation if necessary prior to and during the viva although they are not normally present (except in cases where the supervisor is appointed as an examiner). Examiners should have a meeting, normally a couple of hours before the viva, to exchange and discuss preliminary reports. Examiners should then, bearing in mind each other’s comments upon the written work, jointly determine:
♦ the key issues to be raised with the candidate
These will be those identified in the initial reports where clarification is required or where criteria have not been met.
♦ the order within which they are to be raised
In order to encourage candidates to talk, it can be helpful to raise relatively uncontroversial/factual issues at the start and then proceed to ones which are likely to be more difficult/conceptual when he or she is in the swing of things.
♦ who will ‘lead’ on each issue
Examiners usually decide upon a division of labour based upon their expertise in the topic, with one leading on each issue and the other asking supplementary questions

Normally, the external examiner chairs the proceedings and has overall responsibility for conducting the viva. In cases where there is more than one external, it should be agreed who will undertake this role.

Good practice in conducting a viva is:
♦ to ensure that the room is appropriately laid-out
The viva is a formal occasion, and the room should be appropriately laid out.
♦ to introduce the examiners to the candidate
It is courteous to the candidate for the chair of the examiners to introduce him- or herself and the other examiner(s) to the candidate.
♦ to explain the purpose of the viva to the candidate
It can be useful to explain to candidates that the purpose of the viva is to provide them with the opportunity to defend their thesis in high-level debate with experts drawn from the
to explain the process of the viva to the candidate

As many candidates will not have previously undertaken a viva, it has been pointed out (see UCoSDA/British Psychological Society, 1995) that it can be helpful to explain the process to them. This involves the examiners asking questions about their work and supplementary questions based upon their answers.

The chair should make it clear that the examiners have a duty to thoroughly explore both the work presented and the candidate’s knowledge and understanding of both it and the wider field and that persistent questioning is a normal and necessary part of the process.

If he or she wishes, the chair should also say that no information about recommendations will be given until the examiners have conferred after the end of the viva but make it clear that this again is part of the process and that no inferences should be drawn.

The candidate should also be told that he or she may, if they wish, consult with their copy of the thesis throughout the viva.

to start by commending the candidate

Candidates can be extremely nervous, and it is important to try and settle them down at the start of the viva by saying something commendatory but non-committal, e.g. ‘We found your thesis very interesting’, ‘we particularly enjoyed...’.

to question the candidate

Examiners should then start the questions. Normally, the external examiner begins the questions, and he or she should choose ones to start with which candidates should be able to answer without undue difficulty, e.g. why did you decide to do this topic?, what aspect of the work have you most enjoyed? Further questions should then be asked covering the key issues and in the order previously identified. In questioning the candidate, examiners should:

- ask questions in a constructive and positive way
- use an appropriate range of questioning techniques

Questions may, as Murray (1998) has noted, be general (‘How did you come to study this topic?’), open (‘tell me about your methodology?’) or closed (‘why did you think that the confidence limits were unimportant in this case?’).

General or open ones are useful in encouraging the candidate to reflect upon their work, while closed ones lead to specific answers. Examiners should try to tailor the type of question to the type of answer required and, if possible, aim for a mix of general and open questions (which are harder to answer but can reveal much more about the candidate) and closed ones (which may reveal less but are easier for the candidate to answer).

- recognize that candidates may need time to answer
- praise a good answer

When candidates give a particularly incisive or interesting answer, it can be helpful to their morale to praise them

- give candidates a chance to recover from a poor answer

When candidates give a poor answer, this may be through misunderstanding or nerves. Rephrasing a question and asking it again gives the able candidate the opportunity to recover the position or may confirm the inability to respond of a weaker one.

to conclude the viva

After you and your co-examiner(s) are satisfied that you have gathered the relevant evidence, you should indicate this to the candidate, thank them for answering your questions, ask whether there are any concluding comments which they wish to make, explain again that the examiners will now consult about the outcome, and tell them how the recommendation will be communicated to them. While this may be done informally after the viva, candidates should be informed that formal notification of the result will be given by the Registrar’s Office.

Poor practice in conducting the viva (see Partington, Brown and Gordon (1993: p 78) would be for an examiner to act throughout as:

- an inquisitor

This examiner behaves like a TV interviewer quizzing a politician during an election campaign, rapidly shooting out hostile questions, interrupting the answers, and generally trying to score points. Such an approach may intimidate the candidate so that he or she is unable to respond or anger them to the extent that the viva becomes an adversarial confrontation.

- a proof reader

This examiner takes candidates line by line through their theses asking questions about errors of spelling, punctuation and grammar. If these are exceptionally poor, instead of proof reading in the viva, examiners can make it a requirement that the thesis is re-typed or hand the candidate a list of corrections after the viva.

- a committee person

The committee person takes the candidate through the thesis page by page questioning each matter as it arises rather than synthesising points into key issues relating to the trigger for the study, the methodology, the design, etc.

- a hobby horse rider

This examiner has strong feelings or prejudices about one area of the thesis and keeps returning to questions on this while neglecting other aspects of the research.

- a kite flyer

The kite-flyer has identified a – usually fairly tenuous – link between the thesis and another subject and persists in exploring this to the detriment of the examination of the topic as defined by the candidate, i.e. effectively examines a thesis which the student did not write.

- a reminiscer

This examiner continually regales the candidate with stories of their own research career to the detriment of the examination of the candidate’s work.

5.5 Post-examination

After reading the thesis and, if appropriate, conducting the viva, examiners have to decide upon a recommendation, write a report on the examination, and decide what information should be given to candidates required to amend or re-submit theses or dissertations. External examiners are also invited to make comments on any aspect of candidate’s experiences which they have judged to be particularly good or which have raised problems.
5.5.1 Deciding upon a Recommendation

Following the first submission and examination of a candidate, the examiners may make the following recommendations:

(a)(i) That the candidate be admitted immediately to the degree of Doctor of Philosophy.

(a)(ii) That the candidate be admitted to the degree of Doctor of Philosophy subject to minor revisions being made to the satisfaction of the main supervisor, normally within a period of one month of receiving formal notification of the revisions to be made.

(a)(iii) That the candidate be admitted to the degree of Doctor of Philosophy subject to minor corrections of the text made to the satisfaction of the main supervisor, normally within a period of six months of receiving formal notification of the corrections to be made.

(b)(i) That the candidate be permitted to revise and re-submit the thesis within twelve months and be re-examined orally.

(b)(ii) That the candidate be permitted to revise and re-submit the thesis within twelve months, without a further oral examination.

(c) That the candidate’s thesis be deemed to be of a satisfactory standard, but that the candidate be adjudged to have failed to satisfy the examiners in the oral examination and that the candidate therefore be required to submit within six months either for a second oral examination or for a written examination, as the examiners shall determine.

(d)(i) That the candidate has reached the standard required for the appropriate Master’s Degree and should immediately be awarded that degree instead.

(d)(ii) That the candidate has reached the standard required for the appropriate Master’s Degree and should be awarded that degree instead subject to minor corrections of the text made to the satisfaction of the main supervisor, normally within a period of one month of receiving formal notification of the corrections to be made.

(d)(iii) That the candidate has reached the standard required for the appropriate Master’s Degree and should be awarded that degree instead subject to minor revisions being made to the satisfaction of the internal examiner, normally within a period of six months of receiving formal notification of the revisions to be made.

(e) That the candidate be permitted to revise and re-submit the thesis for the appropriate Master’s Degree within twelve months and, if the examiners so require, be re-examined orally.

(f) That no degree be awarded and that the candidate be deemed to have failed.

Recommendations for award ((a) above)

In cases where examiners are satisfied that all of the criteria for the award are fully met, they should recommend the award of the degree immediately or subject to minor textual corrections subject to the satisfaction of the supervisor or minor revisions to the satisfaction of the internal examiner.

Other recommendations ((b) to (f) above))

In cases in which examiners are not satisfied that all of the criteria are fully met and are unable to recommend award, then there is a range of other recommendations which can be made. In deciding which of these to make in a given case, examiners should take into account:

♦ the potential to meet the standards for an award

A recommendation to revise a thesis for resubmission and re-examination should only be made if, in the judgement of the examiners, it has the potential to meet the standards for the original award submitted for or for another award. If it does not, then it should be failed.

♦ the amount of work entailed in revising the thesis

It is possible to recommend that the thesis should be revised and resubmitted within either six or twelve months, and examiners have to make a judgement about the amount of work entailed. If this is a re-writing of sections of the thesis, then normally six months is appropriate; if it is a complete re-write, then twelve months would be appropriate. If further research is required, this should normally be secondary, e.g., discriminating data or recalculating statistics, and not primary, e.g., gathering new data.

♦ external factors relating to the research

While, of course, external factors relating to the research must not generally be regarded as extenuating in the context of recommending award, examiners may wish to take them into account when considering the time within which a candidate should have the opportunity to revise and re-submit their thesis, subject to the maximum of twelve months.

Such factors may include:

– the quality of supervision received by the candidate, e.g., problems between students and supervisors, disrupted supervision

– facilities available for research, e.g., inadequate resourcing of equipment, unexpected non-availability of equipment, problems with technical support, inadequate library facilities

– research procedures, e.g., access to participants/clients, patients who have withdrawn unexpectedly, delays in gaining ethical approval for experiments

– the personal circumstances of the candidate

While personal circumstances must not generally be regarded as extenuating in the context of recommending award, examiners may wish to take them into account when considering specifying the time within which a candidate should have the opportunity to revise and re-submit their thesis, subject to the maximum of twelve months.

Such personal circumstances may include illness, pregnancy, personal stress, linguistic or cultural difficulties in undertaking and writing up the research. There should normally be documentary evidence covering such circumstances.

Additionally, in the rare cases of candidates whose thesis is satisfactory but who fail the viva examination, personal circumstances may be taken into account in considering whether to hold a second viva or to hold a written examination. So if, for example, there are medical reasons why the candidate will viva poorly or in cases where candidates are returning overseas and will find it difficult to return for a second viva, examiners may consider substituting a written test.

5.5.2 Writing the Final Report

The final report should be written, ideally, immediately following the viva or as soon as possible thereafter. In the vast majority of cases, examiners independently arrive at the same verdict and concur in the recommendation. They should then jointly complete the supplied final report form. This involves completing a checklist of how far the criteria for the award have been met by the candidate and stating the recommendation to Senate. Final reports should be sent to the graduate school administration which will, subject to approval by the relevant postgraduate dean, forward them to the candidate and the candidate’s supervisor.

In a few cases, examiners may be unable to agree upon a recommendation. In this case, they should complete the form indicating their recommendations and the grounds for disagreement, and forward it to the graduate school administration. (This report will not be made available to the candidate but will, if the candidate should subsequently appeal, form part of the formal record of appeal). The University will then appoint a new external examiner who will re-examine the thesis, if necessary conduct a further viva, and
make a recommendation which is final. The additional examiner shall be told that the previous examiners had failed to reach agreement but will not have sight of the report. On the occasion of the second oral examination the candidate’s supervisory team (and where appropriate the Internal Examiner) shall be available to be consulted by the additional external examiner. The dean of postgraduate studies shall appoint a member of University staff as an independent observer, who will report on the conduct of the viva. The main supervisor shall co-ordinate the arrangements for the oral examination. After the conclusion of the oral examination, the additional examiner shall make a recommendation which shall be final. He/she shall submit a final report to the relevant Graduate School Office which will, subject to the approval of the relevant dean of postgraduate studies, forward it to the candidate and the candidate’s supervisory team in the normal way.

5.5.3 Giving Information to Candidates Required to Revise or Resubmit Work

In cases where the recommendation is that changes need to be made to the thesis before resubmission, it is the responsibility of the examiners to provide full details of all changes and revisions required. The list of revisions required should be given to the candidate and the candidate’s supervisor as soon as possible after the viva and a copy attached to the final report which is forwarded to the graduate school administration. The latter then communicates these in writing to the research supervisor and to the candidate. It should be noted that the presumption is that if the candidate makes these changes and revisions to the satisfaction of a designated examiner (normally the internal examiner for students and an external for staff) or, if specified, all examiners, this will lead to a recommendation for award.

It is therefore important that, before they part after the viva, the examiners agree exactly what the student is required to do before resubmission. Where the recommendation is that the degree be awarded subject to minor textual changes, this will simply consist of a list of the corrections required, but where the thesis is referred for resubmission within six or twelve months, a more substantial list of changes/work to be done must be provided. It is vital that this is comprehensive – a student who has made all of the changes required by the examiners but who is then denied the award because of further deficiencies would have good grounds for appeal.

5.5.4 Commenting upon the Candidate’s Experience

External examiners are invited to make any relevant comments upon aspects of a candidate’s experience which they feel have been particularly good or which have raised problems. These should be addressed in a separate letter to the graduate school administration which will forward a copy to the relevant dean of postgraduate studies for consideration.

6. Conclusions

The examiners are key figures in ensuring that the standards of research degrees meet the University’s criteria and are at least comparable with those in other UK Universities.

The University ensures that examiners of research degrees are of high standing in their discipline, and that they bring a knowledge and understanding of discipline-specific standards to their duties.

In performing those duties, the University expects that examiners will be rigorous and fair and that they will follow good practice, as set out above or in other ways.

By undertaking their duties in this way, examiners not only maintain standards at Newcastle but, of course, also act as effective gatekeepers for the research community of which they are a part by ensuring that candidates meet the academic criteria for membership.

Guidelines for Assessment of the PhD in Psychology and Related Disciplines (Sheffield: ESRC and UCoSDA, 1995)

R.Murray, The Viva (University of Strathclyde: Centre for Academic Practice, 1998)

Standards of Academic Conduct

The University requires all students to maintain high standards of academic conduct and, in particular, to avoid conduct amounting to cheating in examinations, the fabrication of research results or plagiarism.

Cheating in examinations includes: copying from or conferring with other candidates; the possession or use of unauthorized material or equipment; and the impersonation of an examination candidate. Candidates who knowingly permit themselves to be impersonated, or their work to be copied, will be regarded as cheating. Any student suspected of having cheated in examinations will be dealt with under the University's Assessment Irregularities Procedure and may also be subject to disciplinary action as determined by the Academic Registrar in accordance with the University's Disciplinary Procedures approved by Council.

The fabrication of research results includes: claims, which cannot reasonably be justified, to have obtained specific or general results; false claims in relation to experiments, interviews, procedures or any other research activity; and the omission of statements in relation to data, results, experiments, interviews or procedures, where such omission cannot reasonably be justified. Any student who is suspected of having fabricated research results in relation to submitted and assessed work which contributes to an examination or degree result, will be dealt with under the University's Assessment Irregularities Procedure and may also be subject to disciplinary action as determined by the Academic Registrar in accordance with the University's Disciplinary Procedures.

