Policy Statement and Supplementary Guidance for Student Pregnancy, Maternity, Paternity, Adoption and Student Parents

This policy and guidance was originally approved by ULTSEC 28th May 2014. This policy was revised and approved by ULSTEC on 2nd May 2018 & previously on 1st June 2016.

Introduction

The Equality Act 2010 places a duty on the University to promote equality for the following protected characteristics: pregnancy and maternity; age; disability; gender reassignment; marriage and civil partnership; race; religion or belief; sex; sexual orientation.

This document provides advice and guidance to:

- Students who are pregnant at any stage during their studies, to their partners, and to those who have recently become parents (e.g. through adoption) on issues related to study, health and safety, and finance.
- University staff who may have a role in advising students coming to them with these issues.

Scope of the Policy and Guidance

The Policy and Guidance covers any student who becomes pregnant during their studies, and students who are about to become parents. This includes any student who is the partner (including same sex partner) of someone who is pregnant and expects to be responsible for the child, and any student becoming a parent (e.g. through adoption) of a child.

The principles of this Policy Statement and supplementary guidance apply to all students regardless of the location of study, including those students studying at approved campuses. Any local arrangements at approved campuses should follow the principles of this policy as closely as possible, taking into account the local context.

On a case by case basis some staff roles may vary from those detailed below.

Policy Statement

Newcastle University is committed to promoting equality in all its activities and aims to provide a work, learning, research and teaching environment free from discrimination and unfair treatment. The University actively seeks to develop best practice in discharging its legal responsibility.

The University believes that becoming pregnant or caring for a child should not, in itself, prevent any student from succeeding in their studies. The University is committed to showing as much flexibility as possible to facilitate students’ success, making sure no student is disadvantaged whilst ensuring academic standards are not compromised. The degree of flexibility that can be offered will vary between disciplines, but all academic units will follow the general approach set out in this document.

The health and safety of a pregnant student will be of paramount importance at all times, and academic units will deal with all students covered by this policy in a sensitive, non-judgemental and confidential manner. Only members of staff who need to be informed for valid reasons will be informed of a student’s circumstances and this will normally be done with the student’s prior consent.
Supplementary Guidance

1. Rights and Responsibilities - students who are pregnant during their studies

1.1 Confirming the Pregnancy

A student who suspects they are pregnant should see their GP to have the pregnancy confirmed as soon as possible. If they decide to terminate the pregnancy, or miscarry, this need not be disclosed to the University. Absence from the University required as a result should be classed as ‘sickness absence’. If the student requires a medical certificate to cover the absence any medical evidence will be handled in strict confidence by the University.

Students may approach the Student Health and Wellbeing Service if they need personal support in adjusting to their change in circumstances. Additionally the Students’ Union Student Advice Centre can provide support in outlining pregnancy options and financial support.

If a student plans to continue with their pregnancy and feels that they may need some adjustments to their studies the student should inform their academic unit as soon as possible. The University can only make provision for the student once it is aware of the pregnancy. Whilst the Tutor or Supervisor would normally be the first point of contact, the student can initially choose to speak to another member of staff with whom they feel most comfortable. However, students should note that the Tutor or Supervisor will normally need to be informed in due course. The student must be advised of the key contact if this is other than the Tutor or main Supervisor.

A student is not under any obligation to inform the University, however, it is not possible to provide support or adjustments to a student if the University is unaware of the situation.

1.2 Implications for Study – leave of absence

The key contact from the academic unit will meet with the student to discuss how the pregnancy is likely to impact on study. A checklist is provided in Appendix C to aid this discussion.) Where there are particular implications for study or any special arrangements, a written summary should be made of the requirements. The student should receive a copy of this, as should other appropriate member(s) of staff requiring this information. The student’s permission should be established before passing on information.

There may need to be a leave of absence depending on when the baby is due, and the student together with the Tutor, Supervisor or key contact will decide (1) whether an interruption is needed and (2) if so, the duration of the interruption. This decision also needs to take into account the academic requirements of the student’s programme. A student with a baby due near the examination period might require confirmation from their GP that they are fit to sit exams. Time off might also be needed for medical appointments. Adjustments are normally arranged in line with normal procedures – see below.

Subject to arrangements for the programme, especially taught programmes with structured semester dates, by right students are entitled to a period of up to 52 weeks Maternity Leave. The student is expected to notify their academic unit of the pregnancy no later than 15 weeks before the baby is due if they intend to take Maternity Leave.