Plagiarism is the unacknowledged use of another person’s ideas, words or work. At one extreme, plagiarism is simply a form of cheating, such as where the whole or a significant part of work submitted towards an examination or degree is the unacknowledged work of another, copied slavishly from a book or research paper. At the other extreme, plagiarism may occur accidentally, through poor standards of scholar-ship, or may concern insignificant parts of submitted work. Plagiarism may involve the use of material downloaded from electronic sources such as the Internet.

Students are sometimes unclear as to what use may be made of the work of others in the field without raising concerns about plagiarism. Any student who is in doubt on this matter should consult his or her tutor or supervisor. In most cases, the adoption of appropriate standards of scholarship will avoid any such concerns. The following general guidelines may assist:

1. Passages copied verbatim from the work of another must be enclosed in quotation marks. A full reference to the original source must be provided. The substitution of a few words in an otherwise verbatim passage will not obviate the need to use quotation marks and to provide a full reference.
2. Students must always give due acknowledgement to the sources of ideas or data which are not their own and are not truly in the public domain (for example, because they are novel or controversial) or are not widely held or widely recognized.
3. Ideas and data which are the student's own or are truly in the public domain may be included without attribution, but should be expressed in the student's own words.
4. Students must take care to distinguish between their own ideas or work and those of others. Any ambiguity in such a distinction could give rise to a suspicion of plagiarism.
5. Where the student's work is the result of collaborative research, the student must take care to acknowledge the source of data, analysis or procedures which are not their own.

Students who are suspected of having made the unacknowledged use of another person's ideas, words or work in submitted and assessed work which contributes to an examination or degree result, will be dealt with under the University's Assessment Irregularities Procedure and may also be subject to disciplinary action as determined by the Academic Registrar in accordance with the University's Disciplinary Procedures.

Guidelines on External Funding – RIS Input

Research and Innovation Services (RIS) can assist research supervisors in the following areas:

- Negotiation of research studentship funded projects with external organizations.
- Advice on student intellectual property issues including assignment of Intellectual Property to the University.
- Advice on other contractual obligations relating to confidentiality, publication, reporting.

Full information on these and other information relating to studentships can be found on the Research and Innovation Services website at www.ncl.ac.uk/ris/central/pages/resources/wallen/research_studentships.htm

The RIS website also has details of who to contact in Research and Innovation Services.

Advice for Collaborative Studentships

ESRC document ‘On the Case’ (E Bell and C Read, 1988)

The full, very comprehensive document is available from the relevant graduate school or the Student Progress Section. The contents of the full document are listed below:

SECTION 1
- Introduction: where it all started
- The growth of collaborative research
- The ESRC perspective

SECTION 2
- The beginning: principal issues in setting up a collaborative studentship
- Understanding non-academic organization perspectives
- Developing and setting the standards of the research project
- Intellectual property rights arising from the research
- Public dissemination of research results/confidentiality issues
- Recruiting the student

SECTION 3
- Up and running: managing and monitoring a collaborative studentship
What to do when your research nears completion ...

Submission of Thesis
Approximately three months prior to the completion of your thesis you need to submit a form for the approval of your thesis title to your supervisor. (The form can be collected from your graduate school). Your supervisor will also use this form to begin the process of appointment of your examiners. You are advised to ensure that debts are cleared in advance of submitting this form.

When you submit two soft bound copies of your thesis to the graduate school, you will be required to complete a Research Degree Examination Entry form. This form has a declaration from you regarding your work and will be used to check that all your financial obligations to the University have been met.

Once your soft bound theses have been received by the graduate school they will be forwarded to your examiners with copies of regulations and forms for their reports.

Your supervisor will arrange the viva date, in consultation with the examiners and yourself.

The graduate school will inform you of the result of your examination, and give details of any revisions that may be required along with the deadline for your resubmission.

Once you have been informed in writing by the graduate school that the examiners have agreed that you have met all the conditions for your award, you will be asked to submit two hard bound copies of your completed thesis. You will need to also complete the British Library forms at this time. These are submitted to the graduate school your passlist will be produced and you will be asked to complete the forms for your congregation where your award will be conferred.

Conferment of Degrees
When the passlist is produced you will become eligible to graduate with your research degree. Congregations are held in May, July and December each year for the conferment of a higher degree. When passlists have been produced, students will be invited to apply to graduate at the next available ceremony. Students need to apply to be included in a particular ceremony. You will not be entitled to describe yourself as holding a degree unless this has been awarded either 'in person' or 'in absentia' at a Congregation as a result of your application. If you do not make an application, your degree will not automatically be conferred and your degree parchment will not be issued. For further information on any aspect of Congregations, please refer to the Congregations website: www.ncl.ac.uk/congregations or contact Mrs Dawn Gray, Congregations Administrator, telephone: 0191 222 6225.

Code of Good Practice in Research

The University expects all its researchers and students to adhere to the highest standards of integrity in research. This statement addresses the issues involved in the proper conduct of research and provides guidance on the standards expected. It applies to staff, honorary staff, students and visiting workers.

Within this overarching framework there may be specific discipline requirements in areas such as ethics, clinical governance, data protection, legal requirements, home office and other government requirements, in addition to health and safety and other good laboratory practice requirements. Some disciplines may also be subject to specific good practice requirements of external funding agencies or professional bodies.

1 Integrity and honesty
1.1 Researchers should be honest in respect of their own actions in research and their responses to the actions of other researchers. This applies to the whole range of research work, including experimental design, generating and analysing data, acting as a reviewer or referee on grant applications or research papers etc. applying for funding, publishing results, and acknowledging the direct and indirect contributions of colleagues, collaborators and others.

1.2 Plagiarism, deception or the fabrication or falsification of results, are regarded by the University as serious disciplinary offences.

2 Research misconduct
2.1 The University takes seriously any allegation of research misconduct and has a written procedure for investigating and resolving such allegations.

2.2 Researchers are encouraged to report cases of research misconduct and to do so in a responsible and appropriate manner. (Please refer to the University's Policy on Research Misconduct.)

3 Leadership and co-operation in research groups
3.1 The Vice-Chancellor, Pro-Vice-Chancellors, Provosts, deans of research, heads of schools, directors of research institutes and centres, professorial and all other senior staff are responsible for creating a climate which allows research to be conducted in accordance with good research practice.

3.2 Leaders of research groups have responsibility to ensure that a climate of mutual co-operation is created in which all members of the research team are encouraged to develop their skills and in which both the open exchange of ideas and supportive criticism is fostered.

3.3 Research group leaders must also ensure that appropriate direction of research and supervision of researchers and research students is provided.

4 Openness
4.1 While recognizing the need for researchers to protect their own and the University's research interests in the process of planning their research, obtaining and publishing the results, and seeking to develop the outcome of their research into application (where relevant), the University encourages researchers to be as open as possible in discussing their work with other researchers, and with the public.

4.2 Once results have been published the University expects researchers to make available relevant data and materials to other researchers on request, provided that this is consistent with any ethics approval and consents which cover the data and materials and any intellectual property rights in them.

5 Guidance from professional bodies
5.1 Researchers are expected to observe the standards of
research practice set out in guidelines published by funding bodies, scientific and learned societies and other relevant professional bodies.

5.2 All researchers should be aware of, and comply with, the legal requirements which regulate their work.

6 Ethical approval

6.1 Researchers whose work involves human participants or human biological samples are expected to comply with local or multi centre research ethics committee requirements and to understand any other requirements of regulatory bodies relating to their work. For further information see the staff handbook.

7 Documenting results and storing primary data

7.1 There should be clarity at the outset of the research programme as to the ownership of, where relevant:

- data and samples used or created in the course of the research; and

- the results of the research.

7.2 Researchers should keep clear and accurate records of the procedure followed and the approvals granted during the research process, including records of the interim results obtained as well as the final research outcomes. This is necessary not only as a means of demonstrating proper research practice, but also in case questions are subsequently asked about either the conduct of the research or the results obtained.

7.3 Data generated during the course of research should be kept securely in paper or electronic format as appropriate and retained for a minimum of 10 years (or longer where there is a legal requirement governing retention).

7.4 Back up records should always be kept for data stored on a computer.

7.5 Data collected and stored must comply with any legal requirements such as the Data Protection Act.

8 Publishing results

8.1 Results should be published in an appropriate form, usually as papers in refereed journals or other publicly accessible form.

8.2 Researchers should have regard to the commercialization potential of their work and take appropriate steps to advise the University of any inventions and, where appropriate, take steps to protect any intellectual property prior to publication.

8.3 Whilst the publication of the results of research may need to be delayed for a reasonable period pending protection of intellectual property arising from research, such periods of delay in publication should be kept to a minimum.

8.4 Anyone listed as an author on a paper should accept responsibility for ensuring that he/she is familiar with the contents of the paper and can identify his/her contribution to it.

The practice of honorary authorship is unacceptable.

8.5 Whilst the University encourages the communication of research to the wider public, any disclosure to the popular media should endeavour to place the research in its appropriate context and care should be taken not to exaggerate the impact of any findings.

9 Use of results

9.1 Where appropriate, researchers are expected to maximize the prospects of research being taken into practice through the commercial route by protecting intellectual property (IPR).

9.2 Where a commercial route is not appropriate then it is expected that researchers will take appropriate steps to ensure that research findings are transferred to relevant user communities.

10 Acknowledging the role of collaborators and other participants

10.1 The contributions of formal collaborators and all others who directly assist or indirectly support the work should be properly acknowledged.

11 Managing Research Projects

11.1 Researchers have a responsibility to ensure that they, and all those involved in the project, are fully aware of the terms and conditions of grants and contracts and the implication of these in relation to their research projects.

11.2 Lead researchers have a responsibility to ensure that all staff and students working on projects are made aware of, and adhere to, this Code of Good Practice.

12 Conflict of interest

12.1 Researchers should declare and manage any real or potential conflicts of interest, both financial and professional. These might include:

- where the researchers have an existing or potential interest in the outcome of the research;

- where there is a private or private practice benefit significantly dependant upon the outcome of the research;

- where the researcher's professional or personal gain arising from the research may be more than might be usual for research.

The University will shortly be publishing a further statement on Conflicts of Interest.

This code of practice is consistent with, and is drawn from codes of good research practice published by the BBSRC, MRC, the Wellcome Trust, and the Guidelines from the Association of Medical Research Charities.

Academic Matters

Policies and Procedures

The University has a range of policies and procedures which exist for the purpose of protecting and supporting the highest standards within the University.

Readers are encouraged to be familiar with their existence. Key points of each policy/procedure are detailed below. Not all detailed in full. Also, policies and procedures are subject to annual review. You should therefore check the University’s website for the latest and full version of the policy or procedure.

Academic Appeals Procedure for Students

A student who wishes to challenge the decision of the Examiners must make a case on one of the following grounds:

(i) You were adversely affected by illness or other relevant factors, of which you were previously unaware, or which for a good cause you were unable to disclose to the Examiners in advance.

(ii) Procedural irregularity on the part of the examiners.

(iii) Inadequate assessment by an examiner or examiners.

(iv) Bias or prejudice on the part of an examiner or examiners.

Challenges to the academic judgement of the examiners on an assessment outcome or the level of award recommended cannot form the basis of an appeal.

Given the existence of procedures for complaint and redress during the study period, alleged inadequacy of teaching or supervision shall not constitute grounds for an appeal. Separate policies and relevant information are contained in the following documents:

- Student Complaints Procedure
- Policy on Dignity at Work and Study
- Guidelines for Research Students
- Newcastle University and You
- Postgraduate Newcastle
- Public Interest Disclosure (‘Whistleblowing’)
- Policy

The full Academic Appeals Procedure is available at www.ncl.ac.uk/spo.

Procedure for Assessment Irregularities

The University’s Standards of Academic Conduct (see Part 5 of this handbook) must be maintained. Students who are suspected of being in breach of these standards will be subject to the University’s Procedure for Assessment Irregularities and may also be subject to disciplinary action, as determined by the Academic Registrar in accordance with the University's Disciplinary Procedures.

For the purposes of the Procedure for Assessment Irregularities, an assessment irregularity involves the use of improper means by a candidate in the assessment process. This includes, but is not limited to, the following.

- Copying from or conferring with other candidates or using unauthorised material or equipment in an examination room.
- Impersonating or allowing another to impersonate a candidate.
- Introducing examination scripts into the examination process otherwise than in the course of an examination.

- Permitting another student to copy work.
- The falsification ( by inclusion or suppression ) of research results.
- Plagiarism. This is defined as the unacknowledged use of another person's ideas, words or work either verbatim or in substance without specific acknowledgement. For the avoidance of doubt, plagiarism may occur in an examination script as well as in assessed coursework, projects, reports and like work and may involve the use of material downloaded from electronic sources such as the internet. Further, the inclusion of a source in a bibliography is not of itself a sufficient attribution of another's work.

The full Procedure for Assessment Irregularities is available at www.ncl.ac.uk/spo.

Dignity at Work and Study - Code of Practice for Staff and Students

1 Policy Statement

The University is committed to a policy of equality of opportunity. We aim to provide a working and learning environment which is free from unfair discrimination and will give staff and students the opportunity to fulfil their personal potential. All individuals should be treated with dignity and respect whether at work or study.

The purpose of this Policy is to promote a working and learning environment and culture in which harassment and bullying are known to be unacceptable and where individuals have the confidence to deal with harassment and bullying without fear of victimisation. This policy aims to ensure that if harassment or bullying does occur to staff, students or visitors, adequate procedures are readily available to deal with the problem with support and sensitivity so as to prevent it recurring.

Harassment and bullying can have a detrimental effect upon the health, confidence, morale and performance of those affected by it, and on the working and learning environment. The University undertakes to ensure a prompt response to all complaints and to treat them with due respect, relevant confidentiality and fairness (see Procedure, Appendix 1). In some instances, they may be dealt with informally. In others, there may be grounds for disciplinary actions, including dismissal or expulsion from the University.

The University undertakes to:

- Treat incidents of harassment or bullying as serious.
- Publicise the Policy as widely as possible in order to ensure that all staff and students are aware of its existence.
- Include information in staff induction and appropriate staff development sessions (eg awareness training).
- Monitor the number of cases arising and the effectiveness of the Policy.
2 Rights and Responsibilities

The 1991 European Commission code 'Protection of Dignity of Men and Women at Work', highlights the need for employers to develop and implement coherent policies to prevent harassment. In addition, various laws place responsibilities on employers to protect employees and these are outlined in Appendix 2.

Everyone has a responsibility to respect the feelings and sensibilities of others and to behave in a way which does not cause offence. In some instances individuals may be genuinely unaware that their behaviour is causing offence, but it is the duty of each individual to be sensitive to the impact their conduct may have on colleagues.

All those in authority, whether managers, supervisors, leaders etc have a responsibility to issue reasonable instructions and expect them to be carried out. The legitimate supervision of staff and students should be distinguished from harassing or bullying behaviour. However, it is important that consideration is given to style of dealing with others - those exercising authority should not behave in a way that would generally be considered unreasonable.

Staff and students should discourage harassment and bullying by making it clear that they find such behaviour unacceptable and by supporting colleagues who experience such treatment. Anyone who sees harassment or bullying happening in their area has a responsibility to take action. It is possible to bring a complaint forward if you witness harassment or bullying.

All complaints of harassment or bullying will be taken seriously by the University and thoroughly investigated. The aim is to provide the support needed to help individuals decide the best course of action, and to resolve the issues raised.

The Procedure, (Appendix 1) provides a framework for dealing with complaints confidentially, fairly and in a consistent manner. It will also help to resolve problems quickly and informally wherever possible, without fear of victimisation or retaliation.

Serious breaches of the Policy may lead to the relevant disciplinary procedures being used.

3 What are harassment and bullying?

Harassment, in general terms, is unwanted conduct affecting the dignity of men and women. It may be related to race, ethnic origin, sex, marital or parental status, sexual orientation, religion, disability, age, political belief, trade union membership, or any personal characteristic of the individual, and may be persistent or an isolated incident. The key is that the actions or comments are viewed as demeaning and unacceptable to the recipient.

The following are some examples of what is unacceptable behaviour in the University:

- Physical Conduct - Unwanted physical conduct, including unnecessary touching or brushing against another employee/student’s body, assault, coercing sexual intercourse, physical threats, insulting or abusive behaviour or gestures.
- Verbal Conduct - Unwelcome advances, propositions or remarks, innuendoes, lewd comments or abusive language, which is sex or race based or which refers to a person’s age, disability, sexuality, religion or personal appearance.
- Non-verbal Conduct - Making abusive or offensive gestures, displaying of offensive written or visual material, other unacceptable non-verbal conduct which denigrates a person for whatever reason.
- Bullying - Offensive, abusive, intimidating, malicious or insulting behaviour, including by electronic means, abuse of power or unfair sanctions, which make the recipient feel threatened or vulnerable, which undermines self confidence and which may cause stress.

Bullying and harassment are not necessarily face to face, they may be by written communications, electronic email (so called ‘flame-mail’) and phone. More subtle forms of bullying and harassment, often not recognised, include persistently ignoring a person, isolating or excluding them.

4 Responsibilities

All Staff and Students

Everyone has a responsibility to comply with this Policy and all staff and students should ensure that their behaviour towards colleagues does not cause offence and could not in any way be considered to be harassment or bullying.

Differences in culture, attitudes and experience, or the misinterpretation of social signals, can mean that what is perceived by the person experiencing the behaviour as harassment and bullying, may be perceived by others as normal. It is important to be sensitive to the feelings and reactions of others and adjust behaviour as necessary.

Unresolved incidents of harassment or bullying need to be progressed and can be raised with any one of the people listed in the Procedure (Point 4 Second Stage - Informal).

Those with responsibility for implementing the Policy should:

- Set a good example by treating all staff and students with dignity and respect.
- Understand the Policy and make every effort to ensure that harassment and bullying do not occur, particularly in work or study areas for which they are responsible.
- Respond sensitively and supportively to any members of staff or students who make an allegation of harassment or bullying; provide clear advice on the procedure to be adopted; maintain confidentiality in accordance with this Policy; monitor the work or study environment to ensure that there are no problems of harassment or bullying, or of victimisation after a complaint has been made.
- Be alert to unacceptable behaviour and take appropriate action: do not wait until complaints are brought to their attention if they are aware of behaviour of other managers or staff or students which might cause offence. If the incident is not serious then calling the individual aside and carrying out some ‘awareness-raising’ may be sufficient to stop the behaviour.
- Ensure that staff and students know how to raise problems, are aware of the Policy and procedures, and of sources of help and advice available.

Dignity at Work and Study Advisers

Dignity at Work and Study Advisers are members of staff who have volunteered and have been trained to undertake this role. Any of the Advisers, attached as Appendix 3, will be prepared to discuss incidents or problems with you in complete confidence, however sensitive these may be. An Adviser will listen carefully to the problem and then inform you of possible courses of action. The Adviser may be able to suggest strategies for dealing with the harassment or bullying and will help you reach a decision about what, if anything, you wish to do, or have done, about the harassment.

If you are being accused of harassment or bullying the Adviser will also be able to offer you advice.

In addition, support and advice can be obtained from the Equal Opportunities Adviser.

Any discussions will be confidential within the confines of the University's legal obligations. In some cases the first
person you contact may need to consult further in order to find the best way to help you: this will be done in confidence.

Trade Union Representatives

Trade union members who are raising a complaint, or have a complaint made against them, can also talk confidentially to a representative of their trade union for advice and support.

Appendix 1

Procedure for Making and Dealing with Complaints of Harassment and Bullying

1 Introduction

This procedure has been designed to deal with complaints of harassment and bullying which need to be handled in a sensitive manner. The procedure, therefore, seeks to ensure minimal stress for the complainant, timely resolutions of complaints and a degree of flexibility appropriate to individual circumstances.

At all stages of the procedure, the need to maintain confidentiality for both complainant and alleged harasser will be paramount. Information circulation will be minimised to that which is necessary to ensure a fair investigation and hearing.

This procedure is separate from the disciplinary procedures, which may be used following the results of the investigation under this procedure. However, an incident may be so serious, or there may be sufficient evidence, to proceed straight away with the relevant disciplinary procedure.

It is recognised that in bringing a complaint, the complainant must be protected from further harassment or detriment arising from the alleged incident and associated complaint. However, mischievous or malicious allegations may in themselves be a form of harassment and can lead to disciplinary action against the complainant.

2 Keeping a record

It is important that anyone who believes that they have suffered from harassment or bullying should keep notes of the details outlined below for each incident. Such notes should be made as soon after the event as possible. The notes should, if possible, include the following:

- date
- time
- place
- name of person harassing/bullying them
- what actually happened
- how they actually felt at the time of harassment/bullying
- name of any witnesses
- action taken and whether reported
- any correspondence relating to the incidents and subsequent complaints

Act promptly: don't wait until conditions reach an intolerable level or your personal well-being is put in jeopardy.

3 First Stage - Informal

If you think you are being subjected to harassment or bullying in any form, do not feel that it is your fault or that you have to tolerate it.

If possible, make it clear to the harasser that his/her behaviour is unacceptable and must stop. You could do this verbally, or you may find it easier to do it by letter, in which case you are advised to keep a copy.

It is important to keep a record of events which distress you and the effect they have had on you. Make a note of any witnesses to an incident and ask them if they would be prepared to give evidence on your behalf should the complaint proceed to the formal stage.

4 Second Stage - Informal

If you feel unable to confront the person concerned as set out in the First Stage, you should seek help and advice from any one of the following people:

Staff
- Provost
- Head of School/Service
- Line Manager
- Human Resources Officer
- Trade Union Representative
- University Chaplain
- Dignity at Work and Study Adviser
- Equal Opportunities Adviser

Students
- Head of School
- Personal Tutor/Supervisor or other relevant academic
- Welfare Officer in Student Union
- Student Advice Centre in Student Union
- Student Progress Office
- Counselling Service
- University Chaplain
- Dignity at Work and Study Adviser
- Equal Opportunities Adviser

Where appropriate, and only with your agreement, they will attempt to resolve the matter informally.

This may involve you, with their support, meeting with the harasser to explain why his/her behaviour is causing offence/distress and to ask him/her to change his/her behaviour.

If you do not feel able to meet with the harasser, you can request that the adviser meets with the harasser on your behalf in an attempt to resolve the matter or that the adviser seeks assistance from someone else who may be able to mediate between you and the harasser. In cases where the Head of School/Service or student's tutor/supervisor is not directly involved, that person should be informed of the action being taken unless you request otherwise.

If the matter remains unresolved through this informal approach, or if the problem continues after an agreed resolution, the matter should be referred to the Third and Formal Stage.

5 Third Stage - Formal

If the harassment/bullying continues or is of a more serious nature that cannot be dealt with by the informal means, you should make a formal complaint by completing an HB1 Form detailing your complaint. At this stage the alleged harasser will be sent a copy of your completed HB1 Form and any letter that you submit with the form.

Please note Dignity at Work and Study Advisers are trained to advise you if you wish.

For Staff

You will submit an HB1 form to the Director of Human Resources who will consider its degree of seriousness and, where appropriate, in consultation with the Equal Opportunities Adviser. The Director will then decide whether to proceed to the formal stage or whether the case can be resolved informally.

For Students

You will submit an HB1 form to the Dignity at Work and Study Advisers who will decide whether to proceed to the formal stage or whether the case can be resolved informally.

This procedure has been designed to deal with complaints of harassment and bullying which need to be handled in a sensitive manner. The procedure, therefore, seeks to ensure minimal stress for the complainant, timely resolutions of complaints and a degree of flexibility appropriate to individual circumstances.

At all stages of the procedure, the need to maintain confidentiality for both complainant and alleged harasser will be paramount. Information circulation will be minimised to that which is necessary to ensure a fair investigation and hearing.

This procedure is separate from the disciplinary procedures, which may be used following the results of the investigation under this procedure. However, an incident may be so serious, or there may be sufficient evidence, to proceed straight away with the relevant disciplinary procedure.

It is recognised that in bringing a complaint, the complainant must be protected from further harassment or detriment arising from the alleged incident and associated complaint. However, mischievous or malicious allegations may in themselves be a form of harassment and can lead to disciplinary action against the complainant.

2 Keeping a record

It is important that anyone who believes that they have suffered from harassment or bullying should keep notes of the details outlined below for each incident. Such notes should be made as soon after the event as possible. The notes should, if possible, include the following:

- date
- time
- place
- name of person harassing/bullying them
- what actually happened
- how they actually felt at the time of harassment/bullying
- name of any witnesses
- action taken and whether reported
- any correspondence relating to the incidents and subsequent complaints

Act promptly: don't wait until conditions reach an intolerable level or your personal well-being is put in jeopardy.

3 First Stage - Informal

If you think you are being subjected to harassment or bullying in any form, do not feel that it is your fault or that you have to tolerate it.

If possible, make it clear to the harasser that his/her behaviour is unacceptable and must stop. You could do this verbally, or you may find it easier to do it by letter, in which case you are advised to keep a copy.

It is important to keep a record of events which distress you and the effect they have had on you. Make a note of any witnesses to an incident and ask them if they would be prepared to give evidence on your behalf should the complaint proceed to the formal stage.

4 Second Stage - Informal

If you feel unable to confront the person concerned as set out in the First Stage, you should seek help and advice from any one of the following people:

Staff
- Provost
- Head of School/Service
- Line Manager
- Human Resources Officer
- Trade Union Representative
- University Chaplain
- Dignity at Work and Study Adviser
- Equal Opportunities Adviser

Students
- Head of School
- Personal Tutor/Supervisor or other relevant academic
- Welfare Officer in Student Union
- Student Advice Centre in Student Union
- Student Progress Office
- Counselling Service
- University Chaplain
- Dignity at Work and Study Adviser
- Equal Opportunities Adviser

Where appropriate, and only with your agreement, they will attempt to resolve the matter informally.

This may involve you, with their support, meeting with the harasser to explain why his/her behaviour is causing offence/distress and to ask him/her to change his/her behaviour.

If you do not feel able to meet with the harasser, you can request that the adviser meets with the harasser on your behalf in an attempt to resolve the matter or that the adviser seeks assistance from someone else who may be able to mediate between you and the harasser. In cases where the Head of School/Service or student’s tutor/supervisor is not directly involved, that person should be informed of the action being taken unless you request otherwise.

If the matter remains unresolved through this informal approach, or if the problem continues after an agreed resolution, the matter should be referred to the Third and Formal Stage.

5 Third Stage - Formal

If the harassment/bullying continues or is of a more serious nature that cannot be dealt with by the informal means, you should make a formal complaint by completing an HB1 Form detailing your complaint. At this stage the alleged harasser will be sent a copy of your completed HB1 Form and any letter that you submit with the form.

Please note Dignity at Work and Study Advisers are trained to advise you if you wish.

For Staff

You will submit an HB1 form to the Director of Human Resources who will consider its degree of seriousness and, where appropriate, in consultation with the Equal

Opportunities Adviser, will ensure that all informal action has been exhausted. The Director of Human Resources will nominate an appropriate investigating officer who will investigate the matter and decide whether or not the case is a disciplinary one to be pursued through the University’s Disciplinary Procedures.

Notes will be kept of any investigation, meetings or discussions and appropriate confidentiality will be observed for both complainant and alleged harasser.

You have the right to be accompanied to these meetings/discussions by a Dignity at Work and Study Adviser, Trade Union Representative or other appropriate member of staff.

Both complainant and alleged harasser will be informed of the outcome of the investigation in writing.

For Students
You will follow the Student Complaints Procedure which is available from the Student Progress Office.

NB If a member of staff is involved, the complaint should be reported to the Head of the Student Progress Office who will in turn notify the Director of Human Resources. The Head of the Student Progress Office and the Director of Human Resources will jointly nominate an appropriate investigating officer.

Notes will be kept of any investigation, meetings or discussions and appropriate confidentiality will be observed for both complainant and alleged harasser.

You have the right to be accompanied to these meetings/discussions by a Dignity at Work and Study Adviser or other appropriate member of staff or student.

Both complainant and alleged harasser will be informed of the outcome of the investigation in writing.

6 Possible Outcomes

- no further action
- confirmation of the alleged harasser’s innocence
- informal resolution eg conciliation
- staff development for the alleged harasser
- disciplinary procedure invoked which may result in oral, written or final written warnings or suspension or dismissal/expulsion from the University
- moving the alleged harasser or the complainant to a different location, if appropriate (it is normal practice to move a proven harasser rather than the complainant - if it is necessary to move the complainant for sound business reasons, this should only be done with the complainant’s agreement, as a forcible move could constitute further detriment/harassment)

7 Appeals
If the complainant or alleged harasser is not satisfied with the way the complaint has been handled or the outcome they may appeal in writing in the following ways:

For staff
Appeal in writing to the Chair of the Equal Opportunities Committee within 10 working days of written notification of the outcome of the formal investigation. Appeals against disciplinary action should be dealt with under the relevant disciplinary procedure.

For students
Students wishing to lodge an appeal about the outcome of a complaint which has been investigated should do so in writing, addressing their appeal to the Academic Registrar. If the Academic Registrar, having investigated the original complaint, considers there to be grounds for the appeal, he may make appropriate arrangements to have the complaint reconsidered. Any further action or outcome will be decided by the Academic Registrar and will be final. There will be no further opportunities for appeal within the University.

8 Where a complaint is made against you
If you have a formal complaint made against you, you will be given a copy of the Dignity at Work and Study Policy and a copy of the HB1 Form completed by the complainant. You will be given the opportunity to state your case and to respond to a written complaint in writing. Any written response will be copied to the complainant. Where disciplinary action is taken you will have rights as specified under the relevant disciplinary procedure.