Research students should provide a copy of the medical certificate MATB1, issued by their midwife, confirming the date the baby is due. The earliest that a research student can plan to take maternity leave is 11 weeks before the baby is due. However the maternity leave automatically begins if
the student is unable to continue with study due to a pregnancy related illness within the 4-week period before the baby is due or if the baby arrives prior to the planned start of the Maternity Leave.

It is a legal requirement that students should not return to study within 2 weeks of giving birth for health and safety reasons (4 weeks if there is placement in a factory). If students wish to return to their studies before the planned return date previously agreed they should contact their Tutor or Supervisor or key contact as soon as possible and at least 2 weeks before the new return date. It may be appropriate for the student and Tutor, Supervisor or key contact to plan an appropriate timetable for re-integration into the programme of study, including the examination schedule, where appropriate.

The period of maternity leave cannot be broken by other types of absences. If students become ill during the maternity period, the absence is treated as part of the maternity leave up to the end of that maternity leave period.

The academic unit must ensure that on return to study, the student is correctly registered.

1.3 Implications for Study – health and safety

There may be health and safety measures needing to be put in place in order to protect the student and their unborn baby, and this will be particularly relevant in certain disciplines (e.g. where the student might be exposed to harmful chemicals or radiation, or be expected to lift heavy objects or undertake fieldwork or other strenuous activity). Therefore, once the student has informed the academic unit of the pregnancy, a Risk Assessment will be completed by the academic unit – normally by the relevant local Health and Safety Officer who will consult the Occupational Health and Safety Service (OHSS) if required. This will identify any risks that may be present which could harm the student and/or baby, and detail steps that need to be put in place to alleviate or minimise these risks. It should also detail any risks that may arise from any placement period or fieldwork due to be undertaken. The risk assessment should be reviewed at agreed periods during the pregnancy and may include the return to study period if the student is breastfeeding.

Any student who has given birth must not return to University within two weeks of giving birth as indicated in 1.2 above.

The risk assessment may include a requirement for the student to consult a health care provider (e.g. GP, midwife). Occupational Health advice is also available for research students.

1.4 Implications for Study – programme activities

If the student continues to study during the pregnancy, regular meetings should be held with the Tutor or Supervisor or other key contact, to assess the effectiveness of any special arrangements put in place. Where necessary, further adjustments can be considered.

Where the student plans to take part in field work, pregnancy should be risk assessed by the academic unit responsible for organising the field work. There may be particular risks associated with the field work and the student should discuss this fully with the appropriate member of staff. Students will not normally be permitted to take part in field work after the 7th month of pregnancy.

Where the student plans to take part in a study year abroad or a placements, pregnancy should be risk assessed by the academic unit responsible for organising the placement. If the student becomes pregnant whilst on a study year abroad or a placement, the student is encouraged to inform the academic unit to ensure that appropriate plans are in place to safeguard the student’s health and properly manage academic progress. If the host organisation cannot offer adequate support for the student the academic unit may need to discuss termination of the placement with
the student.

University insurance, if it applies in the context of a student working and studying overseas as part of their course, does not cover foreseen situations such as a planned birth and related health care. It may be therefore appropriate for the student or the key contact to seek advice on the University's insurance terms (www.ncl.ac.uk/internal/finance/insurance/) Students may need to purchase additional private health care insurance for any overseas work or study.

1.5 Other implications - funding

The University provides advice to students on funding sources and may be able to advise on implications for some funding on becoming a parent. Please refer to Student Services - Financial Support Team. Advice may also be obtained from the Student Advice Centre.

The benefit rules are different for EU students and international students, and further advice should be sought from the Student Advice Centre or the Department for Work and Pensions. The support opportunities from finance providers, such as Student Finance England (SFE) should also be reviewed.

In the event of a leave of absence being agreed, undergraduate students should note that funding will usually stop when the leave of absence begins, normally the student may however apply for discretionary funding from SFE or equivalent organisation. The University will automatically inform the Student Loan Company and relevant national UK fee providers. Normally there is no tuition fee due to the University during a leave of absence.

The University refund policy covers refunds of tuition fees for self-funded or privately sponsored students who take a leave of absence. Students should contact Student Services - Tuition Fees Team for further information.

Where a University studentship has been awarded to a student this is normally suspended during any leave of absence but will normally remain available upon the student’s return to study.

The University has limited hardship funding that may be available for students. Please refer to Student Services - the Student Health and Wellbeing Service.

1.6 Other implications – international student visas to study in the UK

International students with financial sponsors must contact their sponsors and agree a plan of action (such as deferring study/ when to resume study etc.). Those international students who are not entitled to any maternity benefits in the UK may prefer to return home for the duration of their pregnancy. It should be remembered that airlines may not carry passengers who are 7 months pregnant or more, and this should be taken into account when planning. (Please consult airline policies).