If it is found that a malicious complaint has been made, this will be addressed through measures such as action under the appropriate disciplinary procedures being taken against the complainant.

If a complaint is made against you, you should consider the following:

- Differences of attitude and culture or misinterpretation of social signals can mean that what is perceived as harassment by one person may not seem so to another. Even though your behaviour may seem harmless to you, it is the other person’s reasonable reaction to your behaviour that is important.
- Think carefully about the complaint and the particular concerns expressed and consider whether the complaint can be justified in any way, and whether it would be advisable and appropriate to change your behaviour.
- The first indication you may have that there is a problem may be when a colleague tells you that they are offended or upset by certain aspects of your behaviour and they will ask you to stop behaving towards them in a particular manner. All staff/students have the right to ask any of their colleagues to stop behaving in a manner which is insulting or offensive to them.
- Alternatively you may first be made aware that there is a problem when approached by one of the designated members of staff attempting to resolve the issue or informing you that a formal complaint has been made.
- If you are accused of harassment or bullying, you may wish to consult a relevant advisor as mentioned in Section 4 of this procedure. Using these support networks will not be interpreted as an indication of guilt or any admission on your part; they are intended to help staff/students to deal with any allegations made against them.
- If a problem is identified, the different stages of the Procedure will allow for that problem to be dealt with either informally or formally depending on the circumstances of each case.
- Whatever stage of the Procedure is used, the aim is to stop any individual from harassing or bullying another and to prevent staff/students from having to endure this type of behaviour.

9 False Complaints
This procedure aims to promote fairness and consistency in dealing with reasonable complaints from members of staff and students. However, the University will not accept complaints which are believed to be false or malicious and, indeed, may decide to take disciplinary action in some circumstances when it can be demonstrated that a complaint is made on a deliberately false or malicious basis.
10 Victimisation

Victimisation or retaliation as a result of action being taken under this procedure is unacceptable and may lead to disciplinary action. Victimisation may also be unlawful.

11 What records will be held?

Where a formal complaint is made under Stage 3 of the procedure and the complaint is substantiated, records will be kept on a central file and the relevant personal file.

Where formal disciplinary action is taken, records will be held in accordance with the timescales (if stated) in the relevant disciplinary procedures.

12 Monitoring

Statistics will be collected annually and presented to the University’s Equal Opportunities Committee with comparisons to previous years. Managers and Dignity at Work and Study Advisers will be asked to identify:

• the number of cases they have dealt with over the previous year
• the ethnic origin and gender of complainants
• the nature of the harassment, eg bullying/racist/sextist
• the schools/sections in which the harassment occurred
• how the cases were resolved, ie no action/informal action/formal action/other

The information will be anonymised, the names of the complainants and alleged harassers will be withheld.

The full Policy on Dignity at Work and Study, with an outline of the legal position and sources of advice, is available at www.ncl.ac.uk/hr/policy/dignity.htm

Students who wish to make a formal complaint under this Policy, should follow the Student Complaints procedure.

---

Equal Opportunities Policy

1. Policy Statement

The University of Newcastle upon Tyne confirms its commitment to a comprehensive policy of equal opportunities for all employees and all students in which individuals are selected and treated on the basis of their relevant merits and abilities and are given equal opportunities within the University. The aim of the policy is to ensure that no job applicant or employee, prospective student or student, should receive less favourable treatment on any grounds which are not relevant to good employment practice for staff or to academic ability, potential and attainment for students. The University is committed to a programme of action to make the policy fully effective.

It is the University's policy to treat all people equally irrespective of race, ethnic origin, sex, marital or parental status, sexual orientation, religion or belief, disability, age, political belief or trade union membership and activities.

In order to promote practices which will ensure equality of opportunity, all staff and students should be made aware of the University's statement of policy and of this code of practice.

Staff and students are encouraged to assist in the removal of any discriminatory practices that may exist in the University by drawing them to the attention of the Chair of the Equal Opportunities Committee via the Director of Human Resources for staff or the Academic Registrar for students.

2. Responsibility For The Policy

All staff, students, visitors and others associated with the University, without exception, have a responsibility to ensure that their actions comply with the requirements of the Policy, namely to treat all people equally irrespective of race, ethnic origin, sex, marital or parental status, sexual orientation, religion or belief, disability, age, political or trade union membership or activities. There are a number of individuals and groups with specific responsibilities:

• University Council is responsible for:
  • Ensuring that the Equal Opportunities Policy and its procedures are in place.
  • The Vice Chancellor has ultimate executive responsibility for:
    • The effective development and implementation of Equal Opportunities Policies.
  • Managers (including Provosts, Heads of Schools, Heads of Section and all other line managers) are responsible for:
    • Ensuring that the policy is implemented and maintained within their own Schools/Sections
    • Ensuring all staff are fully informed about their responsibilities and receive support and training in carrying them out.
    • Taking appropriate action against staff or students who discriminate for reasons of race, ethnic origin, sex, marital or parental status, sexual orientation, religion or belief, disability, age, political belief or trade union membership or activities. This may include invoking appropriate University disciplinary or grievance procedures, and initiating procedures for dealing with complaints.
    • Ensuring that the equal opportunities policy and its procedures are followed within their areas of responsibility.

• The Director of Human Resources and the Academic Registrar have responsibility for:
  • The implementation and monitoring of the policy as it pertains to staff and students respectively.
  • Reporting to the Equal Opportunities Committee and Council on progress and plans in an Annual Report.
  • Ensuring that appropriate staff training and development is carried out.

• Equal Opportunities Committee has responsibility for:
  • The formulation of equal opportunities policies and procedures and for overseeing their implementation. The Committee reports to the Council of the University which has the authority to approve the policies.

Staff or students who act to obstruct efforts to promote the Equal Opportunities Policy or are the perpetrators of acts of discrimination may be subject to the University’s disciplinary procedure, which, if proven, may result in oral, written or final written warnings or suspension or dismissal/expulsion from the University.

3. Implementation Of The Policy

Codes of practice and appropriate procedures will be developed and introduced to implement the Policy. The University will ensure that all students and staff and, so far as is practicable, others associated with the University are informed of the Policy, any associated policies and procedures and their responsibilities with respect to
4. Reporting Breaches Of The Policy

Any student or member of staff who believes he/she has been discriminated against on the grounds of race, ethnic origin, sex, marital or parental status, sexual orientation, religion or belief, disability, age or political belief or trade union membership may invoke the University's Student Complaints Procedure or Staff Grievance Procedure, as appropriate.

Where necessary, advice for staff on procedural matters may be obtained from the Human Resources Dept and advice for students may be obtained from the Student Progress Office.

Complaints of discrimination from applicants for staff posts or student places, from visitors and from others associated with the University should be addressed to the Registrar who will ensure that they are investigated and that the complainant receives a written response, and where appropriate that action is taken.

Acts of unlawful discrimination by an employee or a student will, if appropriate, be dealt with under the relevant disciplinary procedure.

The University will seek to protect individuals from any form of victimisation arising from their taking action in relation to their rights under the relevant legislation or making any complaint under these procedures.

5. Explanatory Notes

Sexual Orientation

This policy seeks to protect everyone i.e. gay, lesbian, bisexual and heterosexual people. Protection would occur where discrimination takes place because of an individual’s actual or perceived sexual orientation or for those treated less favourably because they associate with LGBT (Lesbian, Gay, Bisexual or Transgender) people.

Religion or Belief

The legal definition of religion or belief is broad and defined as being any religion, religious belief or similar philosophical belief (not political belief). Whether a religion or belief falls within this definition will be for the courts to decide.

Disability

The Disability Discrimination Act 1995 defines disability as a ‘physical or mental impairment which has a substantial and long-term adverse effect on the person’s ability to carry out normal, day to day activities’.

Race Equality Policy

1. Aims and values

The University of Newcastle upon Tyne is a ‘community of communities’: national, ethnic, cultural, linguistic, religious and many more. The University is unequivocally committed to the goal of fostering mutual respect and understanding between its constituent communities and to promoting equality of opportunity among staff and students alike. It encourages all staff and students to enjoy and celebrate its diverse culture. The Race Equality Policy commits the University to the elimination of unlawful discrimination, the promotion of equality of opportunity and to the promotion of good relations between people of different racial groups. Through this policy the University aims to make race equality central to the way the University carries out all its public functions, so that it becomes an integral part of its policy development, the curriculum, teaching and learning, assessment, staff recruitment, training and career development, management, student support and guidance, admissions, access and participation, partnerships and community links, behaviour and discipline, service delivery, outsourcing, procurement and any other function.

2. Background

2.1 Institutional Racism

The Race Relations (Amendment) Act 2000 (RRAA) came into effect on 31st May 2002, as an amendment to the existing Race Relations Act 1976. This new piece of legislation was a direct outcome of the inquiry into the racist murder of teenager Stephen Lawrence. In his report, Sir William McPherson identified widespread institutional racism as ‘The collective failure of an organisation to provide an appropriate and professional service to people because of their colour, culture, or ethnic origin. It can be seen or detected in processes, attitudes and behaviour which amount to discrimination through unwitting prejudice, ignorance, thoughtlessness and racist stereotyping which disadvantage minority ethnic people’ (Home Office, 1999: 6.34).

Some common manifestations of institutional racism can be found in appendix A.

2.2 Race Relations (Amendment) Act 2000

The Race Relations (Amendment) Act 2000 has placed a statutory general duty on all Public authorities to promote race equality and in particular:

- To eliminate unlawful racial discrimination
- To promote equality of opportunity and good relations between persons of different racial groups.

The Act has placed further specific duties on Higher Education Institutions to:

- publish a Race Equality Policy and an Action Plan for its implementation
- assess the effect of University Policies on staff and students from different racial groups
- Monitor, by racial group, the admission and progress of students and the recruitment and career development of staff
- Set out arrangements for publishing a race equality policy statement and the results of assessments
- Take reasonable and practical steps to publish the results of monitoring each year

The University Race Equality Policy has been developed by the Race Equality Sub-Committee with regard to the implementation.

The necessary training and support will be provided to those persons responsible for the implementation of the Policy.

The University will monitor the implementation and effectiveness of the Policy through the Equal Opportunities Committee which will report, as appropriate, to Council.

The Act has placed further specific duties on Higher Education Institutions to:

- publish a Race Equality Policy and an Action Plan for its implementation
- assess the effect of University Policies on staff and students from different racial groups
- Monitor, by racial group, the admission and progress of students and the recruitment and career development of staff
- Set out arrangements for publishing a race equality policy statement and the results of assessments
- Take reasonable and practical steps to publish the results of monitoring each year

The University Race Equality Policy has been developed by the Race Equality Sub-Committee with regard to the
guidance and code of practice issued by the Commission for Racial Equality. It has been considered and approved by the Equal Opportunities Committee, and should be read in conjunction with the University Equal Opportunities Policy.

3. Responsibilities

All staff, students, visitors and others associated with the University, without exception, have a responsibility to ensure that their actions comply with the requirements of the Policy, namely to eliminate unlawful discrimination, promote race equality and promote good relations between people of different ethnic groups. There are a number of individuals and groups with specific responsibilities:

- University Council is responsible for:
  - Ensuring that the University acts within the requirements of the Race Relations Act and meets all its general and specific duties
  - Ensuring that the race equality policy and its procedures are followed.

- The Vice Chancellor has ultimate executive responsibility for:
  - the effective development and implementation of Equal Opportunities Policies, including the Race Equality Policy.
  - Ensuring that effective procedures are in place.

- Managers (including Provosts, Heads of Schools, Heads of Section and all other line managers) are responsible for:
  - Ensuring that the policy is implemented and maintained within their own Schools/Sections
  - Ensuring all staff are fully informed about their responsibilities and receive support and training in carrying them out.
  - Taking appropriate action against staff or students who discriminate for reasons of race, colour, nationality or ethnic or national origins. This may include invoking appropriate University disciplinary or grievance procedures, and initiating procedures for dealing with complaints.
  - Ensuring that the race equality policy and its procedures are followed within their areas of responsibility.

- The Director of Human Resources and the Head of the Student Progress Office have responsibility for:
  - the implementation and monitoring of the policy as it pertains to staff and students respectively.
  - Ensuring that appropriate staff training and development is carried out.

- Equal Opportunities Committee has responsibility for:
  - the formulation of equal opportunities policies and procedures and for overseeing their implementation. The Committee reports to the Council of the University which has the authority to approve the policies.

- Race Equality Sub-Committee has responsibility for:
  - Advising the Equal Opportunities Committee on the development and implementation of the Race Equality Policy.

Staff or students who act to obstruct efforts to promote race equality or are the perpetrators of racial discrimination may be subject to the University’s disciplinary procedure, which, if proven, may result in oral, written or final written warnings or suspension or dismissal/expulsion from the University.

4. Specific Duties

The University of Newcastle upon Tyne will comply with the specific duties of the Race Relations (Amendment) Act 2000 by:

- Planning and Developing Policy

  Preparing and publishing a written statement of our Race Equality Policy and an Action Plan for its implementation.

- Ethnic Monitoring

  - Establishing an infrastructure to monitor, by racial group, the policies or functions relating to students including:
    - Admissions and access
    - Achievement, progress and assessment
    - Student Welfare
    - Accommodation
    - Teaching and learning
    - Curriculum
    - Dignity at Work & Study
  
  - Establishing an infrastructure to monitor, by racial group the policies or functions relating to staff including:
    - Recruitment & selection
    - Appraisal
    - Reward
    - Professional development
    - Staff support
    - Staff retention
  
- Establishing an infrastructure to monitor, by racial group, the policies or functions relating the community and general public including:
  - Working with community groups
  - Procurement and outsourcing
  - Use of consultants

- Impact Assessment

  - Conducting an assessment to establish the effect of the University Policies on students from different racial groups including:
    - Admissions and access
    - Achievement, progress and assessment
    - Student Welfare
    - Accommodation
    - Teaching and learning
    - Curriculum
    - Dignity at Work & Study
  
  - Conducting an assessment to establish the effect of the University Policies on staff from different racial groups including:
    - Recruitment & selection
    - Appraisal
    - Reward
    - Professional development
    - Staff support
    - Staff retention
  
- Conducting an assessment to establish the effect of the University Policies on community groups including:
  - Working with community groups
  - Procurement and outsourcing
  - Use of consultants
  - Comparing ethnic monitoring data with qualitative
data.

- Consultation with representative groups of staff and students, including racial minority groups.
- Consultation with community groups from outside the university.
- Prioritising functions where action is required
- Setting a three year action plan with key performance indicators, which determines frequency of monitoring
- Formulating an evaluation process
- Publishing
- Setting out arrangements for publishing the race equality policy statement to all staff, students and the wider community.
- Setting out arrangements for publishing the results of assessments and monitoring each year.

Further details about arrangements for complying with the specific duties of the Act are available in the University of Newcastle’s Race Equality Action Plan.