Where an international student requires a leave of absence for more than one month (including any sequential periods of absence) the University is obliged to report the absence to the Home Office. Depending on the circumstances, leave to remain in the UK may be curtailed. Students should consult Student Services - Visa Team on specific implications for their visa.

1.7 Other implications - accommodation

Pregnant students living in University accommodation may find that this is no longer suitable, for health and safety reasons. In addition, their tenancy agreement may be for single occupancy only. The due date and student plans may influence accommodation options. Pregnant students are encouraged to discuss their circumstances with Student Services - Accommodation Team as soon
as possible. If required, support will be offered in finding suitable accommodation options for the
student’s individual circumstances. The University has a small number of flats suitable for family
accommodation, although there is generally a waiting list for these. For more information,
students should contact Student Services – Accommodation Team - who can also provide advice to
students about finding non-University owned family accommodation.

2. Rights and Responsibilities – Student Parents

2.1 Support for partners who have responsibility for bringing up the child

Any student discovering they are about to become a parent or who expect to be responsible
for raising a child, will be entitled to request time out of study. This is likely to include time off for
medical appointments prior to, and after, the birth, as well as a period of maternity support
leave immediately following the birth. A student in this situation should contact their Tutor or
Supervisor to discuss this. Flexibility will be shown where possible although this will necessarily
be more limited in some programmes/disciplines than others. It should be noted that the Tutor
or Supervisor will need to be informed, even if discussions involve a different staff member.

Up to two weeks paternity leave may be taken at any time during a partner’s pregnancy or within
three months following the birth. This will be additional to the normal annual leave entitlement.
For research students there will normally be no change to the student’s funding end date or
submission deadline.

Adjustments are normally arranged in line with normal procedures – see below.

2.2 Students about to become parents (e.g. through adoption)

Students about to become parents (e.g. through adoption or because their partner is about to
give birth) should inform their Tutor or Supervisor to discuss their circumstances as soon as possible.
It should be noted that the Tutor or Supervisor will need to be informed, even if discussions
involve a different staff member. Flexibility will be shown where possible although this will
necessarily be more limited in some programmes/disciplines than others.

The main carer of an adopted child is entitled to a period of up to 52 weeks Adoption Leave.
Aspects of maternity leave (see section 1 above) apply - i.e. funding, the need for planning the leave
of absence and a reintegration to study.

Arrangements can also be made to allow time out of study for the parent who is not the main carer.
Maternity Support / Adoption Leave (other than for the main carer) is normally for a maximum of
10 days. Within this limit, the period of time off may vary depending on the age of the child, the
programme of study being undertaken, and the point in the academic session at which the event
takes place. Leave can be taken during a partner’s pregnancy or within three months following the
birth/adoption. This leave is in effect additional annual leave. For research students there will be no
change to the student’s funding end date or submission deadline. Adjustments are normally arranged
in line with normal procedures – see below.

2.3 Postgraduate Research students

Postgraduate Research students receiving funding from external bodies should follow the
guidance for their particular scheme, or contact their funding body or sponsor for further advice.

Employer, Visa or Funder terms and conditions overrule University Policy. By accepting a Studentship
or Visa, the student is agreeing to the specific terms and conditions of the funder, employer or Home
Office, which may differ from the entitlements noted above.
RCUK and certain other funders provide maternity pay only if the student is in receipt of a full
studentship. However, other funders may only support unpaid leave (e.g. University Scholarships).
Postgraduate Research students funded by RCUK may have additional entitlements to maternity
support leave or paid paternity / adoption leave. Further guidance is provided in Appendix A.

3. **Babies/Children on Campus**

Students may be accompanied by children in general public areas such as the Courtyard, or in one-
to-one tutorials if the tutor permits. Children brought onto the campus are the responsibility of
the adult who brings them and must be supervised at all times. From a Health and Safety
perspective, the University environment is not, in general, designed for, nor does it take specific
account of, the needs of young children and toddlers; therefore close and continuous supervision
by the parent / carer will be required at all times. Under no circumstances should children be
brought into areas where there is the possibility of a risk to health and safety (notable examples would
include laboratories and workshops) unless specific approval has been given by an authorised
member of the relevant academic unit. The University cannot be held responsible for what
might happen to an unattended child on University property.