5. Review of the Policy

In order to ensure that the University is making progress towards its Race Equality targets an appropriate reporting structure will be established which will set out how the Race Equality Sub-Committee can report on progress to the Equal Opportunities Committee and the University Council.

Consultation with staff and students will take place in order to raise awareness of the policy and to gain feedback on its contents. Feedback given will be considered when updating the Policy. The Race Equality Policy and Action Plan will be reviewed annually and updated as necessary.

6. Training and development

Staff development and training will be extremely important to the successful implementation of the Race Equality Policy. A training plan will be devised to ensure that senior managers are made aware of the implications of the Race Relations (Amendment) Act 2000, and their roles and responsibilities. The plan will also provide for race equality training to be rolled out across the campus, and embedded in other appropriate training and development activities, such as the Postgraduate Certificate of Academic Practice and the Management Development Programme.

7. Publishing the Policy

To support the implementation of this policy, it will be widely published, and will be made available to all new staff and students. It will be published on the internal and external University websites and available in hard copy format from the Human Resources Department, Student Office, Admissions and the International Office. A communication programme will be established to publish this policy, its associated action plan, results of assessments and monitoring.

8. Reporting alleged breaches

Alleged breaches of the policy, or incidents of racism or racial discrimination, should be reported. The most appropriate reporting mechanism will be dependent on the nature of the alleged incident. A quick guide to incident reporting is given in Appendix B, however if you are unsure please contact the following:

Staff related issues
- Julie Bullimore HR Projects Assistant (Equal Opportunities) 0191 222 3440 julie.bullimore@ncl.ac.uk
- Richard Burrow Assistant Director of Human Resources 0191 222 6306 richard.burrow@ncl.ac.uk
- Jim Smith Administrative Officer 0191 222 6066

Sources of additional help and support can be found in appendix C.

8.1 Incidents of Racial Harassment or Bullying

Incidents of alleged harassment or bullying (including racial harassment & bullying) of University staff or students should also be reported via the procedure attached to the Dignity at Work and Study Policy, available on the University Intranet at www.ncl.ac.uk/internal/hr/policy/dignity.htm or from the Human Resources Section or Student Welfare Services as above. Alleged perpetrators of racial bullying or harassment may be subject to the University’s disciplinary procedure, which if proven, may result in oral, written or final written warnings or suspension or dismissal/expulsion from the University.

Racist harassment or bullying are criminal offences. They should be reported to the University and you are strongly encouraged to report such incidents to the police. Reporting an incident to the police does not necessarily require a formal statement or appearance at court - you don't even have to give your name unless you choose to.

By reporting incidents you can help the police to build up information about patterns of crime and help them catch the offenders.

You can report a racist incident in a number of ways:

- Through the University who will file the report on your behalf
  Julie Bullimore 0191 222 3440 (staff)
- Richard Burrow 0191 222 6306 (staff)
- Jim Smith 0191 222 6606 (students)
- Northumbria Police 0191 214 6555
- Northumbria Police on-line www.northumbria.police.uk
- ARCH 24 Hour Racist Incident Reporting Line 0800 032 3288

Appendix D gives some practical advice about reporting a racist incident to the police. These guidelines have been produced by the Racial Harassment Support Group in conjunction with Northumbria Police.

8.2 Racial Discrimination

Any student or member of staff who believes he/she has been discriminated against on the grounds of race may invoke the University’s Student Complaint Procedure or Staff Grievance Procedure as appropriate. These procedures should also be followed by staff and students who witness incidents of racial discrimination.

Complaints of discrimination from applicants for staff posts or student places, from visitors and from others associated with the University should be addressed to the Registrar who will ensure that they are investigated and that the complainant receives a written response, and where appropriate that action is taken.

Acts of unlawful discrimination by an employee or a student will, if appropriate, be dealt with under the relevant disciplinary procedures.

The University will seek to protect individuals from any form of victimisation arising from their taking action in relation to their rights under the relevant legislation or making any complaint under these procedures.

8.3 Personal complaints and grievances

Staff and students also have access to personal complaints and grievance procedures. Details are available on the University Intranet or from the HR Section or Student Welfare Services as above.

8.4 General breaches

Any more general breach of the policy should be reported to the HR Projects Assistant or to the Director of Human Resources or Student Progress Office as appropriate or to
the Chair of the Equal Opportunities Committee.
Any racist incident whether or not it occurs on campus and irrespective of whether university staff or students are involved may be reported to the local Agencies Against Racist Crime and Harassment (ARCH), of which the University is a member. ARCH is a multi-panel agency which is committed to:

- Developing an effective inter-agency response to racist incidents in the Newcastle.
- Reducing the number of racist incidents experienced in the city.
- Improving and increasing support available to victims.
- Improving the safety and welfare of those who live, work, study in and visit Newcastle.

Definition of a Racist Incident
The definition used by the University of Newcastle upon Tyne is that recommended in the Stephen Lawrence Report:
“A racist incident is any incident which is perceived to be racist by the victim or any other person”.
(Recommendation 12)
Examples may include (this list is not exhaustive)
- Verbal abuse
- Unprovoked assaults
- Damage or threats of damage to property
- Sending of threatening and/or abusive correspondence (including email)
- Making threatening and or abusive phone calls or text messaging
- Graffiti

Appendix A – Common Manifestations of Institutional Racism
1. ‘it doesn’t happen here’ - denying the possibility of discriminatory practice within an institution without accurate data, or consultation with those most likely to be on the receiving end of discrimination;
2. a ‘colour blind approach’, which treats everyone the same and which does not acknowledge or address the differing needs of black and minority staff and therefore potentially marginalizes their perspective;
3. abdication of one’s personal responsibility for tackling racism, by not challenging others’ behaviour or attitudes, as ‘it does not directly affect me’, or for fear of unpopularity or reprisals;
4. failing to incorporate race issues within day-to-day practice, procedures and mainstream activity;
5. Unwillingness to attend training or improve self awareness about ones own assumptions, behaviours or attitudes;
6. under-representation of specific groups within the organisation, particularly at a senior and influential level, the absence of a ‘minority’ perspective on key decision-making bodies;
7. a lack of commitment in practice, to implementing the policies that institutions subscribe to on paper. (UCL Race Equality Policy Note 2)
The full Race Equality Policy, is available along with sources of advice and further information about reporting an incident, at www.ncl.ac.uk/internal/hr/policy/raceequal.htm
Students who wish to make a formal complaint under this Policy, should follow the Student Complaints procedure.

Policy and Procedure on Public Interest Disclosure

1 Introduction
1.1 The University is committed to the highest standards of openness, probity and accountability. It seeks to conduct its affairs in a responsible manner taking into account the requirements of the funding bodies, the standards in public life set out in the reports of the Nolan Committee, and the principles of academic freedom embodied in its Statutes and enshrined in the Education Reform Act 1988.
1.2 The Public Interest Disclosure Act, which came into effect on 1 January 1999, gives legal protection to employees against being dismissed or penalized by their employers as a result of disclosing in the public interest certain serious concerns. It is a fundamental term of every contract of employment that an employee will faithfully serve his or her employer and not disclose confidential information about the employer's affairs. However, an individual within the organization should have the right to disclose certain matters of public interest without fear of reprisal.
1.3 This policy and procedure is intended to guide and assist members of the University who believe they have discovered malpractice or impropriety and to assist the University in the maintenance of appropriate standards of propriety and good practice. Members of the University are expected to use this policy and procedure in the first instance rather than report their concerns to a third party outside the Institution. There is, however, no intention to interfere with individuals’ civil duties and rights and to prevent them, for example, from reporting criminal activity to the police.

2 Scope of Policy
2.1 This policy and procedure provides for employees and students who believe that they have evidence of malpractice or impropriety which it would be in the public interest to disclose to bring their concerns to the attention of the appropriate University officer.
2.2 Instances of malpractice or impropriety might include:
- financial malpractice or impropriety or fraud
- failure to comply with a legal obligation or with the Statutes and Regulations of the University
- dangers to health and safety or the environment
- academic or professional malpractice
- miscarriage of justice
- improper conduct or unethical behaviour
- criminal activity (not covered by the above)
- attempts to conceal any of the above.
2.3 The University already has in place a number of policies and procedures for such matters as grievance, complaints, discipline and harassment. This policy and procedure should not be used where a matter of concern should more appropriately be addressed through other approved University procedures. However, investigation of matters raised under this policy and procedure may subsequently lead to the invocation of other University procedures (see sections 4 and 6 below).
3 Safeguards

3.1 Protection

This policy is designed to offer protection to those employees or students who make a disclosure of the kind described in 2.1 above provided that the disclosure is made:

- in good faith
- in the reasonable belief that the disclosure is substantially true
- without a view to personal gain
- to an appropriate person/body (see section 4 below).

3.2 Confidentiality

All disclosures made in accordance with this policy and procedure will be treated in a confidential and sensitive manner. The identity of the individual making the disclosure will be kept confidential to the extent that the maintenance of such confidentiality does not hinder or frustrate any related investigation. However, the individual making the disclosure may need to provide a statement as part of the evidence required and the investigation process may lead to the identity of the individual being revealed.

3.3 Anonymous Allegations

This policy encourages individuals to put their name to any disclosures they make. Concerns expressed anonymously will be considered only at the discretion of the University. In the exercise of this discretion, the factors to be taken into account will include:

- the seriousness of the issues raised
- the credibility of the concern
- the likelihood of confirming the allegation from attributable sources.

3.4 Untrue Allegations

Where investigation reveals that the allegation had no substance, no action will be taken against the individual who made the allegation provided that the allegation had been made in good faith and in the reasonable belief that it was substantially true. However, disciplinary action may be taken where clear evidence of malice has been established or where an individual persists in a vexatious or otherwise unreasonable use of this policy and procedure.

4 Procedures for Making a Disclosure

Initial Step

4.1 The individual should make the disclosure to the Registrar, as Secretary to Council, who will inform the Vice-Chancellor and the Chairman of Council unless:

(i) requested not to do so by the discloser, or
(ii) if the Chairman of Council is likely to be involved at any subsequent appeal.

In cases involving financial malpractice or impropriety, the Registrar will act in close consultation with the Vice-Chancellor, as the Accounting Officer for the University’s public funding. If the disclosure is about the Registrar then the disclosure should be made to the Vice-Chancellor. If the individual does not wish to raise the matter with either the Registrar or the Vice-Chancellor, then he or she may raise it with the Chairman of the Audit Committee, if the issue falls within the purview of that Committee, or with the Chairman of Council.

Process

4.2 The Registrar will acknowledge receipt of the disclosure and will consider the information contained within the disclosure. He will determine whether prima facie the disclosure property falls for consideration within the terms of this policy and procedure or whether the matter should more appropriately be considered through other approved procedures. If the Registrar determines that the disclosure is a matter for consideration within this policy and procedure, he will decide on the form of investigation to be undertaken.

This may be:

- to investigate the matter internally
- to refer the matter to the police
- to call for an independent inquiry

In some cases, a matter disclosed might be dealt with by agreed action without the need for further investigation. In determining the above the Registrar shall take such advice or undertake such consultation as may be necessary.

4.3 The Registrar will, as soon as is reasonably practicable, inform the person making the disclosure what action, if any, is to be taken, and the envisaged timescale for consideration of the case. The procedure will be implemented as expeditiously as is reasonably practicable.

4.4 Where the matter is to be the subject of an internal inquiry, the Registrar will consider who should undertake the investigation and its terms of reference. Internal audit will normally be instructed to investigate disclosures relating to financial malpractice or impropriety. In other cases, the investigation will be carried out by a senior member of staff independent of the area in which malpractice or impropriety is alleged to have occurred. In all cases no one having any part to play in reaching a decision on any matter raised through disclosure will take any part in investigating matters contained in the disclosure. Investigations will be conducted as sensitively and speedily as possible.

4.5 If a disclosure is to be referred to the police, the University will co-operate fully with the police in the course of police enquiries, but will take no action itself pending completion of police enquiries and possible action.

4.6 If a disclosure is to be referred for independent enquiry, internal investigation, other than that undertaken as part of such enquiry, will normally be suspended, pending completion of such independent enquiry.

5 Feedback

5.1 If no action is to be taken, the Registrar will inform the person making the disclosure of the reason in writing. In such event, the person will have the opportunity to request the Chairman of Council (or the Chairman of the Audit Committee if the subject of the disclosure is financial malpractice or impropriety) to review the disclosure and the reasons given for not taking further action. The Chairman of Council (or of Audit Committee, as the case may be) will consider the matter and will either confirm the decision that no further action be taken, or determine what further action is to be taken and through what process.

5.2 Where a decision is made to conduct an internal investigation into a disclosure, the person against whom the disclosure is made shall be provided with a copy of the disclosure and any evidence supporting it, and shall have the opportunity to make a full response to the disclosure during the course of the investigation. No investigation shall be concluded or action taken without the person against whom the disclosure is made having had a copy of the disclosure and any evidence supporting it, and an opportunity to make a full response to the disclosure. In making such a response, a person against whom an allegation is made has the right to be accompanied by a trade union representative, or a Union Society Officer in the case of a student, or another member of the University not involved in the area of University activity to which the allegation relates.

5.3 In the event of a decision to call for an independent enquiry, the person against whom the allegation is made will be provided with a copy of the disclosure and any evidence supporting it.
5.4 In the event of a decision to refer the matter to the police, the provision of a copy of the disclosure and any evidence in support of it to the person against whom the allegation is made will be at the absolute discretion of the police.

6 Subsequent Action

6.1 Upon completion of an internal investigation, a written report will be made to the Registrar. The outcome of an internal investigation or an independent enquiry or referral to the police will determine whether further action should be taken and, if so, the nature of the action, which might include the invoking of other approved University procedures such as disciplinary, grievance or complaint and harassment procedures, or reference to an appropriate external authority.

7 Reporting of Outcomes

7.1 A report of all disclosures and any subsequent action will be made by the Registrar to the Chairman of Council and the Audit Committee. The Chairman of Council, the Chairman of Audit Committee, and the Registrar will have joint responsibility for maintaining and overseeing this policy and procedure and for making appropriate reports to Council.

This policy and procedure will be the subject of periodic review and, if necessary, revision in light of experience and in consequence of any further advice which may be issued in the higher education sector.

Student Disciplinary Procedures

1(a) Introduction

These procedures seek to ensure that student disciplinary matters are dealt with fairly and promptly at the appropriate level by those with clear authority from the University. The procedures apply to persons who are subject to the discipline of the University as prescribed in the General Regulations.

The purpose of the procedures is to regulate student behaviour in order to secure the proper working of the University in the broadest sense. As serious consequences may follow a finding of misconduct, it is necessary in every case for it to be shown that the conduct in question falls within the general definition before it may be characterised as misconduct.

(b) Definition of Misconduct

A breach of discipline is, for the purpose of these procedures, called an "act of misconduct", and this will include, but not be limited to, failure to observe all University rules and regulations including local regulations for the governance of Academic Schools, Academic Service Departments and University Residences. The essence of misconduct under this code is improper conduct or improper interference, in the broadest sense, with the proper functioning or activities of the University, or those who work or study in the University. It also includes conduct which otherwise damages the University.

(c) Scope

These procedures apply to student behaviour in the University, and this extends to all buildings and grounds belonging to the University, including University Residences, Sports Grounds, the University Farms and the University Research Vessel. The procedures shall also apply to acts of misconduct committed outside the University when a student is away in a University context, or when it is found that there is some link to the University or its reputation. Discipline of students within the Union Society building shall be the responsibility of officials of the Union Society nominated by the Society. The Union Society has an agreement with the University which identifies matters which it will report as a matter of course to the University and matters which it will report to the Police. The agreement is subject to annual review. Examination and other assessment irregularities are dealt with in accordance with the University "Procedure for Assessment Irregularities".

(d) Fitness for Professional Practice

As part of the function of the University, graduation from certain courses entitles a graduate to practise in a profession or to obtain professional status. In the case of students of Medicine and Dentistry, special procedures exist for the certification of fitness to practise, and students found to have committed a disciplinary offence put their future career at risk. The Academic Registrar or his nominee shall, in addition to applying the standard procedures, be entitled to refer disciplinary cases involving such students to the Faculty of Medical Sciences Fitness to Practice Committee. In all other cases, the Academic Registrar or his nominee shall, in addition to applying the standard procedures, be entitled to refer a disciplinary case to the relevant Head of School, to consider whether a student's future professional position has been compromised and, if so, what action if any should be taken to inform the professional body.

(e) Examples of Misconduct

The following paragraphs elaborate upon, but do not limit the breadth of, the general definition of misconduct in Paragraph 1(b). The following shall, subject to the above, constitute misconduct:

i) disruption of, or improper interference with, the academic, administrative, sporting, social or other activities of the University, including offensive behaviour, whether on University premises or elsewhere; (University Council has previously approved a policy for the immediate management of disruptive behaviour on University premises.)

ii) obstruction of, or improper interference with, the functions, duties or activities of any student, member of staff or other employee of the University or any authorised visitor to the University;

iii) behaviour which brings the University into disrepute;

iv) intentional or reckless damage to, or defacement of, University property or the property of members of the University community;

v) misuse or unauthorised use of University premises, facilities or items of property;

vi) failure to disclose name and other relevant details to an officer or employee of the University in circumstances when it is reasonable to require that such information be given;

vii) failure to comply with a previously-imposed penalty under these procedures;

viii) acts of dishonesty, including theft, fraud, deceit, or deception in relation to the University, its staff or students;

ix) action likely to cause injury or impair safety on University premises, e.g. acts involving damage to or discharge without just cause of, or other misuse of or interference with, a Fire Extinguisher or other Fire Safety Equipment. (Such acts endanger the University community and is likely to result in a severe sanction.)

x) harassment of any student, member of staff, or any authorised visitor to the University, whether
sexual, racial or bullying; (The University has a published Equal Opportunities Policy and Procedure for Making and Dealing with complaints of Harassment and Bullying.)

xi) violent, indecent, disorderly, threatening or offensive behaviour or language whilst on University premises or engaged in any University activity;

xii) breach of the provisions of the University’s Code of Practice for Freedom of Speech;

xiii) conduct which constitutes a criminal offence where that conduct
   i) takes place on University premises, or
   ii) affects or concerns other members of the University community, or
   iii) damages the good name of the University, or
   iv) itself constitutes misconduct within the terms of these procedures.

(For the avoidance of doubt, the University may proceed under Student Disciplinary Procedures notwithstanding the instigation of any criminal proceedings.)

2 Procedures: General

(a) The University shall have the right to investigate any allegation of misconduct against a student, and may take disciplinary action where it decides, on the balance of probabilities, that an act of misconduct has been committed.

Any investigation into an alleged act of misconduct, whether carried out under the central or local procedures, shall normally include in its early stages an interview of the student(s) concerned by the relevant authorised person in accordance with the provisions for the Conduct of Hearings set out in paragraph 7.

(b) Definition of Authorised Person

Under the Local Procedure, the following persons shall be deemed to be the authorised person for dealing with student discipline:

- In Academic Schools: The Head of the School in which the misconduct occurs, or a nominated deputy
- In Academic Service Departments: The Head of the relevant Academic Service Department, or a nominated deputy
- In University Residences: The relevant Warden or Housing Manager, or a nominated deputy

Under the Central Procedure, all references to the Academic Registrar shall be taken to include anyone nominated by the Academic Registrar to act on his behalf.

(c) Allegations of misconduct which fall into categories i - vi in paragraph 1 (e) may be dealt with by the Academic Registrar or another authorised person. Offences in categories vii - xiii in paragraph 1 (e) may only normally be dealt with by the Academic Registrar unless committed in a University residence, in which case the matter may be dealt with by an authorised person under the Disciplinary Procedures for University Residences (Appendix III), provided that the matter does not constitute a serious criminal offence. The Academic Registrar may, however, in any particular case of alleged misconduct that would normally fall within his own jurisdiction, determine that it should nevertheless be dealt with by another authorised person.

3 Local Procedure

(a) Where an allegation of misconduct is made known to an authorised person, the matter may be dealt with under the Local Procedure, in which case the authorised person may consult with the Academic Registrar at any stage in the enquiry. If the decision is made to deal with the matter under the Local Procedure, the authorised person shall, subject to sub-paragraph (b), determine the matter using the appropriate Local Procedure as set out in

- Appendix I - Disciplinary Procedures for Academic Schools;
- Appendix II - Disciplinary Procedures for Academic Service Departments;
- Appendix III - Disciplinary Procedures for University Residences.

(b) The authorised person may refer the matter to the Academic Registrar for determination under the Central Procedure where the authorised person is of the opinion that the available sanctions are an inappropriate response, given the nature and severity of the offence, or where the case involves a repetition of misconduct.

(c) Where an authorised person is satisfied that a student has committed an act of misconduct, one or more of the following sanctions may be imposed.

i) A warning, orally and in writing, advising the student about their future conduct.

ii) Where a student has previously received a warning, or where the authorised person deems fit, a final warning.

iii) A compensation payment for the direct cost of reparations to property.

iv) Confiscation without compensation of items prohibited by rules and regulations relating to Academic Schools and Academic Service Departments.

v) A fine, up to a limit from time to time agreed with the Academic Registrar.

vi) Suspension from the use of an Academic Service or from the use of specified facilities belonging to an Academic School. Where such power is exercised the Academic Registrar shall be informed as soon as is reasonably practicable. The decision shall be subject to written confirmation by the Academic Registrar where the period of suspension is in excess of one month, or two weeks in the case of the Computing Service.

vii) In the case of Halls of Residence or other University accommodation, an authorised person shall have the right to impose such further sanctions as are, from time to time, approved by Council. For the avoidance of doubt, discipline in all University accommodation shall, in the first instance, be considered under the University’s Student Disciplinary Procedures for University Residences.

4 Central Procedure

Acts of misconduct which fail to be considered by the Academic Registrar under paragraph 2 (c) of these procedures, and acts in relation to which a case is referred from an authorised person under paragraph 3(b) of the Local Procedure, shall be dealt with under the Central Procedure.

(a) Procedure A

Where the Academic Registrar so decides, he shall have the right to deal with an allegation of misconduct. Where the Academic Registrar is satisfied that an act of misconduct, one or more of the following sanctions may be imposed.

i) A warning, in writing, advising the student about future conduct. Where a student has previously received a warning, or where the Academic Registrar deems fit, the student may receive a final warning.

ii) A compensation payment for the direct cost of reparations to property.

iii) A fine.
(b) Procedure B
Where the Academic Registrar decides that a case is sufficiently serious, a Disciplinary Committee shall consider the case. Pending the hearing of an allegation of misconduct by a Disciplinary Committee the Academic Registrar may temporarily suspend a student from the University or from such facilities as the Academic Registrar shall determine. In such a case, the decision to suspend a student shall be reviewed by the Academic Registrar after every two week interval, and the Committee will hear the case, where reasonably practicable, within four weeks.
(For clarity, the Academic Registrar may suspend a student upon report of a serious allegation, pending further investigation.)

(c) A Disciplinary Committee shall comprise three members drawn from the staff members of the Disciplinary Panel from time to time appointed by Senate. A Disciplinary Convenor*, formally appointed from time to time by Senate, shall be responsible for appointing a Disciplinary Committee for each case and shall specify which of the three members shall act as Chair. The Academic Registrar shall provide such secretarial and administrative support as is reasonably necessary.

(d) The Academic Registrar shall not be a member of any Disciplinary Committee, but shall be responsible for the preparation and presentation of the charge or charges before the Committee. The Academic Registrar shall inform the student(s) concerned in writing of the allegations and shall inform the student(s) that the case is to be heard by a Disciplinary Committee. A member of administrative staff who has had no involvement in the case shall be appointed as secretary to the Committee and shall be responsible for sending the student(s) any relevant documents, the summoning of witnesses, and generally for the proper presentation of the case before the Committee.

(e) If the Committee is satisfied that the offence is not proven, they shall take no further action against the student. If the Committee is satisfied that the student committed the act of misconduct, one or more of the following sanctions may be imposed.

- A warning, orally and in writing, advising the student about their future conduct. Where a student has previously received a warning, or where the Committee deems fit, the student may receive a final warning.
- A compensation payment for the direct cost of reparations to property.
- A fine.
- Suspension from the University or such part or parts as may be specified.
- Expulsion from the University.

(f) A student expelled or suspended as a result of disciplinary proceedings shall have no right to a refund of fees.

5 Supplementary Provisions

(a) The money raised from all fines shall be credited to the Vice-Chancellor's Hardship Fund.

(b) Non-payment of compensation or fines levied under these procedures shall, for the purpose of General Regulation B 5, constitute a failure to fulfill a financial obligation to the University.

The full Student Disciplinary Procedure is available at www.ncl.ac.uk/spo Including:
- The Disciplinary Appeal Procedure
- Appendix I - Disciplinary Procedures for Academic Schools;
- Appendix II - Disciplinary Procedures for Academic Service Departments;
- Appendix III - Disciplinary Procedures for University Residences.

Student Complaints Procedure

Introduction
1. The Complaints Procedure described below should be followed in cases where a student wishes to make a complaint about a service or member(s) of staff or another student within the University where it has not been possible to resolve the problem with the service or individual(s) concerned.

2. Before having recourse to the Complaints Procedure, a student should attempt to resolve a problem with the individual(s) concerned or consult his/her tutor or supervisor or head of School for help and advice. Only when these steps have failed, or when the student has good cause for not pursuing these means of resolving the issue, should the Complaints Procedures be invoked.

3. The University has complementary policies about expectations in respect of dignity at work and study, racial equality and equality of opportunities (See www.ncl.ac.uk/inst/yr/policy/policies). Students wishing to make a complaint about actions which are contrary to these policies should do so by completing the student complaint form/procedure. They should also make it clear that their grievance relates to one of these specific policies.

Appeals resulting from Student Disciplinary Procedures are dealt with under separate arrangements.

There are also separate procedures for dealing with complaints relating to tenants, staff or service in University accommodation. The procedures are contained in the relevant information booklets supplied by the respective student residencies.

The Complaints Procedure shall not apply in cases in which an individual wishes to appeal against an academic decision; in such instances the applicant should follow the academic appeals procedure for Students. In order to avoid duplication of effort, the academic Registrar shall determine whether a complaint shall proceed if an appeal has also been made in connection with the same/similar matter as the complaint.

Students shall not be disadvantaged for lodging a complaint in good faith.

Procedure
4. The complainant shall complete the Student Complaint Form available from the Student Progress Section and submit it for the attention of the Head of the Student Progress Section.

Complaints received more than 6 months after the event in question will not normally be investigated.

5. The Head of the Student Progress Section or nominee (referred to subsequently as the Complaints Officer) shall acknowledge receipt of the Complaint within 7 days of the receipt of the completed Complaints form and shall invite the complainant to discuss the matter. The complainant may be accompanied by a friend or representative at this meeting and at any other meetings under this procedure. The friend or representative may make representations with the permission of the Complaints Officer. No action may be taken in the case of
complaints made anonymously.

6. Subject to the written consent of the complainant, the following provisions apply:
   a) The Complaints Officer will determine whether the complaint merits detailed investigation or whether there are avenues which have not yet been explored and with which the Complaints Officer or another colleague could assist;
   b) If it is decided that the complaint does merit investigation, the Complaints Officer will investigate it, consulting initially the relevant Head of School, senior tutor or equivalent colleague, but also seeking information as necessary from anyone else likely to be helpful in resolving the matter;
   c) Once all necessary information has been gathered, the Complaints Officer shall decide whether it is possible to try to resolve the matter between the parties concerned;
   d) If it is not possible to resolve the matter as in (c) above, or if the issues raised are particularly serious, the Head of the Student Progress Section shall refer the matter to the Pro-Vice-Chancellor who will Chair a Complaint Panel. The Complaint Panel shall be supported by a Complaints Officer. The Chair may co-opt further independent members of academic or administrative staff as deemed appropriate. If a complaint hearing is convened (paragraph e), the Welfare Officer or another independent officer of the Student Union shall also be a member of the Panel. The Chair and members of the Complaint Panel shall have no previous involvement in or close connection to the case. The Complaint Panel will investigate the complaint and may seek any such information as appears to be necessary to reach a decision. A record shall be maintained of the proceedings.
   e) Exceptionally, and where deemed appropriate by the Chair, the Complaint Panel may invite the complainant, and any other relevant parties, to a hearing. Any persons invited to attend a hearing by the Complaint Panel may be accompanied by a friend or representative, who may make representations with the permission of the Chair. The Complaint Officer will provide the appellant, as soon as is reasonably practicable, with relevant case papers in accordance with the requirements of the Data Protection Act 1998, together with written advice about the general nature of hearings. The conduct of the hearing shall, unless otherwise provided in this procedure, be for the Chair of the Complaint Panel to decide.
   f) Appropriate action shall be taken in the light of the outcome of the investigation. The action will be intended to resolve the matter but may include the initiation of formal disciplinary action against a member of staff or a student under the University's disciplinary procedures;
   g) On the completion of the investigation, which shall be conducted as soon as reasonably practicable, the Complaints Officer shall notify the complainant in writing as soon as possible of the outcome and of any consequential action to be taken.

7. If the complainant refuses to consent to the matter being investigated, no further action shall be taken, but the Student Progress Section shall keep a confidential record of the details of the complaint. In such cases:
   a) in the absence of an investigation, the University will not be able to act on the complaint;
   b) the record of the complaint shall be labelled: "In accordance with the wishes of the complainant, this complaint has not been investigated but will remain on a confidential file within the Student Progress Section for a period of twelve months as detailed in Section 7c of the Student Complaints Procedure" c) a complainant may withdraw the refusal to consent by notice in writing to the Head of the Student Progress Section within 3 months of the date of receipt of the complaint. This time limit may not be extended.