Students should not normally bring their child with them into any public teaching and research
areas – such as lecture theatres, seminar or teaching rooms, laboratories or shared work spaces –
and so they will need to make arrangements for the care of their child whilst they are in these
locations. Student parents must ensure they have suitable childcare arrangements in place at times
when they are expected to be at University.

Children are welcome in the Library for short visits when accompanying parents/guardians (for
example if the return of books or the collection of reserved items). Children should be accompanied
at all times when in the Library.

The University provides baby change facilities on the Newcastle campus in the following locations:

- Student Services, level 2, King’s Gate
- Newcastle University Students’ Union – basement and level 2.
- The Robinson Library.

Additional baby change facilities will be developed as buildings are refurbished. For an updated list
see [www.ncl.ac.uk/students/wellbeing/about/studentparents.htm](http://www.ncl.ac.uk/students/wellbeing/about/studentparents.htm)

Nursing mothers should be aware that there are no specific facilities for expressing milk on campus
and that alternative arrangements should be made. Students can approach their academic unit to
enquire about booking a suitable room for expressing milk and access to a refrigerator to
store expressed milk. The academic unit should undertake a risk assessment and the
University’s assumption is that the academic unit will provide reasonable access to private space
and a refrigerator for this purpose unless there is good reason to the contrary.

4. **Complaints**

Any student who feels that the University has failed to meet the standards identified in this policy and
guidance may raise a complaint under the University’s Student Complaints and Resolution Procedure:
[https://www.ncl.ac.uk/students/progress/Regulations/Procedures/complaints.htm](https://www.ncl.ac.uk/students/progress/Regulations/Procedures/complaints.htm). It is suggested that
problems are resolved as informally as possible in the first instance. The Student Advice Centre
can provide impartial, confidential advice to students in this situation (contact details at the end of this
document).
5. **Guidance for Staff**

This section provides guidance on the support of students coming under the scope of this policy, for use by any member of staff with a role in advising or supporting students. At all times, staff must ensure those students are not treated less favourably than any other student on the basis of their circumstances. In line with the University’s legal obligations, flexibility should be shown where possible to ensure continued learning is facilitated. Information given by students should be treated confidentially and with sensitivity. Staff should not attempt to influence any student’s decision but should provide impartial advice.

When a student contacts a member of staff to discuss any circumstances covered by this policy, a response should be made within five working days and a meeting arranged as soon as possible thereafter. If the member of staff being contacted by the student is not the student’s Tutor or Supervisor, the Tutor or Supervisor should nonetheless be kept informed subject to permission from the student.

### 5.1 Adjustments

Whilst it is recognised that each request must be dealt with on an individual basis, there are a number of measures that can be used in order to enable the student’s continuation of study. These include:

- Allowing a leave of absence from study (for a pre-determined amount of time) for the birth, or adoption, and a period of time thereafter.
- Prior to and after the birth, or adoption, giving permission for periods of absence for medical appointments, and making arrangements for the student to catch up on missed classes.
- Showing a degree of flexibility regarding assignment deadlines if the student’s circumstances make it difficult for them to be met.
- Allowing resit examinations to be counted as first attempts where the pregnancy or birth or adoption prevents the student from taking them at the usual first attempt.
- Consideration of any requests to transfer to part-time study, where this is possible (although the student should bear in mind the implications of this course of action). Staff should refer the student for advice if appropriate.
- Offering support to help the student re-integrate to their studies after any period of prolonged absence.
- Exam adjustments such as being able to sit near the exit/rest breaks etc

**Adjustments should be administered via normal University procedures:**

Key procedures include:
- Personal Extenuating Circumstances,
- Student Notice of Absence procedure,
- Change of Circumstance procedures – taught programmes,
- Change of Circumstance procedures – research programmes.

It is important to take the views and wishes of the student into account, rather than applying a standard set of arrangements. All decisions taken should be based on discussion with or input from the student.

Whilst an appropriate degree of flexibility should be exercised, care must be taken to ensure that academic standards are not compromised. A balance must be achieved between ensuring the student is not disadvantaged, and giving undue special treatment. It is not necessary for the University to grant every request made, although efforts should be made to meet reasonable requests. Requests should not be refused solely on the basis of being too costly to implement, although this will necessarily be considered when assessing the overall ‘reasonableness’ of a request. If any request is refused, the reasons for the refusal should be provided in writing for the student.
Where specific arrangements are required to be put in place for a student who is already granted additional arrangements (e.g. on the grounds of disability), these should be kept separate in order that it remains clear which arrangements relate to which particular circumstance. This ensures that these arrangements are in place for the required amount of time and also clarifies adherence to the different pieces of legislation.