8. If the Head of the Student Progress Section considers the complaint vexatious or frivolous, the complainant shall be advised that the complaint is dismissed as unfounded. Students shall not be disadvantaged for lodging a complaint in good faith. However, if a complaint is found to be malicious, the complainant may be subject to the University's disciplinary procedure.

9. Appeals
A complainant may seek a review of the outcome of their complaint only on the ground of procedural irregularity on the part of the Complaints Officer or Complaint Panel.

A complainant wishing to lodge an appeal about the outcome of a complaint which has been investigated shall do so in writing, addressing the appeal to the Academic Registrar within 14 days of notification of the outcome of the investigation. The Academic Registrar may dismiss an application which does not provide a prima facie case on the specified ground.

If the Academic Registrar, having reviewed the original complaint file and sought any evidence as appears to be necessary to reach a decision, considers there to be grounds for the appeal, he may make appropriate arrangements to have the complaint reconsidered. Any further action which may be possible will be decided by the Academic Registrar and will be final. There will be no further opportunities for appeal within the University.

There is no further appeal within the University. Provision for independent external review is made through the existence of the 'Visitor' to the University. The Visitor's role is to review the application by the University of its own internal procedures. Further information about the Visitor's role and how to contact the Visitor may be obtained from the Student Progress Section, Academic Office, 6 Kensington Terrace (or by email at student-progress@ncl.ac.uk).

10. Monitoring
The Head of the Student Progress Section shall make an annual report to University Teaching and Learning Committee of all complaints she and her staff have investigated, including:
   • The number of complaints made, and upheld or rejected
   • The nature of the matters raised and any remedial action recommended and taken
   • The ethnic origin and gender of the complainants for equal opportunities monitoring.

Confidentiality
All information which a complainant, or anyone else, provides to the Student Progress Section, to the Pro-Vice-Chancellor, or to other officers dealing with the matter in the course of an investigation of a complaint, shall be treated as confidential, subject to the need to divulge information to investigate a case and any requirements of the Data Protection Act. It is equally important that the complainant also respects the need for confidentiality throughout the complaints process.

Further Information
Further advice and guidance can be obtained from the Student Progress Section, Academic Registrar's Office, 6 Kensington Terrace or from the Student Advice Centre in the Union Society.

A copy of the complaint form is included at the end of this section.

The web source for the procedure and form is: www.ncl.ac.uk/spo
Withdrawal from the University

Occasionally students decide for a variety of reasons that they wish to withdraw from the University. If at any stage you begin to have doubts about continuing with your studies, you are advised to discuss the matter with your supervisor as soon as possible as it may be the case that something you perceive as a problem can be overcome. If you do decide to withdraw, you should inform your sponsor, your supervisor and the relevant graduate school. If you are liable for tuition fees or for any or all of the tuition fee contribution, you should contact the Finance Department to find out how much you owe to the University or whether any refund is due to you. Even if you withdraw before the first instalment of a tuition fee contribution is due, you may still be liable to pay a certain amount to the University (see also Payment of Tuition Fees in Part One of this Handbook).

If you are in University managed accommodation, you must also notify the Accommodation Office of your withdrawal. You will remain responsible for the rent charges for the full termly billing period. You will only be released from this is the room is re-let to another student who is not already committed to University accommodation.

Policy for Intellectual Property and Research Studentships

Introduction

The University has become concerned that heads of school and supervisors may not be fully aware of the pitfalls that can accompany our attempts to protect and commercialize Intellectual Property (IP) arising from work carried out during an MPhil or PhD programme, or during an undergraduate research project or during a working visit by a member of staff from another institution. Where supervisors believe that a project involving a student or an academic visitor is likely to generate potentially commercializable IP, they should note carefully the position outlined below.

Intellectual Property generated by members of staff in the University is automatically vested in the University provided that it relates to work that the member of staff would normally be expected to carry out as part of their day-to-day activities. However, undergraduate and research postgraduate students and academic visitors are not members of staff, and there may be considerable variation in the nature and source of their funding. This is a complex situation. This note explains the IPR position of different types of studentships. It details where positive action is taken by Research and Innovation Services (RIS) to protect IP and identifies where schools need themselves to take specific action.

Where a student or a visitor is joining a large research effort with considerable and possibly highly commercializable IP, supervisors must ensure that the IP position is reviewed immediately with the student, that the student is aware of the position with regard to IP, that he or she understands the problems that will arise for the University should the IP associated with a project be disclosed prematurely, and that the IP generated in the course of the grant is properly vested in the University in exchange for an undertaking to treat the student as if he or she were a member of academic staff with regard to intellectual property. A corollary of this is that where the student has clearly been responsible for “inventive” steps in the prosecution of his or her research, and that research has led to a patent being filed by the University, the student’s name shall appear on the patent.

Case Students and Commercially Funded Studentships

For students on CASE awards, or awards that are funded in whole or part by Industry, RIS will issue a standard letter to the student, a copy of which can be seen on the Web. In this letter it is made clear that the IP generated by the student during his or her research will be owned by the University and that in this regard the student will be treated as if the student were a member of the academic staff. RIS will normally negotiate the ownership and exploitation conditions of any IP arising from the work with the company before the research project begins. It is very much in the interests of supervisors to ensure that such an agreement is in place; failure to do so may have very serious consequences at a later date.

Studentships Supported from Charitable Foundations

For students on charitable foundation grants, the situation is more variable: with some charities, such as the Cancer Research Campaign, the University has a framework agreement; many other charities impose conditions on IP and its exploitation as part of their standard conditions of grant, and supervisors are strongly advised to consult RIS to establish the situation in each case. Where such agreements exist, or where conditions attached to the grant vest the IP with the charity or with a third party acting on behalf of the charity, the supervisor should liaise with RIS to ensure that the student receives and signs an appropriate assignment letter. Where no agreement is in place, and/or the charity makes no disposition of IP arising from its grants, the difficulties are similar to those described in the next section.

Research Council Earmarked and Quota Studentships

For students funded by the Research Councils alone, the precise situation will depend on the nature of the award. Many awards are made as 'earmarked' studentships i.e. the studentship is part of a larger grant, the conditions of such grants normally vest the exploitation of the IP generated with the University, and supervisors should seek the advice of RIS over the assignment of the student's IP to the University, using a standard letter available on the website. Students on this type of grant will for the purposes of intellectual property be treated as if they were members of staff. For students funded by normal Research Council Quota studentships, the responsibility for exploitation of any IP arising from the studentship is vested with the University, but IP arising during the studentship remains, in principle, the property of the student unless explicit steps are taken. It is of the highest importance that supervisors and heads of school recognize this fact.

Self-funded Students

A more complex situation arises where students are self-funded. Under these circumstances, students are free agents, and no assumption can be made that IP generated during the course of the research project will vest solely with the University. Where the creative step can clearly be traced to the supervisor, and documentary proof of this can be produced, then there is no problem, but real-life situations are usually far from being so clear-cut, with both the supervisor and the student likely to claim some of the credit. The University does not believe that it would be feasible to introduce a general condition into the PhD regulations automatically vesting IP derived from a PhD or
Studentships which can be obtained from RIS and is also Research Services Guidance Note No 11 Research general guidance about studentships is available in steps needed will have to be undertaken by RIS. Further signed original must be deposited with RIS, since any legal The student should be given one copy and the other accessed from the RIS website. Two copies of each letter Practicalities potentially very costly. reasonable way in which the University can deal with a the University with regard to safety, and reflects the most University's staff, with all IP generated. Where this is the case, the visiting academic member of staff must agree to be bound by those conditions, and this agreement should be in writing. As is the case with studentships a more complex situation arises where the visitor is either self-funded, or funded by an agency with which we have no agreement. The position outlined above also applies in this case, with the added risk that the reports often required by such agencies may lead inadvertently to premature disclosure. This is a particular problem where, as is often the case, the visitor joins a research group which may seek to protect IP accumulated over some time, and which could be jeopardized either by disclosure or even by disagreement as to the author of the decisive inventive step. Where a visitor joins a group actively engaged in research likely to lead to commercializable intellectual property, the group leader must seek to rationalize the IP position with the visitor before work starts. In particular, the visitor must agree in writing to be treated during his/her stay, as a member of the University's staff, with all IP generated during the stay vested with the University in return for agreement that his or her interests will be protected in the same way as for University staff. This requirement is already imposed by the University with regard to safety, and reflects the most reasonable way in which the University can deal with a situation that otherwise would become both complex and potentially very costly.

Practicalities
Schools should use the standard letter which can be accessed from the RIS website. Two copies of each letter should be signed both by the supervisor and the student. The student should be given one copy and the other signed original must be deposited with RIS, since any legal steps needed will have to be undertaken by RIS. Further general guidance about studentships is available in Research Services Guidance Note No 11 Research Studentships which can be obtained from RIS and is also available on the website. See www.ncl.ac.uk/ris

Policy and Procedure for Investigating Allegations of Research Misconduct (for staff)

General Policy
1.1 The University expects all staff who engage in research to observe the highest standards of integrity at all times. The Nolan Committee on Standards in Public Life identified seven principles that have relevance to best practice in the conduct of research. These are: selflessness, integrity, objectivity, accountability, openness, honesty and leadership. Together these principles provide a foundation for personal integrity that should be reflected in the professional conduct of research by every individual who contributes to research at the University.

1.2 All researchers should be familiar with, and conduct their research in accordance with the University's Code of Good Practice in Research. Research misconduct is least likely to arise in an environment where good open research practice is encouraged and where there is effective supervision at all levels. Heads of school and directors of research institutes are responsible for establishing and communicating the standards, protocol and ethics for research relevant to their area, to all
academic and research staff, and for ensuring adherence to these standards.

1.3 Allegations of research misconduct are fortunately rare, but the University takes any allegation very seriously and will ensure that all allegations are investigated in accordance with the policy and procedures set out in this document. The University is also committed to protecting its researchers from malicious accusations and will take action against any individual(s) responsible for such allegations.

1.4 This policy complements the University's policy on Public Interest Disclosure ('Whistle Blowing policy'). Allegations of research misconduct made under Public Interest Disclosure will be referred by the Registrar, or, in his absence the Director of Business Development, to the Pro-Vice-Chancellor (Research) (PVC(R)), or if more appropriate to another senior officer following consultation with the Vice-Chancellor or, in his absence, the Deputy-Vice-Chancellor, and investigated in accordance with the policy and procedure set out in this document.

Scope

2.1 This document applies to all employees, honorary or visiting researchers and fellows conducting research within or on behalf of the University at the time the misconduct is alleged to have occurred. Where allegations of misconduct are made by an individual or organization external to the university such an individual or organization will be informed of the University's policy and procedures and of the University's expectations with regard to compliance.

2.2 In this document the masculine gender includes the feminine gender and singular nouns and verbs include the plural and vice versa.

General Principles

3.1 Key definitions are presented in Annex 1.

3.2 All University employees or individuals working within the University have a responsibility to both the University and to the wider research community to report observed, suspected or apparent research misconduct as set out in these documents.

3.3 An individual reporting apparent misconduct has a responsibility to do so in good faith, to maintain confidentiality and to cooperate with any subsequent assessment or investigation.

3.4 The PVC(R) will, to the maximum extent possible, respect the privacy of those who in good faith report apparent misconduct and will make diligent efforts to protect their positions and reputations.

3.5 The PVC(R) will be supported in this procedure by a member of the Human Resources team, who will be responsible for ensuring that both the complainant and the respondent are kept fully informed of progress.

Preliminary Action (Stage 1)

4.1 Any member of the University who believes that an act of research misconduct has occurred or is occurring should report the allegation (with all relevant background) to the relevant Head of school or director of research institute. If an individual is unsure whether a suspected action constitutes research misconduct, he may discuss this informally with the head or director. If the head or director believes that the circumstances described do not meet the definition of research misconduct, he will advise the individual and if necessary take other appropriate action to address any specific issues. If the head or Director decides that the circumstances described meet the definition of research misconduct then he will request that the individual submits a formal allegation in writing to the Provost of the Faculty referencing this procedure.

4.2 If the individual is not satisfied with the response from the head of school or institute director or if, for any reason, the individual does not feel it appropriate to raise the matter initially with the head or director he may instead discuss the allegation direct with the research dean for the faculty. If the research dean believes that the circumstances described do not meet the definition of research misconduct, he will advise the individual and if necessary take other appropriate action to address any specific issues. If the research dean decides that the circumstances described meet the definition of research misconduct then he will request that the individual submit a formal allegation in writing to the Provost of the faculty referencing this procedure.

4.3 A complaint from a source external to the University will be referred direct to the Provost of the faculty concerned to carry out a preliminary assessment as described in the following paragraphs.

4.4 The Provost, assisted where appropriate by the head or director and the research dean, will review the allegation and will inform the individual against whom the allegation is made of the substance of the allegation and give him an opportunity to respond. If he is not satisfied with the response or believes that the reputations of any of the parties (including the University) will remain in jeopardy if the matter is not subject to independent assessment, he will proceed to the next stage of the procedure. As part of this preliminary action the Provost will also identify any funding source(s) for the research which is the subject of the complaint and identify whether there are any external parties such as collaborators who may be affected and notify this information to the PVC(R).

4.5 At this stage, all possible steps will be taken to protect the anonymity of the complainant and respondent until such time as a formal investigation is warranted under stage 3.

4.6 If the Provost decides that an assessment is warranted he will ask the head or director to arrange for all relevant research records and materials (including computers and computer discs) to be secured.

4.7 If the Provost decides that an assessment is not warranted, he will record his justification for that decision and inform the complainant and respondent of this outcome. This record must be copied to the PVC(R).

4.8 If the Provost has an interest in the matter this preliminary action will be carried out under the direction of the Provost of another faculty appointed by the PVC(R).

Initial Assessment (Stage 2)

5.1 Purpose

The purpose of the assessment is to determine whether there is prima facie evidence of research misconduct, not to reach a final conclusion as to whether misconduct occurred or who was responsible.

5.2 Notification Requirements

If the Provost decides that an assessment is warranted he will notify both the respondent and complainant in writing, and remind them of their obligation to co-operate in the assessment and to observe the confidentiality requirements. He will also inform the PVC(R) of the proposed action.

If the PVC(R) has a conflict of interest in the matter, the Vice-Chancellor or, in his absence, the Deputy-Vice-Chancellor, will appoint an alternative senior member of the University to fulfil the role of the PVC(R) set out in this procedure.

5.3 Appointment of Assessment Committee

The PVC(R) will appoint an assessment committee of three individuals (which should not include himself) with no conflicts of interest in the case and who have the appropriate expertise to evaluate the technical or academic issues. Normally at least one member of the committee will be appointed from a school or research institute outside the faculty concerned. The committee shall be chaired by a member of the committee external to the faculty concerned appointed by the PVC(R).
5.4 Assessment Committee Terms of Reference and Procedure

The assessment committee should specifically limit its scope to that of evaluating the facts only to determine whether there is sufficient evidence of research misconduct to warrant an investigation.

Assessment will normally involve the committee in interviewing the complainant, the respondent (who may be accompanied by a friend, who may be a trade union representative, a work colleague, or other appropriate person), and key witnesses, including, if appropriate, external expert witnesses, and examining the relevant research records and materials. The Respondent may submit evidence to the committee.

The Assessment Committee should keep proper records of their proceedings. A written report should be prepared which states what evidence was reviewed, summarizes relevant interviews and includes a conclusion as to whether an investigation is warranted.

5.5 Time Limit for Completing Assessment Report

The assessment committee will complete the assessment and submit its report within 30 working days starting from the date the committee was set up. Where circumstances clearly warrant a longer period, the PVC(R) may approve an extension of this time limit.

5.6 Decision by PVC(R)

After receiving both the report and the written comments of the respondent, if any are made, the PVC(R) shall determine whether to conduct a formal investigation, conclude the matter or take some other appropriate form of action. The PVC(R) shall inform the Vice-Chancellor of his/her decision, and shall send him a copy of the assessment report, and any comments submitted by the respondent, within five working days of receiving the report.

The PVC(R) will inform both the complainant and the respondent of his decision in writing.

5.7 Investigation (Stage 3)

6.1 Purpose

The purpose of the formal investigation is to examine and evaluate all relevant facts to determine whether research misconduct has occurred and if so, the responsible person and the seriousness of the misconduct.

6.2 Notification Requirements

If the PVC(R) decides that a formal investigation will be conducted, he will notify both the respondent and the complainant in writing and remind them that they are expected to co-operate in the investigation. Failure to do so may render themselves open to disciplinary action by the University against them.

The PVC(R) shall, where required to do so under the terms of any funding conditions, notify any bodies that provide funding related to the research of the individual concerned, that an investigation is to take place. Similarly the PVC(R) shall also notify any other body related to the research concerned in the event that the University is contractually obliged to notify that body at this stage in the investigation.

6.3 Appointment of Investigation Committee

The PVC(R) will appoint an investigation committee consisting of at least three persons (which should not include himself), and a member of the Human Resources directorate. None of the investigation committee shall have served on the assessment committee or have been previously involved with the case. Normally at least one member of the committee will be appointed from a school or research institute outside the faculty concerned.

The committee shall be chaired by a member of the committee external to the faculty concerned appointed by the PVC(R). Membership may include appointees external to the University if no qualified or competent members can be appointed from within the University. Members of the investigation committee must not have any conflicts of interest with the respondent or complainant or the case in question, and they must have the necessary expertise to examine the evidence, interview the witnesses and conduct the investigation. The investigation committee will keep written records and the committee will be provided with secretariat support by the Registrar.

The PVC(R) will notify the respondent of the proposed constitution of the investigation committee. If the respondent submits a written objection to any of the persons appointed to the investigation committee, the PVC(R) may replace the challenged person with a qualified substitute. If the PVC(R) does not replace the challenged person, the reasons for the objection and its over-ruuling should be part of the investigation report. Not more than two challenges to the constitution of the investigation committee may be made by the respondent.

6.4 Investigation Process

The investigation will be initiated within 30 working days of the completion of the assessment if findings from that assessment provide sufficient basis for conducting an investigation.

The investigation will include examination of all documentation including relevant research data materials, proposals, publications, correspondence, memoranda, and notes of telephone calls, and any other documents deemed by the committee to be pertinent to the investigation. The investigation committee may call upon witnesses to be cross-examined and invite expert witnesses to comment and be cross-examined. The respondent will have the opportunity to be interviewed and may be accompanied at interview by a friend such as a trade union representative, a work colleague or other appropriate individual. The respondent or his friend may submit evidence to the committee and/or cross-examine witnesses. Wherever possible interviews should be conducted of all individuals involved in making the allegations, and other individuals who might have information regarding key aspects of the allegations. A verbatim record of these interviews should be prepared by the committee secretariat to ensure factual accuracy, and included as part of the investigation report.

6.5 Time Limit for Completing Investigation Report

An investigation should normally be completed within 60 working days of the appointment of the investigation committee. This includes conducting the investigation, preparing the report of findings, making the report available for comment by the respondent and submitting the report to the PVC(R). An extension in this time may be approved by the PVC(R) where it is impracticable for the full process of the Investigation to be carried out within this time-frame.

6.6 Investigation Report Contents

The final investigation report must state how the investigation was conducted, describe how and from whom the information was obtained relevant to the investigation, state the findings and explain the basis for the findings. It must also include the full verbatim reports of the interviews. The report must state explicitly whether in
the view of the investigation committee research misconduct has occurred.

6.7 Comments by the Respondent
The PVC(R) shall provide to the respondent a copy of the report and evidence considered by the investigation committee and offer the respondent an opportunity to comment on the report. Comments by the respondent must be submitted to the PVC(R) within 20 working days of receipt of the report and shall be attached as an addendum.

7 Outcome and Subsequent Actions (Sanctions/Disciplinary procedures)
The PVC(R) shall pass the investigation report together with comments if any, from the respondent, to the Vice-Chancellor or whoever is authorized under the University Statutes and Ordinances concerning staff discipline, to determine what action should be taken in accordance with the University's disciplinary procedures as set out in the Statutes. If it is decided that a formal disciplinary panel should be set up, the report of the investigation committee will form part of the evidence to be considered by the disciplinary panel.

If there is a finding of research misconduct at the conclusion of any disciplinary process, or if the respondent admits any research misconduct, the University may convey the findings to appropriate bodies. These may include the General Medical Council, or other professional body, any relevant grant-awarding body or any other public body with an interest, the editors of any journal which have published articles by the person against whom the allegation has been upheld, or any other body which in the opinion of the University is likely to be affected by the research misconduct in question. All such disclosure must be limited to misconduct upheld in relation to research relevant to such bodies or published by such journals. Where an appeal is lodged this fact will also be conveyed to the bodies concerned, as will the outcome of the appeal.

8 Restoration of Reputations
If the allegations are not upheld and especially in the event that the University becomes aware that the allegations have become public, the University will take all reasonable steps to restore the reputations of persons alleged to have engaged in misconduct. This will include taking appropriate steps to inform all parties previously notified of the alleged misconduct, of the outcome of the disciplinary procedure and to publish a notice stating the outcome of the investigation where so requested to by the respondent.

9 Appeal by the Complainant against a decision not to pursue the allegation.
If the complainant is not satisfied with any decision reached during this procedure, he may have recourse to the University’s Policy and Procedure on Public Interest Disclosures.

10 Malicious Accusations
Where the outcome of a preliminary action, assessment or investigation indicates that an allegation has not been made in good faith, the University may decide to pursue disciplinary action against the complainant where he is employed by the University, and appropriate civil action through the courts against an external complainant.

11 Maintenance of Records
Records of assessments or investigations will be maintained for not less than seven years after the termination of the investigation. Where required to do so the University may make these records available to external organisations.

Annex 1 - Definitions
Allegation means a written statement setting out the grounds on which the complainant believes misconduct has taken place.

Assessment means information gathering and initial fact-finding to determine whether an allegation or apparent instance of research misconduct warrants an investigation.

Complainant means a person who makes an allegation of research misconduct.

Conflict of Interest means the real or apparent interference of one person’s interest with another, where potential bias may occur due to prior or existing personal or professional relationships.

Good Faith Allegation means an allegation of research misconduct made by a complainant who honestly believes that research misconduct may have occurred. A complainant who recklessly disregards evidence that disproves an allegation has not made an allegation in good faith.

Investigation means the formal examination of all relevant facts to determine if misconduct has occurred, and if so, the responsible person and the seriousness of the misconduct.

Preliminary Action means the immediate evaluation by the PVC(R) of an allegation of research misconduct to determine whether the allegation falls within the scope of the definition of misconduct and whether there is sufficient evidence to warrant an assessment.

Respondent means the person against whom an allegation of research misconduct is directed, or the person who is the subject of the inquiry or investigation. There can be more than one respondent in any inquiry or investigation.

Research misconduct or Misconduct means fabrication, falsification, plagiarism or other practices that seriously deviate from those commonly accepted within the research community for proposing, conducting or reporting research. It does not include honest error or honest differences in interpretations or judgments of data.

Copyright Licence Agreement
This institution has a Licence with the Copyright Licensing Agency Limited to enable students and members of staff to copy extracts, within clearly defined limits (set out below) from books, journals and periodicals published in the United Kingdom, Australia, Canada (including Quebec), Denmark, Finland, France, Germany, Greece, Iceland, The Netherlands, New Zealand, Norway, Republic of Ireland, South Africa, Spain, Sweden, Switzerland and by some publishers in the United States of America*

What the Licence covers
The Licence permits the copying of extracts (whether the pages copied consist of text or graphics or are a combination of text and graphics) from most books, journals and periodicals published in the UK (and in the other Mandating Territories shown above), with the specific exception of those belonging to one of the categories of material defined in the next section.

The basic permission to photocopy extends to the copying (from paper to paper) of:

• up to 5 per cent or one complete chapter (whichever is the greater) from a book;
• up to 5 per cent or one whole article (whichever is the greater) from a single issue of a journal;
• up to 5 per cent or one paper (whichever is the greater) from a set of conference proceedings;
• up to 5 per cent of an anthology of short stories or poems
or one short story or one poem of not more than 10 pages (whichever is the greater);
• up to 5 per cent or one single case (whichever is the greater) from a published report of judicial proceedings.

**What the Licence does not cover**

The following Excluded Material is outside the scope of this Licence Agreement:
♦ printed music (including the words)
♦ bibles, liturgical works, orders of service
♦ maps, charts, or books of tables
♦ newspapers
♦ public examination papers
♦ industrial house journals
♦ workbooks, work cards and assignments
♦ 'copying not allowed under the CLA licence' titles
♦ private documents (fee-based tuition)
♦ works included on the Excluded Works list
♦ works published by non-participating US publishers
♦ works published outside Mandating Territories

For more information contact the University’s Copyright Licensing Co-ordinator – Robin.King@ncl.ac.uk
CONFIDENTIAL

STUDENT COMPLAINT FORM

Please note: the information provided on this form will be treated as confidential and will not be passed to anyone outside the Student Progress Section without your consent. It is very important that you read the notes attached before completing the form. This form should not be used for Academic Appeals.

___________________________________________________________________________

1. Your Details

Name ............................................................. Student Number ..............................................
School ........................................................................................................................................
Year of Study .......... Name of Tutor/Supervisor .................................................................
Address (see Guidance note 1). ......................................................................................................
Tel:........................................ Email............................................................................................

2. Complaint

Does your complaint relate to: The Policy on Dignity at Work and Study ☐
(See note 2b)
The Race Equality Policy ☐
The Equal Opportunities Policy ☐
None of the above policies ☐

Please describe the grounds for your complaint. It would be helpful if you would include the names of all people involved where known. (Please continue on a separate sheet if necessary)

Have you taken up your complaint with the person(s) involved? YES/NO*
Have you raised the matter with your Head of School? YES/NO*

If your answer to either of the above questions is 'no', please explain why and explain with whom within the University, if anyone, you have raised the matter (see Guidance note 2e).

Do you consent to the Student Progress Section investigating your complaint with the individual(s) concerned and all other parties likely to be helpful in providing a solution? YES/NO*

What is the purpose of your complaint – i.e.: for what outcome are you hoping?

Signature .................................................................................................. Date ......................

* Delete as applicable (PTO).
STUDENT COMPLAINT FORM
GUIDANCE NOTES

Note 1 – Your details

The University is concerned that any complaints which cannot be resolved with the individual(s) concerned or with the help of the relevant Head of School are investigated carefully. Students who submit a completed Complaint Form are invited to discuss the matter with a member of staff in the Student Progress Section to help clarify the position. If you are able to provide a telephone number and/or your e-mail address, it will make it easier for the Student Progress Section to contact you. If you do not supply a telephone number or e-mail address, you will be contacted by letter.

No action will be taken in the case of complaints made anonymously.

Note 2 – Does this procedure apply to you?

a) This form is designed for use by any student who wishes to make a formal complaint about a service or member(s) of staff or a student within the University where it has not been possible to resolve the problem with the service or individual(s) concerned.

b) The University has complementary policies about expectations in respect of dignity at work and study, racial equality and equality of opportunities (See www.ncl.ac.uk/internal/hr/policy/policies). Students wishing to make a complaint about actions which are contrary to these policies should do so by completing the student complaint form/procedure. They should also make it clear that their grievance relates to one of these specific policies. Students should follow the Dignity at Work and Study Code of Practice until the formal stage, at which point the Student Complaints Procedure will be invoked.

c) Information booklets are produced by student residences (for complaints relating to University accommodation). Local procedures detailed in these documents should initially be followed before making a formal complaint under this Student Complaints procedure.

d) In order to avoid duplication of effort, the Academic Registrar shall determine whether a complaint shall proceed if an appeal has also been made in connection with the same/similar matter as the complaint.

e) It is expected that you will have attempted to resolve the matter about which you wish to complain by raising it with the individual(s) concerned or that you have consulted your tutor or supervisor, Head of School or other member of staff to assist you. If you have not done so, you are asked to consider doing so before completing this form.

f) If you decide that you do need to complete this form, you may find it helpful to read ‘Newcastle University and You’ if you are an undergraduate student or ‘Postgraduate Newcastle’ if you are a postgraduate student. These Student Charter documents explain what level of service you can expect from the University and, in turn, what is expected from you. Both documents are accessible from the following website: www.ncl.ac.uk/spo

g) You should note that it is important to lodge a complaint as soon as possible after the event in question, as delays are likely to make it more difficult to investigate and resolve them. Complaints received more than 6 months after the event(s) in question will not normally be investigated.

h) This procedure relates to registered students of the University. The Procedure may also be followed by students who have left the University within the last 6 months.

Note 3 – Your consent

If the Student Progress Section is to pursue your complaint, it will need to take the matter up with all those concerned and it can only do this with your consent. Even if you indicate that you do not wish the matter to be taken further, however, you are encouraged to take up the invitation to speak to someone in the Student Progress Section.

WHAT HAPPENS NEXT?

As explained in Note 1 above, once you have made a formal complaint by completing this form, the Student Progress Section will acknowledge receipt of your form within 7 working days and will invite you to discuss the matter further. If you agree to the matter being investigated, the Student Progress Section will proceed as quickly as possible. It should, be recognised that it may take some considerable time to gather and consider all the necessary information, but the Student Progress Section will endeavour to complete its investigation within 6 weeks of the receipt of the Complaints Form. As far as possible you will be kept informed of progress and at the outcome of the investigation you will be notified in writing of the result.

Send this form, with full details and evidence relating to your complaint, to:

The Student Progress Section,
Academic Office
University of Newcastle upon Tyne
6 Kensington terrace