For staff requiring more detailed guidance on specific requests for adjustments to the programme, advice can be sought on any of the above from the Student Progress Service or relevant Deans.
Appendix A – Additional Guidance for Postgraduate Research Students

Although the entitlement is 2 weeks, absences of up to 4 weeks for Paternity, Maternity Support or Adoption leave may be approved by the main Supervisor. These absences must be reported to the Academic Unit in line with the unit’s absence reporting procedures.

Absences greater than 4 weeks for Maternity or Adoption or Maternity Support or extended paternity leave must be reported to the Research Student Support Team (HASS and SAgE) or Graduate School (FMS). An interruption of studies must be arranged by completing an Interruption application form, which should be accompanied by documentary medical evidence of maternity (for the pregnant student or partner) or evidence of adoption.
(details available at: https://www.ncl.ac.uk/students/progress/student-resources/PGR/changecircs/InteruptStudies.htm)

Submission Deadlines

For absences of up to 4 weeks for Paternity, Maternity Support or Adoption leave there will be no adjustment to the student’s submission deadline as no formal interruption has been approved as this leave is in effect additional annual leave.

For absences greater than 4 weeks for Maternity or Maternity Support leave, where a formal interruption of studies is approved, the student’s submission deadline will be adjusted in line with the amount of leave taken. If the student is in receipt of funding (e.g. RCUK studentship), the funding end date will also be adjusted in line with the funder’s terms and conditions.

Funding

Not all funders provide financial support to cover maternity/adoption leave, or multiple periods of maternity/adoption leave. Research Councils in the UK (RCUK) and certain other funders provide maternity pay only if the student is in receipt of a full studentship. However, other funders may only support unpaid leave.

Students in receipt of an RCUK studentship awarded by the University receiving a full maintenance stipend, should refer to the additional policy and procedure below.

i. All students are entitled to 52 weeks of maternity or shared parental leave.

ii. All students will be entitled to continue to receive full stipend support at the standard rate during the first 26 week period of maternity leave or shared parental leave.

iii. The following 13 weeks should be paid at a level commensurate with employee entitlements to statutory maternity pay (approximately 41% of the minimum doctoral stipend).

iv. The final 13 weeks are unpaid.

v. The studentship will be held in abeyance during the period of the maternity leave. Studentships and postgraduate studies should not normally be held in abeyance for more than 12 months.

vi. Partners funded through an RCUK studentship are entitled to up to 10 days paid Ordinary
Paternity Leave on full stipend.

vii. Partners funded through an RCUK studentship may be entitled to up to 50 weeks of Shared Parental Leave; this may include paid and unpaid leave depending on individual circumstances, any paid leave should be at full stipend.

viii. There is no qualifying period for maternity, paternity, adoption or shared parental leave.

ix. Students must notify the Research Student Support Team (HASS and SAgE) or Graduate School (FMS) if they are not able to return to study by the end of their maternity leave. Students who do not return to complete their studies following a period of maternity leave will be required to repay the stipend they have received during their maternity leave.

x. The above information is consistent with RCUK Terms and Conditions of Research Council Training Grants April 2018 (available at https://www.ukri.org/funding/information-for-award-holders/grant-terms-and-conditions/)

Acknowledgment: Aspects of this policy are developed from an equivalent policy at the University of Glasgow.

Appendix C – Checklist for Staff when discussing the needs of pregnant students

The following is an aid to guide discussions with a pregnant student. It is good practice for any special agreements and action points to be documented – the member of staff will normally ensure that an appropriate record is taken and shared with the student and other key parties.

- This University Policy and Guidance.
- Has the student updated contact information on S3P (including emergency contact details)
- Sources of advice within the University - personal support, financial advice, accommodation advice, visa advice.
- Due Date.
- Potential maternity leave period / Leave of absence period.
- Implications for the student’s programme - e.g. assessment schedule, placements, field trips, repeat study requirements.
- Do others need to be consulted on these matters?
- During pregnancy, programme activities that require risk assessment (e.g. field trips, lab or practical activities, lone working, travelling).
- Who will complete the risk assessment(s) and who will advise of the requirement(s).
- Implications (e.g. medical appointments) for attendance and remedial options.
- Implications for assessment or submission deadlines.
- Funding implications and sources of advice.
- Implications for visa.
- Adjustments that the student thinks will be needed to continue to study effectively during the pregnancy.
- Adjustments that the student thinks will be needed upon return to study following the pregnancy.
- University mechanisms for requesting adjustments.
- Permission to discuss the student’s case with other named staff.
